Rules of Play

Buster Blackjack features a side bet that allows the player to bet that the dealer will bust. The more cards in the dealer's busted hand, the higher the payoff is.

The game can be played on any Blackjack style table. It can be dealt with six to eight decks of cards. In addition to the mandatory blackjack bet, the player has the option to make a "Buster" side bet. After all bets are made, the dealer deals himself and each player two cards. One of the dealer's cards is revealed. All players then play out their hands by the player/dealer.

The Buster side bet remains in action whether or not the player busts or has a blackjack.

Once all players have played out their hands, the dealer will reveal his hole card and play out his hand. If the dealer does not bust, all Buster side bets lose and will be collected by the player/dealer. If the dealer busts, all Buster side bets are paid by the player/dealer, according to the below pay tables. The payoff odds vary with the number of cards in the dealer's busted hand.

There is no additional collection fee for placing a Buster side bet.

The Buster side bet may be less than or equal to but may not exceed the mandatory blackjack bet.

Note that if all players have a blackjack, as long as there are Buster side bets, the dealer must complete his hand, if not 17 or greater.

SUMMARY OF GAME

The object of the game is to assemble two hands of two (2) or three (3) cards with a point value as close to nine (9) as possible.

DETAILS

Standards of Play

The game features a rotating player/dealer position that collects from all losers and pays all winners to the extent that their wager covers the action. The rotation of the player/dealer position is the same of industry standard games and complies with 330.11 of the California Penal Code. The object of the game is to form a hand that equals nine (9) or as close to it as possible. The player's hand is compared with the player/dealer's hand. The hand closest to "9" wins.

Type of Gaming Table Used

The game shall be played on a standard blackjack table having eight places on one side for the players and the player/dealer, and a place for the Casino dealer on the opposite side.

The game may also be played on a "batwing" or "figure-eight" table that can accommodate up to 14 players.

Number of Players in the Game

A minimum of two (2) and a maximum of fourteen (14) players can participate in the game, depending on the type of table utilized.

Type of Card Deck

A standard 52 deck of cards is utilized in a multiple deck shoe. A minimum of three (3) decks and a maximum of eight (8) decks can be used during the play of the game. There are no Jokers.

All cards 2 through 9 hold their face value. 10, J, Q & K have a value of zero (0). The Ace has a value of one (1). A hand with cards whose sum is in double figures is ranked with the tens (10s) digit ignored. For example, a hand totaling eighteen (18) would count as eight (8).

Betting Scheme

1. All wagers in 21st Century Baccarat shall be made by placing gaming chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.
2. Backline betting is allowed.
3. All wagers shall be placed prior to any cards being dealt. No bets shall be made, increased, or withdrawn after the dealer has begun dealing.
4. At the beginning of each round of play, players have the following options when placing their wager(s):
 - a. Player line which pays 1 to 1
 - b. Dealer line which pays 19 to 20 or 9 ½ to 10
 - c. Tie bet which pays 8 to 1

21st CENTURY BACCARAT Version 8.0

5. All bets for the base game and tie bet must be between the minimum and maximum table limits.

Dealing Procedures

At the start of a game a player is offered the player/dealer position. Once accomplished, the casino dealer shall wait for each player to make their wager (within posted table limits) on the base game as well as any bonus bets. Once all wagers are placed, the house dealer deals two hands of two cards each, two cards to the right and two cards to the left one by one in rotation. The hand to the left of the house dealer is a community hand that belongs to those that placed a bet on the dealer line. The hand to the right of the house dealer is a community hand that belongs to those that placed a bet on the player line. All cards are dealt face down. The dealer opens the player hand first and then the dealer's first card. The decision, if any, is made by the player(s) betting on the Player hand and then the Dealer's hand is resolved. The position that is closest to 9 wins.

A Natural 8 or 9 is accomplished when the first two cards of the player or dealer's hand has a value of eight (8) or nine (9). When this occurs, the other hand will not be allowed to draw an additional card.

How Winners are Determined and Paid

After the cards are dealt, the closest to 9 will be declared the winner and all winners will be paid and all losers will have their wagers awarded to the player/dealer. All ties between the player line and the dealer line on zero through nine (0-9) are considered a "push," and the original wagers are called off.

Player Hand:

- The player hand must stand when the cards dealt are valued between 6 and 9.
- The player hand must hit when the cards dealt are valued between 0 and 4.
- The player hand must hit when the cards dealt are valued at 5 except when the dealer hand is valued at 5 or 6, and then they will have the following options:
 - Stand and keep their wager on the stand line;
 - Hit and take a community card by moving wager to hit line or place a hit button on their cards.
- The house dealer will deliver additional hit card to player's hand. If all player bets choose to stand on an option hand, the dealer will still deliver the additional hit card to the player's hand, in order to make a complete hand, for comparison purposes to the dealer's hand.
- The casino dealer will then expose the dealer's hand.

Dealer Hand:

- If the player stands, then the dealer hand hits on a total of 5 or less.
- If the player does hit for a complete hand then the dealer hand hits using the following rules:
 - If the dealer's hand total is 3, then the dealer hand is dealt a third card unless the player's third card was an 8.
 - If the dealer's hand total is 4, then the dealer hand is dealt a third card unless the player's third card was a 0, 1, 8, or 9.
 - If the dealer's hand total is 5, then the dealer hand is dealt a third card if the player's third card was 4, 5, 6, or 7.
 - If the dealer's hand total is 6, then the dealer hand is dealt a third card if the player's third card was a 6 or 7.

21st CENTURY BACCARAT Version 8.0

House Way

Player hand hits on five (5) or below and stands on six (6) or more. The casino dealer must use the house way when a player requests the casino dealer to play an additional wager.

Tie Bet

A player has the option of making a tie bet when they have also made a base game bet. The tie occurs when the player's hand and the dealer's hand equal the same number. This wager wins or loses independent of the base game bet. The tie bet may be less than, equal to, or greater than the base game wager as long as it is within table limits. There is no collection fee taken for placing a tie bet wager. Winning tie bets pay 8 to 1.

Round of Play

- The player/dealer makes their wager.
- All players place their wagers on the player or dealer line.
- The dealer takes all casino collections and drops them in the affixed drop box.
- The dealer deals the cards and then determines the winner (Player or Dealer) or whether the hand is a tie.
- The dealer places the action button. The action button determines which player receives first action on their wager. The player/dealer's hole card determines the position of the action button. The player/dealer's position is always zero. Other seats, in clockwise rotation, respectively represent other numbers.
- All wagers are settled to the extent the player/dealer's wager covers the action.
- The dealer (if applicable) records whether the preceding hand was won by the player, dealer or was a Tie on the affixed electronic reader board.

Other Equipment Used

A Shuffle Master shuffler will be affixed at or near the table and utilized. In the event that the shuffle machine does not work, the dealer will shuffle the cards.

A card shoe will be used to deal the cards.

An electronic reader board will be used. This is an electronic display that allows the players to see the history of past hands dealt and whether the outcome was a win for the Player, Dealer or a Tie.

2. **Deck:** The game is played with a standard 52 card deck with no jokers.
3. **Table:** The game shall be played on a standard poker table which accommodates up to ten (10) seated positions.
4. Texas Hold'em uses a flat disc called a dealer button to indicate the position of the deal. The dealer button moves clockwise one seat each hand. The button (player with the dealer button) is last to receive cards on the initial deal and has the right of last-action on all betting rounds except the first.
5. Action is initiated on the first betting round by the player on the immediate left of the big blind. On all subsequent betting rounds the action is begun by the first active player clockwise from the dealer button. Players must post both blinds each round. In a new game, players are dealt cards, with the highest card by suit receiving the dealer button. All blinds are "live", meaning during the first round of betting, the player with a blind has the option of raising the pot when the action reaches them even if there has been no previous raise.
6. There are designated blinds in Texas Hold'em, the small blind and the big blind (two, in the first and second positions to the left of the dealer button). The blinds are considered to be bets, and used to initiate action.
7. Each player receives two down cards as his initial hand followed by a round of betting. Betting during this round will be at the lower table limit. Players may then either release (fold) their hand or they must call the amount of the big blind or raise the amount equal to the big blind.
8. The dealer then burns a card and turns three cards up at once; this is called the "flop." After the flop, there is a second round of betting. Betting during this round will be at the lower table limit. Players may then either release (fold) their hands, check, raise, or call raises.
9. The dealer then burns and turns one card (the fourth card, commonly known as the turn card), followed by another round of betting. Betting during this round will be at the higher table limit. Players may then either release (fold) their hands, check, raise, or call raises.

10. Finally, the dealer will burn and turn the last card (the fifth card, commonly known as the river card), followed by the last betting round. Betting during this round will be at the higher table limit. Players may then either release (fold) their hands, check, raise, or call raises.
11. After all betting has been completed, a player may use any combination of the two cards dealt to them and the five community cards (one in his hand, for from the board, etc.) to determine their best five card hand. The highest ranked five card poker hand wins the pot. In the event of a tie, the pot will be split equally among all winners. If there are an odd number of chips, the odd chips shall be awarded to the player closest to the left of the dealer button.
12. During the first two rounds of betting, the betting will be at the lower limit. During the last two rounds of betting, the betting will be at the higher limit. Example: In a \$3-\$6 game, the small blind is \$1 and the big blind is \$3. During the first two rounds of betting, raises shall be in \$3 increments. During the last two rounds of betting, raises are in \$6 increments. Therefore, whatever the table limits are, that will establish what the lower and higher increments will be for each round of betting. This will apply for limit as well as no-limit games. However, for no-limit games, the increments during each round are the minimum amount that must be placed.
13. There is a maximum of three raises per round of betting, unless play is heads up, in which case there is no limit to the number of raises.

Collection Fees

The collection fees shall be taken from "the pot" after the casino dealer has placed the first three community cards face-up and moved all player bets into the pot. The collection fees are determined based on the number of players seated and participating in the game after the flop.

11. After all betting has been completed, a player must use two of the four cards dealt to them and three of the five community cards to make the highest and/or lowest five card hand. However, players do not have to use the same two hole cards and three board cards to make their high and low hands. To qualify for a low poker hand, a player must have an 8 high or better (lower), meaning that the five cards used by the player must rank 8 or lower. Additionally, when determining if a player has a qualifying low hand, straights and flushes do not count against the player's hand; however if the player has a pair or higher in their low hand, the hand does not qualify as a low hand. The lowest possible five-card poker hand is 5-4-3-2-A. When multiple players have qualifying low hands, the lowest hand is determined by comparing the highest card of each player's five card hand, with the lowest high card being the winning low hand. *Example: a 7-6-4-3-2 is better than an 8-6-5-3-ace, even though the second hand has the lowest card.* If there is a qualifying low hand, the pot will be divided equally in half, with half of the pot being awarded to the highest five card hand and the other half being awarded to the lowest qualifying hand. If no player has a qualifying low hand, the player with the highest ranking five card poker hand wins the entire pot. Furthermore, a player is eligible to win the high hand as well as the low hand in which they would win the entire pot. In the event of a tie when there is no qualifying low hand, the pot will be split equally among all winners with high hands. In the event of a tie when there is a qualifying low hand, the pot will be divided equally in half, with one half of the pot being split equally among all winners of the high hand and the other half of the pot being split equally among all winners of the low hand. If there are an odd number of chips for all cases, the odd chips shall be awarded to the player closest to the left of the dealer button.
12. During the first two rounds of betting, the betting will be at the lower limit. During the last two rounds of betting, the betting will be at the higher limit. Example: In a \$3-\$6 game, the small blind is \$1 and the big blind is \$3. During the first two rounds of betting, raises shall be in \$3 increments. During the last two rounds of betting, raises are in \$6 increments. Therefore, whatever the table limits are, that will establish what the lower and higher increments will be for each betting round.
13. There is a maximum of three raises per round of betting, unless play is heads up, in which case there is no limit to the number of raises.

Collection Fees

The collection fees shall be taken from "the pot" after the casino dealer has placed the first three community cards face-up and moved all player bets into the pot. The collection fees are determined based on the number of players seated and participating in the game after the flop.

1. The goal of Seven Card Stud is to win the pot with the highest ranking five-card poker hand attainable out of the seven cards a player holds. Traditional poker hand rankings apply. Additionally, traditional suit ranking apply, with spades being the highest suit and clubs being the lowest suit.
2. **Deck:** The game is played with a standard 52 card deck with no jokers.
3. **Table:** The game shall be played on a standard poker table which accommodates a minimum of two and a maximum of eight players is permitted to play.
4. If there are not enough cards left in the deck for all players, the dealer will deal all the cards except the last card, which is mixed with the burn cards. The dealer then scrambles and cuts these cards, burns again, and delivers the remaining down cards, using the last card if necessary. If there are still not as many cards as players remaining without a card, then the dealer announces to the table that a common card will be used. The dealer will burn a card and turn one card face up in the center of the table. This card plays in everyone's hand. The player who is now high using the community card initiates the action for the last round.
5. In a new game, players are dealt cards, with the highest card by suit receiving the dealer button.
6. Seven Card Stud uses a flat disc called a dealer button to indicate the position of the deal. The dealer button moves clockwise one seat each hand. The button (player with the dealer button) is last to receive cards on the initial deal. Action is initiated on the first betting round by the player with the lowest face up card, decided by the lowest suit. A tie is broken by suit with the lowest suit being forced to bet. On all subsequent betting rounds the action is begun by the player with the highest face-up cards.
7. At the beginning of the game, prior to cards being dealt, all players must post an ante. The antes are considered to be bets, and used to initiate action.
8. Each player receives three cards as his initial hand, with the first two being dealt face down and the third card being dealt face up, starting with the player to the left of the dealer button and continuing clockwise. This is followed by a round of betting. Players may then either release (fold) their hand, raise the pot or they must call raises. Betting during this round will be at the lower table limit.
9. The dealer then deals each player another face up card, starting with the player with the dealer button and moving clockwise. After each player receives their fourth card, there is a second round of betting. Players may then either release

(fold) their hands, check, raise, or call raises. Betting during this round will be at the lower table limit. However, if a player has a pair face up on the board, that player has the option of betting at the lower or higher limit. Whichever limit they choose, the rest of the table will be required to use that limit during that round. The following rounds betting limits will remain unchanged.

10. The dealer then deals each player another face up card, starting with the player with the dealer button and moving clockwise. After each player receives their fifth card, there is a third round of betting. Players may then either release (fold) their hands, check, raise, or call raises. Betting during this round will be at the higher table limit.
11. The dealer then deals each player another face up card, starting with the player with the dealer button and moving clockwise. After each player receives their sixth card, there is a fourth round of betting. Players may then either release (fold) their hands, check, raise, or call raises. Betting during this round will be at the higher table limit.
12. The dealer then deals each player another card, except this card is dealt face down, starting with the player with the dealer button and moving clockwise. After each player receives their seventh and final card, there is a fifth round of betting. Players may then either release (fold) their hands, check, raise, or call raises. Betting during this round will be at the higher table limit.
13. After all betting has been completed; a player may use any five cards in their hand to determine their best five card hand. The highest ranked five card poker hand wins the pot. In the event of a tie, the pot will be split equally among all winners. If there are an odd number of chips, the odd chips shall be awarded to the player closest to the left of the dealer button.
14. During the first two rounds of betting, the betting will be at the lower limit. During the last three rounds of betting, the betting will be at the higher limit. Example: In a \$3-\$6 game, the small blind is \$1 and the big blind is \$3. During the first two rounds of betting, raises shall be in \$3 increments. During the last three rounds of betting, raises are in \$6 increments. Therefore, whatever the table limits are, that will establish what the lower and higher increments will be for each betting round.
15. There is a maximum of three raises per round of betting, unless play is heads up, in which case there is no limit to the number of raises.

Collection Fees

The collection fees shall be taken from “the pot” after all players have posted the required antes but prior to the start of any cards being dealt. The collection fees are determined based on the number of players seated and participating in the game when the antes are placed.

SEVEN CARD STUD HIGH/LOW SPLIT

RULES

1. The goal of Seven Card Stud High/Low Split is to win at least half of the pot with either the highest and/or lowest ranking five-card poker hand attainable out of the seven cards a player holds. Traditional poker hand rankings apply. Additionally, traditional suit ranking apply, with spades being the highest suit and clubs being the lowest suit.
2. **Deck:** The game is played with a standard 52 card deck with no jokers.
3. **Table:** The game shall be played on a standard poker table which accommodates a minimum of two and a maximum of eight players is permitted to play.
4. If there are not enough cards left in the deck for all players, the dealer will deal all the cards except the last card, which is mixed with the burn cards. The player who is now high using the community card initiates the action for the last round.
5. In a new game, players are dealt cards, with the highest card by suit receiving the dealer button.
6. Seven Card Stud High/Low Split uses a flat disc called a dealer button to indicate the position of the deal. The dealer button moves clockwise one seat each hand. The button (player with the dealer button) is last to receive cards on the initial deal. Action is initiated on the first betting round by the player with the lowest face up card, decided by the lowest suit. A tie is broken by suit with the lowest suit being forced to bet. On all subsequent betting rounds the action is begun by the player with the highest face-up cards.
7. At the beginning of the game, prior to cards being dealt, all players must post an ante. The antes are considered to be bets, and used to initiate action.
8. Each player receives three cards as his initial hand, with the first two being dealt face down and the third card being dealt face up, starting with the player to the left of the dealer button and continuing clockwise. This is followed by a round of betting. Players may then either release (fold) their hand, raise the pot or they must call raises. Betting during this round will be at the lower table limit.

9. The dealer then deals each player another face up card, starting with the player with the dealer button and moving clockwise. After each player receives their fourth card, there is a second round of betting. Players may then either release (fold) their hands, check, raise, or call raises. Betting during this round will be at the lower table limit. However, if a player has a pair face up on the board, that player has the option of betting at the lower or higher limit. Whichever limit they choose, the rest of the table will be required to use that limit during that round. The following rounds betting limits will remain unchanged.
10. The dealer then deals each player another face up card, starting with the player with the dealer button and moving clockwise. After each player receives their fifth card, there is a third round of betting. Players may then either release (fold) their hands, check, raise, or call raises. Betting during this round will be at the higher table limit.
11. The dealer then deals each player another face up card, starting with the player with the dealer button and moving clockwise. After each player receives their sixth card, there is a fourth round of betting. Players may then either release (fold) their hands, check, raise, or call raises. Betting during this round will be at the higher table limit.
12. The dealer then deals each player another card, except this card is dealt face down, starting with the player with the dealer button and moving clockwise. After each player receives their seventh and final card, there is a fifth round of betting. Players may then either release (fold) their hands, check, raise, or call raises. Betting during this round will be at the higher table limit.
13. After all betting has been completed; a player may use any five cards in their seven card hand to determine their best five card hand. However, players do not have to use the cards to make their high and low hands. To qualify for a low poker hand, a player must have an 8 high or better (lower), meaning that the five cards used by the player must rank 8 or lower. Additionally, when determining if a player has a qualifying low hand, straights and flushes do not count against the player's hand; however if the player has a pair or higher in their low hand, the hand does not qualify as a low hand. The lowest possible five-card poker hand is 5-4-3-2-A. When multiple players have qualifying low hands, the lowest hand is determined by comparing the highest card of each player's five card hand, with the lowest high card being the winning low hand. *Example: a 7-6-4-3-2 is better than an 8-6-5-3-ace, even though the second hand has the lowest card.* If there is a qualifying low hand, the pot will be divided equally in half, with half of the pot being awarded to the highest five card hand and the other half being awarded to the lowest qualifying hand. If no player has a qualifying low hand, the player with the highest ranking five card poker hand wins the entire pot. Furthermore, a player is eligible to win the high hand as well as the low hand in which they would win the entire pot. In the event of a tie when there is no qualifying low hand, the pot will be split equally among all winners with high hands. In the event of a tie

when there is a qualifying low hand, the pot will be divided equally in half, with one half of the pot being split equally among all winners of the high hand and the other half of the pot being split equally among all winners of the low hand. If there are an odd number of chips for all cases, the odd chips shall be awarded to the player closest to the left of the dealer button.

14. During the first two rounds of betting, the betting will be at the lower limit. During the last three rounds of betting, the betting will be at the higher limit. Example: In a \$3-\$6 game, the small blind is \$1 and the big blind is \$3. During the first two rounds of betting, raises shall be in \$3 increments. During the last three rounds of betting, raises are in \$6 increments. Therefore, whatever the table limits are, that will establish what the lower and higher increments will be for each betting round.
15. There is a maximum of three raises per round of betting, unless play is heads up, in which case there is no limit to the number of raises.

Collection Fees

The collection fees shall be taken from "the pot" after all players have posted the required antes but prior to the start of any cards being dealt. The collection fees are determined based on the number of players seated and participating in the game when the antes are placed.

8. The dealer then deals each player another card, starting with the player to the left of the dealer button and continuing clockwise. Each player may request that their card be dealt either face down or face up. If the player requests the card be dealt face down, the player will be required to turn all of their other cards face up so that there is only one card face down at any one time. In the event of a tie, the pot will be split equally among all winners. If there are an odd number of chips, the odd chips shall be awarded to the player closest to the left of the dealer button.
12. There is a maximum of three raises per round of betting, unless play is heads up, in which case there is no limit to the number of raises.
13. During any round, it is permissible for a player to pick up and “mix” their cards. However, if another player wants to see any players “exposed” cards, the player with the “mixed” cards must display their “exposed” cards.

* "BONUS" card is worth 10, except when dealt with an Ace on the first two cards of the initial deal, whereupon, it will be worth 10.5 and the hand a Pure 21.5 Blackjack.

ROUND OF PLAY

1. Pure 21.5 Blackjack is played on a raised gaming table. The table seats eight players who face the dealer in a 180-degree seating arrangement. The tables are the standard blackjack tables commonly used in the casino industry. The casino dealer stands opposite the players, and in the center of the table. The casino dealer's chip tray is set in front of the dealer. The play starts from the right of the dealer and proceeds in a clockwise fashion.
2. The game uses a 52-card deck with aces through nines (the standard spades, hearts, clubs and diamonds) and 16 bonus cards (four of each "king", "queen", "jack" and "ten"). The game is played with a minimum of a single deck, totaling 52 cards and to a maximum of eight decks totaling 424 cards.
3. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed the collection fee for the players and Player/Dealer will also be displayed. A maximum of three collection rates is allowed in compliance with the California Penal Code.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place an amount of money (casino chips) in a betting circle in front of their seat. That money will be used to pay the winners and will set the amount that he/she can collect for the losers. The casino will place a button in front of the Player/Dealer, which designates that they are taking the "bank position and further designate whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his/her betting circle.
5. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the posted collection for the wager they placed in any betting circle where they have money or "action".
6. Once the Player/Dealer has posted the amount of money, he/she will wager against the other players, and once the players have placed their wagers, the casino dealer will collect all of the fees. This will always be accomplished before the start of the game in accordance with the California Penal Code. The casino dealer will take the collection fees and drop them into a locked collection box affixed to the gaming table.
7. After the fees have been collected, the dealer will deal the cards to the players and the Player/Dealer. All cards dealt throughout the game are face up, with the exception of the Player/Dealer's second card, which will remain "face down" until all players have acted on their hands. The casino dealer is the only person on the table allowed to touch the cards. The players will signal the dealer with hand gestures that indicate whether the wish to hit or stand. The hand signals will be consistent with the industry standard signals of a sweeping motion towards a player's body, indicating a hit, or a side-to-side hand motion, indicating the desire to stand. The casino dealer deals the first card to the player seated to the left of the designated Player/Dealer, in a clock-

wise manner. Each player will be dealt one card face up with the Player/Dealer receiving the last card. The Player/Dealer's cards will be placed in front of the casino dealer.

8. The casino dealer will deal a second card to the players in the same order noted above. The players are given an opportunity, starting with the player seated to the left of the Player/Dealer, to be dealt additional cards to make the best possible hand. (Rules and procedures for splitting, doubling down, and surrendering will be outlined later)
9. Players must follow the below listed **Charts 1A and 1B** in deciding whether to hit or stand on a particular hand.
10. After all players have acted on their hands and indicated to the casino dealer that they do not want or cannot receive additional cards, the Player/Dealers down card will be turned up. This down card will determine where the "action button" is placed.
11. The "action button" determines where the action starts and who will be first to be paid for their winning hand or lose their wager. The action button is placed based on the numerical value of the Player/Dealer's down card. The Ace is counted as one and is the first seat to the right of the player/dealer. The counting is then consecutive and clockwise with the player/dealer position NOT being counted. A chart (**Diagram #1**) outlining the placement of the action button follows.
12. The Player/Dealer's hand will then be completed according to the rules listed on **Chart 1B**. Once the Player/Dealer's hand is completed, the payoff and/or collection of wagers will begin in the seat designated by the action button and continue in a clockwise manner until all wagers have been acted on. Furthermore, all base game wagers will be settled first, beginning with the action button and continuing in a clockwise manner around the table, then once all base game wagers have been settled, all bonus bet wagers will be settled, starting with the action button and continuing in a clockwise manner around the table.
13. In the event that the Player/Dealer does not have enough money on the table to cover all the wagers on the table, there will be no free collection button, refund, or other conciliatory action given to the affected players by the casino or the Player/Dealer.
14. The Player/Dealer's cards will always be dealt and placed in front of the casino dealer's tray. The placement of the Player/Dealer's cards is standard in all games and is depicted below. See **Diagram #2**

DIAGRAM #1

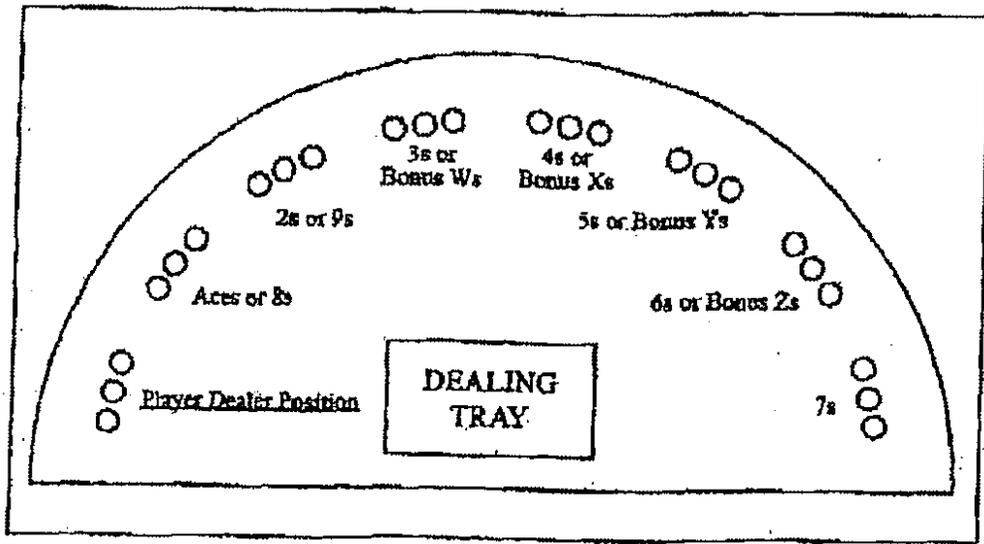

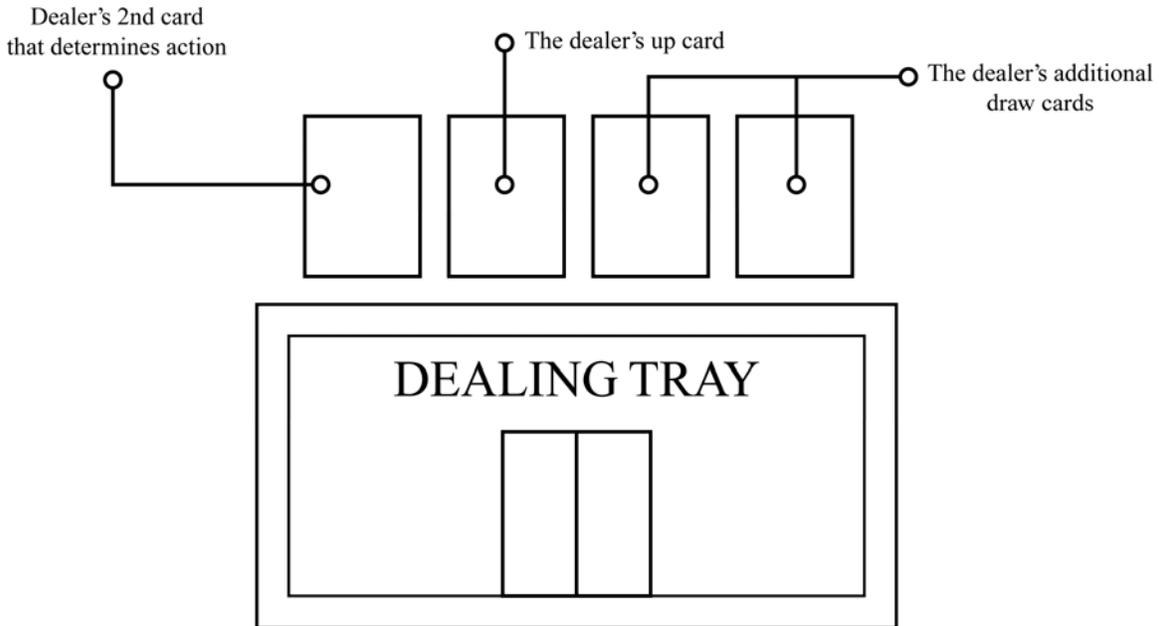

DIAGRAM #2

15. After all wagers are settled, the cards are collected and discarded. The bank button is changed from 1st Bank to 2nd Bank and after every two hands; the Player/Dealer position is rotated in a clockwise fashion around the table.

16. The next round of play begins when the casino dealer collects all the cards from the table and places them in the discard tray. The casino dealer will also change the bank button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clockwise to the next position on the

table. If there is no person that intervenes on the Player/Dealer's position, the game will be "broken" or stopped, as required by the California Penal Code.

App. 4th1397, 1408-1409. And in addition to the meaning of AB 1416 (the Wesson Bill) which added section 330.11 to the California Penal Code relating to the California licensed gambling establishments and any future regulatory guidelines from the California Department of Justice, Division of Gambling Control, with respect to the operation of a controlled game featuring a Player/Dealer position.

DOUBLE-DOWN, SPLIT, SURRENDER, AND INSURANCE

1. Players can double-down on the first two cards dealt to them. The player must place a second wager which may be equal to or less (double down for less) than the player's original wager. The player will only receive one additional card, regardless of the total.
2. Players can split cards of the same value or two “BONUS” cards. The player must place a second wager equal to the original wager. Players cannot split for less. Players may then draw as many cards as desired per split card to achieve the best possible hand of 21.5. When splitting two Aces, the player only receives one additional card per ace. There is no splitting for less. If the draw card is a “BONUS” card after splitting two Aces, the player will be paid even money on their wager, not 6 to 5.
3. A maximum of 3 splits is allowed per hand, giving a player up to 4 hands. Doubling-down is permitted after splitting.
4. Players can surrender after their first two cards are dealt to them. If they choose to surrender, half of their wager will be forfeited. The player must indicate their desire to surrender before the Player/Dealer’s down card is exposed. Their play for the hand will then cease.
5. Insurance will not be offered for this game.

6. The casino will take no extra collection fee on double downs or splits from the player or Player/Dealer.
7. All payoffs are to the extent that the Player/Dealer's money covers the action on the table. A Player/Dealer cannot win or lose more than the entire amount of money placed on the table before the start of the hand.

COLLECTION RATES

A collection fee shall be collected by the house dealer per hand from the player-dealer position based on the total amount of action on the table. However, players shall not be required to pay a collection fee for any wager that they place. Or, a collection fee shall be collected by the house dealer per hand from the player-dealer position. Players shall also be required to pay a collection fee for each base game wager that they place. The collection fees must be placed and shall be taken by the house dealer and dropped prior to any cards being dealt or any round of play being conducted. At this time, there is no jackpot collection fee for this game.

PAI-GOW POKER

RULES

1. **Deck:** One traditional deck of 52 playing cards, plus one joker is used.
2. **Joker:** The joker can be used as an Ace, or to complete a straight or a flush.
3. **Table Layout:** Each table has 7 active seats. An 8-seat table may be used with one inactive seat in order to symmetrically accommodate a floor person and another seated player. The inactive seat has the betting spots blocked. The inactive seat rotates clockwise, and is always located immediately to the right of the Player/Dealer.
4. **Betting Spots:** Each seat has 8 betting spots.
5. **Number of Players:** Per Petaluma City Ordinance 4.22.115, there can be no more than 12 players shall be permitted to play at any time at any one table.
6. **Table Limit:** \$10 - \$200 per spot (\$1600 per seat)
7. **Structure:** Each player at the table is dealt seven cards to make two hands, a two-card hand and a five card hand. Rankings are based on basic poker rankings with a royal flush being the highest possible five card hand and a high card hand being the lowest. The five-card hand must be higher than the two-card hand.
8. **Foul Hand:** If the player sets the hands so that the two-card hand is higher than the five-card hand, it is a Foul Hand and automatically is a losing hand. Similarly, if there are not exactly two cards in one hand and five cards in the other hand, it is a foul hand and automatically loses.
9. **Object of Game:** The object of the game is for both of the player's hands to rank higher than both of the Player/Dealer's hands.
 - Should one hand rank exactly the same as the Player/Dealer's hand, this is a tie (copy).
 - The Player/Dealer wins all ties.
 - If the player wins one hand, but loses the other, this is considered a "push" (tie), and no money exchanges hands.
10. **Payoff:** Winning hands are paid even money. Losing hands lose the money wagered.

11. **Player/Dealer (Banker)**

- Any player may be the Player/Dealer (Banker). All players bet against the Bank.
- The bank must rotate in a continuous and systematic fashion. The Bank is offered to each seated player spot in a clockwise fashion. That seated spot may bank for a maximum of two consecutive hands. That player may accept or pass, in which case the Bank is offered to the next player.
- When the banker position passes to the next seat, the player seated in that seated position has the first option. If he refuses the bank, any player betting on that seated position the previous hand is eligible to be the banker for the next hand, in order of the square in which they bet the prior hand.
- There must be an intervening Player/Dealer so that a single player cannot have repeated dealings within the meaning of Oliver V. County of Los Angeles 1998, 66 CAL App4th 1397, 1408-09, in addition to, within the meaning of AB 1416, an act to add to section 330.11 of the Penal Code. If there is no intervening player, the game is closed. The house never participated as a Player/Dealer, nor may the house take a percentage from the game.
- There is no minimum amount that a Player/Dealer must wager, other than the regular table minimum for all players. Player/Dealers are never required to cover all opposing player's wagers.

12. **Misdeals:**

- When the dealer is arranging the cards into piles of seven cards, if one card is exposed and it is not an ace or a joker, the card is set aside, the remaining cards are dealt out as normal and the exposed card is replaced with the top card left over after making seven piles of seven cards.
- If the exposed card is an ace or a joker, the deck is scrambled, shuffled, and re-dealt.
- If during the course of the deal prior to the Player/Dealer hand being opened, if any card(s) of the Player/Dealer hand is exposed by the house dealer, that deal will be declared a misdeal, and all hands reshuffled.
- When the house dealer is distributing the cards, if a card is exposed, that player's hand is dead, and all bets on that seated position are returned.

13. **Specific Rules**

- Once the Player/Dealer exposes his cards, the players cannot touch theirs.
- Players are not allowed to show their hands or talk to the other players about their hands before all cards are exposed.
- If one player is wagering on more than one seat, that player may look at and determined the setting of the first hand only. The remaining hand(s) must be set the “house way”.
- Players and the Player/Dealer must place their bets before the dice cup is opened. No change in bets can occur after that point.
- Only chips placed in the appropriate position on the table constitute a valid bet.
- Each player is responsible for the chips he/she places on the table.
- No side bets are allowed.

14. **Play of the Game**

- Play of the game is as follows: The dealer places seven hands of seven cards each, face down in front of the dealer’s tray. The dealer checks that exactly four cards are left over, and then places those cards in the front of the dealer’s tray. When dealing the seven (7) piles of seven (7) cards, the casino dealer shall deal one card at a time to in front of them until there are seven cards, starting from left to right. Once there are seven (7) cards laid out, the casino dealer shall deal each pile another card, from right to left, giving each pile a total of two (2) cards. This process of dealing cards left to right, then right to left, shall be completed until each pile has seven (7) cards. The remaining cards shall be placed in the discard pile.
- There are two steps taken to determine which of the seven hands goes to which player. In the first step, the Player/Dealer calls out a number from one to seven, and the Action button is placed on the pile that corresponds to that number. This hand is pushed slightly forward and the preceding hand is turned sideways.
- The Player/Dealer then shakes the dice cup containing three dice; however he doesn’t yet open the cup. The cup is opened by the house dealer, only after all bets are placed in the betting circles.

- The Player/Dealer’s position is always 1, 8 or 15. Other seats, in clockwise rotation, represent the other numbers. The dealer counts clockwise from the Player/Dealer’s position to locate the seat corresponding to the number on the dice. The pile of cards with the Action button will then be placed in front of the player indicated by the dice. The remaining piles, starting with the pile to the right of the action pile from the house dealer position, will then be distributed clockwise. The Player/Dealer hand is left in front of the house dealer and the dealer button is placed on top of it.
- Each player then arranges his cards into a two-card low and a five-card high hand as described above.
- The dealer does not look at the cards until all players have set their hands in the designated spaces face down. Any hands that are going “house way” will have a “house way” button placed on them.
- The dealer then turns his cards over and sets his hand face up.
- Loosing hands should be turned face down and loosing wagers should be placed on top. If the player wins one hand and loses the other, this is considered a “push”. No money exchanges hand and the cards are placed in the discard holder.

SUMMARY OF GAME

The object of the game is to assemble two hands with a point value as close to nine as possible. Aces have a value of 1, picture cards have a value of 10, all other cards have their face value. A hand with cards whose sum is ten or higher is ranked with the tens (10s) digit ignored. For example, a hand totaling 18 would be valued simply as 8.

The casino dealer deals two hands of 2 cards each, two cards to the right and two cards to the left one by one in rotation. The hand to the left of the casino dealer is a community hand that belongs to those that placed a bet on the banker line. The banker's is dealt face down. The hand to the right of the casino dealer is a community hand that belongs to those that placed a bet on the player line. The player's hand is dealt face down. Players have the option to bet on the player's hand, the player-dealer's hand, or tie bet. In addition, if a player placed a wager on the player line or the banker line, that player may place a wager on the Player Dragon Bonus Bet or the Banker Dragon Bonus Bet. A player may place a tie bet wager even if they have not also placed either a player line wager or a banker line wager prior to the initial deal.

Player-dealer and Deal

The player-dealer position rotates in a systematic and continuous way so that the opportunity to act as the player-dealer does not constantly remain with a single person for many hands. The person in player-dealer position may not act as player-dealer position more than two consecutive hands or rounds of play. There must be an intervening player-dealer so that a single player cannot repeatedly act as the player-dealer within the meaning of *Oliver v. County of Los Angeles*, (1998) 66 Cal.App.4th 1397, 1408-09 or section 330.11 of the California Penal Code, relating to gambling establishments and any future regulatory guideline from the California Bureau of Gambling Control or the California Gambling Control Commission with respect to the operation of controlled games featuring a player-dealer position. The game will be broken if at least one other intervening player at the table does not accept the deal when offered.

Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house never participates as a player-dealer. The house never takes a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.

Dragon Bonus Bet

Each player wagering in the base game of Baccarat has the option of placing a wager within table limits on the designated DB (Dragon Bonus) spot located next to each player's position on the gaming felt layout. The Dragon Bonus Bet may award a bonus payout to the player(s) who receives a hand that meets the requirements, as described below. There will be two circles in front of each player position. One will be labeled "Player Dragon Bonus" and the other will be "Banker Dragon Bonus."

Players have two ways to win:

1. If the hand the wager on (Player or Banker) is a “natural or;
2. If the hand they wager on is a non-natural that wins by four (4) or more points from the losing hand. The higher margin of victory, the higher the payout. If the spread is three (3) points or less, the DB bet loses.
3. Regardless of what hand a player wagered on, a player may wager on the Player Dragon Bonus Bet circle, the Banker Dragon Bonus Bet circle, or both.
4. The Dragon Bonus Bet may less than or equal to the base game wager. However, the bonus bet may not exceed the base game wager or the table limit.
5. There is no collection for the DB bet.
6. The player-dealer will pay all Dragon Bonus Bet wagers and will collect all losing Dragon Bonus Bet wagers. Wagers are collected or paid, to the extent that the player-dealer’s wager covers. Once the player-dealer’s wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.

Mini Pai Gow

Overview

Mini Pai Gow is basically the traditional Pai Gow Game with

- 6 cards dealt to players and the player/banker instead of seven
- Players may double down after viewing their hand
- An additional Bonus wager

Rules of Play

- A. Each player must make a Mini Pai Gow Poker wager and optionally may make a Mini Pai Gow Aces Bonus wager before the start of the game.
- B. Each player, including the player/banker, will be dealt six (6) cards face down.
- C. The players now set their hands with the best possible five (5) card hand in the back and their second high hand (one card) in the front. Each player simultaneously decides whether to double down or not with a wager equal to the original Mini Pai Gow Poker wager.
- D. The player/banker now sets their hand with the best five (5) card hand in back and the second best hand set in front consisting of only one (1) card.
- E. The original Mini Pai Gow Poker wager always receives action. However, the dealer must qualify with a pair of 5's or higher for the player's double down wager to receive action; otherwise the double down wager is a push.
- F. All original Mini Pai Gow Poker wagers will be settled first, followed by the double down Mini Pai Gow Poker wagers, followed by the Mini Pai Gow Aces Bonus bets. Backline Betting is permitted on all wagers.

Dealing procedures

- A. Mini Pai Gow is played with a standard 52 card deck plus one Joker for a total of 53 cards.
- B. The cards will be shuffled using a shuffling machine
 - a. If the machine is not working the cards will be shuffled in the following way
 - i. Scramble
 - ii. 2 riffles
 - iii. Strip
 - iv. Riffle
 - v. Cut by player/banker
- C. The player/banker will designate which hand they want to be action (the first hand that is delivered out).
- D. Each player must make a Mini Pai Gow Poker wager.
- E. Each player who made a Mini Pai Gow Poker wager may make a Mini Pai Gow Aces Bonus wager up to the posted limit before the cards are dealt.
- F. The dealer will shake a closed dice cup and then present it to the player banker to shake. The player/banker will shake the dice cup and leave it unopened on the table.
- G. The dealer will open the dice cup and deliver the cards starting with the action hand to the seat designated by the dice cup. The player/banker position will

Mini Pai Gow

- always be 1, 9 and 17 and the seats will be counted in clockwise order. For example, if the player/banker is on seat 2 and the total of the dice is 12 the action hand will be delivered 4 spots over from the player/banker seat (seat 6). The remainder of the cards will be delivered in a clockwise fashion with the player/banker hand remaining in front of the dealer tray with a marker on it.
- H. Each player sets their high hand (five cards) and their second high hand (one card) and places them in the appropriate areas. Same foul hand rule applies in Mini Pai Gow as it does in traditional Pai Gow Poker. If the player places a card higher than any of his other five cards and those five cards are of different suits and ranks not equally a straight the players wager is a losing wager. Each player simultaneously decides whether to double down or not with a wager equal to the original Mini Pai Gow Poker wager.
 - I. After all the player hands have been set, the dealer will then turn over the player/banker hand and set the hand according to house way with the highest five (5) card hand in back and the second highest one (1) card hand in the front. The player/banker will then have the option to play the hand a different way or tell the dealer to proceed with house way.
 - J. The dealer will now, in turn, compare his two hands with the player's two hands. If the dealer qualifies for the double down wager with at least a recommended pair of fives (pair of 5s) or higher, the player's double down wager, if made, plays; otherwise, the double down wager is a push. If the double down wager is a push the double down wager will be returned to the player prior to opening the player's hand.
 - a. If the player/banker's two hands beat the player's two hands, the wager is placed on top of the cards and the dealer proceeds to the next hand.
 - b. If the player's two hands beat the player/banker's two hands, the cards are left in front of the wager face up.
 - c. Any other outcome (the player/banker and the player split the two hands) will be a push and the dealer will muck the cards.
 - d. If one hand is identical in rank to the player-dealer's hand, it is a copy hand. The player-dealer wins all copy hands.
 - K. If any of the players receive a hand of that qualifies for a Mini Pai Gow Aces Bonus and they have wagered on the bonus position, they will receive the posted bonus payout. Winning bonus wagers will be paid regardless of the outcome of the Mini Pai Gow wager. The player will receive winning bonus wagers regardless of how they have set their hand. (i.e. splitting 3 Aces, they will still receive the bonus payout for 3 of a Kind). The joker may be used as an ace or to complete a straight, flush, or straight flush hand, but not a Royal Flush.
 - L. After all hands have been opened and compared to the player/banker's hand, the dealer will start reconciling the hands starting with the action hand. The hands will be reconciled in order starting with the Mini Pai Gow base bets and double down bets, then reconciling Mini Pai Gow Aces Bonus bets. The player/dealer will pay all wagers and will collect all losing wagers. Wagers are collected or paid, to the extent that the player/dealer's wager covers. Once the player/dealer's wager has been exhausted, the wagers not covered by the player/dealer will be returned to the players.

Dealing Procedures and Round of Play

At the start of a game a player is offered the player-dealer position. Once accomplished, the house dealer shall wait for each player to make their wager in accordance with the table limits.

Each player has the following options when placing their wager(s):

- The player line which pays 1 to 1;
- The banker line which pays 1 to 1;
- The Tie Bet, which pays 8 to 1;
- If a player placed a wager on either the player line or the banker line, that player may place a wager on the Dragon 7 Bonus Bet, which pays 40 to 1.
- If a player placed a wager on either the player line or the banker line, that player may place a wager on the Panda 8, which pays 25 to 1.

Once all wagers are placed, the house dealer deals one card to the right and one card to the left, one by one in rotation, until each hand has a total of two cards each. All cards are dealt face-up. The hand to the left of the house dealer is a community hand that belongs to those that placed a bet on the banker line. The hand to the right of the house dealer is a community hand that belongs to those that placed a bet on the player line. The player's hand is resolved first and then the banker's hand is resolved. The hand that is closest to nine wins. After the house dealer delivers the first two cards to both the Player line and Banker line, the following Baccarat rules are followed.

- The player's hand must stand when the hand is valued at 6 through 9, and must hit when the hand is valued at 5 or less.
- If the player's hand stands, then the dealer hand hits on a total of 5 or less.
- If the player's hand hits for a complete hand then the banker's hand hits using the following rules:
 - If the banker's hand total is 3, then the banker's hand is dealt a third card unless the third card dealt to the player's hand was an 8.
 - If the banker's hand total is 4, then the banker's hand is dealt a third card unless the third card dealt to the player's hand was a 0, 1, 8, or 9.
 - If the banker's hand total is 5, then the banker's hand is dealt a third card if the third card dealt to the player's hand was 4, 5, 6, or 7.
 - If the banker's hand total is 6, then the banker's hand is dealt a third card if the third card dealt to the player's hand was a 6 or 7.

The following chart shows when the banker hits (H) or stands (S) according to the rules above:

Banker's Score	Player's Third Card									
	0	1	2	3	4	5	6	7	8	9
7	S	S	S	S	S	S	S	S	S	S

ULTIMATE PAI GOW POKER

Type of Game

Ultimate Pai Gow Poker is a seven card California style game that utilizes a player-dealer position. Players play against the player-dealer who pays and collects back to front seat by seat according to action until the hand is over or the bank money has been depleted.

Object of the Game

The object of the game is for the players to compete against the player-dealer by betting that either the player's hand will win or the banker's hand will win. At the beginning of the game one seven-card hand will be placed out on the table to represent the player and another seven card hand will be placed out on the table to represent the banker. Both hands are opened by the dealer and set house way. The dealer is required to form a two-card hand and a five-card hand for both the player and banker according to the house way strategy. The five-card hand must always rank higher than the two-card hand. Once each of the hands have been set house way the dealer will compare the two hands to determine if the wagers placed on the table win, lose, or push. If the player's side wins both the two-card and five-card hands all player wagers will get paid and all banker wagers will lose. If the banker side wins both the two-card and five-card hands all banker wagers will get paid and all player wagers will lose. All copy/ tie hands lose to the player-dealer and the second hand alone will determine the outcome. If both the two-card and five-card hands result in a tie both the player and banker wagers will lose. Additionally, if the player's or banker's hand has a two-card or five-card copy it cannot win. The hand can only push or lose depending on if the non-copy hand is of higher or lower value. In order to get paid out on a base bet the player must win the two-card and five-card hand.

Example: Both the player and banker two-card hand copies and the banker's five-card hand is better than the player's five-card hand, then the banker wager results in a push and the player wager loses.

Example: Both the player and banker two-card hand copies and the player's five-card hand is better than the banker's five-card hand, then the player wager results in a push and the banker wager loses.

Description of Table Used and Total Number of Seated Positions

The game shall be played on an industry standard semi-circle or bat wing table. The game is played with a minimum of two and a maximum of fourteen players.

Action and Distribution of Cards

The casino dealer will start in seat one and offer the player-dealer position to the player. In the event the player passes, the dealer will continue clockwise until the position is filled.

Shuffler Distribution

Players place their wagers in the designated areas. The player receives the first hand and the banker receives the second hand from the shuffling machine.

Manual Distribution

The casino dealer starts by dealing seven piles of seven cards. When dealing the seven piles of seven cards, the casino dealer shall deal one card at a time to in front of him or herself until there are seven cards, starting from left to right. Once there are seven cards laid out, the casino dealer shall deal each pile another card, from right to left, giving each pile a total of two cards. This process of dealing cards left to right, then right to left, shall be completed until each pile has seven cards. The remaining four cards shall be placed into the discard pile.

The player-dealer chooses one of the seven piles, and shakes a dice cup containing 3 standard dice. The total of the three dice determines which pile of seven cards will be distributed to the player's position, by counting the pile of cards chosen by the player-dealer position as one and continuing clockwise until the total is reached, the next stack of seven cards in order is the banker's hand.

Dealing Procedures and Round of Play

- Players at a table will place a wager on either the Ultimate Player wager or the Ultimate Banker wager in the designated betting area located on the felt.

Both hands are opened by the dealer and set house way. The dealer is required to form a two-card hand and a five-card hand for both the player and banker according to the house way strategy. The five-card hand must always rank higher than the two card hand. Once each of the hands have been set house way the dealer will compare the two hands to determine if the wagers placed on the table win, lose, or push.
- The player-dealer will pay and collect all wagers back to front seat by seat according to action until the hand is over or the bank money has been depleted. After all wagers are settled and the cards are collected, the dealer will drop the house collection into the box. The player-dealer button is turned over to read deal #2 and the game starts over again. Once a player has occupied the player-dealer position twice, it will be offered to the next player in a clockwise rotation.

ULTIMATE WAR

Cordova Restaurant and Casino

Type of Game

The game of Ultimate War utilizes a player-dealer position and is a California game. The position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. The gambling enterprise does not participate in the actual play of the game and has no interest in the outcome of the play.

Object of the Game

The object of the game is to assemble two hands of one card each with the players competing against the player-dealer position.

Description of the Deck and Number of Decks Used

The game is played using a standard 52-card deck and no jokers. Cards will be dealt using a multiple deck shoe. A minimum of one deck and a maximum of eight decks shall be used during the play of the game. The deck will be shuffled in between each round of play.

Card Values and Hand Rankings

The rank of the cards used in Ultimate War, for the purpose of determining a winning hand, shall be, in order from the highest to lowest rank: ace, king, queen, jack, 10, 9, 8, 7, 6, 5, 4, 3 and 2. The suit of a card shall have no effect on its rank.

Description of Table Used and Total Number of Seated Positions

The game shall be played on either a standard blackjack table that accommodates up to seven players and a player-dealer position for a total of eight seated positions or a standard baccarat table that accommodates up to thirteen players and a player-dealer position for a total of fourteen seated positions. Within each betting area for each seated player, there shall be five separate betting areas specifically designated for five separate wagers; the Player Bet, the Banker Bet, the War Bet, the Ultimate 5 Player Bet, and the Ultimate 5 Banker Bet. Each betting space at the table has a fixed amount for wagering limits defining the minimum and maximum amounts that may be wagered. Players must bet at least the table minimum. Back-line betting is permitted on all wagers.

Method used to Determine Action and Distribution of Cards

The action on payouts will always begin with the player to the left of the player-dealer position and continue clockwise. All wagers shall be settled from seat to seat in the following order: all Player Bet wagers, all Banker Bet wagers, all War Bet wagers, all Ultimate 5 Player Bet, and then all Ultimate 5 Banker Bet wagers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player -dealer shall be returned to the respective players.

Dealing Procedures and Round of Play

At the start of a game a player is offered the player-dealer position. Once accomplished, the house dealer shall wait for each player to make their wager in accordance with the table limits.

Each player has the following options when placing their wager(s):

- The Player Bet which pays 1 to 1;
- The Banker Bet which pays 1 to 1;

ULTIMATE WAR

Cordova Restaurant and Casino

- The War Bet, which pays according to the pay table below;
- The Ultimate 5 Player Bet, which pays according to the pay table below;
- The Ultimate 5 Banker Bet, which pays according to the pay table below.

Once all wagers are placed, the house dealer deals one card to the right and one card to the left. The hand to the left of the house dealer is a community hand that belongs to those that placed a wager on the Player Bet. The hand to the right of the house dealer is a community hand that belongs to those that placed a wager on the Banker Bet.

The hand that has the highest card value wins. If the both hands have the same value they are considered a tie and the hand "goes to war". When a hand goes to war the house dealer will deal an additional card to the Player Bet hand and the Banker Bet hand to determine the winner. The hand that is dealt the highest card wins. In the event that the hands tie again, the hand will go to war again and the process will repeat until a winner is determined. There is no limit to the amount of times the Player and Banker Bet hands may go to war. The winner is determined by a comparison of the last card given to each player.

How Each Wager Wins, Loses, or Pushes

Once both hands have been completed, according to the guidelines above, the player's wagers are settled. The following shall apply for each possible outcome when determining the winner. The player-dealer shall pay and collect all wagers accordingly:

- The player-dealer shall pay all winning Player Bet wagers when the card dealt to the Player's hand is higher than the card dealt to the Banker Bet hand. However, when the Player Bet hand wins with a 5, the Player Bet is not paid and is a push. The Banker's Bet loses and is collected as normal.
- The player-dealer shall collect all losing Player Bet wagers made by players when the Banker Bet hand is higher in value than the Player Bet hand.
- The player-dealer shall pay all winning Banker Bet wagers when the card dealt to the Banker Bet hand is higher than the card dealt to the Player Bet hand. However, when the Banker Bet hand wins with a 5, the Banker Bet is not paid and is a push. The Player Bet loses and is collected as normal.
- The player-dealer shall collect all losing Banker Bet wagers made by players when the Player Bet hand is higher in value than the Banker Bet hand.

War Bet

- For each seated position, there shall be one separate and specifically designated area for the placement of a War Bet wager. A player may place a War Bet wager even if he/she has not also placed either a Player Bet wager or a Banker Bet wager prior to the initial deal.
- The player-dealer shall pay all winning War Bet wagers when the card dealt to a Player's hand and the card dealt to the Banker's hand have the same value.
- The player-dealer shall collect all losing War Bet wagers when the card dealt to the Player's hand and the card dealt to the Banker's hand do not have the same value.

Pai Gow Poker with Ultimate Push and Happy Pai Gow Bet

Synopsis:

This game uses the traditional Pai Gow Poker game and adds two bonus bets, Ultimate Push Bonus Bet and Happy Pai Gow Bonus Bet. The bonus bets have to be placed prior to the hands being played. A Player has the option to place a Ultimate Push wager and the wager will win when the Player's hand and the Player-Dealer's hand push. This Ultimate Push Bonus Bet pays 1:1 except when there is a pair of 3's or higher, then it will pay 2:1. In addition, a Player has the option to place a Happy Pai Gow wager and the wager will win when the wagered hand of seven cards consists of Ace high or lower.

Object of the Game:

The object of the game is for both of the player's two hands to rank higher than both of the player-dealer's two hands by strategically playing the seven-card poker hand with a two card low hand and a five-card poker high hand. Should one hand rank exactly the same as the player-dealer's hand, this is a tie. The player-dealer wins all ties. If the player wins one hand, but loses the other, this is considered a "push", and no money exchanges hands.

Type of Deck Used:

The traditional Pai Gow Poker game uses a total of 52 cards and a joker. The Joker is used as an Ace or to complete a straight or flush.

Table Layout:

Each table has 7 active seats and 1 inactive seat. An 8-seat table may be used with one inactive seat in order to symmetrically accommodate a floor person and another seated player. The inactive seat has the betting spots blocked. The inactive seat rotates clockwise, and is always located immediately to the right of the player-dealer, from the Dealer's perspective.

Number of Players:

There is no minimum number of players, as long as there is at least one player and one player-dealer.

Ranking of Hands:

Pai Gow Poker is played with a standard fifty-two (52) card deck with one joker, fifty-three (53) cards total. The Joker can only be used as an Ace, or to complete a Straight, Flush, or a Straight Flush.

The highest 5-card hand is Five Aces, and the highest 2-card hand is a Pair of Aces. The PGPQ hand rankings, based on traditional poker rankings, are as follows:

<i>Rank</i>	<i>Combination of Cards</i>
1 st	Five Aces (A-A-A-A-Joker)
2 nd	Royal Flush (10-J-Q-K-A of the same suit)
3 rd	Straight Flush (Five cards, same suit, ranked in order; i.e. 6-7-8-9-10 of hearts)
4 th	Four-of-a-kind (Four cards of the same rank; for example, 5-5-5-5) The highest-ranked cards win should the p/d and player both have a four-of-a-kind
5 th	Full House (Three-of-a-kind and one pair) The highest-ranking three-of-a-kind wins; i.e. K-K-K-7-7 beats a 10-10-10-A-A
6 th	Flush (Five cards, same suit, regardless of ranking; i.e. 5-8-9-Q-K of spades)
7 th	Straight (Five cards of different suits ranked in order)
8 th	Three-of-a-kind (Three cards of the same ranking; for example, Q-Q-Q)

Game Rules and Structure:

Each player at the table is dealt seven cards to make two hands, a two-card hand and a five-card hand. Rankings are based on basic poker rankings. The five-card hand must be higher than the two-card hand.

Play of the game is as follows:

a. The dealer places seven hands of seven cards each, face down in front of the dealer's tray. The dealer checks that exactly four cards are left over, and then places those cards into the dealer's tray.

b. There are two steps taken to determine which of the seven hands goes to which player. In the first step, the player-dealer calls out a number from one to seven, and the Action button is placed on the pile that corresponds to that number. This hand is pushed slightly forward and the preceding hand is turned sideways.

c. If a dice cup is used, the player-dealer then shakes the dice cup containing three dice. The cup is opened only by the house dealer, after all bets are placed in the betting circles. If a random number generator is used, the number generated by the random generator will be used.

d. The player-dealer's position is always 1, 8 or 15. The dealer counts clockwise from the player-dealer's position to locate the seat corresponding to the number on the dice. The pile of cards with the Action button, will then be placed in front of the player indicated by the dice or number generated by the random number generator. The remaining piles will then be distributed clockwise. The player-dealer's hand is left in front of the dealer and the dealer button is placed on top of it.

e. Each player then arranges their cards into a two-card low and a five-card high hand as described above.

f. The dealer does not look at the cards until all players have set their hands in the designated spaces face down. Any hands that are going "house way" will have a "house way" button placed on them.

g. The dealer then turns his cards over and sets his hand face up. Losing hands should be turned face down and losing wagers should be placed on top. If the player wins one hand and loses the other, this is considered a "push". No money exchanges hands and the cards are placed in the discard holder.

h. If one player is wagering on more than one seat, that player may look at and determine the setting of the first hand only. The remaining hand(s) must be set according to the "house way". Players and the player-dealer must place their bets before the dice cup is opened or the random number generator is finalized. No change in bets can occur after that point. Only chips placed in the appropriate position(s) on the table constitute a valid bet. Each player is responsible for the chips he/she places on the table.

Object of the Game

The object of the game is to play to 31. The Player hopes to be dealt a "Natural" which is the Top Ranked Hand. The Players and the Player Dealer add the numerical value of their initial two-cards and compare them against each other. In the event the Player Dealer is dealt a "Natural" the game stops, and the Hands are compared. If the Player is not dealt a two-card thirty-one (31) then the Player will play to Hard thirty-one and if not, then the Player will try to get as close to twenty-one.

The Player's hand is frozen from receiving an additional Draw card when their hand total is between 22 and 30. After the Draw the Player will lose their original wager with a hand value between 22 and 30 and Win on a value of 31 no matter the value of the Player Dealers hand.

- ♣ A Natural consists of an Ace card and a 10-point card when the first two hands are dealt.
- ♣ A "Blackjack X" consists of an Ace/King of Spades.
- ♣ All cards have face value. Face cards have a value of 10.
- ♣ If the Player Dealer does not have a Natural the Players will have the option to Double Down, Hit, Split, Surrender, or Stand depending on the value of their hand.
- ♣ The Player must stand on a Natural, and a Hand that totals between 22 and 30. The Player has an option when their hand total is between 2 and 21.
- ♣ Player Dealer must hit soft 17 and stands on Hard 17 or above.

Game Rules

A standard deck of cards with no Joker is used in the play of the game. The Deck will contain a total of 52-cards. The game can be played with a minimum of one (1) and a maximum of eight (8) decks. All Aces of spade will have an "x" stamped on the card.

The game plays to 31 which can be achieved either on the initial two-card deal by being dealt a standard Ace card along with a 10-point card or by hitting to 31 while trying to avoid landing on a hand that totals between 22 and 30. The best hand is referred to as a "Natural 31" and is accomplished when the player or player-dealer's initial two (2) card hand consists of a standard ace and a ten (10) point card. The second best hand is a two-card hand that consists of an Ace and King suited. If the player is not dealt a two-card hand of thirty-one (31), the player will try to achieve either a hard thirty-one (31), which is the third best hand, or a hand of twenty-one (21), which is the fourth best hand. Both the Player and the Player-Dealer's hand are frozen from taking additional Hit cards when their hand value is between 22 and 30. When exceeding twenty-one, the Player will win on Hard (31) and will lose on any other total, no matter the value of the Player Dealer hand. The Players will have the option to Stand, Split, take Insurance, Double Down, Surrender or Hit provided the Player Dealer is not dealt a two-card 31. A hard hand is any hand that the minimum value is more than 11. Minimum value means there are aces in the hand and using all the aces as 1 instead of 11's the hand is 12 or more, or it would be any hand that if were to receive another 10 would bust over 22.

A hard 31 would be a hand that the player hits a hard 21 and receives a 10. This is the only way that hand could be achieved.

When both the Player and the Player Dealers hand value is between 22 and 30 they are frozen from taking additional Hit cards. When exceeding twenty-one, the Player will win on Hard (31) and will lose on any total between 22 and 30, no matter the value of the Player Dealer hand.

Mexican Poker (GEGA-002068) – No Limit

For **schedule options 1 through 3**, the house dealer will collect the collection fee from ‘the pot’ after the first round of betting has been completed. If after the first round of betting, there are insufficient funds in the pot to satisfy the collection fee, the difference will be collected during each subsequent round until the total collection fee has been collected. However, if after the first round of betting, there are insufficient funds in the pot to satisfy the collection fee, and there are no additional wagers added to ‘the pot’ during that round of play, the collection fee will be considered complete for that round of play. *Ultimate Texas Hold'em is owned, patented and/or copyrighted by SHFL Entertainment, Inc. Please submit your agreement with Owner authorizing play of Game in your gambling establishment together with any request for Bureau of Gambling Control (Bureau) approval to play this game. Please note that the Bureau is making the details of this game available to the public as required by subdivision (g) of Business and Professions Code section 19826, but the posting does not waive any rights to the game content which may be held by Owner. The terms of any agreement with Owner are to be negotiated between the gambling establishment and Owner, and any dispute or asserted breach related thereto are private matters which will not be resolved by the Bureau.

Standards of play:

Ultimate Texas Hold'em features head-to-head play against the player/dealer and an optional bonus bet.

The player/dealer position will be selected as in other games approved by the Bureau of Gambling Control; and the player/dealer will only "bank" the hand (including bonus bets) for two (2) consecutive times before it is rotated in a clockwise fashion around the gaming table.

Players and the player/dealer each receive two cards. They combine them with five community cards to make their best five-card hand.

Ultimate Texas Hold'em lets players bet aggressively. The earlier they bet, the more they can risk and win. If players bet pre-flop, they may risk 3x or 4x their ante. If they bet on the flop, they may bet 2x their ante. If they wait until the river, when all community cards are out, they may only bet 1x their ante.

This game also features an optional bet, the Trips bonus. Players win the Trips bonus if their final five-card hand is three of a kind or higher. Odds will be printed on layout.

Type of gaming table utilized for this game:

Ultimate Texas Hold'em shall be played on a table having seven (7) places on one side for the players and the player/dealer for a total of eight seated positions, including a place for the Casino dealer on the opposite side of the table. Each Ultimate Texas Hold'em table shall have a drop box attached to it.

The layout cloth covering the table shall bear an inscription to the effect that the "Player/Dealer only plays with a pair or higher."

The wagering areas shall be designated as follows:

1. For ante wagers on the word “Ante”;
2. For blind wagers on the word “Blind”;
3. For trips bonus wagers on the word “Trips”; and
4. For play wagers on the word “Play.”

Number of players in the game:

A maximum of seven players plus the player/dealer position for a total of eight seated positions.

Type of card deck used:

1. **Shuffling Machine:** Cards used to play Ultimate Texas Hold'em shall be dealt from an automatic card shuffling device (“shuffler”).
2. **Physical Characteristics:** Cards used to play Ultimate Texas Hold'em shall be in standard decks of fifty-two (52) cards.
3. **Number of Decks:** Cards used to play Ultimate Texas Hold'em shall be played with two (2) alternating decks, each consisting of fifty-two (52) cards with backs of the same design.
 - a. The backs of the cards of the two decks are of different colors;
 - b. One deck will be shuffled by the automated card shuffling device while the other deck is being dealt or used to play the game;
 - c. Both decks will be continuously alternated in and out of play, with each deck being used for every other round of play; and
 - d. The cards from only one deck shall be placed in the discard rack at any given time.

Ranking of Hands:

1. All suits of cards shall have the same rank.
2. Cards shall rank, from lowest to highest, as follows:
 - a. 2, 3, 4, 5, 6, 7, 8, 9, 10, jack, queen, king, ace.

3. Hands of cards shall rank, from lowest to highest, as follows:
- a. 1 Pair 2 cards of the same value. A higher pair beating a lower pair. Aces shall be high.
 - b. 2 Pairs 2 different sets of pairs. The highest pair has priority when comparing hands. If the high pairs are the same, then the low pairs are compared, and then the remaining card.
 - c. 3 of a Kind 3 cards of the same value.
 - d. Straight 5 cards of any suit in sequence. An ace may be counted as high or low.
 - e. Flush 5 cards of the same suit, not in sequence. The value of the highest card in the hand shall decide the ranking between 2 flushes, and where the highest cards in both hands are the same value, the next card and so on.
 - f. Full House 3 cards of the same value and a pair (two cards of the same value). The hands take their rank from the threesome.
 - g. 4 of a Kind 4 cards of the same value.
 - h. Straight Flush 5 cards of the same suit in sequence.
 - i. Royal Flush Ace, king, queen, jack, and 10 of the same suit.

Betting scheme:

- 1. All wagers at Ultimate Texas Hold'em shall be made by placing gaming chips on the appropriate betting areas of the table layout, keeping in mind the table minimum and maximum wagering limits.
- 2. All wagers shall be placed prior to the dealer announcing "No more bets." No bets shall be made, increased, or withdrawn after the dealer has announced, "No more bets."
- 3. Before the first card is dealt in a round, each player shall make either:
 - a. An equal wager in the "Ante" and "Blind" circles; or

- b. An equal wager in the “Ante” and “Blind” circles and a “Trips Bonus Wager.”

An ante wager and a blind wager are required to play the round.

4. The player/dealer will collect all losing wagers and will pay all winning wagers to the extent of their wager. Once the player/dealer’s wager is exhausted, all player wagers not covered by the player/dealer will be returned to the players.

Dealing procedures:

1. Immediately before the start of each round of play and after all ante wagers, blind wagers, and any trips bonus wagers have been made, the casino dealer shall:
 - a. Call “No more bets”; and then
 - b. Starting on his/her left and continuing clockwise around the table, deal the cards.
2. All cards shall be dealt face down.
3. When a card shoe is used the cards shall be dealt as follows:
 - a. 1 card to each wagering area containing an ante wager and blind wager and then 1 card to the player/dealer; followed by
 - b. A further card to each such wagering area and the player/dealer, so that each player and the player/dealer have 2 cards each; followed by
 - c. 5 community cards in the center of the table.
4. When an automatic shuffler is used the cards shall be dealt as follows:
 - a. 2 cards at a time to each wagering area containing an ante wager and blind wager; followed by
 - b. 2 cards to the player/dealer; followed by
 - c. 5 community cards in the center of the table.

5. After the cards have been dealt and delivered to each player and the player/dealer, the dealer shall unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards.

Round of Play

1. After the dealing procedures above have been completed, each player shall examine his or her cards and decide whether to check (do nothing) or to make a play wager three or four times the value of their ante wager. Once players bet, they cannot bet again and they cannot change their bet.
2. When players have made their player wagers (if any), the casino dealer shall proceed to turn over the first three community cards.
3. Players who have not already made a play wager may decide to either check again or to make a play wager two times the value of their ante wager.
4. The casino dealer shall proceed to turn over the remaining two community cards (the turn and the river).
5. When all five community cards are revealed, players who have not yet made a play wager can either fold or make a play wager equal to the value of their ante wager.
6. A player who decides to fold shall place his/her cards face down on the table. The casino dealer shall then, in relation to each player who has folded:
 - a. Collect the ante wager, blind wager, any trips bonus wager (if the hand is not a 3 of a Kind or better) on behalf of the player/dealer, and the player's cards;
 - b. Individually spread out the cards, face down, and count them; and
 - c. Place the cards in the discard rack.
7. For all remaining players, the casino dealer will turn over the player/dealer's two cards. Each player and the player/dealer's two cards will be combined with three of the community cards to make the best five-card poker hand.
8. When handling the cards, players shall at all times ensure that the cards remain on or above the area of the table. The cards must not be removed from the table.

When the player/dealer does not qualify:

9. Where the player/dealer's hand is not 1 pair or higher, the player/dealer does not qualify. Starting with the player on the player/dealer's left, the casino dealer shall:
- Expose each player's cards, signal a push for the ante and return the ante wager to each player that did not fold;
 - Resolve the play, blind, and trips bonus bets normally (see below "When player/dealer qualifies"); and
 - Collect, count and place the player's cards in the discard holder.

NOTE: Ultimate Texas Hold'em handles qualifying differently than other games. When the dealer does not qualify, it is not an automatic win for the player.

When the player/dealer qualifies:

10. If the player/dealer's hand has a poker value of a pair or higher, the casino dealer reconciles the hands of those players who remain in the game. Starting with the player to the left of the player/dealer, the casino dealer will:
- Bring the player's cards into the "work area" between the player/dealer's hand and the trips bonus wager area and reveal the player's cards;
 - Determine the player's best 5-card poker hand utilizing any of the 7 cards available (player's 2 hole cards and 5 community cards);
 - Compare the player's hand with that of the player/dealer; and
 - Announce the value of the player's hand and whether it wins or loses.
11. A player's hand shall:
- Win if it has a higher poker value than that of the player/dealer's hand;
 - Lose if it has a lower poker value than that of the player/dealer's hand;
 - Constitute a push if it has a poker value equal to that of the player/dealer's hand.
 - If a player wins with less than a straight, the blind bet pushes.

12. If a player's hand loses, the casino dealer shall:
 - a. Collect on behalf of the player/dealer, in order, the play, ante and blind wagers;
 - b. Determine whether the trips bonus wager qualifies and pay accordingly on behalf of the player/dealer; and
 - c. Collect, count and place the player's cards in the discard holder.
13. If a player's hand wins, the casino dealer shall on behalf of the player/dealer:
 - a. Pay the ante wager and play wager on the hand;
 - b. Pay the blind wager if the hand is a straight or better;
 - c. Pay any trips bonus wager if the hand is a 3 of a kind or better; and
 - d. Collect, count and place the payer's cards in the discard holder.
14. If a player's hand constitutes a push, the casino dealer shall:
 - a. Pay any trips bonus wager if the hand is a 3 of a kind or better;
 - b. Collect, count and place the player's cards in the discard holder.
15. Winning ante wagers and play wagers shall be paid 1 to 1.
16. Winning blind wager and trips bonus wagers shall be paid in accordance with the approved pay table for the cardroom.
17. Where a player has made a trips bonus wager at the beginning of the round and has received a 3 of a Kind or higher, the casino dealer shall leave the particular cards face up on the table and those cards shall not be collected or discarded until the payout on the hand has been made.
18. If the player receives a 3 of a Kind or higher, the trips bonus payouts are made regardless of whether the hand wins, loses, or pushes.

NOTE: If the player has a 3 of a Kind or better, the trips bet always wins – even if the player folds.

19. The player/dealer is never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player/dealer wager. The house never participates as the player/dealer. The house never takes a percentage of wagers placed in the game. There is no maximum on the player/dealer's wager.
20. The player/dealer position rotates in a systematic and continuous way among the seated players, and no one player may serve as the player/dealer for more than two consecutive hands. The player/dealer button rotates clockwise around the table.

Although the Bureau has approved these collection rates, games offering a zero collection are currently under Bureau review. The Bureau has the right to: (1) review the lawfulness of the CA Games Collection Rates; (2) notify all law enforcement agencies and gambling establishments if further review determines that the CA Games Collection Rates are unlawful; (3) require gambling establishments to cease and desist offering the CA Games Collection Rates, if found unlawful; and (4) take action against those gambling establishments that decline to abide by the Bureau's cease and desist notification.

For **schedule options 1 through 3**, a collection fee will be taken per hand from the player-dealer position based on the total monetary value of all game wagers and bonus bet wagers that are placed by players prior to cards being dealt, referred to as total action on the table. The total action on the table does not count any additional wagers placed by players after cards are dealt. There will be no collection fee required from a player when placing the Ante, Blind or Trips wagers. The Trips Bonus wager may be less than, equal to, or more than the Ante and Blind wagers as long as they are within table limits. The collection fee shall be collected from the player-dealer and dropped by the house dealer after each player has placed their wagers but prior to cards being dealt or any round of play being conducted.

Collection Procedures

California Games - California games utilize a player-dealer position. The position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. All controlled game wagers, including bonus bets, are collected or paid, to the extent that the player-dealer's wager covers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

- Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed above, shall be used at a gaming table at any one time.
- Collection rates and fees shall be determined prior to the start of play of any hand or round. Rates shall not be calculated as a fraction or percentage of wagers made or winnings earned. Flat fees on wagers may be assessed at different collection rates; however, no more than five collection rates may be established per table limit.
- The Cordova Casino shall provide ample notice to patrons regarding the collection rates and fees, as well as the procedure for collecting them. Collection fees shall be conspicuously posted on or within view of every gaming table.
