## HOMICIDE IN CALIFORNIA

Could we perfect human nature, we might also expect a perfect state of things. GOETHE, quoted in Johann Peter Eckermann's

#### DIVISION OF CRIMINAL JUSTICE INFORMATION SERVICES Nick Dedier, Director

#### **BUREAU OF CRIMINAL INFORMATION AND ANALYSIS**

Doug Smith, Chief Mike Acosta, Assistant Chief

#### **CRIMINAL JUSTICE STATISTICS CENTER**

Steve Galeria, Program Manager

The role of the Criminal Justice Statistics Center is to:

- Collect, analyze, and report statistical data which provide valid measures of crime and the criminal justice process;
- Examine these data on an ongoing basis to better describe crime and the criminal justice system;
- Promote the responsible presentation and use of crime statistics.

#### STATISTICAL ANALYSIS CENTER

### introduction

*Homicide in California, 1998* contains information about the crime of homicide and its victims, demographic information about persons arrested for homicide, and information about the response of the criminal justice system. Information about the death penalty, the number of peace officers killed in the line of duty, and justifiable homicide is also included.

Most data displayed in this publication come from three data bases maintained by the California Department of Justice's Criminal Justice Statistics Center (CJSC). The Homicide File captures willful and justifiable homicide crime data; the Monthly Arrest and Citation Register captures the race/ ethnic group, age, and gender of persons arrested for homicide; and the Offender-Based Transaction Statistics system captures information about types of dispositions and sentences. Because of differences in the type of data collected, and the methods used to collect these data, the reader is cautioned against comparing data from these three collection systems.

This year's edition of *Homicide in California* incorporates several changes: narrative highlight statements have been expanded; California counties with the highest and lowest 1998 homicide rates have been identified (see Page 13); homicide clearance rates for the period 1989 through 1998 have been charted and are now included within the narrative (see Chart 37, Page 23); and, homicide rates for the general population have been compared to homicide rates for peace officers killed in the line of duty for 1989 through 1998 (see Chart 53, Page 45). As in last year's edition, CJSC publications available in either printed or electronic format (via the Internet) are listed on the inside of the back cover. Customized statistical reports or additional statistical information may be requested by contacting CJSC at the numbers provided.

### highlights

#### HOMICIDE CRIMES (see Pages 2-23)

- From 1997 to 1998, homicide crimes decreased 16.7 percent in rate per 100,000 population (7.8 to 6.5). From 1989 to 1998, the homicide crime rate decreased 40.9 percent (11.0 to 6.5).
- Since 1989, homicide rates have decreased for all gender and race/ethnic groups shown. Blacks experienced the highest rate of decline (down 53.7 percent) but continue to maintain substantially higher homicide victimization rates compared to whites and Hispanics.
- The homicide rate for victims aged 30-39 decreased 45.3 percent from 1989 to 1998 (13.9 to 7.6).
- In 1998, most white victims fell into the "aged 40 and over" category (42.4 percent). Most Hispanic and black victims fell into the "aged 18-29" category (55.0 and 45.0 percent, respectively).
- From 1989 to 1998, the majority of homicide victims knew their assailant.
- Proportionately, females were eighteen and one-half times more likely to be killed by their spouses than were males.
- Generally, homicides occurred most often during the summertime.
- In 1998, males were most likely to be killed on streets or sidewalks and least likely to be killed in their residences; the inverse was true for females.
- Since 1989, more homicide victims have been killed by firearms than by all other types of weapons combined.
- In 1998, 40.0 percent of homicide victims aged 5-17 were killed as a result of gang-related activities.
- In 1998, 63.1 out of every 100 homicides were cleared by an arrest; this is the highest clearance rate for the 1989 to 1998 period.

### highlights

#### **HOMICIDE ARRESTS** (see Pages 26-29)

- From 1997 to 1998, homicide arrests decreased 2.3 percent in rate per 100,000 population at risk (8.6 to 8.4). From 1989 to 1998, the homicide arrest rate decreased 44.4 percent (15.1 to 8.4).
- From 1989 to 1998, the majority of homicide arrestees and victims were male.
- In 1998, the largest proportion of homicide arrestees and victims were Hispanic (46.6 and 44.7 percent, respectively). The majority of homicide arrestees were aged 18-29 (58.8 percent) and the largest proportion of homicide victims were aged 18-29 (43.5 percent).

#### **DISPOSITIONS OF ADULTS ARRESTED FOR HOMICIDE** (see Pages 32-37)

Over 70 percent of adults arrested for homicide, for which dispositions were received, were convicted of homicide or some other offense.

#### **DEATH PENALTY SENTENCES** (see Pages 40-41)

■ By the end of 1998, 516 persons were under sentence of death in California. Of these, 32 were sentenced in 1998.

#### **PEACE OFFICERS KILLED IN THE LINE OF DUTY** (see Pages 44-45)

Since 1989, 64 peace officers have been killed in the line of duty. Seven were killed in 1998.

 $\blacksquare$  ARRESTS  $\succ$ 

**CJSC HOME PAGE** 

Since 1989, the homicide crime rate for peace officers killed in the line of duty has increased 20.9 percent per 100,000 respective population (8.6 to 10.4).

 $\blacksquare$  APPENDIX  $\triangleright$ 

• AG HOME PAGE

#### **HOMICIDE CRIMES**

Homicide is defined by the FBI's Uniform Crime Reporting (UCR) Program as the "willful (nonnegligent) killing of one human being by another." The homicide category comprises murder and nonnegligent manslaughter. Attempted murder, justifiable homicide, manslaughter by negligence, and suicide are excluded. Data depicting homicide in California have been collected and published for over 45 years.

From 1997 to 1998:

- The homicide rate per 100,000 population decreased 16.7 percent (7.8 to 6.5).
- The number of homicides decreased 15.9 percent (from 2,579 to 2,170).

Comparing 1989 to 1998:

- The homicide rate per 100,000 population decreased 40.9 percent (11.0 to 6.5).
- The number of homicides decreased 31.3 percent (from 3,159 to 2,170).

Comparing 1952 to 1998:

- The homicide rate per 100,000 population increased 170.8 percent (2.4 to 6.5).
- The number of homicides increased 677.8 percent (from 279 to 2,170).

The 1998 homicide rate of 6.5 is the lowest since 1968 and represents the fifth consecutive year of decline.

#### Table N-1 HOMICIDE CRIMES, 1952-1998 Number and Rate per 100,000 Population

| Year(s) | Number | Rate |
|---------|--------|------|

#### Chart 1 VIOLENT CRIMES, 1989-1998 Rate per 100,000 Population

Source: Table 1.

There are four offenses classified as violent crimes by the FBI: homicide, forcible rape, robbery, and aggravated assault. For comparison, changes in the rates of the four offenses follow:

From 1997 to 1998:

- Homicide decreased 16.7 percent (7.8 to 6.5).
- Forcible rape decreased 5.5 percent (30.9 to 29.2).
- Robbery decreased 16.9 percent (247.0 to 205.3).
- Aggravated assault decreased 10.1 percent (495.3 to 445.1).

#### Comparing 1989 to 1998:

- Homicide decreased 40.9 percent (11.0 to 6.5).
- Forcible rape decreased 29.8 percent (41.6 to 29.2).
- Robbery decreased 38.7 percent (335.1 to 205.3).
- Aggravated assault decreased 25.8 percent (599.5 to 445.1).

□ Of the four offenses classified as violent crimes by the FBI, homicide maintained the lowest rate per 100,000 population for the years shown and had the highest rate of decline since 1989 (down 40.9 percent).

Charts 2, 3, and 4 display homicide rates per 100,000 population for victims classified by gender, race/ethnic group, and age.

In 1998,

- The total homicide rate was 6.5 per 100,000 population.
- The male homicide rate was over three and onehalf times that of the female homicide rate (10.3 vs. 2.7).
- The black homicide rate was over seven and one-half times that of whites and almost two and one-half times that of Hispanics (22.6 vs. 3.0 and 9.6, respectively).

Comparing 1989 to 1998:

- The male homicide rate decreased 39.8 percent. The female homicide rate decreased 41.3 percent.
- The white homicide rate decreased 42.3 percent, the Hispanic homicide rate decreased 36.4 percent, and the black homicide rate decreased 53.7 percent.

□ Since 1989, homicide rates have decreased for all gender and race/ethnic groups shown. Blacks experienced the highest rate of decline (down 53.7 percent) but continue to maintain substantially higher homicide victimization rates compared to whites

#### Chart 2

HOMICIDE CRIMES, 1989-1998 By Gender of Victim Rate per 100,000 Population

Chart 3 HOMICIDE CRIMES, 1989-1998 By Race/Ethnic Group of Victim Rate per 100,000 Population

Source: Table 3.

and Hispanics.

Chart 4 HOMICIDE CRIMES, 1989-1998 By Age of Victim Rate per 100,000 Population

Source: Table 4.

#### In 1998,

Persons aged 18-29 had the highest homicide victimization rate (17.0 per 100,000 population).

Comparing 1989 to 1998:

The homicide rate decreased 31.9 percent for victims under age 18, 22.0 percent for victims aged 18-29, 45.3 percent for victims aged 30-39, and 43.9 percent for victims aged 40 and over.

Since 1989, homicide rates have decreased for all age categories shown. Persons aged 18-29, however, continue to maintain the highest homicide victimization rate (in 1998, the rate was five times that of victims under age 18, two times that of victims aged 30-39, and four and one-half times that of victims aged 40 and over).

In 1998,

- Males represented 79.6 percent of total homicide victims; they comprised 50.2 percent of the population.
- Females represented 20.4 percent of total homicide victims; they comprised 49.8 percent of the population.

Chart 5 HOMICIDE CRIMES, 1998 By Gender of Victim

Source: Table 5.

Chart 6 HOMICIDE CRIMES, 1998 Gender of Victim by Percent of Total Victims and Percent of Population

As homicide victims, males are statistically over-represented when compared to females. Chart 7 HOMICIDE CRIMES, 1998 By Race/Ethnic Group of Victim

Source: Table 6.

Note: Percentages may not add to 100.0 because of independent rounding.

#### Chart 8

HOMICIDE CRIMES, 1998

Race/Ethnic Group of Victim by Percent of Total Victims and Percent of Population

Note: Percentages may not add to 100.0 because of independent rounding.

#### In 1998,

- Whites represented 24.2 percent of total homicide victims; they comprised 51.5 percent of the population.
- Hispanics represented 44.7 percent of total homicide victims; they comprised 29.9 percent of the population.
- Blacks represented 24.2 percent of total homicide victims; they comprised 6.9 percent of the population.
- The "other" race/ethnic group category represented 6.8 percent of total homicide victims; they comprised 11.7 percent of the population.

As homicide victims, Hispanics and blacks are statistically over-represented when compared to the white and "other" race/ethnic group categories.

In 1998,

- Victims under age 18 represented 14.3 percent of total homicides; this age group comprised 28.1 percent of the population.
- Victims aged 18-29 represented 43.5 percent of total homicides; this age group comprised 16.3 percent of the population.
- Victims aged 30-39 represented 19.9 percent of total homicides; this age group comprised 16.9 percent of the population.
- Victims aged 40 and over represented 22.4 percent of total homicides; this age group comprised 38.7 percent of the population.

Note: Percentages may not add to 100.0 because of independent rounding.

Source: Table 8.

Chart 11

HOMICIDE CRIMES, 1998

Chart 12 HOMICIDE CRIMES, 1998 Race/Ethnic Group of Victim by Age of Victim

Source: Table 9.

#### In 1998,

- More white victims were female than were either Hispanic or black victims (35.8 vs. 13.1 and 16.8 percent, respectively).
- More Hispanic and black victims were aged 18-29 than were white victims (55.0 and 45.0 vs. 23.6 percent, respectively).
- More white victims were aged 40 and over than were either Hispanic or black victims (42.4 vs. 11.4 and 18.4 percent, respectively).

White victims tended to be older, Hispanic and black victims younger.

When homicides were examined by the relationship of the victim to the offender, it was found that:

In 1998,

- 49.6 percent of victims were friends or acquaintances of offenders.
- 5.4 percent of victims were spouses of offenders.
- 7.1 percent of victims were parents or children of offenders.
- 2.7 percent of the relationships of victim to offender fell into the "other relative" category.
- 35.3 percent of victims were strangers to offenders.

Comparing 1989 to 1998:

- The proportion of homicides in which victims were friends or acquaintances of offenders decreased from 51.1 percent in 1989 to 49.6 percent in 1998.
- The proportion of homicides in which victims were strangers to offenders increased from 32.3 percent in 1989 to 35.3 percent in 1998.

#### Chart 15 HOMICIDE CRIMES, 1998 Gender of Victim by Relationship of Victim to Offender

#### In 1998,

- More female victims were spouses of offenders (20.5 percent) than were male victims (1.1 percent).
- More white victims were spouses, parents, or children of offenders than were either Hispanic or black victims (23.0 vs. 8.0 and 7.5 percent, respectively).

Chart 16 HOMICIDE CRIMES, 1998 Race/Ethnic Group of Victim by Relationship of Victim to Offender

Proportionately, females were eighteen and one-half times more likely to be killed by their spouses than were males.

In 1998,

- Victims under age 18 were least likely to be strangers to offenders (25.0 percent) than were victims in any other age group shown.
- More victims aged 18-29 were friends or acquaintances of offenders (56.2 percent) than were victims in any other age group shown.
- More victims aged 40 and over were spouses of offenders (12.3 percent) than were victims in any other age group shown.

Chart 17 HOMICIDE CRIMES, 1998 Age of Victim by Relationship of Victim to Offender

Source: Table 13.

Regardless of age group, the largest proportion of homicide victims were killed by friends or acquaintances.

PLUMAS

SIEF

UOLUMNI

In 1998, eleven of California's 58 counties exceeded the 1998 statewide homicide rate of 6.5 per 100,000 population. When grouped:

- One county had a homicide rate of 10.0 and over per 100,000 population.
- Sixteen counties had homicide rates between 5.0 and 9.9 per 100,000 population.
- Eighteen counties had homicide rates between 0.0 and 4.9 per 100,000 population.
- Homicide rates were not computed for the remaining 23 counties with populations of less than 100,000.

Of the 35 counties for which 1998 homicide rates were computed, Madera County experienced the highest rate per 100,000 population (10.5); Marin County experienced the lowest (0.4).

10.0 and over 5.0 - 9.9 0.0 - 4.9 Rates not computed

CRIMES 13

When homicides were examined by season of incident, it was found that:

In 1998, the incidents that led to death occurred more often in the summer than in any other season (26.2 percent). Chart 19 HOMICIDE CRIMES, 1998 By Season of Incident

Source: Table 15.

Chart 20 HOMICIDE CRIMES, 1989-1998 By Season of Incident

Source: Table 15.

With the exception of 1996, homicides occurred most often during the summertime.

#### Chart 21 HOMICIDE CRIMES, 1998 Race/Ethnic Group of Victim by Average Daily Number of Incidents on Weekdays and Weekends

Source: Table 16.

Chart 22 HOMICIDE CRIMES, 1998 Age of Victim by Average Daily Number of Incidents on Weekdays and Weekends

Source: Table 17.

#### In 1998,

- An average of 5.5 homicide victims were killed each weekday and 7.0 homicide victims were killed each weekend day.
- Hispanic victims had the highest average daily number of incidents on both weekdays and weekends (2.2 and 3.7, respectively) of any race/ethnic group shown.
- Victims aged 18-29 had the highest average daily number of incidents on both weekdays and weekends (2.2 and 3.4, respectively) of any age group shown.
- Regardless of the race/ethnic group or age group shown, the average daily number of incidents on weekends equaled or exceeded the average daily number of incidents on weekdays.

When homicides were examined by location of incident, it was found that:

In 1998,

- 29.0 percent of victims were killed at their places of residence.
- 38.0 percent of homicides occurred on streets or sidewalks.
- 33.0 percent of homicides occurred in "all other" locations.
- More males were killed on streets or sidewalks (44.3 percent) than were females (13.1 percent). Proportionately, more females were killed at their places of residence (56.3 percent) than were males (22.0 percent).

#### Chart 23 HOMICIDE CRIMES, 1998 By Location of Homicide

Source: Table 19.

#### Chart 24 HOMICIDE CRIMES, 1998 Gender of Victim by Location of Homicide

Of the locations shown, males were most likely to be killed on streets or sidewalks and least likely to be killed in their residences; the inverse was true for females.

#### Source: Table 19.

#### Chart 26 HOMICIDE CRIMES, 1998 Age of Victim by Location of Homicide

#### In 1998,

- More whites than Hispanics or blacks were killed at their places of residence (49.1 vs. 20.9 and 25.2 percent, respectively). Conversely, more Hispanics and blacks were killed on streets or sidewalks than were whites (45.9 and 44.9 vs. 20.8 percent, respectively).
- More victims aged 18-29 were killed on streets or sidewalks (48.7 percent) than were victims in any other age group shown.
- More victims aged 40 and over were killed at their places of residence (47.6 percent) than were victims in any other age group shown.

Whites were most likely to be killed in their residences; Hispanics and blacks, on a street or sidewalk.

When homicides were examined by type of weapon used, it was found that:

In 1998,

- 68.8 percent resulted from the use of firearms.
  - 61.6 percent resulted from the use of handguns.
  - 7.2 percent resulted from the use of all other types of firearms.
- 13.5 percent resulted from the use of knives.
- 5.2 percent resulted from the use of personal weapons (hands, feet, etc.).
- 5.5 percent resulted from the use of blunt objects (clubs, etc.).
- 6.9 percent resulted from the use of weapons grouped in the "all other" category.

Comparing 1989 to 1998:

- The proportion of homicides that resulted from the use of firearms increased from 65.7 percent in 1989 to 68.8 percent in 1998.
- The proportion of homicides that resulted from the use of nonfirearms decreased from 34.3 percent in 1989 to 31.2 percent in 1998.

#### Chart 27 HOMICIDE CRIMES, 1998 By Type of Weapon Used

#### Chart 28 HOMICIDE CRIMES, 1989-1998 By Selected Types of Weapons Used

Source: Table 21.

Homicides were committed most often with firearms.

#### Chart 29 HOMICIDE CRIMES, 1998 Gender of Victim by Type of Weapon Used

Chart 30 HOMICIDE CRIMES, 1998 Race/Ethnic Group of Victim by Type of Weapon Used

Source: Table 22.

#### In 1998,

- More males were killed with firearms (74.0 percent) than were females (48.2 percent).
- Proportionately, more females were killed with knives, personal weapons, or blunt objects (32.8 percent) than were males (22.1 percent).
- More Hispanics and blacks were killed with firearms than were whites (77.4 and 75.2 vs. 46.9 percent, respectively).

On average, 68.8 percent of all homicide victims were killed with firearms in 1998. The percentage of white homicide victims killed with firearms fell below the average; Hispanics and blacks, above.

In 1998,

- More victims aged 18-29 were killed with firearms (81.6 percent) than were victims in any other age group shown.
- Proportionately, fewer victims aged 40 and over were killed with firearms (52.0 percent) than were victims in any other age group shown.

Chart 31 HOMICIDE CRIMES, 1998 Age of Victim by Type of Weapon Used

Source: Table 23.

Over 81 percent of homicide victims aged 18-29 were killed with firearms.

#### Chart 32 HOMICIDE CRIMES, 1998 By Contributing Circumstance

Source: Table 24. Note: Percentages may not add to 100.0 because of independent rounding.

#### Chart 33 HOMICIDE CRIMES, 1989-1998 By Selected Contributing Circumstances

Source: Table 24.

### When homicides were examined by contributing circumstance, it was found that:

In 1998,

- 11.2 percent occurred as a result of a rape, robbery, or burglary.
- 46.7 percent occurred as a result of an argument.
- 22.0 percent were gang-related.
- 5.9 percent were drug-related.
- 14.1 percent occurred as a result of "all other" contributing circumstances.

#### Comparing 1989 to 1998:

- The proportion of homicides in which the contributing circumstance was gang-related increased from 18.5 percent in 1989 to 22.0 percent in 1998.
- The proportion of homicides in which the contributing circumstance was drug-related decreased from 9.8 percent in 1989 to 5.9 percent in 1998.

#### rimes C

In 1998,

- More males were victims of gang-related homicides (26.6 percent) than were females (3.8 percent).
- Proportionately, more whites than Hispanics or blacks were victims of homicides which occurred as a result of an argument (60.4 vs. 40.9 and 44.8 percent, respectively).
- More Hispanics and blacks were victims of gang-related homicides than were whites (32.9 and 22.4 vs. 4.0 percent, respectively).

#### Chart 34 HOMICIDE CRIMES, 1998 Gender of Victim by Contributing Circumstance

Source: Table 25. Note: Charts 32, 35, and 36 include rape with robbery and burglary. However, for a more relevant comparison between male and female victims, rape is included in the "all other" category in Chart 34. In 1998, 2.5 percent of homicide crimes involving females were rape-related.

Source: Table 25.

#### Chart 37 HOMICIDE CRIMES CLEARED, 1989-1998 Clearance Rate

#### Source: Table 29.

Note: A clearance rate is the percentage of crimes (homicides) reported that have been cleared. It is calculated by dividing the number of homicides cleared by the number of homicides reported. The result is multiplied by 100.

#### In 1998,

- Most homicide victims under age 5 were killed as a result of child abuse (75.9 percent).
- More homicide victims aged 5-17 were killed as a result of gang- or drug-related activities (41.5 percent) than from any other contributing circumstance shown.
- More homicide victims aged 18-59 and aged 60 and over were killed as a result of an argument (51.8 and 47.2 percent, respectively) than from any other contributing circumstance shown.

□ In 1998, 63.1 out of every 100 homicides were cleared by an arrest, the highest clearance rate for the years shown.

### arrests

#### **HOMICIDE ARRESTS**

Unlike crimes, which are classified by nationwide Uniform Crime Reporting (UCR) standards, arrests are reported by California statute definition of the offense.<sup>1</sup> This may cause some differences in the definitions of certain crimes and the reporting of the arrests for those crimes. For instance, the California definition of a homicide arrest includes murder and *nonvehicular* manslaughter. The federal definition of a homicide crime includes murder and *nonnegligent* (nonaccidental) manslaughter.

All California law enforcement agencies report arrest and citation information to the California Department of Justice on the "Monthly Arrest and Citation Register," which lists each arrestee; includes information about age, gender, and race/ethnic group; and specifies the "most serious" arrest offense and law enforcement disposition. Chart 38 HOMICIDE ARRESTS, 1998

Source: Table 31.

In 1998, of 2,117 arrests for homicide:

- 88.3 percent of arrestees (1,870) were male.
- 11.7 percent (247) were female.

☐ In 1998, the majority of homicide arrestees and victims were male (88.3 and 79.6 percent, respectively) (see <u>Tables 5</u> and <u>31</u>).

 The following penal codes for homicide arrest offenses were valid at the time of the closeout of the 1998 arrest offense code file: 128, 187(a), 189, 192(a), 192(b), 193(a), 193(b), 273ab, 399, 12310(a).

#### Chart 39 HOMICIDE ARRESTS, 1998 By Race/Ethnic Group of Arrestee

Source: Table 32.

Chart 40 HOMICIDE ARRESTS, 1998 By Age of Arrestee

Source: Table 33.

#### In 1998, of 2,117 arrests for homicide:

- 22.9 percent of arrestees (484) were white.
- 46.6 percent (987) were Hispanic.
- 22.2 percent (470) were black.
- 8.3 percent (176) fell into the "other" race/ethnic group category.

#### And,

- 14.5 percent of arrestees (308) were under age 18.
- 58.8 percent (1,244) were aged 18-29.
- 14.3 percent (302) were aged 30-39.
- 12.4 percent (263) were aged 40 and over.

□ In 1998, the largest proportion of homicide arrestees and victims were Hispanic (46.6 and 44.7 percent, respectively). The majority of homicide arrestees were aged 18-29 (58.8 percent) and the largest proportion of homicide victims were aged 18-29 (43.5 percent). (See <u>Tables 6</u>, <u>7</u>, <u>32</u>, and <u>33</u>.)

### arrests

In 1998,

Homicide arrestees for all three race/ethnic groups shown were predominately male.

# dispositions

#### DISPOSITIONS OF ADULTS ARRESTED FOR HOMICIDE

This section of the report describes 1998 dispositions of adults arrested for homicide, regardless of the year of arrest. Data were obtained from California's Offender-Based Transaction Statistics (OBTS) system. This system tracks the processing of adults arrested for felony offenses from arrest through final disposition using data compiled from information collected on fingerprint cards and "Disposition of Arrest and Court Action" (JUS 8715) forms.

#### Chart 43 DISPOSITIONS IN 1998 OF ADULTS ARRESTED FOR HOMICIDE By Type of Disposition

Source: Table 36.

Note: Percentages may not add to 100.0 because of independent rounding.

#### Chart 44 DISPOSITIONS IN 1998 OF ADULTS ARRESTED FOR HOMICIDE Gender of Arrestee by Type of Disposition

Source: Table 37.

### Examination of 1998 dispositions of adults arrested for homicide found that:

- 11.4 percent were released at the law enforcement level or had a complaint denied at the prosecutorial level.
- 13.4 percent were either dismissed or acquitted.
- 75.1 percent were convicted of homicide or some other offense.

And,

Males were more likely to be convicted than females (76.4 vs. 64.2 percent).

# dispositions

In 1998,

The proportions of whites, Hispanics, and blacks arrested for homicide and convicted of homicide or some other offense were approximately the same (79.2, 79.4, and 76.9 percent, respectively).

And,

Proportionately, more arrestees under age 18 were convicted (91.4 percent) than were arrestees in any other age group shown. (The "under 18" age group includes juveniles remanded to adult court.) Chart 45

Source: Table 41.

#### Chart 48

DISPOSITIONS IN 1998 OF ADULTS ARRESTED FOR HOMICIDE AND CONVICTED Gender of Offender by Convicted Offense

Source: Table 42.

### Of those adults arrested for homicide who were convicted in 1998, it was found that:

- 63.9 percent were convicted of homicide.
- 36.1 percent were convicted of lesser crimes such as robbery or assault.

And,

More males were convicted of homicide (65.8 percent) than were females (45.3 percent).

# dispositions

In 1998,

Proportionately, more blacks were convicted for homicide than were whites or Hispanics (77.3 vs. 63.1 and 63.6 percent, respectively).

And,

Proportionately, more arrestees under age 18 were convicted of homicide (77.4 percent) than were arrestees in any other age group shown. Chart 49

### death penalties

#### DEATH PENALTY SENTENCES

This section contains information about persons sentenced to death in California courts in 1998. Death penalty data were extracted from the 1998 Offender-Based Transaction Statistics (OBTS) system. For detailed information regarding the death penalty and the criteria by which a person can be sentenced to death, refer to California Penal Code sections 190 through 190.9.

Source: Table 44.

During 1998, 32 persons were convicted of first-degree murder and sentenced to death. These were initial death sentences only and do not include persons who were resentenced to death after their death sentences were reversed on appeal. By the end of 1998, 516 persons were under sentence of death in California.

Of the 32 persons newly sentenced to death in 1998:

- 30 were male; two were female.
- Five were white; 18 were Hispanic; and nine were black.
- The mean (average) age at arrest was 27.
- Los Angeles County sentenced the largest number: 16.

Additional information can be found in Tables 44 and 45.

### peace officers killed

### PEACE OFFICERS KILLED IN THE LINE OF DUTY

Information about peace officers killed in the line of duty was obtained from the Homicide File. Only sworn officers *feloniously* killed in the line of duty are included. (Sworn officers accidentally killed in the line of duty and non-sworn officers, such as security guards, are excluded.)

Data in Tables N-2 and N-3 show that:

- From 1989-1998, 64 peace officers were killed in the line of duty. The average number of peace officers killed annually was 6.4. In 1998, seven were killed.
- In 1998, five peace officers were killed with handguns and two were killed with rifles.

Table N-2 PEACE OFFICERS KILLED IN THE LINE OF DUTY, 1989-1998

\_\_\_\_

| Year(s) | Number of officers killed |
|---------|---------------------------|
| Total   | 64                        |
| 1998    | 7                         |
| 1997    | 7                         |

HOMICIDE CRIMES AND PEACE OFFICERS KILLED IN THE LINE OF DUTY, 1989-1998 Rate per 100,000 Respective Population

Source: Table 46.

Data in Table N-4 show that:

In 1998, all seven peace officers killed in the line of duty were male; six were white and one was Hispanic.

When homicide rates for the general population were compared to homicide rates for peace officers killed in the line of duty, it was found that:

In 1998,

The general population homicide rate was 6.5 per 100,000 respective population. The homicide rate for peace officers killed in the line of duty was 10.4 per 100,000 respective population.

Comparing 1989 to 1998:

The general population homicide rate decreased 40.9 percent (11.0 to 6.5). The homicide rate for peace officers killed in the line of duty increased 20.9 percent (8.6 to 10.4).

### justifiable homicides

#### JUSTIFIABLE HOMICIDES

A justifiable homicide is defined by the Uniform Crime Reporting (UCR) Program as the killing of a felon by a private citizen or by a peace officer during the commission of a felony. Justifiable homicides are sometimes referred to as excusable or noncriminal homicides.

When justifiable homicides were examined, it was found that:

In 1998,

- 98.2 percent of felons killed by peace officers were male; 1.8 percent were female.
- 95.7 percent of felons killed by private citizens were male; 4.3 percent were female.

#### Chart 54

JUSTIFIABLE HOMICIDES BY PEACE OFFICERS OR PRIVATE CITIZENS, 1998 By Gender of Deceased

Source: Table 48.

#### Chart 55 JUSTIFIABLE HOMICIDES BY PEACE OFFICERS OR PRIVATE CITIZENS, 1998 By Race/Ethnic Group of Deceased

Source: Table 48.

#### Chart 56 JUSTIFIABLE HOMICIDES BY PEACE OFFICERS OR PRIVATE CITIZENS, 1998 By Age of Deceased

Source: Table 48.

#### In 1998,

- 40.0 percent of felons killed by peace officers were white, 37.3 percent were Hispanic, 15.5 percent were black, and 7.3 percent fell into the "other" race/ethnic group category.<sup>1</sup>
- 15.2 percent of felons killed by private citizens were white, 34.8 percent were Hispanic, 45.7 percent were black, and 4.3 percent fell into the "other" race/ethnic group category.
- 8.2 percent of felons killed by peace officers were under age 18, 42.7 percent were aged 18-29, 24.5 percent were aged 30-39, 22.7 percent were aged 40 and over, and 1.8 percent fell into the "unknown" age category.<sup>1</sup>
- 2.2 percent of felons killed by private citizens were under age 18, 60.9 percent were aged 18-29, 28.3 percent were aged 30-39, and 8.7 percent were aged 40 and over.<sup>1</sup>

<sup>1</sup> Percentages may not add to 100.0 because of independent rounding.

### justifiable homicides

### When justifiable homicides were examined by location, it was found that:

In 1998,

- Most felons were killed by peace officers on a street or sidewalk (64.5 percent).
- The largest proportions of felons killed by private citizens fell into the "citizen's, shared residence" and "street, sidewalk" categories (both 28.3 percent).

By Contributing Circumstance

Source: Table 50.

Chart 60 JUSTIFIABLE HOMICIDES BY PRIVATE CITIZENS, 1998 By Contributing Circumstance

When justifiable homicides were examined by contributing circumstance, it was found that:

In 1998,

- Most felons killed by peace officers were killed while attacking a peace officer (77.3 percent).
- Most felons killed by private citizens were killed during the commission of a crime (60.9 percent).

### appendix I

#### **COMPUTATIONAL FORMULAS**

**ARREST RATE** - An arrest rate describes the number of arrests made by law enforcement agencies per 100,000 total population or per 100,000 population considered to be at risk for arrest. Regardless of the population used, both rates are calculated in the same manner. An arrest rate is calculated by dividing the number of reported arrests by the respective population; the result is multiplied by 100,000. For example, in 1998 there were 2,117 homicide arrests. The total population was 33,494,000 and the total population at risk (10-69 years of age) was 25,263,064.

 $\frac{2,117}{33,494,000} = 0.0000632 \times 100,000 = 6.3 \text{ per } 100,000 \text{ population}$  $\frac{2,117}{25,263,064} = 0.0000837 \times 100,000 = 8.4 \text{ per } 100,000 \text{ population at risk}$ 

**CLEARANCE RATE** - A clearance rate is the percentage of crimes reported that have been cleared. It is calculated by dividing the number of crimes cleared by the number of crimes reported. The result is multiplied by 100. For example, in 1998 there were 1,369 homicides cleared and 2,170 homicides reported. This equals a homicide clearance rate of 63.1 percent.

$$\frac{1,369}{2,170} = 0.6308755 \times 100 = 63.1 \text{ percent}$$

**CRIME RATE** - A crime rate describes the number of crimes reported to law enforcement agencies per 100,000 total population. A crime rate is calculated by dividing the number of reported crimes by the total population; the result is multiplied by 100,000. For example, in 1998 there were 2,170 homicides in California and the population was 33,494,000. This equals a homicide crime rate of 6.5 per 100,000 general population.

 $\frac{2,170}{33,494,000} = 0.0000647 \times 100,000 = 6.5$ 

**PERCENT CHANGE** - A percent change describes a change in number or rate from one year to another. A percent change is calculated by subtracting base year data from current year data. The result is divided by base year data and multiplied by 100. For example, in 1998 the homicide crime rate was 6.5. In 1989 the homicide crime rate was 11.0. The percent change in rate from 1989 to 1998 is a 40.9 percent decrease.

 $\frac{6.5 - 11.0}{11.0} = -0.4090909 \times 100 = -40.9 \text{ percent}$ 

**POPULATION AT RISK** - Arrest section data tables include three comparison populations: total (10-69 years of age), adult (18-69 years of age), and juvenile (10-17 years of age).

When a series of rates are calculated using different populations, the rate calculated for the total will not be equal to the sum of the rates calculated for each subtotal. For example, the total arrest rate (calculated using the *total* at-risk population) will not equal the sum of the adult arrest rate (calculated using the *adult* at-risk population) and the juvenile arrest rate (calculated using the *juvenile* at-risk population).

## appendix II

#### **CRIMINAL JUSTICE GLOSSARY**

**ACQUITTAL:** a judgment of a court, based either on the verdict of a jury or a judicial officer, that the defendant is not guilty of the offense(s) for which he/she was tried.

ADULT: a person 18 years of age or older.

AGGRAVATED ASSAULT: an unlawful attack or attempted attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm (UCR definition).

**APPEAL:** a petition initiated by a defendant for a rehearing in an appellate court regarding a previous sentence or motion.

**ARREST:** "... taking a person into custody, in a case and in the manner authorized by law. An arrest may be made by a peace officer or by a private person" (834 PC).

**ARREST RATE:** the number of arrests per 100,000 population. See "Computational Formulas" preceding this glossary for further explanation.

#### CALIFORNIA DEPARTMENT OF THE YOUTH AUTHORITY (CYA): the state agency which has

jurisdiction over and maintains institutions as correctional schools for the reception of wards of the juvenile court and other persons committed from lower and superior courts.

**CLEARANCE:** an offense is "cleared by arrest" or solved, for crime reporting purposes, when at least one person is arrested, charged with the commission of an offense, and turned over to a court for prosecution. Although no physical arrest is made, a clearance by arrest can be claimed when an offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities. An offense can also be "cleared exceptionally" for crime reporting purposes when an investigation has definitely established the identity of an offender; there is enough information to support an arrest; and the exact location of an offender is known but, for some reason, law enforcement cannot take the offender into custody.

**CLEARANCE RATE:** the percentage of crimes reported that have been cleared.

**COMBINED CASES:** cases rejected by the prosecutor in favor of other counts/cases.

**COMPLAINT:** a verified written accusation, filed by a prosecuting attorney with a local criminal court, which charges one or more persons with the commission of one or more offenses.

**CONVICTION:** a judgment, based either on the verdict of a jury or a judicial officer or on the guilty plea of the defendant, that the defendant is guilty.

**CRIME:** ". . . an act committed or omitted in violation of a law forbidding or commanding it. . ." (15 PC).

**CRIME RATE:** the number of reported crimes per 100,000 general population. See "Computational Formulas" preceding this glossary for further explanation.

CYA: see "California Department of the Youth Authority."

**DISMISSAL:** a decision by a judicial officer to terminate a case without a determination of guilt or innocence.

**DISPOSITION - COURT:** an action taken as the result of an appearance in court by a defendant. Examples are: adults - dismissed, acquitted, or convicted; juveniles dismissed, transferred, or remanded to adult court.

**DISPOSITION - LAW ENFORCEMENT:** an action taken as the result of an arrest. Examples of police dispositions are: adults - released by law enforcement, referred to another jurisdiction, or a misdemeanor or felony complaint sought; juveniles - handled within the department, referred to another agency, or referred to the probation department or juvenile court.

**DISPOSITION - PROSECUTOR:** an action taken as the result of a complaint requested by an arresting agency. Dispositions include granting a misdemeanor or a felony complaint or denying a complaint for reasons such as lack of sufficient evidence or complainant refuses to testify.

**DIVERSION:** a disposition of a criminal defendant either before adjudication or following adjudication, but prior to sentencing, in which the court directs the defendant to participate in a work, educational, or rehabilitative program.

**DIVERSION DISMISSED:** the successful completion of a diversion program.

FELON: one who has committed a felony.

**FELONY:** a crime which is punishable by death or by imprisonment in a state prison (17 & 18 PC).

**FILING:** a document filed with the municipal court clerk or county clerk by a prosecuting attorney alleging that a person committed or attempted to commit a crime.

**FORCIBLE RAPE:** the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are included (UCR definition).

**HOMICIDE:** the willful (nonnegligent) killing of one human being by another. Murder and nonnegligent manslaughter are included (UCR definition).

**JAIL:** a county or city facility for incarceration of sentenced and unsentenced persons.

JUVENILE: a person under the age of 18.

**LOWER COURT:** the court of original or trial jurisdiction for the prosecution of persons accused of misdemeanor or certain felony offenses. Also, lower courts may sentence certain felony offenders as well as conduct preliminary hearings to determine probable cause in cases where felony offenders are subject to the jurisdiction of superior courts.

**MISDEMEANOR:** a crime punishable by imprisonment in a county jail for up to one year.

#### MONTHLY ARREST AND CITATION REGISTER

(MACR): a reporting system used to collect information on adult and juvenile arrests and citations by police and sheriffs' departments. This register contains data on arrest offenses, arrestee characteristics (age, gender, and race/ ethnic group), and law enforcement dispositions.

#### **OFFENDER-BASED TRANSACTION STATISTICS**

**(OBTS):** a system designed to collect statistical information on the various processes within the criminal justice system that occur between the point of the felony arrest of an adult and the point of final disposition.

**OFFENSE:** the charged offense is the crime for which the defendant was arrested or filed on by the district attorney. The convicted offense is the offense the defendant was convicted of or pled guilty to in court.

**PC (PENAL CODE):** the California Penal Code contains statutes that define criminal offenses and specify corresponding punishments. Criminal justice system mandates and procedures are also included.

**POPULATION AT RISK:** that portion of the total population, who because of like characteristics to the specific study group, are considered "at risk." For example, if one were studying juvenile arrestees, all persons between 10 and 17 years of age would constitute the at-risk population.

**PRISON:** a state correctional facility where persons are confined following conviction for a felony offense.

**PROBATION:** a judicial requirement that a person fulfill certain conditions of behavior in lieu of a sentence to confinement. See "Straight Probation."

**PROBATION WITH JAIL:** a type of disposition given upon conviction which imposes a jail term as a condition of probation.

**RATE:** a comparison of a number of events to a population.

**REMAND:** to send back (a case) to another court for further action.

**ROBBERY:** the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by creating fear in the victim (UCR definition).

**SENTENCE:** the penalty imposed by a court upon a convicted person.

**STRAIGHT PROBATION:** probation granted to adults without condition or stipulation that the defendant serve time in jail as a condition of probation.

**SUPERIOR COURT:** the court of original or trial jurisdiction for felony cases and all juvenile hearings. Also, the first court of appeal for lower court cases.

**UNIFORM CRIME REPORTING (UCR):** a federal reporting system which compiles crime data based on information submitted by law enforcement agencies throughout the nation. In California, the Department of Justice administers and forwards these law enforcement data to the federal program.

**VIOLENT CRIMES:** crimes committed against people. This category includes homicide, forcible rape, robbery, and aggravated assault.

YOUTH AUTHORITY: see "California Department of the Youth Authority."

Human blood is heavy, the man that has shed it cannot run away. AFRICAN PROVERB

#### TABLE 2 HOMICIDE CRIMES, 1989-1998 By Gender of Victim Number, Percent, and Rate per 100,000 Population

Notes: Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance. Population breakdowns by gender will not add to total because of variations in population source data. The "percent of population" category for male and female was calculated using the sum of the male and female populations. <sup>1</sup> The "male" category includes homicide victims whose gender could not be determined: 1989 includes 1, 1990 includes 2, 1992 includes 1, 1993 includes 2, 1994 includes 7, 1995 includes 6, and 1997 includes 5.

# TABLE 3 HOMICIDE CRIMES, 1989-1998 By Race/Ethnic Group of Victim Number, Percent, and Rate per 100,000 Population

| Race/ethnic group of victim | 1989       | 1990       | 1991       | 1992       | 1993       | 1994       | 1995       | 1996       | 1997       | 1998       |

Notes: Percentages may not add to 100.0 because of independent rounding. Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance. Population breakdowns by race/ethnic group will not add to total because of variations in population source data. Dash indicates that the percent of population and rate for the "unknown" category cannot be calculated because there are no unknown race/ethnic group population data. The "percent of population" category for race/ethnic group was calculated using the sum of the race/ethnic group populations.

#### TABLE 4 HOMICIDE CRIMES, 1989-1998 By Age of Victim Number, Percent, and Rate per 100,000 Population

| Age of victim             | 1989       | 1990       | 1991       | 1992       | 1993       | 1994       | 1995       | 1996       | 1997       | 1998       |
|---------------------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|
| Total                     |            |            |            |            |            |            |            |            |            |            |
| Number of victims         | 3,159      | 3,562      | 3,876      | 3,920      | 4,095      | 3,699      | 3,530      | 2,910      | 2,579      | 2,170      |

## TABLE 14 - continued HOMICIDE CRIMES, 1989-1998 By County Number and Rate per 100,000 Population

Notes: Dash indicates that a rate is not computed when a county's population is less than 100,000 in a given year. Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance.

TABLE 16 **HOMICIDE CRIMES, 1998** Gender and Race/Ethnic Group of Victim by Day of Incident

Notes: Percentages may not add to subtotals or 100.0 because of independent rounding. Dash indicates that percent distributions are not calculated when the base number is less than 50. Average daily number of incidents may not add to totals because of independent rounding.

<sup>1</sup> There were 365 days in 1998; 261 weekdays and 104 weekend days. The average daily number of incidents for weekdays was calculated by dividing weekday totals by 261. The average daily number of incidents for weekends was calculated by dividing weekend totals by 104.

## TABLE 17 HOMICIDE CRIMES, 1998 Age of Victim by Day of Incident

Notes: Percentages may not add to subtotals or 100.0 because of independent rounding.

Dash indicates that percent distributions are not calculated when the base number is less than 50.

Average daily number of incidents may not add to totals because of independent rounding. <sup>1</sup> There were 365 days in 1998; 261 weekdays and 104 weekend days. The average daily number of incidents for weekdays was calculated by dividing weekday totals by 261. The average daily number of incidents for weekends was calculated by dividing weekend totals by 104.

TABLE 29HOMICIDE CRIMES CLEARED, 1989-1998Number Reported, Number Cleared, and Clearance Rate

<sup>1</sup> A clearance rate is the percentage of crimes (homicides) reported that have been cleared. It is calculated by dividing the number of homicides cleared by the number of homicides reported. The result is multiplied by 100.

Notes: Percentages may not add to 100.0 because of independent rounding. Dash indicates that percent distributions are not calculated when the base number is less than 50. The 1998 data are preliminary and subject to change. <sup>1</sup> The "released" category includes law enforcement releases and complaints denied. "Complaints denied" include single complaints, combined cases, and petitions to revoke probation.

<sup>2</sup> The "dismissed, acquitted" category includes diversions dismissed.
 <sup>3</sup> Age groupings indicate the age of arrestee at time of arrest.
 <sup>a</sup> The "under 18" age group includes juveniles remanded to adult court.

#### TABLE 42 DISPOSITIONS IN 1998 OF ADULTS ARRESTED FOR HOMICIDE AND CONVICTED Gender, Race/Ethnic Group, and Age of Offender by Convicted Offense

Notes: Percentages may not add to subtotals or 100.0 because of independent rounding.

Dash indicates that percent distributions are not calculated when the base number is less than 50.

Data include convictions for both misdemeanors and felonies.

The 1998 data are preliminary and subject to change.

<sup>1</sup> Age groupings indicate the age of offender at time of arrest.

<sup>a</sup> The "under 18" age group includes juveniles remanded to adult court.

TABLE 44 PERSONS UNDER CALIFORNIA SENTENCE OF DEATH, 1978-1998

Source: California Appellate Project.

<sup>1</sup> Persons no longer under sentence of death because of execution, sentence reversal, natural death, suicide, etc.

<sup>2</sup> Total persons under sentence of death on December 31 of each year. Persons with death sentences from more than one county are counted once.

<sup>a</sup> In 1998, two persons already under sentence of death received additional death sentences. Thirty-two initial sentences were imposed with 30 new persons being sentenced.

In 1992, one person already under sentence of death received an additional death sentence. Forty initial sentences were imposed with 39 new persons being sentenced.

<sup>c</sup> In 1991, one person already under sentence of death received an additional death sentence. Twenty-six initial sentences were imposed with 25 new persons being sentenced.

- <sup>d</sup> In 1989, two persons already under sentence of death received additional death sentences.
- Thirty-three initial sentences were imposed with 31 new persons being sentenced.

<sup>e</sup> In 1988, two persons already under sentence of death received additional death sentences. Thirty-four initial sentences were imposed with 32 new persons being sentenced.

In 1987, although six death sentences were reversed, only five persons were no longer under

sentence of death. The sixth person had an additional death sentence from another county. <sup>9</sup> In 1983, two persons already under sentence of death received additional death sentences.

Thirty-five initial sentences were imposed with 33 new persons being sentenced.
