Double Hand Poker

Game Description

Double-Hand Poker is played with 53 cards: a standard 52 card deck and one Joker. The Joker may be used as an Ace or to complete a straight or a flush. The game is dealt on a poker style table to seven players (positions). The dealer button denotes which one of the seven players is the player/banker for that hand.

The house dealer will deal seven hands (piles). Each hand contains seven cards all dealt face down. The player/banker selects one of the seven piles as the first hand to be delivered. The house dealer places an action button on the selected hand.

The dice cup (containing three dice) is shaken by the player/banker to determine which seated player (position) receives the first action hand. The player/banker is always counted as numbers 1, 8 or 15. The dealer will deal each player (position) a pile which consists of seven cards each. The player/banker's hand is kept face down in front of the house dealer.

The players set their hands (any player may ask for his hand to be set House Way). Out of the seven cards two hands are made, one two-card hand and one five-card hand. The five-card hand (the back hand) must rank higher than the two-card hand (the front hand). The players place their hands face down with the two-card hand in front and the five-card hand in back.

After all players have set their hands, the House Dealer will open the player/banker's hand. The player/banker will determine which way the hand will be set.

Rank of Hands

- (a) Five Aces
- (b) Royal Flush
- (c) Straight Flush
- (d) Four of a Kind
- (e) Full House
- (f) Flush
- (g) Straight
- (h) Three-of-a-Kind
- (i) Two Pair
- (j) One Pair
- (k) High Card

Note: An Ace may be played high or low for a 5-card straight.

Example:

5-4-3-2-A = Low straight

A-K-Q-J-10 = High straight

The Joker may be used as an Ace or as any card to complete a straight or as the highest unmatched card in a flush.

Object of the Game

To win the hand, both the front and back hands must rank higher than the player/banker's hands. If both of the player/banker's hands rank higher than the player's two hands, the player/banker wins. If only one of the hands ranks higher, it is a push, meaning neither side wins. Each player keeps his bet. An identical hand is called a copy. The player/banker wins all copies.

- The player/banker may only receive action on the amount wagered. Once the player/banker's wager is depleted, the hand is over. It is possible to hold a losing or a winning hand and receive no action, or partial action.

- The player/banker's hand will not be opened until all hands have been set with the exception of a "House Way" hand.
- A player has a foul hand if:
 - (a) The two-card front hand is stronger than the five-card back hand, or
 - (b) The player does not have exactly two cards in the front hand, or
 - (c) The player does not have exactly five cards in the back hand.
- A boxed or exposed card on the deal will be replaced by the first of the remaining four cards after the deal is finished.
- A misdeal will be declared if:
 - (a) A Joker or an Ace is boxed or exposed, or
 - (b) if two or more cards are boxed or exposed, or
 - (c) the player/banker's hand does not have the correct number of cards.
- A player is responsible for the final setting of his hand. When a player requests assistance on the setting of a hand by the house dealer, a "House Way" button will be placed on the hand. Upon reaching that hand on the pay-off after the player/banker's hand is opened and set, the House Way hand will be opened and set per House Way guidelines. When players have

looked at their hands, they may or may not be allowed to ask for a House Way play.

- Any House Way hand improperly set by the house dealer will be reset by Management.
- The house dealer cannot allow the player/banker to set his hand foul. If the house dealer mistakenly allows a foul hand to be played, it will be reset the most logical way by Management and play will continue.
- The player/banker's hand is not set until he has signified his final decision in an obvious manner to the house dealer.
- Any player may request a new set up before the first bank. Only the player/banker may request a change of deck between the first and second bank.
- When two identical cards are turned up, the hand will be declared a misdeal.
- A hand that has been misread by the house dealer will play at true value if it can be retrieved intact.
- If the hand goes to the wrong spot before the dice cup is closed, it is a misdeal.

ROUND OF PLAY

1. No Bust-21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino dealer stands opposite of the players, and in the center of the table. The casino dealer's chip tray is set in front of him/her. The play starts from the right of the dealer and proceeds in a clock-wise fashion.
2. The game utilizes a standard 52-card deck, with the addition of one Joker per deck for a total of 53 cards. The game can be played with a minimum of a two decks, totaling 106 cards and to a maximum of eight decks totaling 424 cards.
3. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed, and collection fee for the players and Player/Dealer. A maximum of three collection rates are allowed in compliance with the California Penal Code.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place an amount of money (casino chips) in front of their seat in a betting circle and that money will be used to pay the winners and will also set the amount that he/she can collect from the loser. The casino will place a "button" in front of the Player/Dealer which designates that they are taking the "bank" position and further designate whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his betting circle.
5. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the posted collection for the wager they placed in any betting circle where they have money or "action".
6. Once the Player/Dealer has posted the amount of money he/she will wager against the other players, and once the players have placed their wagers, the casino dealer will collect all of the fees. This will always be accomplished prior to the start of the game in accordance with the California Penal Code. The casino dealer will take the

collection fees and drop them into a locked collection box affixed to the gaming table.

7. After the fees have been collected, the dealer will deal the cards to the players and the Player/Dealer. All cards dealt throughout the game are always dealt face up. The casino dealer is the only person on the table to touch the cards. The players will signal to the dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino dealer deals the first card to the player seated to the left of the designated Player/Dealer, in a clock-wise fashion. Each player will be dealt one card face up and the Player/Dealer will receive his/her first card also. The Player/Dealer's dealer first card will be placed in front of the casino dealer rather than in front of the Player/Dealer's seat position.
8. The casino dealer will deal a second face up card to the players, again starting at the player to the first seated position to the left of the Player/Dealer, in a clock-wise fashion. The Player/Dealer does not get dealt a second card until all players have been given the opportunity to be dealt additional cards to make the best possible hand. (Rules and procedures for hands that can be split, double-down, and surrendered are outlined on page 11.)
9. Players must follow the below listed charts in deciding whether to hit or stand on a particular hand.

Rules for Players

10. After all players have made their best hands by indicating to the casino dealer that they do not wish to have additional cards dealt to them, the Player/Dealer will receive his/her second card. This card will determine where the "action button" will be placed.
11. The action button determines where the action starts or who will be first to be paid for their winning hand or lose their wager. The action button is placed based on its numerical value and in comparison to the players seated at the table. (Please see the chart below for an example of how the card's value is used to determine the placement of the action button).

12. Once the hand is played to the end, the payout or collection of the wagers will begin at the seat where the action button is placed. The settling of the wagers will proceed in a clock-wise manner until all wagers have been acted upon.
13. In the event that the Player/Dealer does not have enough money on the table to cover all the wagers on the table, there will be no free collection button, refund, or other conciliatory action given to the affected players by the casino or the Player/Dealer.
14. If the Player/Dealer's first up card is a Joker, all hands are frozen on the table. The Player/Dealer will be dealt the next card and the action button will be placed. Winning and losing wagers will be determined and all pay-offs made. Players have no options on their hands if this occurs.
15. The Player/Dealer's cards will always be dealt and placed in front of the casino dealer's tray. The placement of the Player/Dealer's cards is standard in all games and is depicted in the chart below:

16. The casino dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer does not have an option of hitting a Hard 17 or higher nor staying on a Soft 17 or lower. See the chart below for details:

Rules for Player/Dealer		
Must Stand OR	Must Hit OR	Have Option OR
HARD 17 AND ABOVE	SOFT 17 OR LESS	NONE

17. Once the Player/Dealer's hand has been made, all winners and losers are determined when their card's numerical value are compared to the Player/Dealer's. The Player/Dealer is never required to cover all opposing player's wagers. A Player/Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers. If there is not enough money from the Player/Dealer position to cover all winning wagers, there will be no refund, free collection, or other form of rebate given to the affected players.
18. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the Player/Dealer position is rotated in a clock-wise fashion around the table.
19. The next round of play begins once the casino dealer collects all cards from the table and places them in the discard tray. The casino dealer will also change the bank button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clock-wise to the next position on the table. If there is no person that intervenes on the Player/Dealer's position, the game will be "broken" or stopped, as required by the California Penal Code.

GAME RULES

1. A "Natural 22" (the first two cards dealt are Jokers) is the best possible hand. If the player and the Player/Dealer's hands are both a "Natural 22", the hand is a push or tie, and no action is taken on the wager.
2. The second best hand is a Joker (wild card) with any other card.
3. If a player's total is less than a "Natural 22" and the Player/Dealer's total is more than a "Natural 22", the player wins the hand.
4. If a player's total is less than a "Natural 22" and the Player/Dealer's hand is less than a "Natural 22", the hand closest to a "Natural 22" wins.
5. If a player and the Player/Dealer have the same total and it is less than a "Natural 22", the hand is a push or tie, and no action is taken on the wager.
6. If a player's and the Player/Dealer's totals are more than a "Natural 22", the following will apply:
 - a. If the Player/Dealer is closer to a "Natural 22", the Player/Dealer wins the hand.
 - b. If the player is closer to a "Natural 22", the result is a push or tie and no action is taken on the wager.
7. The Player/Dealer wins all ties or pushes over a "Natural 22".
8. If a player has more than a "Natural 22" and the Player/Dealer has less than a "Natural 22" the Player/Dealer wins. The player would win if they had less than a "Natural 22" and the Player/Dealer had more than a "Natural 22".
9. If the Player/Dealer's first up card is a Joker, all hands are frozen on the table. The Player/Dealer will draw the next card and the action button will be placed. Winning and losing wagers will be determined and pay-offs made.
10. No player may double-down, surrender, or split when the Player/Dealer is dealt a Joker as their first up card.
11. If the Player/Dealer's first up card is not a Joker, the casino dealer will draw as many card as needed (after all player's have made their hands) up to the a Hard 17 or higher.
12. Players with a non-Joker hand have the option to draw additional cards to make their best hand.
13. A Joker with any card is a hard 21 and a player cannot draw an additional card.
14. The game is played on an industry standard Blackjack table where up to eight primary players can be seated.
15. All collection fees are collected by the casino dealer prior to the start of play. Collection fees are pre-determined by the casino and can be up to three separate rates per game. All collection rates and wagering limits for the game will be posted at each gaming table and will not be based on a percentage or other factor.
16. Backline betting is allowed subject to local ordinance or code.
17. Third Party Providers of Proposition Player Services, as defined in Section 19984 of the California business and Professions Code (the Gambling Control Act), are permitted to play.

DOUBLE-DOWN, SPLIT, SURRENDER & ODDS

Players can double-down on their first two cards dealt to them. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game. The player will only receive one card regardless of the total.

Players can split any pair or two cards with a value of 10 each, originally dealt to them. The exception is two Aces. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game. A player may draw as many cards as the desire per split card to make the best hand.

Players can split any two Aces originally dealt to them but can only receive one extra card per Ace. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game.

Multiple splitting of cards is permitted up to a maximum of three (3) splits per hand.

Players can surrender after their first two cards are dealt to them. If they choose to surrender, half of their wager will be forfeited. The player must indicate they wish to surrender before the Player/Dealer's second card is dealt. Their (the player's) play for that hand will cease.

Players cannot double-down, split, or surrender when the Player/Dealer's first card dealt is a Joker.

There is no extra collection fee taken by the casino on any double-down or split executed by a player, nor is there any extra collection fee charged to the Player/Dealer.

Player's Joker-Joker or "Natural 22" pays 2 to 1. All other hands pay 1 to 1.

All pay-offs are to the extent that the Player/Dealer's money covers the action on the table. A Player/Dealer cannot win or lose more than the entire amount of money placed on the table prior to the start of the hand.

POKER GAMES

Omaha Hi-Low Split (8 or Better)

Omaha Hi-low Split is a community card poker game that is played with a standard 52-card deck. In order for a hand to qualify for the low hand, it must contain a 8 or Better (lower) at showdown. The game starts to the left of the dealer button. The blind bet(s) are made from the position(s) left of the dealer button and are forced bets which must be made before the cards are dealt.

Each player is dealt four cards, one at a time, in turn and face down (hole cards) as their initial hand. A round of betting occurs for players who are continuing to contend for the pot. Three board cards are turned face up (flop) in the middle of the table (community cards). The community cards are available for all players to use. The second round of betting occurs. The fourth community card is turned face up (the turn), followed by a third round of betting. A final community card (river) is turned up and a fourth and final round of betting occurs. After the final round of betting has been completed, each player may use any two hole cards with three community cards to make the highest five-card poker hand, and any two hole cards with three community cards to make the lowest qualifying five-card poker hand. The lowest qualifying five-card poker hand is Ace, 2,3,4,5. Players must qualify for the low hand with a hand containing an 8 or better (lower). The pot is split equally between the players with the highest ranking hand and lowest qualifying hand. If no player has a low qualifying hand, the player with the highest ranking five-card poker hand wins the entire pot. In the event of a tie, the pot, or portion of the pot, if the tie is for high or low hand only, is split equally.

OMAHA HIGH-LOW SPLIT (8 OR BETTER)

In Omaha High-Low Split (8-or-better), the best high hand wins half the pot, and the best low hand wins the other half, as long as the low hand consists of five cards of different ranks, with no card being higher than an eight. Straights and flushes do not affect the value of a low hand, and an ace can be used for both high and low.

Rules of Omaha High-Low Split (8-or-better)

1. All the rules of Omaha apply to Omaha High-Low Split (8-or-better).
2. A qualifier of eight or better for low is required in all high-low split games, unless a specific posting to the contrary is displayed.
3. If there is no low hand, the high hand wins the entire pot, which is referred to as "scooping the pot."
4. A player may use one combination of cards to make a high hand and the same or any other combination to make a low hand, as long as each hand consists of exactly two hole cards with three board cards.

PAI GOW TILES

Casino Marysville

Pai Gow Tiles is an ancient Chinese domino game. It has been played throughout Asia for centuries and is the predecessor of the modern games of Chemin de Fer, Baccarat and Blackjack. Pai Gow Tiles is a rotating bank game that uses a standard set of Chinese dominoes (32).

Object Of the Game

The object of Pai Gow Tiles is to make two hands that both rank higher than the two hands made by the player/dealer.

How To Play

1. Each player receives four dominoes and plays two hands of two dominoes trying to make a high hand and a low hand. Your high hand will be compared to the player/dealer's high hand and your low hand will be compared to the player/dealer's low hand,
2. Both hands must be higher than the player/dealer's hands to win.
3. If one hand is higher, and the other hand is lower, then the hand would result in a push.
4. If both the player's hands are lower than the player/dealer's hands, the player loses.
5. a rating system determines the value of each hand.

When You Receive Your Tiles:

1. Look for pairs. Matching pairs are easy to recognize. Unmatched pairs are often overlooked. When you do not have a pair:
2. Look for the 12 (Teen) or the 2 (Dey) with a 7, 8, 9 (to produce either a high Nine, or Gong, or Wong). When you do not have a 12 or 2:
3. Look for two small dominoes that equal 7, 8, or 9. When you cannot make a 7, 8, or 9:
4. Play the biggest domino with the smallest domino (making the low hand as high as possible).

Game Rules

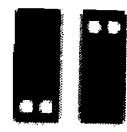

Pai Gow Tiles is similar to playing two separate hands of Baccarat at the same time, with 9 being the highest point: except that there are twenty different combinations of dominoes that are higher than 9. Sixteen of these combinations are pairs. The other four combinations of dominoes that are higher than 9 are called Wong and Gong. Each of these combinations and each individual

domino have a ranking. The symbolism of the domino (not the numerical value) determines their ranking (see ranking chart). If a player can't play one of the above mentioned combinations, he or she adds the total spots on two dominoes (subtracting 10's as in baccarat) to determine his or her hand. If both the player and the player\dealer have the same numerical valued hand, the hand with the higher ranking domino wins (only the highest-ranking domino is considered). If both the player and the player\dealer have the exact same hand, the player\dealer wins.

Please Note: The two dominoes that make the highest-ranking pair, Gee Jon, are interchangeable. The 6 can be played as a 3 and the 3 can be played as a 6. When played individual, these two dominoes are the lowest ranking.

ROUND OF PLAY

1. Pure 21.5 Blackjack is played on a raised gaming table. The table seats eight players who face the dealer in a 180-degree seating arrangement. The tables are the standard blackjack tables commonly used in the casino industry. The casino dealer stands opposite the players, and in the center of the table. The casino dealer's chip tray is set in front of the dealer. The play starts from the right of the dealer and proceeds in a clockwise fashion.
2. The game uses a 52-card deck with aces through nines (the standard spades, hearts, clubs and diamonds) and 16 bonus cards (four of each "king", "queen", "jack" and "ten"). The game is played with a minimum of a single deck, totaling 52 cards and to a maximum of eight decks totaling 424 cards.
3. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed the collection fee for the players and Player/Dealer will also be displayed. A maximum of three collection rates is allowed in compliance with the California Penal Code.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place an amount of money (casino chips) in a betting circle in front of their seat. That money will be used to pay the winners and will set the amount that he/she can collect for the losers. The casino

will place a button in front of the Player/Dealer, which designates that they are taking the "bank position and further designate whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his/her betting circle.

5. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the posted collection for the wager they placed in any betting circle where they have money or "action".
6. Once the Player/Dealer has posted the amount of money, he/she will wager against the other players, and once the players have placed their wagers, the casino dealer will collect all of the fees. This will always be accomplished before the start of the game in accordance with the California Penal Code. The casino dealer will take the collection fees and drop them into a locked collection box affixed to the gaming table.
7. After the fees have been collected, the dealer will deal the cards to the players and the Player/Dealer. All cards dealt throughout the game are face up, with the exception of the Player/Dealer's second card, which will remain "face down" until all players have acted on their hands. The casino dealer is the only person on the table allowed to touch the cards. The players will signal the dealer with hand gestures that indicate whether the wish to hit or stand. The hand signals will be consistent with the industry standard signals of a sweeping motion towards a players body, indicating a hit, or a side to side hand motion, indicating the desire to stand. The casino dealer deals the first card to the player seated to the left of the designated Player/Dealer, in a clock-wise manner. Each player will be dealt one card face up with the Player/Dealer receiving the last card. The Player/Dealer's cards will be placed in front of the casino dealer.
8. The casino dealer will deal a second card to the players in the same order noted above. The players are given an opportunity, starting with the player seated to the left of the Player/Dealer, to be dealt additional cards to make the best possible hand. (Rules and procedures for splitting, doubling down, and surrendering will be outlined later)

9. Players must follow the below listed **Charts 1A and 1B** in deciding whether to hit or stand on a particular hand.
10. After all players have acted on their hands and indicated to the casino dealer that they do not want or cannot receive additional cards, the Player/Dealer's down card will be turned up. This down card will determine where the "action button" is placed.
11. The "action button" determines where the action starts and who will be first to be paid for their winning hand or lose their wager. The action button is placed based on the numerical value of the Player/Dealer's down card. A chart (**Diagram #1**) outlining the placement of the action button follows.
12. The Player/Dealer's hand will then be completed according to the rules listed on **Chart 1B**. Once the Player/Dealer's hand is completed, the payoff and/or collection of wagers will begin in the seat designated by the action button and continue in a clockwise manner until all wagers have been acted on.
13. In the event that the Player/Dealer does not have enough money on the table to cover all the wagers on the table, there will be no free collection button, refund, or other conciliatory action given to the affected players by the casino or the Player/Dealer.
14. The Player/Dealer's cards will always be dealt and placed in front of the casino dealer's tray. The placement of the Player/Dealer's cards is standard in all games and is depicted below. See **Diagram #2**

15. After all wagers are settled, the cards are collected and discarded. The bank button is changed from 1st Bank to 2nd Bank and after every two hands, the Player/Dealer position is rotated in a clockwise fashion around the table.

16. The next round of play begins when the casino dealer collects all the cards from the table and places them in the discard tray. The casino dealer will also change the bank button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clockwise to the next position on the table. If there is no person that intervenes on the Player/Dealer's position, the game will be "broken" or stopped, as required by the California Penal Code.

2. If the Player/Dealer does not have a Pure 21.5 Blackjack, the Players will be given the option to draw to improve their hands, in accordance with Chart 1A above. The Player/Dealer's down card will be checked, by the casino dealer for a "Pure 21.5 Blackjack" when the Player/Dealer's first or up card is an Ace or Bonus Card.
3. After all Players have been given a chance to act on their hands, the Player/Dealers hand will be completed in accordance with Chart 1B.
4. If a Player's total is less than a "Pure 21.5 Blackjack" and the Player/Dealer's total is more than a "Pure 21.5 Blackjack", the Player wins the hand.
5. If a Player's total is more than a "Pure 21.5 Blackjack" and the Player/Dealer's total is less than a "Pure 21.5 Blackjack", the Player loses the hand.
6. If a Player and the Player/Dealer have the same total and it is less than a "Pure 21.5 Blackjack", the hand is a push or tie. No action is taken on the wager.

7. If a Player's total and the Player/Dealer's total are less than a "Pure 21.5 Blackjack", the hand closest to a "Pure 21.5 Blackjack" will win.

 - a) If the Player/Dealer's hand is 888 (three eights) all Players whose total is more than 21.5 Push

9. The game is played on an industry standard Blackjack table where up to eight primary players can be seated.
10. All collection fees will be collected by the casino dealer, prior to the start of play. Collection fees will be determined by the casino and can be up to three separate rates per game.

DOUBLE-DOWN, SPLIT, AND SURRENDER

1. Players can double-down on their first two cards dealt to them. The player must place a second wager equal to the player's original wager. The player will only receive one additional card, regardless of the total. Doubling down for less is allowed.
2. Players can split any pair or two BONUS cards. The player must place a second wager equal to the original wager. The player may draw as many cards as desired per split card. When splitting two Aces, the player only receives one additional card per ace. There is no splitting for less.

Player/Dealer's undercard is a Bonus card giving the Player/Dealer a Pure 21.5 Blackjack. Winning Insurance wagers pay 2 to 1. Insurance wagers may be equal to no more than ½ of a Player's original wager. Insurance may not be offered in casinos where Pure 21.5 Blackjacks pay 6/5 or 7/5.

Even Money- In conjunction with offering insurance, when the Player/Dealer's upcard is an Ace, Players that have a Pure 21.5 Blackjack (an Ace and a Bonus Card) may opt to take even money on their wagers before the Player/Dealer's undercard is checked for a Bonus Card. The Player is actually making an insurance wager equal to ½ of the original wager. If the Player/Dealer has a Bonus card as the undercard (a Pure 21.5 Blackjack), the Player wins the insurance bet (a wager equal to ½ of the original wager that pays 2 to 1) and pushes on the original wager. If the Player/Dealer does not have a Bonus Card as the undercard, the Player will lose the insurance bet and is paid 3 to 2 (for the Pure 21.5 Blackjack) on the original wager. The result in each case is the same as the Player wins an amount equal to the original wager (even money).

Player/Dealer 888 Option- If the Player/Dealer's hand is 888 (three eights), all Players who have a total exceeding 21.5 **win**. (The option currently being offered is the same as this one, except all Players exceeding 21.5 **push**).

TEXAS HOLD-EM

Casino Marysville

Texas Hold-em is played using a standard 52-card deck. The object is to make the best high hand among competing players using the traditional ranking of poker hand.

Players who sit post blinds in consecutive clockwise order from the button. Action is initiated on the first betting round by the player on the immediate left of the person who posted the furthest blind clock-wise from the button. On all subsequent rounds the first active player from the button begins the action.

Each player is dealt two down cards, one at a time, in rotation, in turn.

A round of betting ensues for players who wish to contend for the pot.

Three cards are turned face-up in the middle of the table. These are commonly called the flop.

A round of betting ensues for players who wish to continue and contend for the pot.

A fourth card is turned next to the initial three.

A round of betting ensues for players who wish to continue and contend for the pot.

A fifth and final card is turned next to the previous four. These five cards are common to all active players A final betting round.

All active players expose their hand. Using the best of their personal two cards and the five communal cards, the active player with the best high hand is awarded the pot. Players may use two, one or none (playing the board) of their personal cards to form their hand.

A new player entering a hold-em game may either choose to wait for his or her big blind or post their big blind. If they post the largest blind, it does act as their opening bet and may either call or make the prescribed raise in turn.

If the blinds pass a player's position while away from the table the player may resume play by posting the total amount of the blind. The small blind goes to the center of the pot, while the big is live. The player may also just wait for their big blind.

If a player is dealt more or less cards the game you are playing in calls for, and it is discovered before two players act on their hands, it is a misdeal. If it is discovered that after two players have acted all monies, that player forfeits antes and blinds.

If the flop has the incorrect number of cards (too many), it is taken back and re-shuffled. The burn card will remain and no additional one will be used for this flop.

If a dealer turns up the fourth card on the board before the round of betting is completed, the card will not play. After betting is completed, the dealer will reshuffle the deck, including the card that was taken out of play but not the burn card or discards. The dealer will then deal the fifth card.

If the fifth card is turned up before betting is complete, it shall be reshuffled as in the previous rule.

CASINO MARYSVILLE

KILL POTS

In a game that requires a player who wins two consecutive pots to kill the next pot (natural kill), a marker called a "kill button" indicates which player has won the previous pot. The winner keeps this marker until the present hand has been completed. If the player with the kill button wins a second consecutive pot and it qualifies monetarily, that a player must kill the next pot.

There is a \$20 pot-size requirement for the first opt or "leg" of a kill. For the second "leg" to qualify for a kill, a player must also win a \$20 pot. Uncalled bets are not considered part of the pot.

The "full kill" means that the bet has to double the blind. For example, in a 3-6 limit game, the full kill will be a 6-12 limit. The players will bet 6 dollars before the flop and 6 dollars on flop, while the turn and river cards requires the player to bet 12 dollars. The game is played the same way, except that it is played in higher limits. However, the "full kill" on 4-8 limit game would be 8-16 game.

Kill pots are not require as a part of the game, but the players may request it. The kill pots will be used if all the players agree. Kill pots are mainly used for players who wants to win bigger pots and for those players who has lost to get a chance to break even.

- The Casino Marysville shall provide ample notice to the patrons of fee collection rates and procedures. Table fees shall be conspicuously posted within view of every gaming table.

Should there be no Player holding an “8 or Better to qualify”, the entire pot is awarded to the best-exposed High hand. Players must use two of their personal four cards along with three of the community five cards to form a traditional Poker hand, High and/or Low. They may use a different set of two hole cards and three community cards to form each hand. It is possible for one player to have the best High and the best Low hands.

METHOD OF PLAY

1. Blinds are posted as in many other Poker games.
2. Each Player is dealt four cards, one at a time, in turn, face down.
3. A round of betting ensues for Players who wish to continue and contend for the pot.
4. Three cards are turned face up in the middle of the table (Flop)
5. A round of betting ensues for Players who wish to continue and contend for the pot.
6. A fourth card is turned next to the initial three. (Fourth Street or Turn)
7. A round of betting ensues for Players who wish to continue and contend for the pot.
8. A fifth and final card is turned next to the previous four. (The River Card/” or At the River”).
9. These five cards are common to all active Players.
10. A final round of betting.
11. Active Players now expose their cards. The best High hand and the best Low hand, providing it is an “8-or Better”, split the pot. Otherwise, the High hand wins all. Players must use exactly two of their personal four cards and three of the five communal cards. Should there be an “odd” chip, the HIGH hand receives it.

(NOTE: It is possible for one player to win both the High and the Low.)

GENERAL RULES

1. **IT IS THE PLAYER’S RESPONSIBILITY TO PROTECT THEIR HAND AT ALL TIMES.** Dealers will assist in reading hands to the best of their ability, although it is the Player’s responsibility to protect his or her hand at all times. The dealer will assume that any unprotected, abandoned, or discarded hands are dead or have been folded. Neither the house nor the dealer can be held accountable for the Player’s failure to protect their hand. At management’s discretion, a hand may be considered retrievable.

2. Initial buy-ins for all of the above games is ten times the minimum bet. Thereafter, only one buy of a lesser amount (short-buy) is allowed. Add-on buys, which bring you up to the minimum buy-in, will not be considered a short buy-in.
3. Any new game employing a dealer-button will have the button positioned for the initial deal based on a random draw--high card receiving the button-among the players in the new game, after the deck has been shuffled and spread face down on the table by the dealer. If two or more players draw the same high card, the deal will be determined by suit rank-spades; hearts; diamonds; and clubs.
4. The joker is a hole card. The joker in this game can only be an Ace card, a card to make a straight, and a card to make a flush. Adding the joker will make the game use a total of 53 cards in the deck. If the Joker is flopped on the board (community cards) any player may use it as an Ace, a card to make a straight, and a card to make a flush.

DEALING RULES

1. A card placed face up in the deck (boxed card) is dead and is dealt into the discards. The next card below it in the deck replaces a boxed card. If a Joker were to appear in a deck, it would be treated as a dead card. If a Player does not call attention to the Joker among their down cards before acting on their hand, then they have a foul hand and forfeit all rights to the pot and all monies involved.
2. If a Player's hole card is exposed due to a dealer error, they may not keep the exposed card. After completing the deal, the dealer will exchange the exposed card with the top card on the deck and place the exposed card face up on top of the deck. The exposed card will be used as the burn card before the flop, after all wagering action is completed.
3. If a Player is dealt more cards than the game they are playing in calls for; and it is discovered before they act on their hand; the extra card will be retrieved and placed on the top of the deck as the bum card. A Player receiving less than the required number of cards will receive a card(s) from the top of the deck. If either situation occurs after the Player has acted on their hand, the Player forfeits ALL antes and blinds.
4. If the flop has too many cards, it will be taken back and reshuffled except the bum card, which will remain burned. The dealer will not burn a card before dealing out a new flop. This method is used unless there has been substantial action based on an improper card, in which case, the card the Players based their actions on will stand, and the Dealer on subsequent rounds shall treat the two stuck-together cards as a single card. If this occurs, the Dealer will not bum the top card before dealing another round of cards.
5. If the Dealer puts up the flop before all the betting is completed, the entire flop is taken back and reshuffled except the bum card which will remain burned. The Dealer will not bum a card before dealing out a new flop
6. If the Dealer turns up the fourth card on the board before the round of betting is completed, the card is not in play. After the completion of the betting, the next card is burned and the fifth card is put in the fourth card's place. After betting is completed, the Dealer will reshuffle the deck including the card that was taken out of play but not the bum card or discards. The Dealer will not bum a card before dealing out the fifth card.
7. If the fifth (5th.) card is turned up before the round of betting is completed, the card is not in play. After the betting is completed, the Dealer will reshuffle the deck including the card that was taken out of play, but not the burn card or discards. The Dealer will not burn a card before dealing out the fifth card.

RULES OF PLAY

1. A Player who allows substantial action to occur behind them risks forfeiting their right to initiate action on their hand, and in certain circumstances, may have their hand nullified.
2. A Player who posts a regular size blind may only put up the amount required by the structure of a particular game. Oversize blinds are prohibited.
3. Initial round betting action begins with the Player who is to the immediate left of the ‘big blind’. Thereafter, action begins with the Player to the immediate left of the dealer button.
4. Players entering a new game are entitled to a free hand(s) if the blind has not passed that position on the initial round.

BLINDS

1. A Player should pass through all the blind positions each round. Players departing the game and creating open seats may force the dealer button to skip ahead and, in turn, save a Player at the table a blind position on any given round.
2. When a new Player enters a game they must wait for the big blind or post the amount of the big blind. If they choose to post the amount of the big blind, the blind acts as their opening bet and they may either call by rapping the table or raise.
3. An established Player who misses all or part of their blinds on a round can make them up by posting the total of the blinds. The excess amount over the bring-in (the big blind) becomes dead money and is placed in the center pot. It is not part of the bet. The additional blind plays in turn and is a live blind.
4. An established Player who misses all or part of their blinds will be given a “missed blind” button. To receive a hand when they return, a Player with a missed blind button must do one of the following:
 - a) Wait and come in on their big blind.
 - b) Place an additional blind in the pot. (See # 17)
 - c) Place a straddle blind in the pot, if the position is to the immediate left of the big blind. (See # 21)
 - A player who makes up their blind is still required to take the blind in normal rotation.
5. An established Player waiting for the big blind must still post an amount equivalent to the big blind even though a Player being eliminated on the previous hand places the Player in the middle blind position. If this should occur, there would be two big blinds in play for that hand.
6. Established Players returning to a game or new players entering a game can receive a hand at any time by posting the appropriate blind, including “taking it in the middle” of the existing blinds. The dealer button will skip over the Player who receives a hand in this manner on the next deal. Only one live blind is permitted on a deal.
7. An established Player who misses all or part of their blinds on a round can make the up by posting a “straddle blind”. A straddle blind can only be posted by the person on the immediate left of the big blind. A straddle is always twice the size of the big blind. The rules governing straddle blinds are as follows:

8. Only one straddle is permitted on a deal.
9. A specific size straddle is set for each game. A straddle of larger size than the regulation is not permitted.
10. The person on the immediate left of the straddler initiates the action before the flop.
 - (a) The straddle is a live blind; that Player may raise the pot.
 - (b) The button never has the option of posting a straddle blind
11. No sleeper bets are allowed.
12. A Player who moves to a new seat and in the process moves away from the big blind must post the amount of the big blind or wait out the appropriate number of hands. This rule prevents a Player from continually changing seats to unfairly get several extra hands before taking a blind.
13. A Player, who has fulfilled all their blind obligations, then moves to a new seat, has the option of letting the blinds pass by without penalty after waiting out the appropriate number of hands. They have not unfairly received any hand because their relative position to the blinds has not improved.
14. A Player who needs to make up a blind and looks at any of their cards before posting the blind money has a dead hand, provided the error is caught before the Player acts on their hand. If the player acts before the mistake is caught, the hand is live and may be played, and the Player makes up the blind on a subsequent deal.
15. If the big blind is less than the required amount because that Player is all-in, all subsequent betting action is taken as if the full amount had been posted and the blind plays short. If the Player who was short wins the pot or buys chips the next hand, they are not required to make up the short.

BETTING

1. Only a full bet constitutes a bet or a raise. Anything less than a full bet is considered to be action only. When a Player has gone all in for an amount less than a full bet or raise, the next Player can call the equivalent amount or put in an amount equal to a full bet or raise. For example: In a \$3-\$6 game, on the last card, the first Player bets \$6. The next Player goes "All-In" for \$10. The next Player to act may call the initial bet and all-in wager by placing \$10 in the pot or they may raise the initial bet by placing \$12 in the pot.
2. String raises are not allowed. A Player must put in an amount at least equal to one half a raise to be allowed to return to their stack to complete a raise. A verbal declaration, i.e., "I raise", before action is started, clarifies the action and allows the Player to return to their stack to fulfill their raise.
3. Check and raise is permitted.
4. Anyone who checks out of turn may not initiate any action.
5. A bet and three raises are allowed. When only two Players remain in the pot there is no limit to the number of raises.
6. A Player who puts a single chip into the pot that is larger than the bet to them is assumed to have called the bet, unless they announce "raise". Exception; In spread limit, after the flop, if a player initiates the first bet with an "over-size" chip, the wager is the value of the chip.
7. All blinds are "live", meaning the Player with a blind has the option of raising the pot when the action

reaches them even if there has been no previous raise.

SHOWDOWN

1. **Cards Speak:** Winning hand must show all cards before the pot is awarded. Cards read for themselves. The Player instituting the last action, (by either betting or checking) must turn their hand over first upon completion of all action.
2. Although verbal declarations with regard to the content of a Player's hand are not binding, a Player miscalling a hand and causing another Player to discard their hand may, at the discretion of management, risk forfeiting the pot and further disciplinary action.
3. No pot may be awarded until all losing hands have been killed. The winning hand should remain face up until the pot is awarded.
4. The winning hand must show all cards face up on the table before the pot is awarded unless all other active hands have been discarded and only one intact hand remains.
5. A Player CANNOT play the board and must be in possession of their hand.
6. After the final round of betting has been completed, a player must use two (2) hole cards and any combination of three (3) community cards to make the highest and lowest ranking five (5) card poker hands.
7. Players do not have to use the same two (2) hole cards to make their high and low hands.
8. Players do not have to use the same three (3) community cards to make their high and low hands.
9. A qualifying low hand consists of any five (5) unpaired cards made up of A, 2, 3, 4, 5, 6, 7, or 8.
10. If there are no qualifying low hands, then the highest ranking five (5) card poker hand wins the entire pot.
11. A, 2, 3, 4, 5 is the lowest possible hand. Straights and flushes are not considered for low hands.
12. The pot will be divided equally in half between the high hand and low hand winners if there is a qualifying low hand.
13. If there is a qualifying low hand, the pot will be divided in half. If two (2) or more players have the same high or low hand, they will split half of the pot equally.

The house dealer shall deliver each stack face-down. The stack given to the player-dealer shall be delivered face-down after which the bottom card will be turned face-up.
3. After the stacks have been delivered to each player and the player-dealer, the house dealer shall unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards.

2. Each player who wagers in Three Card Poker shall be responsible for his/ her own hand and no person other than the player or the house dealer may touch the cards of that player. Each player shall be required to keep his/ her three cards in full view of the house dealer at all times.
3. After examination of the cards, each player who has placed an Ante wager shall have the option to either make a Play wager in an amount **equal** to the player's Ante wager or forfeit the Ante wager and end his or her participation in the round of play. The house dealer shall offer this option to each player, starting with the player to the left of the player-dealer and moving clockwise around the table in order.
 - a. If a player has placed a Pair Plus wager, but does not make a Play wager, the player shall forfeit the wager, as well as, the Ante wager.
4. After each player has either placed a wager on the table in the Play wager area or forfeited his/ her wager and hand, the house dealer shall collect all forfeited wagers and associated cards, placing them in the discard rack.

 - a. If the player-dealer does NOT qualify, the Play wager receives no action. The house dealer shall immediately refund these wagers to players.
 - b. If the player-dealer's hand did NOT qualify, the Ante wager receives action. If the player did not fold and their hand ranks higher than the player-dealer's hand, the player shall be paid even

- c. If the player-dealer's hand qualifies, the house dealer shall immediately stack each player's Play wager atop the Ante.
 - i. If the player's hand beats the player-dealer's hand, the player wins even money on the Ante and the Play wagers.
 - ii. If the player-dealer's hand beats the player's hand, the player loses both the Ante and the Play wagers.
 - d. If the player's hand and the player-dealer's hand are equal in rank and value, the hand is considered a tie and the Ante and Play wagers shall push and be returned to the player.
6. The house dealer shall then reveal the three card hand of each active player, starting with the player to the left of the player-dealer position.
 7. All cards collected by the house dealer shall be picked up in order and placed in the discard rack in such a way that they can be readily arranged to reconstruct each hand in the event of a question or dispute.
 8. The action on payouts will always begin with the player to the left of the player-dealer position and continue clockwise. Wagers will be settled in the following order from player to player: the Ante wager, then the Play wager, and then the Pair Plus wager (if placed). Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.
 9. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house shall not participate as the player-dealer. The house shall not take a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
 10. The player-dealer position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. How Winners are Determined and Paid

Once the hands have been completed, according to the guidelines above, the player's wagers are settled. Wagers will be settled in a clockwise manner around the table, starting with the player with the Action Button. All wagers will be settled from seat to seat in the following order: base game wager, Fortune Bonus Bet, Envy Bonus, and finally the Ace-High Bonus Bet. The following shall apply when determining whether the player wins, loses, or pushes:

1. The base game wager wins if the two-card hand and the five-card hand, held by the player, ranks higher than the player-dealer's two-card hand and five-card hand.
2. The base game wager loses if the two-card hand and the five-card hand held by the player, ranks lower than the player-dealer's two-card hand and five-card hand.
3. The base game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
 - a. The base game wager also "pushes" if the ranking of the player-dealer's shown hand is a seven-card ace-high hand.
4. If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
5. The Fortune Bonus Bet wins if a player, who placed a Fortune Bonus Bet, obtains an eligible hand listed in the payable below.

6. The Envy Bonus wins if a player places a \$5 Fortune Bonus Bet and a player at the table (other than themselves and the player-dealer) obtains an eligible hand according to the payable below.
7. The Ace-High Bonus Bet wins if a player, who placed an Ace-High Bonus Bet, and/or the player-dealer obtain an eligible hand according to the payable below.
8. The player-dealer will pay all winning wagers and collect all losing wagers.
9. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the respective players.
