Introduction

This technical report supplements *Racial and Identity Profiling Advisory Board: Annual Report 2020.* It is a consolidation of analyses based on the completed records submitted to the California Department of Justice related to stop data collected from, July 1, 2018 through December 31, 2018. The information collected under RIPA includes data on peace officer perceptions of the demographics of stopped individuals. The purpose of collecting information on officer perceptions is to attempt to systematically document and analyze stops and searches to determine whether disparities occur depending on race or identity. The perceived demographic information collected includes a number of characteristics such as race or ethnicity, gender, age, disability status, English fluency, and LGBT identity. Unless otherwise noted, the demographic information in this report is based on officers' perceptions and may not reflect actual demographic statistics. The following table, details the information officers must report in each submission record.

Information Regarding Stop
1. **Date, Time, and Duration**
2. **Location**
3. **Reason for Stop**
4. **Was Stop in Response to Call for Service?**
5. **Actions Taken During Stop**
6. **Contraband or Evidence Discovered**
7. **Property Seized**
8. **Result of Stop**

Information Regarding Officer's Perception of Person Stopped
1. **Perceived Race or Ethnicity**
2. **Perceived Age**
3. **Perceived Gender**
4. **Perceived to be LGBT**
5. **Limited or No English Fluency**
6. **Perceived or Known Disability**

Information Regarding Officer
1. **Officer's Identification Number**
2. **Years of Experience**
3. **Type of Assignment**

Section 1: Aggregate Wave 1 Agency Data

Subsection 1: 2018 Record Submission Status as of April 1, 2019

Record Submission Status	Number of Stopped Individuals	Percent of Stopped Individuals
Completed/Successful Submission	1,800,054	98.8%
Incomplete/Unsuccessful Submission	21,163	1.2%
In Progress	96	0.5%
Submitted with Errors/Incomplete	20,660	97.6%
Deleted	305	1.4%
Ready for Submission	102	0.5%
Total	**1,821,217**	**100%**

Note. All other tables in this document utilize data only from Completed/Successful Submission records. "In Progress" (DOJ Web App only) indicates the record has been partially recorded but has not been completed. "Submitted with Errors/Incomplete" indicates that the record was submitted to the DOJ with one or more data validation errors (SFTP and Web Services only). "Deleted" indicates a record was deleted for one of the following reasons: 1) Stop record created in error; 2) Stop record captured by another officer; 3) Stop record not required by regulations; 4) Data was submitted in error; 5) Other (requires a narrative explanation). "Ready for Submission" (DOJ Web App only) status indicates that all of the data elements have been entered but the stop record has not been submitted to DOJ.

Subsection 2: Race and Ethnicity Tables

Table 2.1 *Number of Individuals Stopped by Race/Ethnicity*

Race/Ethnicity	Count	%
Asian	99,447	5.5%
Black/African American	271,188	15.1%
Hispanic/Latino	716,029	39.8%
Middle Eastern/South Asian	79,917	4.4%
Multiracial	21,239	1.2%
Native American	3,885	0.2%
Pacific Islander	10,584	0.6%
White	597,765	33.2%
Total	**1,800,054**	**100.0%**

Note. Percentages were calculated based off the total number of individuals stopped (N = 1,800,054).

Table 2.2 *Stop Circumstance by Race/Ethnicity*

Race/Ethnicity	Officer Initiated		Calls for Service	
	Count	%	Count	%
Asian	96,734	97.3%	2,713	2.7%
Black/African American	251,291	92.7%	19,897	7.3%
Hispanic/Latino	686,017	95.8%	30,012	4.2%

Note. Percentages per identity group are calculated based off the total number of individuals stopped per identity group. Percentages in the "Total" row are based off the total number of individuals stopped (*N* = 1,800,054). * Represents categories only applicable to stops of students. Categories that had zero occurrences for a given reason for stop have a dash (-) instead of a percentage. Categories with 0.0% are rounded down from values of less than 0.1%.

Table 2.3.2 *Traffic Violation Types by Race/Ethnicity*

Race/Ethnicity	Moving	Equipment	Non-moving	**Identity Group Total**
Asian	73.1%	8.8%	18.1%	**93,039**

Total	**65.8%**	**14.6%**	**19.7%**	**1,525,855**

Note. Frequencies are based off total number of individuals stopped for a traffic violation (N = 1,525,855[1]) per identity group (Identity Group Total" column).

[1] While 1,525,853 individuals were stopped for traffic violations, due to a system error 1,525,855 (i.e. two more) individuals had a response for traffic violation type and are reported in the data.

Note. Percentages per identity group are calculated based off the total number of individuals stopped per identity group ("Identity Group Total" column). Percentages in the "Officer Assignment Type Total" row are based off the total number of individuals stopped for each assignment type (See "Identity Group Total" column). * Represents categories only applicable to stops of students. Categories that had zero occurrences for a given reason for stop have a dash (-) instead of a percentage. Categories with 0.0% are rounded down from values of less than 0.1%. The officer assignment type category "Other" includes the following officer assignment types: 1) Compliance Check, 2) Special Events, 3) Roadblock or DUI Sobriety Checkpoint, 4) Task Force, 5) Investigative and 6) Other.

Note. Percentages per identity group are calculated based off the total number of individuals stopped per identity group per officer assignment type (see 2.10). Percentages in the "Total" column are based off the total number of individuals stopped per identity group. * Represents categories only applicable to stops of students. Categories that had zero occurrences for a given reason for stop have a dash (-) instead of a percentage. Categories with 0.0% are rounded down from values of less than 0.1%. The officer assignment type category "Other" includes the following officer assignment types: 1) Compliance Check, 2) Special Events, 3) Roadblock or DUI Sobriety Checkpoint, 4) Task Force, 5) Investigative and 6) Other.

Notes: To provide a more accurate representation of the 2017 ACS data for comparison, we weighted the overall distribution of each race/ethnicity in the dataset by the relative contribution of each Wave 1 agency in our stop data. Frequency weights for sheriff's departments were given according to the population estimates from their respective counties while police departments were weighted according to their respective cities. An exception had to be made for the city of San Diego which was compared to the county since the ACS did not include information for this city in 2017. We also made an exception for California Highway Patrol, whose jurisdiction is statewide; their frequency weight applied to California population estimates.

Negative estimates indicate decreased propensity for stopped persons to be the associated group of color in darkness. Positive estimates indicate increased propensity for stopped persons to be the associated group of color in the darkness. Please see below for full model specifications.

Note. As another way to attempt to measure the impact darkness may have on stop frequency by race, we selected two control hours where lighting conditions were constant before and after daylight savings (DS), which occurred on 11/4/2018. We used 4 to 5 PM as the light control hour and 8 to 9 PM as the dark control hour. We also defined a treatment hour (6 to 7 PM) where all respective stops took place in the light prior to DS and in the dark after DS. These scores, thus, could represent the difference in stop frequency change due to DS in our treatment hour from the difference due to DS in each control hour. Negative values indicate that relative to the control hour, DS decreased the frequency of stops in the treatment hour. Positive values indicate that relative to the control hour, DS increased the frequency of stops in the treatment hour.

Note. Relative frequencies are relative by identity group and by column header. A yield rate refers to the proportion of searched individuals who officers found to be in possession of contraband or evidence. We define lower discretion searches as searches where officers provided one or more of the following reasons as the basis for conducting the search: incident to arrest, vehicle inventory, or search warrants. We define higher discretion searches as searches where the only listed search basis was “consent given.” A "yield" is when an officer discovers contraband or evidence in the possession of an individual who the officer searched.

Note. Relative frequencies are relative by identity group and by column header. This table represents overall yield rates; see table 2.15.1 for definition of yield rates. * indicates fields included in the lower-discretion category for the officer discretion level variable in the search yield rate analyses. ** indicates the field included in the higher-discretion category for the officer discretion level variable in the search yield rate analyses.

Note. - Terry Searches include those justified as a protective search (pat search) for weapons based on reasonable belief that the person is dangerous or carrying a weapon. RIPA regulations do not include a data element that directly corresponds to a Terry Search, but does include officer safety and suspected weapon as possible search bases. Thus, an alternate “higher” discretion scheme is provided that includes searches based on consent, officer safety, or suspected weapon while excluding all other potential search bases.

Percentages in the "Officer Assignment Type Total" row are based off the total number of individuals stopped for each assignment type (See "Identity Group Total" column). * Represents categories only applicable to stops of students. Categories that had zero occurrences for a given reason for stop have a dash (-) instead of a percentage. Categories with 0.0% are rounded down from values of less than 0.1%. The officer assignment type category "Other" includes the following officer assignment types: 1) Compliance Check, 2) Special Events, 3) Roadblock or DUI Sobriety Checkpoint, 4) Task Force, 5) Investigative and 6) Other.

Percentages in the "Total" column are based off the total number of individuals stopped per identity group. * Represents categories only applicable to stops of students. Categories that had zero occurrences for a given reason for stop have a dash (-) instead of a percentage. Categories with 0.0% are rounded down from values of less than 0.1%. Table 3.13.1 *Yield rates by Gender*

Gender	Overall	Lower Discretion	Higher Discretion
Female	6,087 (22.6 %)	3,434 (22.6 %)	374 (14.3 %)
Gender Nonconforming	32 (26.7 %)	17 (27.0 %)	2 (28.6 %)
Male	33,367 (22.1 %)	14,284 (26.0 %)	2,191 (11.4 %)

Total	**39,676 (22.2 %)**	**17,840 (25.3 %)**	**2,578 (11.7 %)**

Note. Relative frequencies are relative by identity group and by column header. A yield rate refers to the proportion of searched individuals who officers found to be in possession of contraband or evidence. We define lower discretion searches as searches where officers provided one or more of the following reasons as the basis for conducting the search: incident to arrest, vehicle inventory, or search warrants. We define higher discretion searches as searches where the only listed search basis was “consent given.” A “yield" is when an officer discovers contraband or evidence in the possession of an individual who the officer searched.

Officer Assignment Type Total		**1,682,084**	**32,841**	**7,725**	**1,711**	**75,693**	**1,800,054**	

Note. Percentages per identity group are calculated based off the total number of individuals stopped per identity group per officer assignment type (see Table 4.10). Percentages in the "Total" column are based off the total number of individuals stopped per identity group. * Represents categories only applicable to stops of students. Categories that had zero occurrences for a given reason for stop have a dash (-) instead of a percentage. Categories with 0.0% are rounded down from values of less than 0.1%. The officer assignment type category "Other" includes the following officer assignment types: 1) Compliance Check, 2) Special Events, 3) Roadblock or DUI Sobriety Checkpoint, 4) Task Force, 5) Investigative and 6) Other.

Table 4.13.1 *Yield rates by LGBT*

LGBT	Overall	Lower Discretion	Higher Discretion
Non-LGBT	39,166 (22.2 %)	17,546 (25.3 %)	2,553 (11.7 %)
LGBT	510 (20.5 %)	294 (21.3 %)	25 (13.3 %)
Total	**39,676 (22.2 %)**	**17,840 (25.3 %)**	**2,578 (11.7 %)**

Note. Relative frequencies are relative by identity group and by column header. A yield rate refers to the proportion of searched individuals who officers found to be in possession of contraband or evidence. We define lower discretion searches as searches where officers provided one or more of the following reasons as the basis for conducting the search: incident to arrest, vehicle inventory, or search warrants. We define higher discretion searches as searches where the only listed search basis was "consent given." A "yield" is when an officer discovers contraband or evidence in the possession of an individual who the officer searched.

Note. Percentages per identity group are calculated based off the total number of individuals stopped per identity group per officer assignment type (see Table 5.10). Percentages in the "Total" column are based off the total number of individuals stopped per identity group. * Represents categories only applicable to stops of students. Categories that had zero occurrences for a given reason for stop have a dash (-) instead of a percentage. Categories with 0.0% are rounded down from values of less than 0.1%. The officer assignment type category "Other" includes the following officer assignment types: 1) Compliance Check, 2) Special Events, 3) Roadblock or DUI Sobriety Checkpoint, 4) Task Force, 5) Investigative and 6) Other.

Total	**39676 (22.2 %)**	**17840 (25.3 %)**	**2578 (11.7 %)**

Note. Relative frequencies are relative by identity group and by column header. A yield rate refers to the proportion of searched individuals who officers found to be in possession of contraband or evidence. We define lower discretion searches as searches where officers provided one or more of the following reasons as the basis for conducting the search: incident to arrest, vehicle inventory, or search warrants. We define higher discretion searches as searches where the only listed search basis was "consent given." A "yield" is when an officer discovers contraband or evidence in the possession of an individual who the officer searched.

Total	**39,676 (22.2 %)**	**17,840 (25.3 %)**	**2578 (11.7 %)**

Note. Relative frequencies are relative by identity group and by column header. A yield rate refers to the proportion of searched individuals who officers found to be in possession of contraband or evidence. We define lower discretion searches as searches where officers provided one or more of the following reasons as the basis for conducting the search: incident to arrest, vehicle inventory, or search warrants. We define higher discretion searches as searches where the only listed search basis was "consent given." A "yield" is when an officer discovers contraband or evidence in the possession of an individual who the officer searched.

Note. Percentages per identity group are calculated based off the total number of individuals stopped per identity group per officer assignment type (see Table 7.10). Percentages in the "Total" column are based off the total number of individuals stopped per identity group. * Represents categories only applicable to stops of students. Categories that had zero occurrences for a given reason for stop have a dash (-) instead of a percentage. Categories with 0.0% are rounded down from values of less than 0.1%.

Table 7.13.1. *Yield rates by Disability*

Disability	Overall	Lower Discretion	Higher Discretion
Blind	32 (27.1 %)	15 (25.4 %)	3 (25.0 %)

Total	**39,676 (22.2 %)**	**17,840 (25.3 %)**	**2,578 (11.7 %)**

Note. Relative frequencies are relative by identity group and by column header. A yield rate refers to the proportion of searched individuals who officers found to be in possession of contraband or evidence. We define lower discretion searches as searches where officers provided one or more of the following reasons as the basis for conducting the search: incident to arrest, vehicle inventory, or search warrants. We define higher discretion searches as searches where the only listed search basis was “consent given.” A “yield” is when an officer discovers contraband or evidence in the possession of an individual who the officer searched.

Values indicate the predicted probability of a person of respective color being stopped in the dark compared to Whites. Please see below for full model specifications.

Note. A yield rate refers to the proportion of searched individuals who officers found to be in possession of contraband or evidence. We define lower discretion searches as searches where officers provided one or more of the following reasons as the basis for conducting the search: incident to arrest, vehicle inventory, or search warrants. We define higher discretion searches as searches where the only listed search basis was "consent given." A "yield" is when an officer discovers contraband or evidence in the possession of an individual who the officer searched. This table represents overall yield rates by agency.
