# LOWBALL

## Game Description:

- 1) In California Lowball, the lowest or "worst" poker hand wins. The game is played with a 53-card deck which includes the Joker. The Joker must be used as the lowest card not already present in the player's hand. Most five-card draw Lowball games feature structured betting. There are two betting rounds, one before the draw and one after the draw. The betting limit after the draw may or may not be twice the amount before the draw. A player may look at two cards and kill the pot (double the big blind).
- 2) Rank of hands: The best Lowball hand is 5-4-3-2-A, and a 7-6-4-3-2 is better than a 7-6-5-3-2. Straights and flushes do not count against the player's hand.
- 3) A new player entering any Lowball game may get a hand with-out penalty in any position except the blind.
- 4) Check-raise is not allowed.
- 5) Before the draw, exposed cards of five and under must be taken. An exposed cards of five and under must be replaced after the deal has been completed.
- 6) After the draw, an exposed card(s) can not be taken. The draw will be completed, and the exposed card(s) will be relaced. All cards dealt off the table are treated as exposed cards.
- 7) After the draw, you must bet a hand of seven or better in order to be eligible to win after draw action. If a seven or less is checked, provided it is the best hand, all action after the draw is void. If you check any hand seven or better after the draw, you cannot win any subsequent bets although you are still eligible to win whatever existed in the pot before the draw. However, if you check a seven or better, and are beaten by a better hand, you will lose the entire pot including any additional calls you have made.
- 8) In the event of an all-in bet, a seven may call a short all-in bet after the draw and win. If players over-call the short bet from behind, they will receive their bets back. If the seven fulfills his obligation by making a full bet, all subsequent action will stand.

# OMAHA POKER

Omaha Poker is frequently called Four Card Hold-Em because, except for a couple of variations, both games are the same. The differences are players are each dealt four cards in Omaha vs. two in Texas Hold-Em and player MUST use exactly two cards of their four, along with three of the common cards exposed on the table in order to form their five-carded poker hand. The traditional rankings of hand apply.

All general poker rules and Hold Em rules apply to Omaha games.

Standard 52-card deck is used.

Blinds are posted as in many other forms of poker.

Players are dealt four cards, face-down, one at a time, in rotation, in turn.

A round of betting ensues for players who wish to continue and contend for the pot.

Three cards are turned face-up in the middle of the table. These are commonly called the flop.

A round of betting ensues for players who wish to continue and contend for the pot.

A fourth card is turned next to the initial three.

A round of betting ensues for players who wish to continue and contend for the pot.

A fifth and final card is turned next to the previous four. These five cards are common to all active players.

A final betting round.

All active players expose their hands. Using exactly two of their personal four cards and three of the five communal cards. The active player with the best high hand is awarded the pot.

# OMAHA HIGH-LOW SPLIT

## Game Description:

1) Omaha is a form of Texas Hold'em, except the players are dealt four down cards (hole cards) as their initial starting hands. A round of betting occurs. There are three other betting rounds, the flop, the turn, and the river. The five board cards are community cards and belong to all active players. A player must use exactly two cards from his four- card hand (hole cards) and three cards from the board (community cards) to produce his best five- card hand.

The hole cards and the board cards are interchangeable for High and Low. To win the low half, the player must have an eight or better to qualify, or the high hand wins the entire pot.

Omaha uses a flat disc called a "dealer button" to indicate the player, who in theory, dealt the cards for that pot. The button (player with the dealer button) is last to receive cards on the initial deal, and has the right of last action on all betting rounds except the first. One or more blind bets are used to stimulate action and initiate play. Blinds are posted before the players look at their cards. Blinds count as part of that player's bet, unless the structure of a specific game or situation requires part or all of a particular blind to be dead. Dead chips are not part of a player's bet and are taken into the center of the pot.

Blinds are posted by players in consecutive clockwise order from the button. Action is initiated on the first betting round by the player on the immediate left of (in front of) the person who posted the furthest blind clockwise from the button. On all subsequent betting rounds, the action is started by the first active player clockwise from the button. Omaha Hold'em may be played straight-high.

2) The Ranking of Hands is the same as in High or Low Draw Poker, except there is no Joker.

3) All General House and Hold'em rules apply to Omaha games.

# TEXAS HOLD'EM

## GAME DESCRIPTION:

1) HOLD'em (also know as Texas Hold'em) is a variation of 7-Card Stud. Instead of seven individual cards, each player gets two hole cards. Five community cards are then turned up on the table. As in Stud, Hold'em has structured betting.

Hold'em uses a flat disc called a dealer button to indicate the player, who in theory, dealt the cards for that pot. The button (player with the dealer button) is last to receive cards on the initial deal and has the right of last action on all betting rounds except the first. One or more blind bets, posted before players look at their cards, are used to stimulate action and initiate play. Blinds are posted by players who sit in consecutive clockwise order from the button. Action is initiated on the first betting round by the player on the immediate left of the person who posted the furthest blind clockwise from the button. On all subsequent betting rounds the action is begun by the first active player clockwise from the button.

In Texas Hold'em, a player receives two down cards as his initial hand. There is a round of betting after these cards have been delivered. Three board cards are turned up simultaneously (which is called "the flop"). They are community cards available to all players. Another round of betting occurs. The next two board cards are turned one at a time with a round of betting after each one. After the final rounds of betting has been completed, a player may use any combination of five cards (one in his hand, four from the board, etc.) to determine his best hand. Players may use all of the board cards which is termed "playing the board;" each must announce that he is playing the board before mucking his hand.

Hold'em may be played High-Low split, with an eight or better qualifier for low.

2) The Ranking of Hands is the same as in Draw Poker, except there is no Joker.

3) A new player entering any Hold'em game may get a hand without penalty in any position except the blind.

4) If a player leaves the table for any reason and the blind(s) passes his position, he may resume play by posting the total amount of the blind, and the collection for the game or wait for the big blind. If he chooses to post, the small blind and collection are dead money and are moved to the center of the pot while the big blind is live.

5) The dealer button always moves forward, and the blinds are adjusted accordingly..

6) IN all games, the smallest increment chip used in the blind plays in all-in situations.

7) Players who have not taken the big blind may move away from the blind and have two options:

- a. Post the big blind; it is live.
- b. Wait and be dealt back in on the same position

8) If players are dealt the wrong number of cards the hand is a misdeal, unless it is the button card, discovered before action begins which can be corrected.

9) If the flop has too many cards, it will be taken back, except for the burn card, and reshuffled. No new burn card will be used.

10) If cards are flopped by the dealer before all the betting is completed, the entire flop is taken back and reshuffled. The burn card will remain, and no additional burn card will be used for this flop.

11) If the dealer turns up the fourth card on the board before the action is completed, the card does not play. After the completion of the action, the next card is burned and the fifth card is put in the fourth card's place. After action is completed, the dealer will reshuffle the deck, including the card that was taken out of play but not the burn card or discards. The dealer will then deal the fifth card, with no additional burn card.

12) If the fifth card is turned up before betting is complete it shall be reshuffled in the same manner as in the previous rule.

13) A card dealt off the table is treated as an exposed card.

# **HOLD-EM HI-LO SPLIT POKER**

Hold-Em Hi-Lo Split Poker is played with a standard 52-card deck, generally without the joker. The method of play is just like Texas (two card) Hold-Em, except at showdown time, the best qualifying low hand will split the pot with the best high hand. Should there be no player holding a low qualifying hand, the entire pot is awarded to the best exposed high hand.

# **MEXICAN STUD POKER** **(5-CARD – MEXICO STYLE +1-CARD DECK)**

Five Card Stud-Mexican Style is played with a “stripped” standard 53 card deck consisting of 52 cards and 1 joker. The 8s, 9s, and 10s are removed, leaving 41 cards

To receive a hand, each player places a collection in front of him/her in the table’s playing area. The cards are dealt clockwise, beginning to the left of the dealer button.

Each player receives a total of five cards, of which one card must be face down. After the first two cards are dealt, players must turn one card up. A betting round begins with the high card forced to check or make a minimum bet. After the betting is complete, players receive another card, dealt face-down. Players then turn over one of their cards, (leaving one card facedown). The betting round starts with high hand. The fourth and fifth cards are then dealt and played according to the same format. The player with the ranking hand wins the pot.

All cards 8 through 10 are removed from a regular 53 card deck (deck includes joker, which remains). The joker is “wild” in all cases.

The player with the highest card clockwise of the dealer button will either check or bet.

The highest hand will start the action on all following rounds. Hands are considered to be of equal value whether or not one hand may include the joker. The closest of such hands to the dealer acts first.

If any down card of one or more of the players is exposed by the house dealer, all the rest of the players will receive their cards face down and there will be no betting that round. Betting will continue as usual in all the following rounds.

The game allows for the counting as a straight certain hands containing a non-contiguous progress of numbers due to cards 8-9-10 being removed. These hands are 4-5-6-7-J, 5-6-7-J-Q, 6-7-J-Q-K, 7-J-Q-K-A.

If a player exposes a card during other than prescribed times, it is not considered an exposed card and will be required to play.

Starting after the second card, a card will be burned on each round.

Check and raise is permitted. All raises must be at least equal to the size of the last bet.

Cards speak hold your hand until you are sure of what your opponent has.

Once a card touches the muck, that hand is considered fouled. However, at the Floorperson's discretion, it may be considered retrievable.

No string bets or raises

One short buy is allowed for every full buy- in (1 full, 1 short, 1 full, ect.)

Only the player with the dealer button may ask for an additional shuffle.

If you show any cards to one player during or after a hand, any player at the table may demand that you show those cards to all players after a winner is determined.

No rabbit hunting. Once the cards are out of play, players cannot look through the discards or ask the dealer what is coming off the deck.

All players will act in turn. If a player checks, the player who checked first must show his/her hand first.

A player who indicates action toward betting or calling will be required to complete that action with a minimum bet. However, If a player is unaware of a raise he/she will not be held to that unless action has been taken behind this act.

# FIVE CARD STUD POKER

Five Card Stud is played with a standard 52-card deck. Each player receives one card face down and one face up. They have the option of betting, calling or raising. After each betting round is completed, the dealer will in turn, deal each player one card face up, until each player has received three more face up cards (one after each betting round).

There is one betting round after the first two cards have been dealt to each player. There will be additional betting rounds on the third, fourth and fifth face up cards.

The object is to make the best poker hand using the five cards dealt to each player.

# SEVEN CARD STUD

Seven card Stud used a standard 52-card deck, generally without the joker. Traditional rankings of hands apply.

Players ante, the size of which is relative to the stake of the game.

Players are dealt three cards in turn, in rotation two face down, one face up

Rounding of betting.

Active players are dealt one card face up (fourth)

Round of betting

Active players are dealt one card face up (fifth)

Round of betting

Active players are dealt one card face up (sixth)

Round of betting

Active players are dealt one card face up (seventh)

Final round of betting

Showdown. Active players expose all of their cards.

Best five- card poker hand in traditional order wins.

Most seven- card stud games have structured betting.

In a structured card betting game such as \$2, \$4, the smaller bet is made on the first two betting rounds, and the larger bet is made after the fifth, sixth and seventh cards. If there is an open pair on the fourth card, the players have the option of making the smaller or larger bet. Spread limit games may be offered.

In seven-card stud, the low card initiates the action and the high hand is first in each subsequent round. The ranking of suites is used only to determine the lowest or highest card for a forced bet. Suites are ranked spades (highest) Hearts, Diamonds, Clubs.

If a player antes and/ or asks to be dealt in but is unable to make it back to the table, he/she forfeits his/ her ante and forced entry bet is applicable.

If a player folds his/her hand after making a forced bet or on a round of checking, his/her seat will continue to receive a card until there is a wager.

If a player has the incorrect number of cards on the deal, the player will receive his/her ante back and will be out of the hand, If it is not discovered immediately and the player takes action on his/her hand, the hand is foul and all rights to the pot and moneys involved are forfeited.

If a player's first or second hole card is accidentally turned up, the third card is dealt face down. If both hole cards are dealt face up, the player has a dead hand and receives his/her ante back.

If a dealer burns two cards or fails to burn a card, move the card to the right position to rectify the error, If it happens on a down card and you cannot tell which card it was, then the player must accept the card.

If a dealer burns and deals a card before a round of betting has been completed, that card or cards must be eliminated from play along with an additional card for each remaining player in the hand, After that round of betting is finished, play resumes in normal fashion.

If any player other than first position, receives his/her last card face up all other players will receive their last card face down. The player or players whose card was exposed has two options:

1. Declaring "all in" for the portion of the pot already played. All other betting will be on the side.
2. May continue to be active in any further action in the pot on the final round.

If the player's final card is exposed, all the rest of the player's cards will be exposed. The player who was high on sixth street remains first to act and all action stands.

If there are not enough cards left in the deck for each player the following will happen:

1. The dealer will deal all cards except the last card. He/ she then scrambles the last card and the burn cards, cuts the deck, burns a card and delivers the remaining down cards, using the last card if necessary.

2.If there are five players remaining without a card, the dealer will not burn and deliver the cards. If the dealer finds that there are still not enough cards using the previous procedure, he/she will announce the use of a community card. The dealer will then burn a card and turn up a card in the center of the table. (Community card) The card plays in everyones hand. The player who falls high on board- using the community card initiates the action.

Players who pick up or turn over any of their up cards after a bet is made risk losing all rights to the pot.

Players who call when they are beat by there opponents up card are not entitled to a refund.

## **SEVEN CARD STUD HI-LO**

Seven Card Stud Hi-Lo is played the same as Seven Card with some variation. Seven Card Stud Hi-Lo uses a standard 52-card deck, generally without the joker. Players try to make the best high hand and the best low hand using any combination of five cards out of the seven in their hand. The low card initiates the action on the first round, with an Ace counting as a high card for this purpose. On subsequent rounds the high hand initiates the action. In a structured limit game, an open pair has no option of making the smaller or larger bet as in Seven Card Stud. If the game is played with a qualifier for low, and there should be no low, the entire pot is awarded to the best exposed high hand. A player may make the best hi and best low to win the entire pot.

## **SEVEN CARD STUD LOW (RAZZ)**

Razz is played with a standard 52-card deck, generally without a Joker. Razz is simply Seven Card Stud played for low that is the traditional ranking of poker hands is reversed. The lowest ranked hand is now the best hand. Best possible hand is 5 - 4 - 3 - 2 - Ace. In Razz, the high card has the forced opening bet and the low hand is first to act thereafter. Contrary to Low-Ball, check and raise is permitted.

# DRAW POKER

If the player decides to play, they may discard and draw cards after the first betting round. A player may draw from 0-5 cards. There would be one more final betting round.

If a player is dealt more cards than the game he/she is playing in calls for, and it is discovered before he/she acts on his/her hand, the extra card will be retrieved and placed on the top of the deck as the burn card. If the card has been seen by the player, card is placed face up as a burn card. The player receiving less than the required number of cards will receive a card from the top of the deck. If either situation occurs after any player has acted on his/her hand, all moneys, antes and blinds are forfeited by that player. The first round of betting is on the first five cards. The second and final betting round is on the cards after the draw is completed.

27. Statements regarding the value of a player's hand are not binding. The cards speak for themselves.
28. No side bets of any kind will be allowed.
29. A player may see only one hand regardless of the number of hands on which he or she has wagered. A player can only be the "active" player on one spot and only at one hand, regardless of the number of hands in which he has wagered.
30. If an active player chooses not to wager on his or her spot (for whatever reason), he or she may not prohibit any other player from wagering on that spot, that player will automatically be allowed to wager or backline on that spot until the dealer button has been moved to the next player.
31. A misdeal will be declare if: (1) a Joker or Ace is boxed or exposed, (2) if two or more cards are boxed or exposed on the deal.
32. A boxed or exposed card on the deal will replaced after the deal is finished by the

first of the remaining four cards.

33. Players are responsible for the final setting of their hands. The House Supervisor may assist and/ or offer advice upon request, but is not responsible for final decision.
34. If a player sets their hand with the highest hand in the two-card hand (the five-card hand does not rank higher than the two-card hand), the hand is foul and the wager is forfeited to the extent that money covers.
35. If a player puts three cards in one hand and four cards in the other, or one and six in the other hand, the hand is foul and the wager is forfeited to the extent that money covers.
36. The House dealer cannot allow the dealer to set his or her hand foul. If the house Supervisor mistakenly allows a foul hand to be played, it will be reset the House way by the management and play will continue.
37. The dealer's hand is not set until the dealer has signified his or her final decision in an obvious manner to the House dealer.
38. Once the hand of the player with the action button is exposed, the dealer may not reset his or her hand.
39. A player may request a change of deck only after the dealer has had both deals or when the dealer's button is moved to the next spot.
40. When two of the same cards are turned up, the hand will be declared a misdeal.
41. A hand that has been misread by the House dealer will play at true value if it can be retrieved intact.
42. Management reserves the right to make decisions which are in the best interest of the game. Therefore, under special circumstances, a decision may be rendered that is contrary to the strict and technical interpretation of these rules.

# Pan

Pan is played with 320 cards; 8s, 9s, ~10s, and jokers are omitted. Chips are used for settlement. Additional cards (Spades) may be deleted.

The object of the game is to have eleven cards, face up in front of you, on the table in valid melds. The first player doing so is the winner and receives from each player with cards and chips (also those with hands that are fouled) the total value of his/her melds as they lay, two for winning the hand plus the tops (antes), which must be given to his/her last. he/she is the first player dealt to on the next hand.

## **Rank of Cards**

Cards *in* each suit rank K (high), Q, J, 7, 6, 5, -1, 3, 2, Ace. The jack and seven are in sequence. There is no rank of suites, except that Spades pay double in some cases. (See (conditions))

## **The Draw**

Cards are always dealt to the right (counter clockwise) not to the left as in most games. They are dealt five cards at a time, in the beginning deal, four cards are turned down and the fifth card is turned up to each player. The lowest card up is the eldest hand. From then on, the winner of each hand is dealt to First, and is first to act

## **The Shuffle**

The Pan dealer (mucker) is responsible for shuffling the deck. After each hand, the discards are shuffled with a portion from the back of the deck, to which position these cards are then restored.

## **The Deals**

The dealer (mucker) gives each player ten cards, in two rounds of five at a time, beginning with the winning player. For the deal he/she takes cards from the front of the deck, restoring any excess to the front of the deck.

## **Going On Top**

Before play status, each player beginning with the winning hand declares whether he/she will stay in the play or retire. If he/she retires, he/she discards his/her hand and forfeits his/her ante. Hands discarded by retiring players are not returned to the deck, but are set aside so that they may not be drawn in play. The forfeits go to the player who goes out.

### **The Play**

Starting with the player to the right of the dealer, each in turn draws one card, from the top of the deck or from the top of the discard pile. If he/she takes the top card of the deck, he/she must immediately use it in a meld or discard it. He/she may draw from the discard only if: 1) the top card of the discard pile was drawn from the deck and discarded by preceding player; and 2) he/she can immediately meld this card in a combination

After drawing and before completing this turn by discarding one card face—up, the player may meld as many sets as he/she holds, or add to his/her existing melds.

The object of play is to meld eleven cards, the first player to do So Wins the game.

### **Melds**

Each meld (or spread) must be at least three cards, it may be as many as eleven for convenience the melds are classified as sequences (usually called ropes) and sets

### **Sequence**

Any three card in sequence of the same unit, as Heart Q, J, 7.

### **Set**

Three cards oh the same rank and of different suits, as Heart 4, Spade 4, Club 4, or of the same suit, as Club QQQ. In addition, any three aces or any three kings Form a set regardless of suit, as Diamond A, Diamond A, Club A

### **Conditions**

Certain melds are called condition. On melding a condition, the player immediately collects chips from every player, as Follows:

All threes, five's, and sevens are vale (pronounced valley) cards, that is cards of value. Cards of other rank are none—vale.

### **The Conditions are:**

1. Any set of vale cards, not in the same suit, 1 chip.
2. Any set of vale cards, in the same suit, -4chips in Spades, 2 chips in any other suit.
3. Any set of non-vale cards, in the same suit, 2 chips in Spades, 1 chip in any other suit.
4. Any sequence of A, 2, 3, in the same suit, 2 chips in Spades, 1 chip in any other suit.
5. Any sequence of K, Q, J, in the same suit, 2 chips in Spades, 1 chip in any other suit.

### **Increasing**

A player may add one or more cards to any of his/ her melds provided that the character of the melds is preserved. To a set of different suites he/she may add any card of the same rank, to a set of the same suites another of the same rank and any suite. When such cards are so added to a condition, the player collects the value of the original condition for each additional card, except that only half the value is paid for additional to a set of three vale cards in the same suit (2 chips in spades, 1 chip in any other suit)

One meld may be split into two by the addition of cards, provided that two valid melds results. For example: Diamond J, 7,6, 5, may be split into two melds by the addition of Diamond Q, 4 The advantage in splitting is to increase the number of open ends. If splitting a meld creates a condition, the player collects for this condition, 2 chips in spades, 1 chip in any other suit. For example: the player had melded four 4's, one of the same suit he/she make two valid melds, one of them a condition.

### **Borrowing**

A player may take a card from one of his/her increased melds to make a new meld, provided he/she leaves a valid meld. For example: From Club 7,6,5,4, he/ she may borrow either 7 or 4, but not the 6 or 5

### **Forcing Card**

If the top of the discard pile can be added to a meld of the player to whom it is available, any other player may, if he/ she desires to require the player to take that card. The purpose in forcing this draw on the player is to compel him/her to make a discard, thereby possibly breaking up a prospective combination.

### **Going Out**

When a player shows eleven cards in melds he/she collects two chips from every player and also collects all over again for each condition in his/her cards

When a player has all ten cards spread, the player at his/her left may not discard a card that puts his/her right—hand opponent, unless the player at the left has no other possible choices.

### **Irregularities**

If, before he/she has made his/her first draw, a player finds he/she has nine cards, dealer will serve him/her the additional card. If a player has eleven cards, the dealer withdraws the excess card from a players hand and puts the card among the discarded hands of retired players. If a player has been dealt less than eight cards or more than twelve cards, the hand is dead and the player's ante will be returned.

If a player's hand is found incorrect after he/she has made his/her first draw, he/she must. Discard his/her hand, retire from that deal and return all collections he/she has made for conditions. In addition, he/she must continue to make due payments to others for conditions and for winning.

### Incorrect Meld

If a player lays down any spread not conforming to the rules, he/she must make it valid on demand. If he/she cannot do so, he/she must return any collections made in consequence of the improper spread and legally proceed with his/her turn. If he/she has already discarded, he/she must return all collections he/she had made on that hand, discard his/her hand, and retire from play until the next deal, but must continue to make due payments to others for conditions and winning. However, if he/she has made the meld valid before attention is called to it, there is no penalty.

## Super 9

**This game is also called “Super Pan 9” or “Pan 9”.**

The deck consists of 8 regular deck with the 7's, 8's, 9's and 10's removed (288).

If the player's hand is closer to 9 than the designated “Banker's” hand, the player wins. If the “Banker's” and player's hand add up to the same value a “push” or tie results. In the event of a tie no one wins or loses.

## CALIFORNIA BLACKJACK ("22")

California Blackjack is played with a standard deck of cards (52) with four Jokers added for a total of 56 cards.

The object of the game is to have cards whose face value is closer to 22 than the face value of the Designated Player/Banker's ultimate cards. If the face value of a player's cards is closer to 22 than the Designated Player/Banker's total, he/she wins. Otherwise, he/she loses.

If a player's card total and the Designated player/Banker's card total is the same, neither wins and the player's bet is returned.

You can't bust in California blackjack. It is possible to win with 23 or more. If the face value of both hands are equal distance to 22. But one is under and one is over 22 the under hand wins. Example: player's hand is 24 and the designated player/banker's hand is 20. Although both hands are two away from 22 the designated player/ banker wins because that hand is under

Values for the cards are:

Aces = 11

Face cards = 10

All others = their face value

Jokers = 11

Players make a bet and post the proper collection.

All active players are dealt two cards face down, one at a time, in turn, in rotation. The designated player/banker is dealt one card face down and one card face up.

Any player who is dealt a natural 22 (two aces, two jokers or one of each) in the first two cards must immediately open their cards. The wagers are paid immediately, to the extent that the designated player/banker's money covers, regardless of their position in action.

Each player, in turn, can elect to draw additional face-up card(s) in an attempt to improve their total. they may not draw past a hard 22

After all players have exercised their opinion for additional card(s), the Designated Player/Banker's cards are exposed and the same option is available to him/her. Starting with the ACTION hand, each player's hand is exposed in turn and compared to the Designated Player/Banker's hand total to determine the winner based on the above criteria.

If Designated Player/Banker has a natural and does not let the house dealer know and the players draw to their hands, the hand can now only be played as a two or twelve and Designated Player/Banker must now draw to make a higher hand.

## OBJECT OF THE GAME

The object of Pure 21.5 Blackjack is for the players and the player-dealer to add the numerical value of their cards and:

- Achieve the best possible point total of 21.5 by getting a King, Queen, Jack, or Ten Bonus Card and an ace on the initial two cards dealt (Example King Bonus Card below). This hand pays 6 to 5.

- Get as close to 21.5 as possible, without going over.
- Draw additional cards if needed.

## VALUE OF THE CARDS

The game uses a modified 52-card deck with aces through nines (the standard spades, hearts, clubs and diamonds) and 16 cards specially marked with the word "Bonus" (four of each "king", "queen", "jack", and "ten" card). The game is played with a minimum of six decks to a maximum of eight decks.

- A King, Queen, Jack or Ten Bonus card and an Ace, on the initial deal, is the best possible hand. It is known as a "Pure 21.5 Blackjack" and pays 6 to 5.
- A King, Queen, Jack, or Ten Bonus card dealt with any other card is worth 10 and is added to the other card(s) point total.
- An ace has a value of either 1 or 11.
- All cards from 2-9 have their face value.
- King, Queen, Jack, or Ten Bonus cards have a value of 10 unless dealt with an Ace on the initial deal, and then they have a value of 10.5.

Ranking Chart	
Card	Value
K, Q, J, 10 Bonus card	10 or 10.5 when dealt w/ an ace

## ROUND OF PLAY

1. Pure 21.5 Blackjack is played on a raised gaming table. The table seats eight players who face the house dealer in a 180-degree seating arrangement. The tables are the standard blackjack tables commonly used in the casino industry. The house dealer stands opposite the players, and in the center of the table. The house dealer's chip tray is set in front of the dealer.
2. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed. The collection fee for the players and player-dealer will also be displayed. A maximum of five collection rates is allowed in compliance with the California Penal Code.

## PURE 21.5 BLACKJACK

3. A standard round of play begins when a player-dealer is designated. The player-dealer will place a wager in a betting circle in front of their seat. That wager will be used to pay the winners and will set the amount that he/she can collect for the losers. The casino will place a button in front of the player-dealer, which designates that they are taking the "bank" position and further designates whether it is the first or second turn for the player-dealer in the banking position. The player-dealer will place the appropriate collection fee in front of his/her betting circle.
4. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the appropriate collection fee based on the posted schedule for the cardroom. Prior to the start of play the house dealer will take collection fees and drop them into a locked collection box affixed to the gaming table.
5. After the fees have been collected, the house dealer will deal the cards to the players and the player-dealer. All cards dealt throughout the game are face up, with the exception of the player-dealer's second card, which will remain face-down until all players have acted on their hands. The house dealer is the only person on the table allowed to touch the cards. The players will signal the dealer with hand gestures that indicate whether they wish to hit or stand. The hand signals will be consistent with the industry standard signals of a sweeping motion towards a player's body, indicating a hit, or a side to side hand motion, indicating the desire to stand. The house dealer deals the first card to the player seated to the left of the player-dealer, and continues in a clock-wise manner. Each player will be dealt one card face up with the player-dealer receiving the last card. The player-dealer's cards will be placed in front of the house dealer.
6. The house dealer will deal a second card to the players in the same order noted above and the last card will go to the player-dealer and will be dealt face down. The players are given an opportunity, starting with the player seated to the left of the player-dealer, to be dealt additional cards to make the best possible hand. (Rules and procedures for splitting, doubling down and surrender will be outlined later).
7. Players must follow the below listed **Chart 1A** in deciding whether to hit or stand on a particular hand.
8. After all players have acted on their hands and indicated to the house dealer that they do not want or cannot receive additional cards, the player-dealer's down card will be turned up. This down card will determine where the "action button" is placed.
9. The game utilizes an action button to determine which player receives first action on their wager. The player-dealer's second card, which is dealt face-down, determines the position of the action button. The player-dealer position is not counted when determining where the action button shall be placed. The other seats, in clockwise rotation, starting with the player to the left of the house dealer and continuing left to right, respectively represent the numbers of the player-dealer's face down card. When determining where the action button will be placed, cards will hold the following values: Ace is one, 2 through 9 have their face value, jack is eleven, queen is twelve, and king is thirteen.
10. The player-dealer's hand will then be completed according to the rules listed on **Chart 1B**. Once the player-dealer's hand is completed, the payoff and/or collection of wagers will begin in the seat designated by the action button and continue in a clockwise manner until all wagers have been acted on.

# PURE 21.5 BLACKJACK

11. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house shall not participate as the player-dealer. The house shall not take a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
12. The player-dealer's cards will always be dealt and placed in front of the house dealer's tray. The placement of the player-dealer's cards is standard in all games and is depicted below. See **Diagram #1**
13. The next round of play begins when the house dealer collects all the cards from the table and places them in the discard tray. The player-dealer position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

4. Players can surrender after the first two cards are dealt to them. If they choose to surrender, half of their wager will be forfeited. The player must indicate their desire to surrender before the player-dealer's down card is exposed. Their play for the hand will then cease.
5. The cardroom will take no extra collection fee on double downs or splits from the player or player-dealer.
6. All payoffs are to the extent that the player-dealer's money covers the action on the table. A Player/Dealer cannot win or lose more than the entire amount of money placed on the table before the start of the hand.

## INSURANCE AND EVEN MONEY

1. If the player-dealer's face-up card is an ace, all players will have the option to place a separate "insurance" wager. They are wagering that the player-dealer's face-down card is a King, Queen, Jack, or Ten Bonus card, giving the player-dealer a Pure 21.5 Blackjack. Winning insurance wagers will pay 2 to 1. Insurance wagers may be equal to no more than  $\frac{1}{2}$  of a player's original wager.
2. In conjunction with offering insurance, when the player-dealer's face-up card is an ace, players that have a Pure 21.5 Blackjack (an Ace and a King, Queen, Jack, or Ten Bonus Card) may opt to take even money on their wagers before the player-dealer's face-down card is checked for a King, Queen, Jack, or Ten Bonus Card. The player is actually making an insurance wager equal to  $\frac{1}{2}$  of the original wager. If the player-dealer has a Bonus card as the undercard (a Pure 21.5 Blackjack), the Player wins the insurance bet (a wager equal to  $\frac{1}{2}$  of the original wager that pays 2 to 1) and pushes on the original wager. If the player-dealer does not have a King, Queen, Jack, or Ten Bonus Card as the undercard, the player will lose the insurance bet and is paid, in accordance with the Pure 21.5 Blackjack payoff, on the original wager. The result in each case is the same as the player wins an amount equal to the original wager (even money).
