MOBILITY

The C4 Cyber Response Vehicle (CRV) is a fully-equipped computer technology forensics and communications mobile center that can serve as a self-sufficient emergency command post. It has the ability to access external computer networks and can also link between on-board computers and servers through an internal network. A 7KW gasoline powered generator provides an independent power source if required. The CRV is located in the Sacramento area, but is available to be deployed very quickly in an emergency and can be anywhere in the state within hours.

The CRV can be utilized in situations where rapid collection of digital evidence is essential for the successful investigation of crime. Oftentimes, there are multiple pieces of evidence located on various mobile devices that cannot be gathered via traditional methods in a timely manner. The CRV allows C4 to arrive on scene and immediately begin gathering evidence from critical devices such as cell phones and tablets.

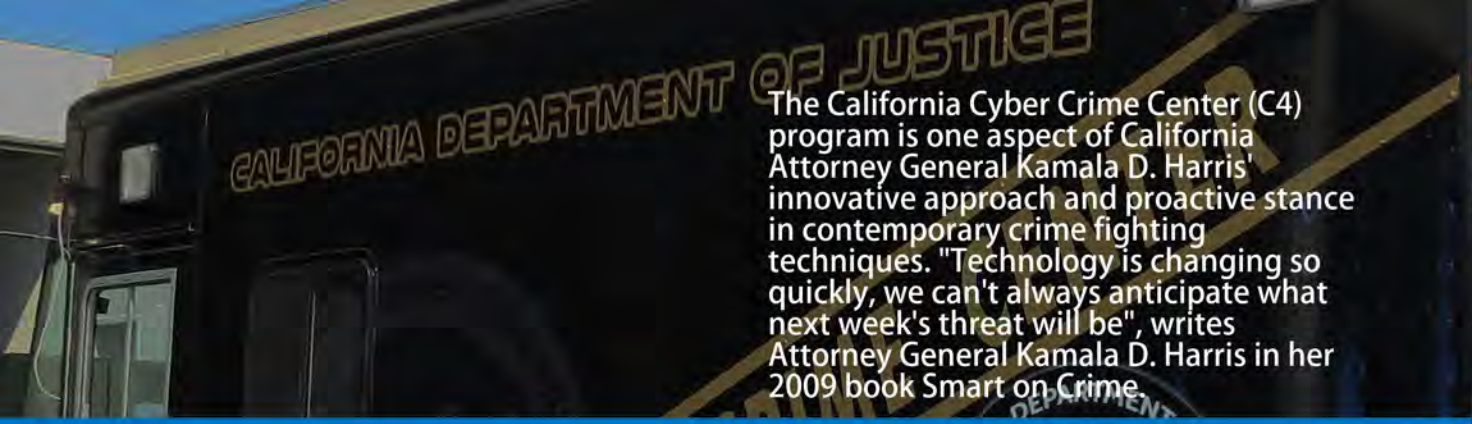
CALIFORNIA CYBER CRIME CENTER

Cyber crime solutions for a digital era



The California Cyber Crime Center (C4) program is one aspect of California Attorney General Kamala D. Harris' innovative approach and proactive stance in contemporary crime fighting techniques. "Technology is changing so quickly, we can't always anticipate what next week's threat will be", writes Attorney General Kamala D. Harris in her 2009 book Smart on Crime.

"Technology is changing so quickly, we can't always anticipate what next week's threat will be"

- Attorney General Kamala D. Harris

86% *of Californians currently use the internet* [1]

80% *of cyber crimes are driven by organized crime rings in which data and tools are widely shared* [2]

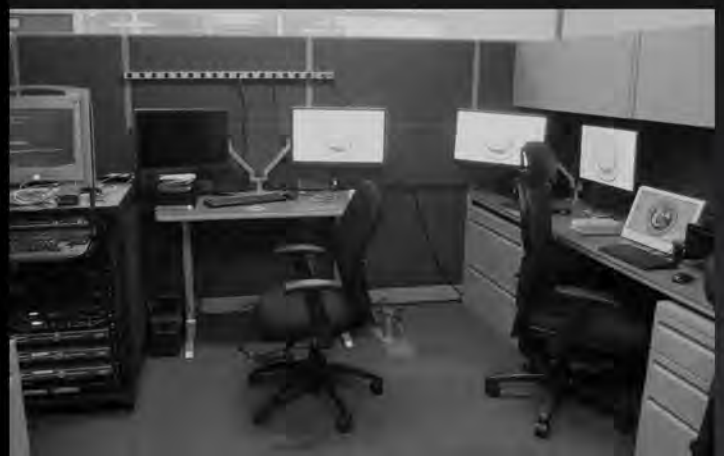
270k *number of complaints to IC3 in 2014* [3]

SERVICES INCLUDE:

- Digital forensics (e.g. cell phones, social media, etc.)
- Investigation and prosecution of cyber crimes
- Technical assistance for cyber crime investigation and prosecution
- Technical assistance for network security
- Digital evidence, legal services, and investigations training

CUTTING EDGE

C4 is an integral part of DOJ's digital crime fighting portfolio. C4 places highly trained information technology specialists and computer scientists alongside law enforcement and prosecutors to assist in solving today's complex crimes that involve digital technology and electronic communications systems.



More Information

C4 unifies California Department of Justice's resources to investigate and prosecute cyber crime, enhance digital evidence capabilities, and promote innovation.

C4 supports DOJ internally as well as local and state law enforcement agency partners throughout the cyber crime lifecycle by providing services, technical assistance, and training related to cyber crime, digital evidence, and digital forensics.

C4 also advances DOJ's internal capabilities to utilize digital evidence for investigations and litigation.
