Executive Summary

The California Department of Justice (DOJ) is responsible for collecting and reporting statistics on crime in California. This report, *Crime in California, 2007*, provides statistics on criminal events and processes within the California criminal justice system. As a comprehensive source of statistics, this report is of value to anyone needing information on crime and the administration of criminal justice in California.

Crime in California, 2007, provides data as reported in 2007, as well as statistical comparisons to prior years. The Crimes section provides data on criminal events reported to law enforcement, and the Arrests section reports data on arrests made by law enforcement personnel. The Dispositions section reports statistics on final adult level dispositions, or legal action outcomes, of felony arrests. Adult Corrections provides statistics on the number of adults under supervision during 2007. The Expenditures & Personnel Section reports on the costs and manpower associated with the California criminal justice system. The Other Databases Section includes statistics on Citizens' Complaints Against Peace Officers and Domestic Violence-Related Calls for Assistance. Lastly, the Data Tables Section of the report is comprised of statistical data for current and prior years.

Crimes

The Crimes section (pages 4-25) provides data on criminal events reported to law enforcement.

- ❑ In 2007, the violent crime rate decreased 2.2 percent from 518.4 to 507.0, reaching its lowest level since 1970 (470.8).
- ❑ The decline in the violent crime rate was driven by the decreases in all four violent offense categories.
- ❑ In 2007, the property crime rate decreased 4.6 percent, driven by a 10.1 percent decrease in the motor vehicle theft rate.

Arrests

The Arrests section (pages 26-63) provides data on arrests made by law enforcement personnel.

- ❑ The 2007 total arrest rate of 5,250.3 per 100,000 population at risk is just slightly lower than the 2006 arrest rate of 5,265.1.
- ❑ In 2007, the total felony arrest rate decreased for the second consecutive year. Conversely, the total misdemeanor arrest rate increased for a second consecutive year.

Arrests (cont.)

- ❑ In 2007, the total violent offense arrest rate increased 1.3 percent, while the total property and drug offense arrest rates decreased 3.0 and 8.0 percent, respectively.
- ❑ From 2006 to 2007, the marijuana arrest rate increased 17.7 percent, while the arrest rates for narcotics, dangerous drugs, and “other” drugs decreased 2.9, 15.6, and 8.0 percent respectively.

Dispositions

The Dispositions section (pages 64-73) describes the processing of adults (and in some cases, juveniles) arrested in California for felony offenses from arrest through final disposition at the adult level.

- ❑ In 2007, 69.4 percent of adult felony arrests resulted in conviction.
- ❑ Probation with jail continues to be the most frequent sentence given for adult felony arrest convictions.
- ❑ Individuals convicted of property offenses have a slightly higher chance of being sentenced to a state institution than those convicted of violent offenses.

Adult Corrections

The Adult Corrections section (pages 74-81) provides statistics on the number of adults under supervision during 2007.

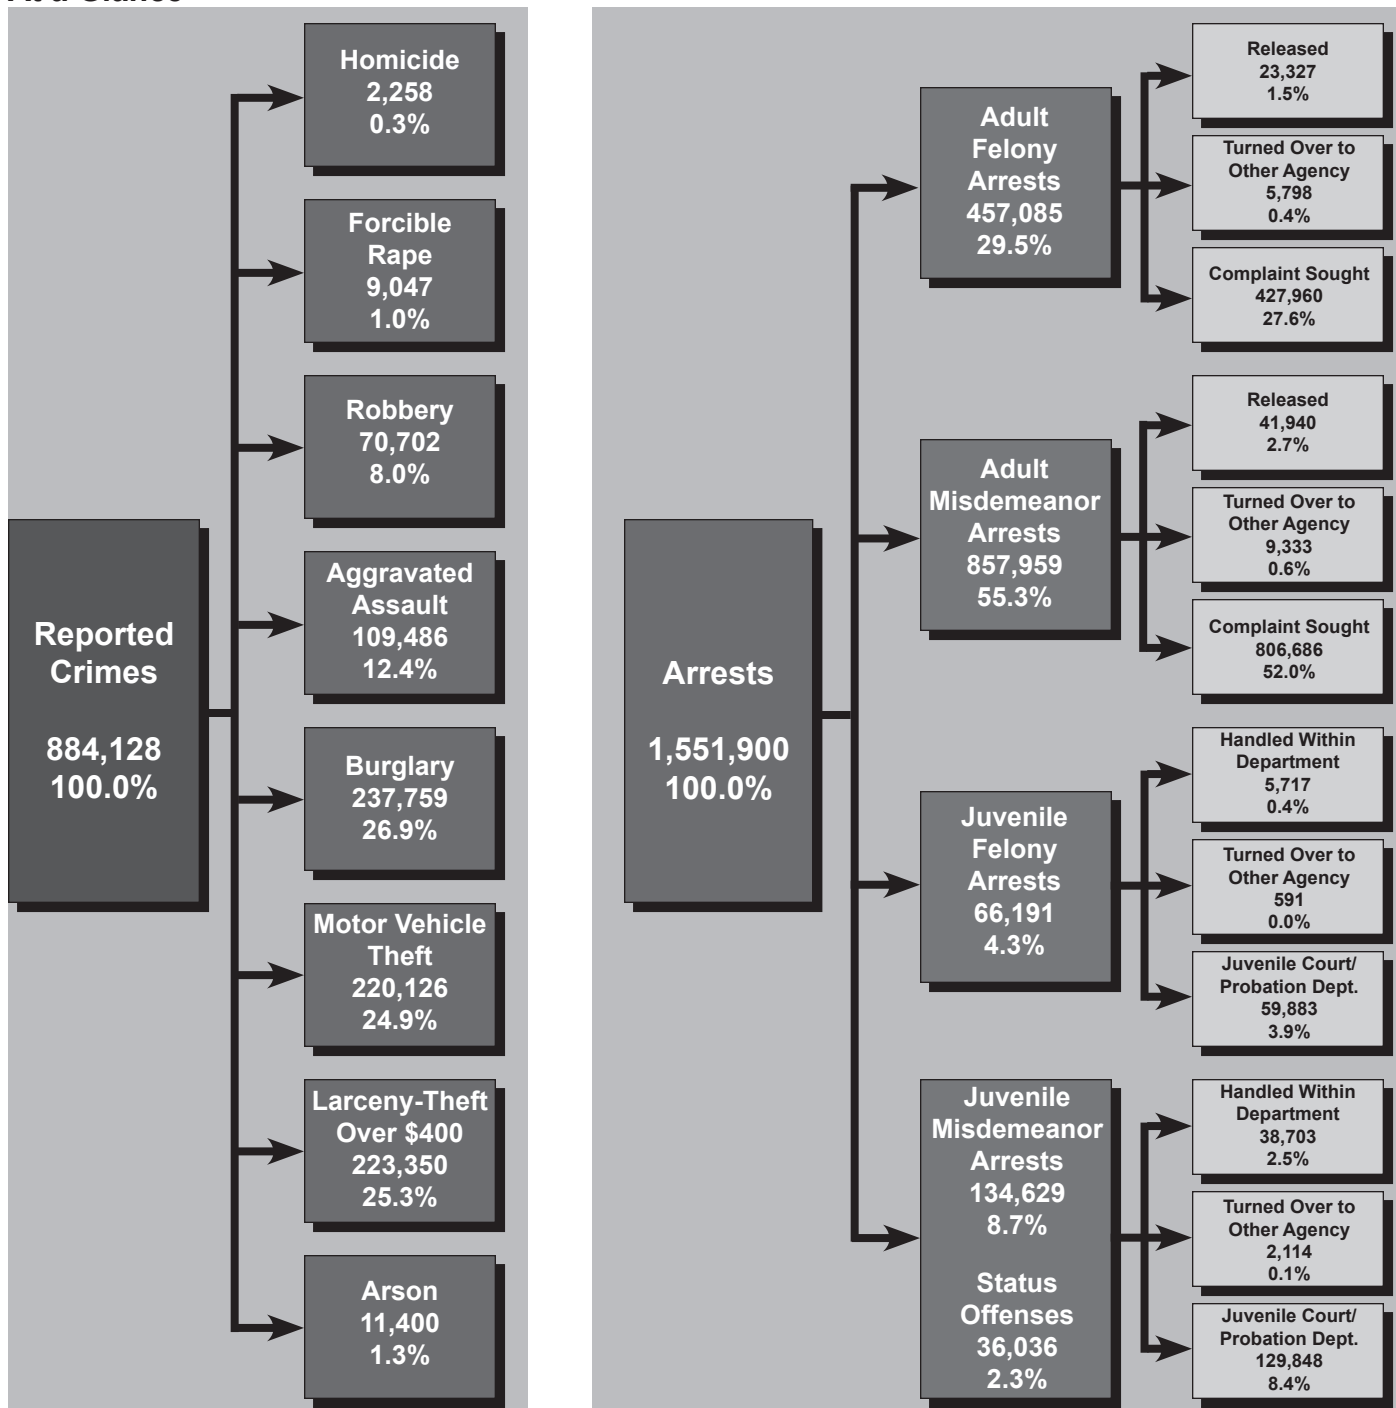

- ❑ From 2006 to 2007, there was a 0.7 percent increase in the rate of adults under state supervision and virtually no change in the rate of adults under local supervision.
- ❑ Since 2002, the rate of adults under state supervision decreased 0.8 percent and the rate of adults under local supervision decreased 3.7 percent.

Acknowledgment

The Department of Justice is mandated by the Legislature to meet the July 1 annual submission of the *Crime in California* report. It is of the utmost importance for law enforcement agencies to submit complete and timely statistical data to the Department of Justice to ensure this mandate is met. As such, appreciation is extended to all law enforcement agencies that have met their reporting requirements.

The criminal justice system has been described as a sequence of events starting with entry into the system, then proceeding to prosecution and pretrial services, adjudication, sentencing and sanctions, and ending with corrections. *Crime in California, 2007* provides insight to this sequence of events by providing information on the number of reported crimes, arrests, dispositions, adult corrections and other relevant information.

Figure 1 provides an overview of this process by showing the number of reported crimes, arrests, and adult felony dispositions reported in 2007. Each measures the end of a stage: crimes are reported after they occur, arrests

are conducted immediately following an observation by an officer or at the conclusion of an investigation, and dispositions are the final stage of the adjudication process. The time between each stage, the reporting parties, and the reporting procedures for each data collection system vary.

While the reader is encouraged to recognize the relationship between crime, arrest and disposition data, the reader is cautioned not to make comparisons. See Appendix 1 for a complete list of data characteristics and known limitations.

Crimes

Section 15 of the California Penal Code defines a crime as "an act specifically prohibited by law or, failure to perform an act specifically required by law for which punishment is prescribed."

In addition to preparing statistical reports such as *Crime in California*, the DOJ compiles and reports data to the Federal Bureau of Investigation (FBI) on crime in California to fulfill the data reporting requirements of the national Uniform Crime Reporting (UCR) program. The UCR program standardizes crime reporting across all states to eliminate differences in Penal Code definitions.

States are required to report statistics on the following eight offenses known as Part 1 crimes: homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. The FBI selected these eight crimes for the UCR because of the seriousness of the offenses, the frequency of occurrence, and the likelihood of their being reported to law enforcement. Other than larceny-theft, the UCR does not count misdemeanors or infractions.

At the DOJ, Part 1 crimes are further categorized as follows: Violent crimes include homicide, forcible rape, robbery, and aggravated assault. Property crimes include burglary, motor vehicle theft, and larceny-theft over \$400.

Some crimes, even Part 1 crimes, are undetected by law enforcement and/or not reported by the public. Undetected and unreported crimes are one reason that crimes in California produce an unknown amount of under-reporting to the DOJ. A second reason for under-reporting is a result of the 'hierarchy rule'. The hierarchy rule is a method used in reporting crime statistics under UCR guidelines whereby only the most serious offense is reported. This is an issue only when multiple offenses occur at the same time, during the same criminal event. For example, if a victim was murdered during a robbery, under the UCR guidelines, only the murder would be reported. There is one exception to the hierarchy rule. Since arson frequently occurs at the same time as other crimes, arson is counted in addition to the most serious offense.

Figure 2
CRIME IN CALIFORNIA, 1983-2007
 By Category
 Rate per 100,000 Population

Source: Table 1.

The above chart displays violent and property crime rates since 1983.

Comparing 1983 to 2007:

- The violent crime rate decreased 34.6 percent (from 775.6 to 507.0).

The violent crime rate increased through the 1980s to a peak in 1992 of almost 1,104 for every 100,000 persons in California. It has since decreased each year, with the exception of a slight increase in 2006, resulting in the current rate of 507 violent crimes for every 100,000 Californians. The rate for 2007 is 54 percent lower than the peak in 1992.

- The property crime rate decreased 43.0 percent (from 3,166.1 to 1,803.6).

The property crime rate in California has fluctuated greatly. Since peaking in 1989 at 3,332 crimes for every 100,000 Californians, the rate declined steadily overall through the 1990s before increasing each year from 2000 through 2005. More recently, California's property crime rate has decreased for each of the last two years.

It should be noted that over the last 25 years, California has experienced changes in laws as well, as data reporting and collection procedures. Such changes can have an effect of increasing or decreasing the number of reported crimes, and therefore, crime rates. In 1986 for example, law enforcement agencies were compelled to report domestic violence as criminal events. The reporting of domestic violence crimes contributed to a 35 percent increase in aggravated assault from 1985 to 1986. Such changes in reporting should be considered when comparing data from year to year.

Violent and Property Crimes

In 2007:

- There were 191,493 violent crimes reported.
- There were 681,235 property crimes reported.

From 2006 to 2007:

- Violent crimes decreased 1.4 percent in number.
- Property crimes decreased 3.7 percent in number.

Comparing 2002 to 2007:

- Violent crimes decreased 7.9 percent in number.
- Property crimes increased 2.0 percent in number.

For the first time since 1999, the number of violent and property crimes both decreased (see Table 1).

Value of Stolen and Recovered Property

As part of the UCR Program, law enforcement agencies report monthly on the estimated dollar value of property stolen and property recovered. While the type of property is categorized in a uniform manner for the reports, agencies do not report the data consistently and vary in their methods of estimating the dollar value of stolen property. Further, property stolen and property recovered in any given time period are not necessarily the same property. For these reasons, dollar values of such property must be viewed as rough estimates.

In 2007, of the total dollar value (\$2,812,907,000) of all property reported stolen:

- Motor vehicles accounted for \$1,339,162,000 (47.6 percent).
- All other property accounted for \$1,473,745,000 (52.4 percent).

In 2007, of the total dollar value (\$911,963,000) of property reported recovered:

- Motor vehicles accounted for \$838,472,000 (91.9 percent).
- All other property accounted for \$73,491,000 (8.1 percent).

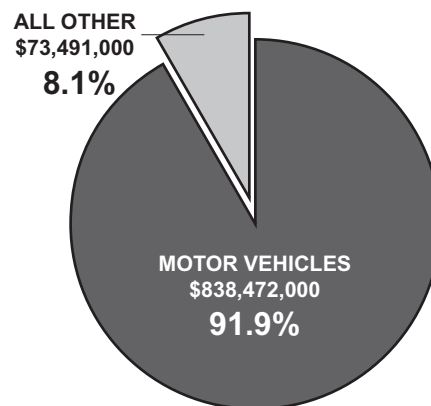

In 2007, the value of stolen motor vehicles made up almost half of the total value of all stolen property in California.

Arson

Arson – Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, or the personal property of another, etc.

In 2007, of the 11,400 arsons reported:

- Structural properties were targeted in 30.2 percent (3,438) of the offenses.
- Mobile properties were targeted in 35.2 percent (4,011) of the offenses.
- Other properties were targeted in 34.7 percent (3,951) of the offenses. Included in this category are crops, timber, fences, signs, etc.

In 2007, the total estimated value of all property damaged was \$223,145,000. The value of damage resulting from arsons directed at:

- Structural properties accounted for \$136,763,000 (61.3 percent).
- Mobile properties accounted for \$45,506,000 (20.4 percent).
- Other properties accounted for \$40,876,000 (18.3 percent).

After a slight increase in 2006, the arson rate decreased 10.9 percent in 2007.

Clearances

Crimes can be cleared by arrests or "exceptional means." An offense is cleared or "solved" for crime reporting purposes when at least one person is arrested, charged with the commission of the crime, and turned over to the court for prosecution or referred to juvenile authorities. In certain situations a clearance may be counted by "exceptional means" when the police definitely know the identity of the offender, have enough information to support an arrest, and know the location of the offender but for some reason cannot take the offender into custody.

A clearance rate is the percentage obtained when the number of clearances reported are divided by the number of crimes reported.

In 2007,

- Homicide had the highest clearance rate (53.5 percent).

Arrests

WHAT IS AN ARREST?

Arrests occur when persons are taken into custody because they are believed to have violated the law. Not all arrests result in persons being placed in jail. Arrestees may be released by the arresting agency, post bail, or released on their own recognizance to appear in court at a later date. Some persons are simply issued citations which direct them to appear in court.

Arrests are divided into two major groups: felony arrests and misdemeanor arrests. An arrest for a felony-level offense can result in a sentence to state prison if the offender is convicted as an adult. An arrest for a misdemeanor-level offense can result in a sentence of up to one year in a county jail, a fine, probation, restitution, or any combination of the four.

Juveniles may also be arrested for truancy, incorrigibility, running away, and curfew violations. These are commonly referred to as status offenses since agency intervention is based solely on the juvenile's status as a minor. Status offenses are acts that would not be "crimes" if committed by adults.

HOW ARE ARRESTS REPORTED?

Unlike crimes, which are classified by nationwide Uniform Crime Reporting (UCR) standards, arrests are reported by the California statute definition of the

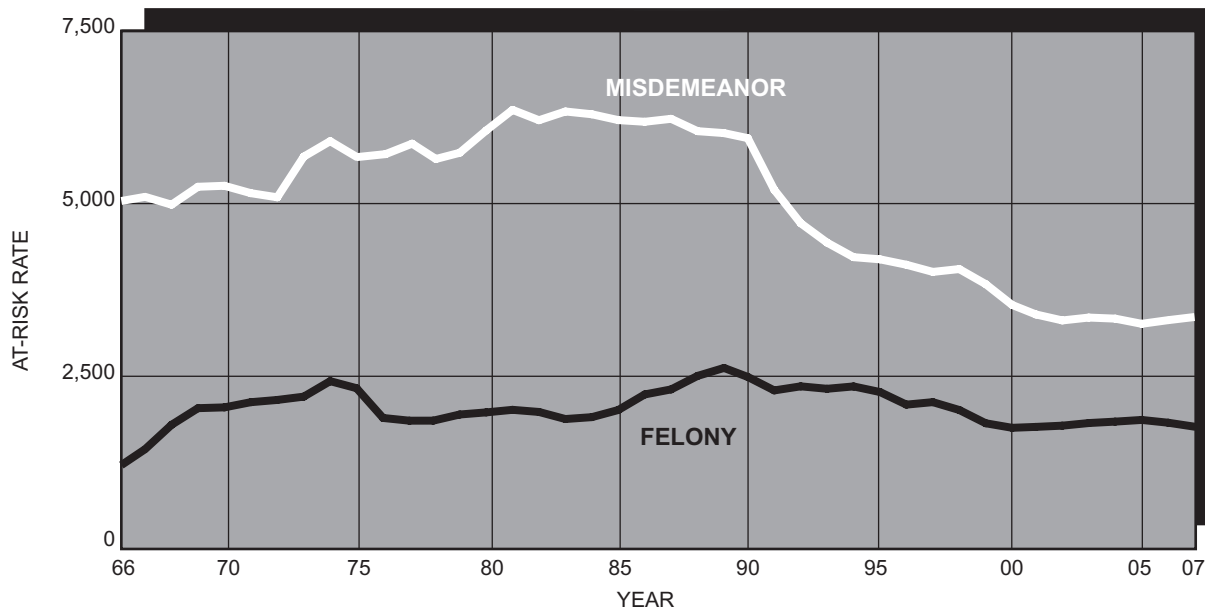

particular offense. This may cause some differences in the definitions of certain crimes and the reporting of the arrests for those crimes. For instance, theft from a locked automobile is a burglary by California Penal Code definition, but according to the UCR definition, the crime would be classified and reported as a theft. The arrest statistics in this section are consistent with the definitions provided by the respective California statute, as shown in Appendix 3.

California law enforcement agencies report arrest and citation information to the DOJ on the Monthly Arrest and Citation Register, which lists each arrestee; includes information on age, gender, race/ethnicity; and specifies the "most serious" arrest offense and law enforcement disposition.

WHAT IS AN AT-RISK ARREST RATE?

An arrest rate describes the number of arrests made by law enforcement agencies per 100,000 total population or per 100,000 population considered to be at risk for arrest. The following section includes three at-risk comparison populations: total (10–69 years of age), adult (18–69 years of age), and juvenile (10–17 years of age). The formula used to calculate at-risk rates can be found in Appendix 2.

Note: The 1995 data include estimates. See Appendix 1, "Data Characteristics and Known Limitations."

The above chart displays arrest rates by year since 1966. Felony and misdemeanor arrest rates are based on population at risk, 10–69 years of age.

POPULATION IN CALIFORNIA, 2007
By Race/Ethnic Group

Note: Beginning in 2004, the "Other" category includes the new race/ethnic group of "Multi-racial."

The subjectivity of the classification and labeling process must be considered in the analysis of race/ethnic group data. As commonly used, race refers to large populations which share certain similar physical characteristics such as skin color. Because these physical characteristics can vary greatly within groups as well as between groups, determination of race is frequently, by necessity, subjective. Ethnicity refers to cultural heritage and can cross racial lines. For example, the ethnic designation "Hispanic" includes persons of any race. Most commonly, self-identification of race/ethnicity is used in the classification and labeling process.

Beginning with the *Crime and Delinquency in California, 1991* publication, race/ethnic group designations used for data display purposes are the same as California Department of Finance, Demographic Research Unit, designations.

Dispositions

WHAT IS THE OFFENDER-BASED TRANSACTION STATISTICS (OBTS) SYSTEM?

The Offender-Based Transaction Statistics (OBTS) system describes the processing of adults (and in some cases, juveniles) arrested in California for felony offenses from arrest through final disposition at the adult level. Data on the adjacent flow chart include adult level felony arrests that received final dispositions in 2007 and were added to the Automated Criminal History System (ACHS) by the Department of Justice by April 2008.

WHAT IS A FINAL DISPOSITION?

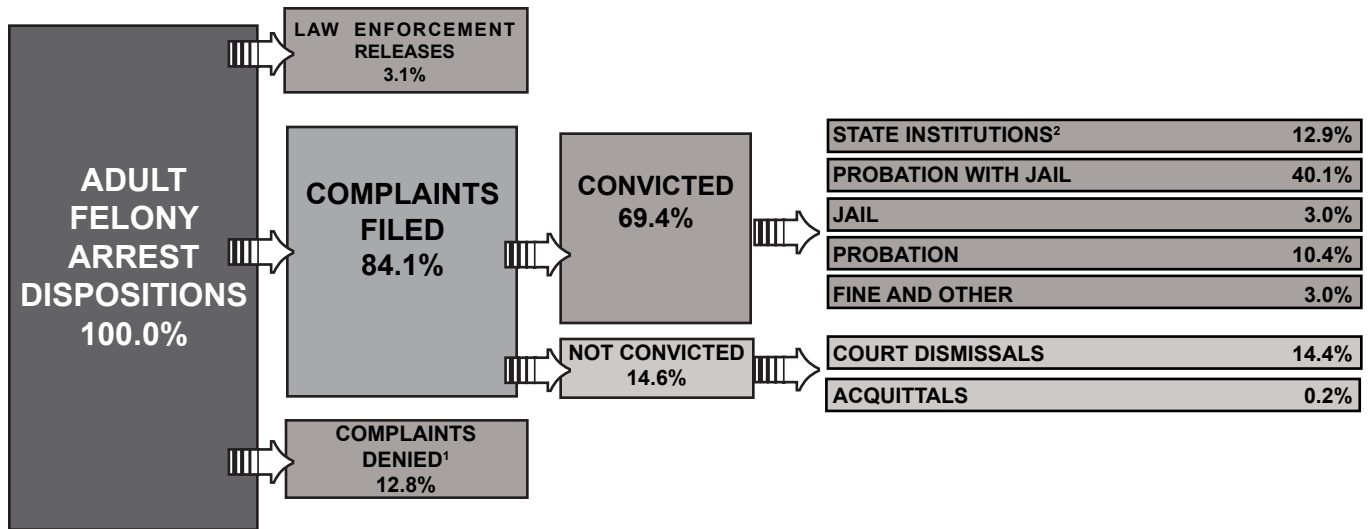

In the OBTS system, the term "final disposition" refers to a specific legal action that takes place following an adult level felony arrest. Final dispositions can occur at the law enforcement, prosecutor, or adult court level. For example, if an arrestee is released by a law enforcement agency, or the complaint is denied by a prosecutor who has determined that there is not enough evidence to justify the filing of a complaint, the release is recorded as a final disposition. If an arrestee is referred to court for adjudication, the outcome (e.g., dismissal, diversion dismissal, acquittal, or conviction) is also recorded as a final disposition. "Intermediate" dispositions (e.g., placements into diversionary programs) are not included in the OBTS file.

HOW ARE OBTS DATA REPORTED?

Dispositions of adult felony arrests were reported by approximately 1,200 agencies in 2007. These agencies include law enforcement, prosecutors, and courts in the California criminal justice system.

OBTS data are extracted from the DOJ's Automated Criminal History System (ACHS). The arrest dispositions received illustrate the statewide processing of adult felony arrestees through California's criminal justice system. Fluctuations in the counts from year to year may not necessarily be due to actual occurrences in the criminal justice system but rather reflect the degree to which dispositions are reported and processed. (See Appendix 1, Data Characteristics and Known Limitations.)

Dispositions for Adult Felony Arrests

Disposition outcomes can be calculated using two different methods. The first is based on total adult felony arrest dispositions and the second is based on total complaints filed. Each is valid and by presenting both, the reader is provided two perspectives from which to evaluate the effectiveness of the criminal justice system.

Disposition outcomes based on total adult felony arrest dispositions describe the overall processing of offenders by the criminal justice system. This method of calculation focuses on the proportion of convictions out of the total number of arrests.

Convicted continues to be the most common type of disposition for adult felony arrests.

Dispositions for Complaints Filed

Figure 92
DISPOSITIONS OF COMPLAINTS FILED
RESULTING FROM ADULT FELONY ARRESTS, 2007
By Type of Disposition

Source: Table 38A.

Disposition outcomes based on total complaints filed describe the processing of defendants in the courts. This method of calculation focuses on those arrests for which a complaint was filed by the district attorney.

A majority (82.6 percent) of all complaints result in a conviction.

Adult Corrections

WHAT IS ADULT CORRECTIONS?

Adults convicted in California courts can be placed under the jurisdiction of either the state correctional system or a correctional system operated by local government. The state correctional system provides confinement, rehabilitation, and parole services for adults and juveniles through the California Department of Corrections and Rehabilitation (CDCR). In addition, offenders in California can be placed in facilities operated by the California Department of Mental Health. Local correctional agencies provide confinement, rehabilitation, and probation services for those sentenced to their care as well as for persons awaiting trial or sentencing.

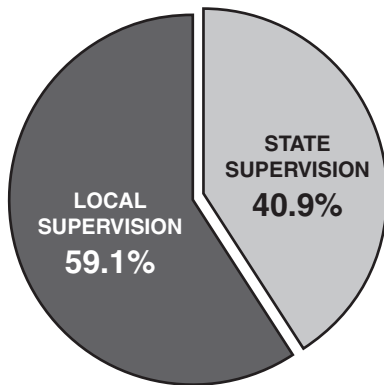

HOW ARE ADULTS UNDER SUPERVISION COUNTED?

At the state level, supervision data are obtained annually from the CDCR. Local level supervision data are obtained from the Corrections Standards Authority (a division of the CDCR) and county probation departments.

This section provides data on adult offenders in California who are under state or local supervision in institutions or receiving parole or probation services.

Expenditures & Personnel

HOW ARE EXPENDITURE AND PERSONNEL DATA REPORTED?

Expenditure data are obtained from the *Governor's Budget* and the annual report of financial transactions concerning cities and counties in California. Both reports are provided by the Controller's office of the State of California.

Included in criminal justice expenditures are salaries and employee benefits, services, and supplies. Capital outlay expenditures, such as prison construction, and expenditures by the Department of Justice and regulatory agencies are excluded.

Personnel data are also obtained from the *Governor's Budget*, the annual report of the Administrative Office of the Courts, and personnel surveys distributed by staff of the Department of Justice. Personnel counts for the Department of Justice and other regulatory agencies are not included.

Note: The 2006/07 expenditure data were not available from the Controller of the State of California in time for inclusion in this publication. Therefore, charts and narrative for expenditure data cover the four-year period, 2001/02 to 2005/06, only.

Note: The 2006/07 criminal justice expenditure data were not available in time for inclusion in this publication.

Criminal justice expenditures are shown in both current and constant dollars.

Comparing fiscal year 2001/02 to 2005/06:

- There was a 29.5 percent increase in current-dollar expenditures and a 7.2 percent increase in constant-dollar expenditures.

Constant dollars are adjusted to reduce the effects of inflation. The State and Local Government Implicit National Deflator, provided by the California Department of Finance, is used to make this adjustment. Fiscal year 1996/97 is used as the base year. Prior publications used a base year of 1980/81.

Expenditures (cont.)

Comparing fiscal year 2001/02 to 2005/06:

- Law enforcement agency expenditures increased 25.5 percent.
- Prosecution agency expenditures increased 28.1 percent.
- Public defense agency expenditures increased 25.6 percent.
- Courts and court-related expenditures increased 2.1 percent.
- Corrections expenditures increased 39.1 percent.

Citizens' Complaints Against Peace Officers

Section 13012 of the California Penal Code states, "The annual report of the department provided for in Section 13010 shall contain statistics showing: . . . (e) The number of citizens complaints received by law enforcement agencies under Section 832.5. These statistics shall indicate the total number of these complaints, the number alleging criminal conduct of either a felony or misdemeanor, and the number sustained in each category. The report shall not contain a reference to any individual agency but shall be by gross numbers only"

Section 832.5(a) of the Penal Code requires that "Each department or agency in this state that employs peace officers shall establish a procedure to investigate complaints by members of the public against the personnel of these departments or agencies, and shall make a written description of the procedure available to the public."

While California Penal Code section 832.5 states that law enforcement agencies are required to report complaints against peace officers, it does not provide for standardization of that reporting. As a result, the definitions and processes used by reporting agencies vary widely. The data provided in this publication are subject to those variations. However, this data is considered accurate based on what the reporting agencies considered relevant to report in order to meet the reporting requirements.

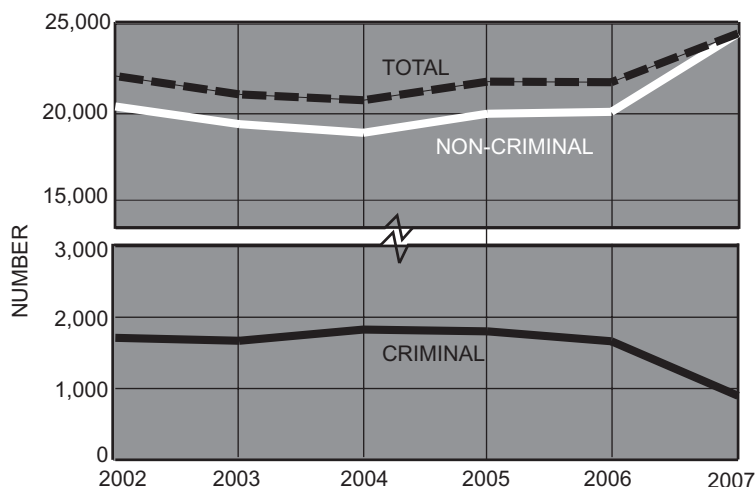

Based on a survey conducted in 2004, it is estimated that complaints from inmates in prisons and jails may constitute approximately one-third of all complaints reported by law enforcement agencies.

Domestic Violence-Related Calls for Assistance

As required by Penal Code section 13730(a), effective January 1, 1986, law enforcement agencies began reporting data on domestic violence-related calls for assistance, including the identification of cases involving the use of a weapon.

Section 13730(b) of the Penal Code instructs the Attorney General to report annually on the number of domestic violence-related calls received statewide, in each county, and by individual law enforcement agencies. Statewide data are reported here. County and agency-level data are published in the *Criminal Justice Profile, 2007* publication series.

Domestic violence is defined as ". . . abuse committed against an adult or a minor who is a spouse, former spouse, cohabitant, former cohabitant, or person with whom the suspect has had a child or is having or has had a dating or engagement relationship." [13700(b) PC]

Within this definition, abuse is further defined as ". . . intentionally or recklessly causing or attempting to cause bodily injury, or placing another person in reasonable apprehension of imminent serious bodily injury to himself or herself, or another." [13700(a) PC]

While the number of Domestic Violence-Related Calls for Assistance decreased 11.2 percent from 2002 to 2007, the number of calls involving a weapon decreased 42.1 percent. The drop in calls involving a weapon may be the result of a change in the "personal weapon" definition and not an actual drop in weapon usage.

Notes: Statewide crime data from 1952-1965 can be found in Table 1 of *Crime in California, 2006*.

Rates may not add to totals because of rounding.

Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance (see Table 58).

^a Prior to 2005, the Los Angeles Police Department had included child abuse and domestic violence simple assaults in their aggravated assault statistics. This change may have contributed to the large decrease in aggravated assaults from 2004 to 2005.

^b Includes estimated annual 1995 data provided by the Oakland Police Department.

¹ Data for larceny theft over \$400 are not available prior to 1983. For additional information, see "Appendix 1, Data Characteristics and Known Limitations."

^a Prior to 2005, the Los Angeles Police Department had included child abuse and domestic violence simple assaults in their aggravated assault statistics. This change may have contributed to the large decrease in aggravated assaults from 2004 to 2005.

¹ Hands, feet, etc.

² Assaults which do not involve the use of a firearm, knife, cutting instrument, or other dangerous weapon and in which there are no serious or aggravated injuries to the victims. Non-aggravated (simple) assaults are not included in the violent crime count. This category is shown here as a means of quality control and for the purpose of looking at total assault violence.

However, since clearance data are only available for total larceny-theft, the property crime clearances and clearance rate are not available. The number of clearances and clearance rate for total larceny-theft are shown. For additional information, see "Appendix 1, Data Characteristics and Known Limitations."

Notes: Statewide arrest data from 1952-1965 can be found in Table 16 of *Crime in California, 2006*.

Since 1966 there have been many changes in laws, data collection procedures, etc.; therefore, caution should be used when comparing data for the 1966-2007 time period.

Juvenile misdemeanor arrest data for 1973-2007 are not comparable to prior years due to changes in reporting criteria.

^a Includes estimated annual data for the Bakersfield Police Department and the Oakland Police Department. For additional information, see "Appendix 1, Data Characteristics and Known Limitations."

¹ Status offenses include truancy, incorrigibility, running away, and curfew violations. These offenses can only be committed or engaged in by a juvenile.

² Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance (see Table 58).

³ Rates are based on the population at risk for each year. The categories are total (10-69 years of age), adult (18-69 years of age), and juvenile (10-17 years of age) (see Table 58).

Notes: Percentages may not add to 100.0 because of rounding.

Data include convictions for both misdemeanors and felonies.

^a Convicted offense category and type of sentence data are not provided for 2002 due to procedural changes that allowed a large percentage of convictions (felony and misdemeanor) to be incorrectly recorded as "all other offenses"; i.e., "violent," "property," and "drug" offenses were under-recorded and "all other offenses" were over-recorded.

¹ The "state institutions" category includes sentences to death, prison, California Rehabilitation Center (Civil Addict), and the Youth Authority.

² "Probation" includes straight probation, fine, and other (no sentence given, sentence suspended, and sentence stayed).

Source: State supervision and jail population data are provided by the California Department of Corrections and Rehabilitation (CDCR).

Notes: State supervision data from 1952-1965 can be found in Table 43 of *Crime in California, 2006*.

Since 1966 there have been many changes in laws, data collection procedures, etc.; therefore, caution should be used when comparing data for the 1966-2007 period. Rates are based on the adult population at risk (18-69 years of age) for each year (see Table 58).

Source: State supervision and jail population data are provided by the California Department of Corrections and Rehabilitation (CDCR).

Notes: Rates may not add to subtotals or total because of rounding.

By statute, interagency transfers between CDCR and Department of Mental Health (DMH) state hospitals may occur.

¹ Counts include felons housed in DMH state hospitals and out of state facilities.

² Outpatients are civil narcotic addicts under parole supervision.

³ Average daily jail populations are for Type II, III, and IV facilities.

⁴ Counts may not add to the total due to projections and rounding of numbers made by the CDCR.

⁵ Rates are based on the adult population at risk (18-69 years of age) for each year (see Table 58).

Notes: Dash indicates that data are not available.

Expenditure data for the Department of Justice and other regulatory agencies are not included.

¹ Expenditures include salaries and employee benefits, services, and supplies.

² The passage of Assembly Bill 196 required that county-level child support programs, previously administered by district attorneys, be operated by local child support agencies. This accounts for the large decrease in prosecution expenditures from 2000/01 to 2001/02.

^a The 2006/07 data were not available from the Office of the State Controller in time for inclusion in this publication.

^b The 1967/68 law enforcement costs do not include state police expenditures.

² Constant-dollar expenditures are calculated according to the State and Local Government National Deflator. Fiscal year 1996/97 is used as the base year to provide a five-year span for comparison. Prior publications used a base year of 1980/81.

Additionally, state police and UC Lawrence-Livermore Lab did not report in 1972 and 1973. Personnel in the Department of Justice and state regulatory agencies are not included.

¹The passage of Assembly Bill 196 required that county-level child support programs, previously administered by district attorneys, be operated by local child support agencies. This accounts for the large decrease in prosecution personnel since 2001.

Notes: Data collection began in 1981.

Because of the individual nature of the requirements of Penal Code section 832.5(a), reporting definitions and procedures vary among reporting agencies.

The data collected under Penal Code section 13012(e) are accurate and complete to the extent that the contributing agency or agencies met reporting obligations.

¹ Based on a survey conducted in 2004, it is estimated that complaints from inmates in prisons and jails may constitute approximately one-third of all complaints reported by law enforcement agencies.

^a The increase in the number of reported non-criminal complaints and the decrease in the number of reported felony complaints are substantially impacted by reporting policy changes made by two law enforcement agencies.

¹ Penal Code section 13730 does not require that the type of weapon involved in a domestic violence-related call be reported.

² Hands, feet, etc.

³ Prior to 1989, the "personal weapon" category was not recognized by all reporting agencies as a type of weapon. When those agencies began reporting personal weapon calls as cases involving weapons, they did not provide the type of weapon designation. This accounts for the large increase in "not reported" weapons in 1989 and 1990.

^a In April 2002, law enforcement agencies were instructed to report personal weapons only if the assault resulted in an injury (aggravated assault).

^b The San Francisco Police Department was unable to provide complete data for 1997, and did not report data for 1998 and 1999 due to computer problems. In 1996, 6,422 domestic violence-related calls for assistance were reported by this department.

^c The Oakland Police Department was unable to provide 1995 data. In 1994, 5,237 domestic violence-related calls for assistance were reported by this department.

^d Data collection began in July 1986; therefore, only six months of data are available and displayed for 1986.

Appendices

DATA CHARACTERISTICS AND KNOWN LIMITATIONS

CRIMES

Uniform Crime Reporting Program (UCR)

- Crime data from the UCR Program have been published continuously for 55 years. Data are available from 1952 to 2007.
- The number of reported homicide, rape, and aggravated assault crimes represents known victims, while for robbery, burglary, larceny-theft, motor vehicle theft, and arson, the number represents known incidents.
- If multiple crimes occur during the same event, only the most serious (based upon a hierarchy) is counted. Arson is the exception.
- In 2003, larceny-theft over \$400 was added to the property crime category to provide a more representative depiction of crime in California. A 1983 California law raised the lower limit of felony theft from \$200 to \$400. Therefore, data for larceny-theft over \$400 have only been available since 1983. Caution should be used when comparing current data to pre-1983 property crime data.
- Prior to 2006, the Los Angeles Police Department had included child abuse and domestic violence simple assaults in their aggravated assault statistics.

ARRESTS

Monthly Arrest and Citation Register (MACR)

- Arrest data from the MACR reporting system date back to 1957. Prior to 1957, only adult felony arrest data were available.
- If a person is arrested for multiple offenses, MACR selects only the most serious offense, based on the severity of possible punishment.
- Felony arrest counts may include some misdemeanor warrants for felony offenses.
- The subjectivity of the classification and labeling process must be considered in the analysis of race/ethnic group data.
- Beginning in 2004, the population category of "other" for race/ethnic group includes the Department of Finance's race/ethnic group of "multi-racial."
- The Bakersfield Police Department was unable to provide arrest data for February through December 1995. The Oakland Police Department was unable to provide any arrest data for 1995. Estimates by both agencies were added to the 1995 statewide totals for publication trend tables.

ADULT FELONY ARREST DISPOSITIONS

Offender-Based Transaction Statistics (OBTS)

- Disposition data from the OBTS system are available from 1975. The OBTS system, which began with a 25 percent sample in four counties in 1973, became operational on a statewide basis in 1975. All 58 counties were reporting by 1978.
- OBTS data are grouped by the year of disposition regardless of the year in which the arrest occurred.
- Adult Felony Arrest Disposition data represent final dispositions equal to approximately 65-75 percent of the total adult felony arrests made during a calendar year.
- Only the final disposition of an arrest event is selected for statistical purposes. Intermediate dispositions (diversion programs, suspended proceedings, reopenings, retrials, or subsequent actions) are not included in OBTS data.
- If a person is arrested for multiple offenses, OBTS selects only the most serious offense, based on the severity of possible punishment. If there are multiple court dispositions, OBTS selects the most serious court disposition and the associated offense.
- OBTS data on state institutional commitments may vary from information compiled and reported by other state agencies because of differences in the data collection systems and criteria.
- The OBTS file includes some persons whose age at arrest was under 18. These minors received a final disposition in adult court under provisions of the Welfare and Institutions Code sections 602, 707(a), 707(b), 707(c), and 707.1(a).
- 2002 OBTS data for convictions by type of offense are not available due to a procedural change that allowed a large percentage of convictions to be incorrectly recorded as "all other offenses." This caused "violent," "property," and "drug" offenses to be under-recorded and "all other offenses" to be over-recorded.
- The 2002 report file was created in May 2004; the 2003 report file in October 2004; the 2004 report file in January 2006; the 2005 report file in April 2006; the 2006 report file in April 2007; and the 2007 report file in April 2008.

ADULT CORRECTIONS

- Adult corrections data are compiled from a number of sources and are complete from 1966. State supervision data are available from 1960, and state institutional data are available from 1952.
- The source for county and city jail data is the Corrections Standards Authority (CSA), "Jail Profile Survey," which is based on type II, III, and IV facilities only. Some juveniles may be included.
- Jail counts may not add to the total due to projections and rounding of numbers made by the CSA.
- Probation data include adults placed on supervised probation only. Court probation, diversion, and summary probation are not included.
- Persons are counted once for each jurisdiction. Therefore, data include original grants of probation and do not include subsequent grants of probation to persons already under probation supervision ordered by the same level court in the same county. Also, the probationers under jurisdiction of both superior and lower courts (or unified courts) and any who are jurisdictional cases of more than one county are counted more than one time in statewide totals.
- From 2001 to 2005, San Francisco did not report adult probation data. San Francisco resumed reporting in 2006.
- The following counties report all their adults on active probation for felony offenses: Contra Costa (2000–2007), Merced (2003–2007), Sacramento (2003–2007), Siskiyou (2000–2007), Tulare (2000–2007), and Yolo (2000–2007).
- In addition to the California Rehabilitation Center (CRC), Civil Narcotic Addicts are also housed at 12 other facilities: Central California Women's Facility, California Institute for Men, California Institute for Women, Deuel Vocational Institution, High Desert State Prison, North Kern State Prison, San Quentin, Substance Abuse Treatment Facility, Valley State Prison, Wasco State Prison, California Correctional Institution, and RJ Donovan Correctional Facility.

CRIMINAL JUSTICE EXPENDITURES AND PERSONNEL

- Expenditure data are available from the 1967/68 fiscal year, and personnel data are available from 1969.
- The UCR definition specifies that law enforcement agencies should only report personnel paid by funds designated for law enforcement.

- Expenditure data for 2006/2007 were not available from the Office of the State Controller in time for inclusion in this publication.
- The 1996 data collection survey forms were revised in an attempt to collect counts on the number of criminal justice personnel employed by prosecutors, public defenders, and probation departments, regardless of the funding source. Prior to 1996, counts excluded state- and federally-funded positions.

CITIZENS' COMPLAINTS AGAINST PEACE OFFICERS

- Data on Citizens' Complaints Against Peace Officers have been collected since 1981. Data are available in a statewide total only.
- Because of the nature of the requirements of Penal Code section 832.5, reporting definitions and procedures may vary among individual reporting agencies.
- Based on a survey conducted in 2004, it is estimated that complaints from inmates in prisons and jails may constitute approximately one-third of all complaints reported by law enforcement agencies.
- In 2007, two law enforcement agencies implemented new reporting policies, substantially impacting the number of reported non-criminal and felony complaints.

DOMESTIC VIOLENCE

- Reporting of Domestic Violence-Related Calls for Assistance began in July 1986. The first full year of reporting was 1987.
- The definition of "domestic violence" is subject to varying interpretations by law enforcement agencies. As a result, different types of domestic relationships are included in the database.
- San Francisco Police Department did not report data from April 1997 to December 1999.
- Included in the data are any cases which resulted in a report being written by the responding law enforcement agencies. Data, therefore, include both cases where an arrest was made and those where circumstances did not warrant an arrest.
- In April 2002, law enforcement agencies were instructed to report personal weapons (hands, fists, or feet) only if the assault resulted in an injury (aggravated assault). This corresponds to a notable decrease in the number of personal weapons reported.

COMPUTATIONAL FORMULAS

CRIMES

Crime rate – A crime rate describes the number of crimes reported to law enforcement agencies for every 100,000 persons within a population. A crime rate is calculated by dividing the number of reported crimes by the total population. The result is then multiplied by 100,000. For example, in 2007 there were 70,702 robberies in California and the population was 37,771,431. This equals a robbery crime rate of 187.2 per 100,000.

$$\frac{70,702}{37,771,431} = .0018718 \times 100,000 = 187.2$$

Clearance rate – A clearance rate describes the percentage of clearances reported to the number of crimes reported. A clearance rate is calculated by dividing the number of clearances by the number of crimes reported. The result is multiplied by 100. For example, in 2007 there were 1,208 clearances for homicide crimes and 2,258 homicides reported. This equals a homicide clearance rate of 53.5 percent.

$$\frac{1,208}{2,258} = .53498 \times 100 = 53.5 \text{ percent}$$

ARRESTS

Arrest rate – An arrest rate describes the number of arrests made by law enforcement agencies per 100,000 total population or per 100,000 population considered to be at risk for arrest. Regardless of the population used, both rates are calculated in the same manner. An arrest rate is calculated by dividing the number of reported arrests by the desired population. The result is multiplied by 100,000. For example, in 2007 there were 523,276 total felony arrests. The total population was 37,771,431 and the population at risk (10–69) was 29,558,540.

$$\frac{523,276}{37,771,431} = .0138537 \times 100,000 = 1,385.4 \text{ per } 100,000 \text{ population}$$

$$\frac{523,276}{29,558,540} = .0177030 \times 100,000 = 1,770.3 \text{ per } 100,000 \text{ population at risk}$$

ADULT CORRECTIONS

Adult correction rate – An adult correction rate describes the number of adults under supervision per 100,000 in the at-risk population. An adult correction rate is calculated by dividing the number of adults under supervision by the adult population at risk (18–69). The result is multiplied by 100,000. For example, in 2007 there were 729,928 adults under state and local supervision and the adult population at risk was 24,902,100. This equals an adult correction rate of 2,931.2 per 100,000 population at risk.

$$\frac{729,928}{24,902,100} = .0293119 \times 100,000 = 2,931.2$$

ADDITIONAL INFORMATION

Percent change – A percent change describes the change in number or rate from one year to another. A percent change is calculated by subtracting the base-year data from the current-year data. The result is divided by the base-year data and multiplied by 100. For example, in 2007 the robbery crime rate was 187.2. In 2002 the robbery crime rate was 183.6. The percent change in rate from 2002 to 2007 is a 2.0 percent increase.

$$\frac{187.2 - 183.6}{183.6} = .01960 \times 100 = 2.0 \text{ percent}$$

Populations at risk – The Arrest section of this report includes three comparison populations: total (10–69 years of age), adult (18–69 years of age), and juvenile (10–17 years of age).

When a series of rates are calculated using different populations, the rate calculated for the total will not be equal to the sum of the rates for the parts. For example, the arrest rate calculated using the total at-risk population will not equal the sum of the juvenile arrest rate (based on the juvenile at-risk population) and the adult arrest rate (based on the adult at-risk population).

Also, the percent changes calculated for these at-risk rates cannot be added. This is because the percent change in the total arrest rate is the result of independent changes in both the number of arrests and the at-risk populations of adults and juveniles.

CRIMINAL JUSTICE GLOSSARY

ACQUITTAL: a judgment of a court, based either on the verdict of a jury or a judicial officer, that the defendant is not guilty of the offense(s) for which he/she was tried.

ADJUDICATION: the formal hearing and settling of a case by judicial procedure.

ADULT: a person 18 years of age or older.

AGGRAVATED ASSAULT: an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm (UCR definition).

ARREST: ". . . taking a person into custody, in a case and in the manner authorized by law. An arrest may be made by a peace officer or by a private person." (834 PC)

ARREST RATE: the number of arrests per 100,000 population. See computational formulas page for further explanation.

ARSON: any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. (UCR definition).

AUTOMATED CRIMINAL HISTORY SYSTEM (ACHS): a centralized, automated system containing criminal history summary information on persons arrested and fingerprinted in California.

AVERAGE DAILY JAIL POPULATION: the average number of inmates housed in a local facility per day. The number includes inmates housed in single cells, double cells, dormitories (multiple occupancy cells), disabled housing, disciplinary segregation, and administrative segregation. The values reported are based upon each facility's "early morning" count. See Type I, II, III, and IV Facilities.

BURGLARY: the unlawful entry of a structure to commit a felony or a theft. Attempted burglary is included (UCR definition).

CALIFORNIA DEPARTMENT OF CORRECTIONS AND REHABILITATION (CDCR): the state agency that operates all state adult prisons and juvenile facilities, oversees a variety of community correctional facilities and other important correctional facility responsibilities, and supervises all adult and juvenile parolees during their reentry into society.

CALIFORNIA REHABILITATION CENTER (CRC): an institution operated by the California Department of Corrections and Rehabilitation, which is designated for the treatment of persons addicted to narcotics or in imminent danger of addiction. Commitment to the facility is by civil procedure only.

CALIFORNIA DEPARTMENT OF THE YOUTH AUTHORITY (CYA): the state agency which has jurisdiction over and maintains institutions as correctional schools for the reception of wards of the juvenile court and other persons committed from criminal courts. (Consolidated with the CDCR and renamed the Division of Juvenile Justice, July 2006.)

CASELOAD: the total number of clients or cases on probation or under supervision with a given agency.

CHARGE: a formal allegation that a specific person has committed a specific offense.

CITATION: a written order, issued by the police for a violation, to appear before a magistrate or probation officer at a later date.

CIVIL COMMITMENT: a type of commitment in which criminal proceedings are suspended while a defendant undergoes treatment at the California Rehabilitation Center (CRC) as a narcotic addict.

CLEARANCE: an offense is cleared or "solved" for crime reporting purposes when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution or cited to juvenile authorities. In certain situations a clearance may be counted by "exceptional means" when the police definitely know the identity of the offender, have enough information to support an arrest, and know the location of the offender but for some reason cannot take the offender into custody.

CLEARANCE RATE: method used to determine the percentage of crimes cleared. The rate is based on the number of crimes reported.

COMBINED CASES: cases declined by the prosecutor in favor of other counts/cases.

COMMITMENT: a warrant, order, or process by which the court directs a judicial officer to take a person to a correctional facility.

COMPLAINT: a verified written accusation, filed by a prosecuting attorney with a local criminal court, which charges one or more persons with the commission of one or more offenses.

CONTROLLED SUBSTANCE: a drug, substance, or immediate precursor which is included in Schedules I through V inclusive, as set forth in Health and Safety Code Sections 11054 through 11058. These would include heroin, marijuana, amphetamines, barbiturates, and psychedelics.

CONVICTION: a judgment, based either on the verdict of a jury or a judicial officer or on the guilty plea of the defendant, that the defendant is guilty.

CORRECTIONS: those agencies or facilities concerned with the custody, confinement, supervision, or treatment of alleged or adjudicated offenders.

CORRECTIONS STANDARDS AUTHORITY (CSA): the division within the CDCR which develops and maintains standards for the construction and operation of local jail and juvenile detention facilities (formerly the Board of Corrections).

COURT: an agency of the judicial branch of government, authorized or established by statute or constitution, having one or more judicial officers on its staff. A court has the authority to decide upon controversies in law and disputed matters of fact brought before it. Because of court consolidation we no longer distinguish between lower court and superior court.

CRC: see California Rehabilitation Center.

CRIME: ". . . an act committed or omitted in violation of a law forbidding or commanding it. . ." (15 PC).

CRIME RATE: the number of reported crimes per 100,000 general population. See computational formulas page in Appendix 2 for further explanation.

NOTES

Crime in California presents statistics showing the number and types of offenses known to public authorities and the number of administrative actions taken by the criminal justice system. For 55 years, *Crime in California* has provided information on crimes and the criminal justice process. The collection and publication of these data are mandated by California Penal Code sections 13010–13012.

- Crime and arrest rates are calculated using annual population estimates provided by the Demographic Research Unit, California Department of Finance. Beginning in 2004, population estimates are based on the 2000 Census. Population estimates for 1990 through 2003 are based on the 1990 Census. Readers are advised to exercise care in interpreting changes in percent and rate between decennial census samples.
- A number of factors can influence counts in particular jurisdictions. The following factors should be considered when utilizing crime statistics, especially for comparative purposes:
 - Variations in composition of the population, particularly age structure.
 - Population density and size of locality and its surrounding area.
 - Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
 - Modes of transportation and highway system.
 - Economic conditions, including median income and job availability.
 - Cultural conditions, such as education, recreation, and religious characteristics.
 - Family conditions with respect to divorce and family cohesiveness.
 - Effective strength of law enforcement agencies.
 - Administrative and investigative emphases of law enforcement.
 - Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
 - Attitudes of citizenry toward crime.
 - Crime reporting practices of citizenry.
 - Illegal drug supply, cost, and demand.
- Historical data are included in this *Crime in California* report to provide trend data. The time periods for which data are available vary from database to database depending upon the date each program was instituted. For additional information, see Appendix 1, *Data Characteristics and Known Limitations*, on pages 160–161.
- Since 1952, there have been many changes in laws and data collection procedures. For instance, in 1986 legislation was enacted which required reporting domestic violence as criminal conduct. As a result, the aggravated assault rate increased over 35 percent in one year. Also, in 1983, California law raised the lower limit of felony theft from \$200 to over \$400. In order to maintain long-term felony trend data, the DOJ removed theft (\$200 and over) from its measure of crime. These types of changes should be considered when comparing data.
