Summary of May 14, 2024

CLETS Advisory Committee

Meeting

This summary of the May 14, 2024 CLETS Advisory Committee meeting includes:

- Action Items from Meeting
- Agenda from Meeting
- Executive Secretary Report
- Legislative Update
- CAS Presentation Regarding Agency Outage Options
- New CLETS Service Application Staff Comments
- Transcript of the Meeting

Action Items from May 14, 2024

CLETS Advisory Committee

Meeting

This summary of the Action Items from the May 14, 2024, CLETS Advisory Committee meeting includes:

Action Item #1 (Chief White, 12/14/23 & 5/14/24):

DOJ to revisit previous action item "Should the PPPs require that retraining occur if operator misuse was founded?"

(page 9, lines 1-18)

Action Item #2 (Committee Member Park, 5/14/24):

DOJ to reach out to the agencies that reported higher numbers of cases of misuse to determine how many individuals committed the misuse.

(page 11, line 10 through page 12, line 4)

Action Item #3 (Committee Member Park, 5/14/24):

DOJ to research the feasibility of establishing agency "disaster mnemonics" that do not expire. (page 19, line 25 through page 20, line 17)

Action Item #4 (Committee Member Park and Chief O'Keefe, 5/14/24):

CLETS Administration Unit (CAS) to coordinate with DOJ Client Services Program (CSP) on creating an Information Bulletin and/or providing presentation regarding options for agencies experiencing outages affecting CLETS connections; DOJ to consider providing to CA Chief's and CA Sheriff's meetings. (page 22, lines 5-10; page 22, lines 13-15)

Action Item #5 (Committee Member Park, 12/14/23 & 5/14/24):

CAS to coordinate with DOJ CSP on creating a presentation outlining what CLEW contains and how it operates to support law enforcement agencies' efforts. (page 33, lines 3-6)

Action Item #6 (Chief White, 5/14/24):

DOJ to continue discussions related to access to the Automated License Plate Reader hotlist. (page 33, lines 11-18)

Department of Justice (DOJ) California Law Enforcement Telecommunications System (CLETS) CLETS Advisory Committee (CAC) Meeting Notice and Agenda

May 14, 2024 1:00 p.m.

Elk Grove City Council Chambers 8400 Laguna Palms Way Elk Grove, CA 95758

OPEN SESSION

- 1. Call to Order
- 2. Roll Call
- 3. Housekeeping
- 4. Approval of Minutes from the December 14, 2023, CAC Meeting
- 5. Chairman's Report
- 6. Executive Secretary's Report
 - a. CLETS Traffic
 - b. Misuse Statistics
 - c. Action Items from Last Meeting
- 7. CAS Presentation Contingency Plans for CLETS Outages
- 8. CLETS Legislative Update John Ponce, DOJ, will provide an update on pending legislation.
- 9. New Service Applications
 - a. CN-01 City of Lancaster Police Department (Los Angeles County)
- 10. Upgrade Applications Approved by DOJ
 - a. City of Burbank Police Department (Los Angeles County)
 - b. City of Beaumont Police Department (Riverside County)
 - c. Solano Community College Department of Public Safety (Solano County)
 - d. U.S. Department of Interior, Bureau of Indian Affairs, Blue Lake Tribal Police Department (Humboldt County)
 - e. Yuba County Sheriff's Department (Yuba County)
 - f. City of Los Gatos Police Department (Santa Clara County)

- g. University of California Police Department, Riverside (Riverside County)
- h. City of Atwater Police Department (Merced County)
- i. City of San Gabriel Police Department (Los Angeles County)
- j. City of Monterey Police Department (Monterey County)
- k. Los Angeles Sheriff's Department (Los Angeles County)
- 1. City of Del Rey Oaks Police Department (Monterey County)
- m. Santa Clara County Probation Department (Santa Clara County)
- n. Santa Clara County Sheriff's Office (Santa Clara County)
- o. City of Grover Beach Police Department (San Luis Obispo County)
- p. Butte County Sheriff's Office (Butte County)
- q. Contra Costa County Probation Department (Contra Costa County)
- r. City of Atascadero Police Department (San Luis Obispo County)
- s. City of Lathrop Police Department (San Joaquin County)
- t. City of Arvin Police Department (Kern County)

CLOSED SESSION

11. Client Report for noncompliance issues – Closed session pursuant to Government Code section 11126, subdivisions (c)(18) – Review of detailed Client Reports regarding specific matters that pose "a threat or potential threat of criminal activity" against CLETS and/or CLETS data transmitted between the Department of Justice and specific client law enforcement agencies.

OPEN SESSION

- 12. Members' Reports
- 13. CAC Discussion/Open Forum/Public Comment
- 14. Next CAC Meeting/Adjourn

Notices and agendas are also available at the following website: https://oag.ca.gov/meetings.

To submit written material regarding an agenda item or questions regarding the agenda or meeting, please contact:

Department of Justice CLETS Administration Section Lydia Shindelbower Telephone: 916-210-4240 cas@doj.ca.gov

The CAC complies with the Americans with Disabilities Act (ADA) by ensuring that the facilities are accessible to persons with disabilities, and providing this notice and information given to the members of the CAC in appropriate alternate formats when requested. If you need further assistance, including

CLETS Advisory Committee Agenda Page 3

disability-related modifications or accommodations, you may contact the CAC no later than seven (7) calendars days before the meeting at (916) 210-4240 or cas@doj.ca.gov.

2023

^{*}Administrative actions are pending

Action Items

(Action items are requests that staff received from the Committee at previous meetings)

Action Item 1 (Greg Park) – Provide guidance on how to plan for an outage that affects an entire county

 Action Taken – The CLETS Administration Section (CAS) has prepared a presentation to be provided later in the meeting.

Action Item 2 (Chief White) – Provide notification to agencies of ASAP to PSAP availability.

 Action Taken – CAS is preparing an Information Bulletin to send to all agencies to notify them of the availability of ASAP to PSAP.

Action Item 3 (Chief White) – Should the PPPs require that retraining occur if operator misuse was founded?

 Action Taken - Due to the various types of violations that constitute misuse, DOJ recommends that administrative/corrective actions continue to be at the discretion of the Agency Head.

Action Item 4 (Greg Park) – Provide overview of CLEW

 Action Taken – DOJ determined that the CAC is not the appropriate forum to discuss the California Law Enforcement Web website, as it is for law enforcement purposes only. For additional information about training available on CLEW, please reach out to the DOJ's Client Services Program at DOJCSP@doj.ca.gov.

CALIFORNIA

DEPARTMENT OF JUSTICE

CLETS ADVISORY COMMITTEE
MEETING
May 14, 2024

CLETS Advisory Committee (CAC) Legislation Update May 14, 2024

1) Assembly Bill (AB) 2352 (Irwin) – Mental health and psychiatric advance directives

Status: In Assembly Appropriations Committee; Referred to suspense file

AB 2352 would specify the requirements for the formation of a written or digital psychiatric advance directive (PAD) and how PAD may be used in numerous and healthcare legal settings. A PAD is a legally binding document that the individual completes and shares regarding their desire for treatment, medication, and other individuals to contact when the individual is experiencing a mental health crisis.

DOJ is engaged with the author's office and her sponsor regarding technical assistance on this bill to allow PAD to be available to any state or local law enforcement agency through the California Law Enforcement Telecommunications System (CLETS). The goal of this possible bill amendment is to give first responders (e.g. law enforcement agencies) additional information (the PAD) to assist them in de-escalating a situation, avoiding a dangerous outcome, or directing an individual to treatment.

2) AB 2917 (Zbur) – Firearms: restraining orders

Status: Passed the Assembly Appropriations Committee (11-0); Ordered to third reading.

Existing law requires the Department of Justice (DOJ) to maintain state summary criminal history information and to furnish this information to specified entities, including city attorneys pursuing civil gang injunctions or drug abatement actions.

AB 2917 would require DOJ to also furnish state summary criminal history information to city attorneys and county counsels pursuing gun violence restraining orders (GVRO).

While not specified in the bill, prosecuting city attorneys or city prosecutors may be able to get this information in CLETS if they qualify for CLETS access. They may qualify for CLETS access only if they prosecute misdemeanors. So the bill may potentially increase the number of entities seeking access to CLETS. I believe there are a handful of city attorney offices that currently have access due to prosecuting misdemeanors. Alternatively, if they need a certified record, they would instead request it from the BCIA Records Custodian.

While there may be potential increased asks for CLETS access, the intent behind AB 2917 is to make clear that city attorneys can have access to criminal history information when filing GVRO petitions on behalf of law enforcement agencies (LEA), and we expect them to receive the information from the LEAs, not from our office or via CLETS access requests.

CALIFORNIA

DEPARTMENT OF JUSTICE

Agencies Experiencing CLETS Outages
Contingency Options

Types of Situations That May Cause CLETS Outages

Outages that affect an agency

- Cyberattack
- Power outage
- Broken circuit
- CAD/RMS/MSC or other system down

Definitions

Definitions for purposes of this presentation:

- Terminal Access Request Form (TARF)
 - This form is used to request new mnemonics or modify mnemonics
- Time Activated Message Forwarding (TAMF)
 - This form is used to forward certain messages from one mnemonic to another. Concerning hit confirmations, the agency being forwarded to needs to have access to the originating agency's master case files.
- Message Switching Computer (MSC)
 - Directly connected hardware/software designed to switch/move transactions to and from CLETS
- Law Enforcement Agency Web Interface (LEAWEB)
 - Browser-based application that utilizes the California Law Enforcement Telecommunication System (CLETS) to provide access to critical criminal justice databases.

Short term-immediate action options:

- 1. Have personnel at a different agency (not affected by outage) enter records under the unaffected agency's ORI.
 - Affected agency could coordinate with unaffected agency to have records entered during the outage.
 - Once the affected agency is no longer impacted by the outage, these records would need to be deleted and then re-entered under the affected agency's ORI. Both agencies would need to track the records being entered so that they could be cancelled/re-entered once connection is reestablished.
 - In this situation, if the affected agency's phone is still available, they could still receive calls regarding hit confirmations, notices of locate, etc. via phone; however, they couldn't receive those via CLETS. A TAMF could be set up to forward these types of messages to a mnemonic at the unaffected agency (applicable if host/MSC is not affected).
 - The unaffected agency would need to coordinate with the affected agency so that incoming messages could be addressed.

Short term-immediate action options (cont.):

- 2. Have personnel from the agency experiencing the outage go to an agency with an active connection and have messages routed to a specific mnemonic there (TAMF).
 - The affected agency's personnel could monitor and respond to messages being forwarded to this mnemonic.
 - This would apply if the affected agency is downstream from a "host" agency, and that host agency's MSC is not affected.

Long term options:

- 1. Apply for a backup secondary direct connection (i.e., router and circuit). This could be set up to use a separate MSC or LEAWEB. CLETS Upgrade Application must be submitted and approved.
- 2. Agency could set up cross-references with another agency that has a separate direct connection, to be used by that other agency or for their own use. The existing mnemonic would already be assigned to the other agency, but the cross-reference would provide the ability to enter/update records for both agencies.
 - HDC 0007 Reciprocity Agreement, TARF, and TAMF required
 - This option could take up to 13 days to become effective due to CLETS tabling schedules.
- 3. Agency could set up a mnemonic behind another agency's MSC
 - If desired, a mnemonic could be set up behind the unaffected agency's system that is assigned to the affected agency's ORI (must be signed off on by the unaffected agency's ACC). This would allow the affected agency to enter/update records under their own ORI, using the unaffected agency's system.

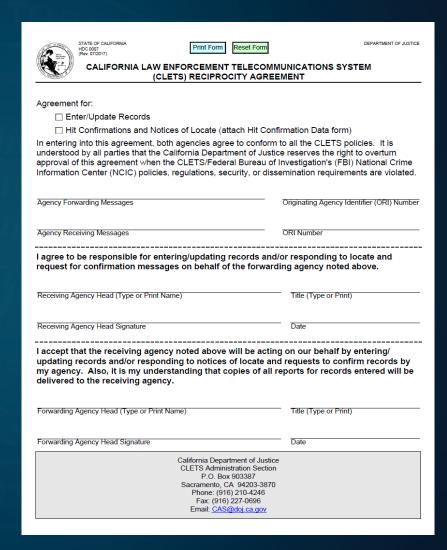

Long term options (cont.):

- 4. In the event that an agency's local system is down, but their host agency's connection to CLETS is still up, and their connection to their host is still up, LEAWEB could be utilized as a backup.
 - This is a solution for a situation where the agency's application or program used to connect to CLETS is not working; however, their connection to their host is still active. Their active connection could be used to reach LEAWEB and run CLETS transactions.
 - This solution would require a CLETS Application to be submitted and approved.

HDC 0007 – Reciprocity Agreement (RA)

- In order for a CLETS agency to designate another CLETS agency as the responsible entity to enter/update records on behalf of the forwarding agency, a Reciprocity Agreement must be completed.
 - The agreement must be signed by the Agency Head of both agencies and submitted to CAS.

Time Activated Message Forwarding (TAMF) Request Form

- Have messages routed to a specific mnemonic, located at a different unaffected agency, that is working with the affected agency.
- A TAMF is most commonly used to address Hit Confirmations

TIME ACTIVATED MESSAGE FORWARDING (TAMF) REQUEST FORM

CLETS Executive Secretary Department of Justice P.O. Box 903387 Sacramento, CA 94203-3870 FAX (916) 227-0696

5) Day(s)/Time(s) messages are to be forwarded:
Sun: Mon: Tue:
Wed: Thu: Fri:
Sat: 6) Messages forwarded include: Hit confirmation requests (NLETS and CLETS YQ_YR. messages only) Notices of locate NCICS, messages CLETS "Emergency" a dministrative messages
Messages <u>not</u> forwarded include: Normal administrative messages and All Points Bulletins Data base responses RESET PRINT

CLETS Terminal Access Request Form (TARF)

- If the agency entering records on behalf of the other is entering/updating records, then an ORI/mnemonic crossreference must be set up.
- Once the ORI is crossreferenced, the designated mnemonic will have the ability to enter/update records for any ORIs that it's cross-referenced with.
- Table updates could take up to 13 days to become effective.

13	Non-Members Present:
14	CHRIS BLAIR, CLETS Executive Secretary MILAD DALJU, Legal Counsel
15	
16	Due to technical difficulties at the beginning of the
17	meeting, audio was not captured for Agenda Items #1-5.
18	The following is a summary of these agenda items:
19	1. Call to Order
20	Chief Donald O'Keefe, Vice Chair of the CLETS Advisory
21	Committee, called the meeting to order at 1:00 p.m.
22	2. Roll Call
23	CLETS Executive Secretary Chris Blair called roll and
24	announced that a quorum was present.
25	

3. Housekeeping

2.3

2.5

Vice Chair O'Keefe told meeting attendees where restrooms could be found within the building. He asked for all committee members to identify themselves before speaking or making a motion or second for the transcript. For audience members wanting to make a comment, Vice Chair O'Keefe requested that they use the microphone located on the podium at the front of the room. He stated that public comment will be limited to 3 minutes per person, and that members of the public will not be permitted to "yield" their allotted time to other members of the public to make comments.

4. VOTE: Approval of Minutes from the December 14, 2023

CAC Meeting

Vice Chair O'Keefe asked if any member of the committee had any comment on the minutes. Hearing none, he then asked if any member of the public had any comment on the minutes. Hearing none, Vice Chair O'Keefe requested for a motion to vote to approve the minutes. Chief Andrew White motioned to vote. Vice Chair O'Keefe requested a committee member to second the motion, and Committee Member Greg Park seconded. Executive Secretary Blair took a roll call vote for the approval of the minutes. The minutes were unanimously approved.

5. Chairman's Report

Vice Chair O'Keefe stated that the chair position is still vacant on the Committee; therefore, as Vice Chair, he would be chairing today's meeting. He then stated that nominating and voting for a new chair will occur at a future meeting. Vice Chair O'Keefe announced that there is a recent vacancy on the committee for the California Highway Patrol; a nominee from the California Highway Patrol has been selected and will be introduced once they have been sworn in. Vice Chair O'Keefe asked if any member of the committee had any comment on the Chairman's Report. Hearing none, Vice Chair O'Keefe asked that Executive Secretary Chris Blair move onto Agenda Item #6, The Executive Secretary's Report. The remainder of the meeting was captured on audio, and was transcribed by: Brittany Olsen-Graham, Foothill Transcription Company

25

Mr. Blair: For the Executive Secretary's Report, I will be discussing CLETS traffic, misused statistics, and action items from the last CAC meeting.

2.3

Here are some of the CLETS traffic statistics for the first quarter of 2024. Total messages are approximately 256 million messages for the quarter for inbound and 257 million outbound. The monthly average is approximately 85 million. The daily average is almost 2.8 million, and the peak day is approximately 3.4 million messages.

In the first quarter of the total of 160 CLETS direct connections, only one connection did not consistently maintain 95 percent uptime, and that was the Santa Barbara County Sheriff's Office. This agency has two different connections, and this is one of their connections. And this connection, actually no other agencies connect through this one, and their secondary connection averaged 100 percent uptime.

Now these are the misused statistics for 2023 and 2022. In 2023 we've had 1,620 ORIs submit. We're missing 82 agencies' misuse reports. 1,587 reported no misuse. 33 reported misuse. Of all the investigations, there were 122 investigations performed. 30 of those investigations are pending. 51 found no CLETS misuse.

And in 2023 there were 7,275 violations found, and

we'll come back to that in a second. 35 of those resulted in counseling. Eight resulted in reprimand. 7,235 resulted in training. Ten resulted in suspension. Six resulted in resignation. Six resulted in termination. And there were six others. And of the others, three of those are still pending and three of them were compensation reductions.

2.3

Now back to the 7,275 violations found in 2023. The highest number of violations from one agency in 2023 was 6,789. These were the result of an agency running III queries for carry concealed weapon permits.

The violations have been addressed by the agency and retraining has occurred for their CCW unit. The agency indicated that their CCW unit supervisors briefed those employees on the proper process, and no further incidents of misuse have been identified since. The agency has also implemented new processes so that this type of misuse is highlighted in their future training classes.

And speaking of III or criminal history queries via CLETS for CCW permit purposes, there were a few other agencies that were identified as running criminal history queries for this purpose. Due to this, the DOJ is planning on providing further guidance to LEAs via an information bulletin describing what information can be accessed for CCW purposes, how to access it, and

reminding agencies that accessing criminal history via CLETS for this purpose is considered misuse and should be reported as such.

2.3

These are the statistics for journal searches. When or if an agency is conducting an investigation related to potential CLETS misuse, they have the option to reach out to the DOJ to request assistance with their investigation, and these are the statistics related to that.

So, in 2023 we received 38 requests. Nine of those are still related to investigations. Nine of those investigations are still pending. 26 found no misuse. Three violations were found. Two resulted in suspension, and one is pending administrative action.

In 2024 so far, we have received 14 requests. Seven of them are pending, and seven found no CLETS misuse.

Now for the action items. Action items are requests that staff received from the committee at the previous meeting. So, action item one, from Committee Member Park: the action item was providing guidance on how to plan for an outage that affects an entire county. The CLETS Administration Section has prepared a presentation to be provided later in the meeting.

Action item two, from Chief White: provide notification to agencies of ASAP to PSAP availability.

Action taken: CAS -- the CLETS Administration Section -- is preparing an information bulletin to send to all agencies to notify them of the availability of ASAP to PSAP.

2.3

Action item three, Chief White: should the PPPs require that retraining occur if operator misuse was founded? And action taken: due to the various types of violations that constitute misuse, DOJ recommends that administrative or corrective actions continue to be at the discretion of the agency.

Action item four, from Committee Member Park: provide an overview of CLEW. Action taken: DOJ determined that the CLETS Advisory Committee is not the appropriate forum to discuss the California Law Enforcement Website, or CLEW, as it is for law enforcement purposes only. For additional information about training available on CLEW, please reach out to the DOJ's Client Services Program at DOJCSP@DOJ.CA.GOV. Thank you.

Chief O'Keefe: Okay. Before moving to the next item, is there any public comment? Seeing or hearing none. We have a CSS --

Mr. Park: A question from committee members.

Chief O'Keefe: I'm sorry. Yes, Chief.

Chief White: Thank you, Chair. I have two questions. The first one is the significant increase,

seven thousand misuses related to III inquiries. I know DOJ labels the inquiries at the top. It says clearly not to be used for licensing purposes. I'm curious if you can indicate what the risk is to California as far as this? I assume this is going to raise some red flags with the FBI CJIS that we went from, on average, a very small number to an extremely large number. What's the risk to our system?

Mr. Blair: So, the question -- sorry. The question
is --

Chief White: Like is -- are we at risk --

Mr. Blair: What is the risk?

Chief White: -- as a state, based upon this agency
having -- I mean our numbers are exponential --

Mr. Blair: Right.

2.3

Chief White: -- for that misuse. Are we at risk of the FBI doing something because of misuse, or do you feel that with the corrective action that was coordinated with DOJ, we're safe?

Mr. Blair: I don't believe I can definitively say either way, but I believe that the actions taken would be considered to have resolved the issue. I can't speak for the FBI, but I would imagine that they would agree. It's something that we'll continue to monitor to ensure that agency and other agencies aren't continuing to do that.

Chief White: Understood. Thank you. The second one relates to security of the system and when there's misuse that's detected. I understand that the action item proposed as a resolution is that DOJ recommends it's business as usual and it stays the same. When I brought this up before, the request was that the committee consider -- it's my understanding the role of the committee is to actually advise DOJ, not to have DOJ advise itself. So, I'm just wondering what -- I realize that's DOJ's position. Is the idea to come back to us and say, "Here's DOJ's recommendation," and then allow the committee to advise DOJ or vote on it? I'm just confused to see it come up that way.

Chief Gilliard: So, we can probably have further conversations on how we can move forward with that. I think at this point in time, we probably need to talk a little bit further. Can we bring this back as a follow-up at the next committee meeting?

Chief White: Thank you.

2.3

Mr. Park: An additional committee member question.

Mr. Blair: Okay. Mr. Park.

Mr. Park: If we can go back to the misuse statistics slide if that's possible. This was helpful for me. Thank you for presenting this information. My understanding initially has been that these numbers

represent individuals, but it appears that these numbers represent events, not necessarily seven thousand individuals. Seven-thousand-plus individuals have misused the system -- is that correct?

Mr. Blair: No. So, it's a number of violations
found.

Mr. Park: But that could be one person --

Mr. Blair: Assume --

2.3

Mr. Park: -- doing seven thousand violations
perhaps, right?

Mr. Blair: It could be, yes.

Mr. Park: Yeah.

Mr. Blair: So, if that one person conducted seven thousand transactions that were considered misuse, it would be considered seven thousand violations.

Mr. Park: Understood. But I think part of what has driven this addition to the Executive Secretary's Report was how the individuals, perhaps within law enforcement and other justice partners, might be misusing the system. Is there any way for us to understand — of that seven thousand or of any of these cases of misuse — how many individuals essentially were responsible for making those incidents happen? Can we have a better understanding of what the audience is that we need to be paying attention to and who is abusing the system as opposed to a bad

actor doing it thousands and thousands of times?

Mr. Blair: That's --

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

2.3

24

25

Mr. Park: I don't know if there's a way for -- so that 7,275, is there a way to add parentheses that would say, "This was caused by five individuals, two individuals..."

Mr. Blair: We could --

Mr. Park: -- that sort of thing?

Mr. Blair: We could follow up with the agencies that reported higher numbers of violations and determine how many individuals that came from.

Mr. Park: Because that would go back to Chief
White's concern about making sure they get retrained,
right? If we have to retrain seven thousand people,
that's obviously a significant effort. But if there's --

Mr. Blair: Right.

Mr. Park: -- two people that need to be retrained,
that would kind of help us understand the audience.

Mr. Blair: In this case, it appeared to have come
from a specific unit within the agency --

Mr. Park: Sure, sure.

Mr. Blair: -- their CCW unit.

Mr. Park: Four or five people maybe.

Mr. Blair: Right.

Mr. Park: Yeah.

Mr. Blair: But yes, we could get that information.

Mr. Park: That would be very helpful. Thank you.

Thank you very much.

2.3

2.5

Chief O'Keefe: Thank you. Anything more from the members before we move forward? Okay. We have the CLETS Administrative Section. Mr. Richard Mason and Ms. Sabrina Ortega will give us a presentation on contingency plans for various CLETS outages.

Ms. Ortega: Good afternoon. I'm Sabrina Ortega.

Mr. Mason: My name is Richard Mason.

Ms. Ortega: We're here from the California

Department of Justice CLETS Administration Section, and
we'll be giving the presentation for the contingency
options for CLETS outages.

So, some of the types of situations that may cause a CLETS outage would be a cyberattack, a power outage, a broken circuit, or a system down such as your CAD, your RMS, or your MSC.

Some of the definitions throughout this presentation we'll be mentioning will be the Terminal Access Request Form known as TARF. This form is used to request new mnemonics or modify mnemonics. We also have the Time Activated Message Forwarding known as TAMF. This form is used to forward certain messages from one mnemonic to

another, and this is concerning hit confirmations. The agency may need to have access to the originating agency's master case files. We also have the Message Switching Computer known as the MSC. And this is directly connected hardware or software designed to switch or move transactions to and from CLETS. And lastly, we have the LEAWeb which is the Law Enforcement Agency Web interface. And this is a browser-based application that utilizes the California Law Enforcement Telecommunications System that provides access to critical criminal justice databases.

2.3

Mr. Mason: Now we're going to discuss what to do. We're going to start with two different short-term immediate action options.

Number one: have personnel at a different agency, one not affected by the outage, enter records on the unaffected agency's ORI. The affected agency should -- could coordinate with the unaffected agency to have records entered during the outage. Once the affected agency is no longer impacted by the outage, these records would need to be deleted and then reentered under the affected agency's ORI. Both agencies would need to track the records being entered so that they could be cancelled and reentered once the connection is reestablished. In this situation, if the affected agency's phone is still available, they could still receive calls regarding hit

confirmations, notices of locate, etcetera, via phone.

However, they couldn't receive those via CLETS. A TAMF -
Time Activated Message Forwarding -- could be set up to

forward those types of messages to a mnemonic at the

unaffected agency. This is applicable if the host Message

Switching Computer is not affected. The unaffected agency

would need to coordinate with the affected agency so that

incoming messages could be addressed.

2.3

Outage option number two, short-term: have personnel from the agency experiencing the outage go to an agency with an active connection and have messages routed to a specific mnemonic there using Time Activated Message Forwarding. The affected agency's personnel could monitor and respond to messages being forwarded to this mnemonic. This would apply if the affected agency is downstream from a host agency and that host agency's Message Switching Computer is not affected.

Now I'm going to talk about long-term options for outages. There are four. The first one is to apply for a backup secondary direct connection. This involves a new router and a new circuit. This could be set up to use a separate Message Switching Computer or LEAWeb. A CLETS Upgrade Application must be submitted and approved for this.

Number two: an agency could set up a cross-reference

with a different agency that has a separate direct connection to CLETS. This will be used by the agency for their own use. The existing mnemonic would be assigned to the other agency, but the cross-reference would provide the ability to enter update records for both agencies.

The HDC 007 Reciprocity Agreement, a TARF, and a TAMF are required to set this up. This option could take up to 13 days to become effective due to CLETS tabling schedules.

2.3

Option number three: the agency could set up a mnemonic behind another agency's Message Switching

Computer. If desired, a mnemonic can be set up behind the unaffected agency's system that is assigned to the affected agency's ORI. This must be signed off by the unaffected agency's ACC -- Agency CLETS Coordinator. This would allow the affected agency to enter update records under their own ORI using the unaffected agency's system.

And lastly, in the event that the agency's local system is down, but their host agency's connection to CLETS is still up and their connection to the host is still up, LEAWeb can be utilized as a backup. This solution is for a situation where the agency's application or program used to connect to CLETS is not working. However, their connection to their host is still active, their active connection can be used to reach LEAWeb and run CLETS transactions. This solution would

require a CLETS Application to be submitted and approved.

2.3

Ms. Ortega: Next, we have the HDC 007 Reciprocity
Agreement. This is used in order for a CLETS agency to
designate another CLETS agency as their responsible
entity to enter and update records on behalf of the
forwarding agency. This form can also be used for
responding to hit confirmations and notices of locate.
When entering into a reciprocity agreement, the agency
responsible for entering and updating records or
responding to hit confirmations must have access to the
originating agency's master case files. And as Richard
mentioned, the agreement must be signed by the Agency
Head of both agencies and submitted to CAS.

Next is the TAMF, the Time Activated Message

Forwarding request form. This Time Activated Message

Forwarding request form can be used to have messages

routed to a specific mnemonic which is located at a

different agency that is not affected by the outage and

happens to be working with an agency that is affected.

The TAMF is most commonly used to address hit

confirmations and is used for non-24-hour agencies to

forward or address hit confirmations during off hours.

And lastly, the TARF, the Terminal Access Request Form. If the agency entering records on behalf of the other is entering or updating records, then an ORI board

mnemonic's cross-reference must be set up. Once the ORI is cross-referenced, the designated mnemonic will have the ability to enter and update records for any ORI that it is cross-referenced with. As Richard mentioned, the table updates can take up to 13 days to be available or to be effective.

2.3

And lastly, if you are experiencing an outage, you can notify the DOJ Operations Center at 916-210-3500. You can also reach out to the CAS Unit at 916-210-4240 or email us at CAS@DOJ.CA.GOV or you can reach out to your CAS analyst. And you can find a list of county analysts on the CLEW website. If you are affected after hours, you can reach out to the DOJ Operations Center. And lastly, you can find any additional resources or forms on CLEW. Thank you.

Chief O'Keefe: Thank you, Sabrina. Thank you, Richard. Does the committee have any questions or comments?

Mr. Park: First of all, thank you very much to the staff, to Kirk Beardwood and team for putting this presentation together. It's highlighted a number of solutions I don't think many agencies have considered or thought are available. It's good to understand that there are some timelines involved specifically with the tabling schedule. I did have a question. I think it was on a

long-term solution. Maybe it was option two. But it was essentially -- I think, if I understood correctly -- an agency and partnership with another local agency could preestablish some mnemonics on somebody else's connection. Is that what I understood correctly?

Mr. Mason: Yes. On option number three --

Mr. Park: Yeah.

Mr. Mason: -- an agency could set up a mnemonic
behind a different agency's Message Switching Computer.
So, let's say L.A. wants to set up a mnemonic in San
Mateo.

Mr. Park: Sure.

Mr. Mason: If L.A. goes down, then the mnemonic in San Mateo is already set up and we'll be able to access both agencies' ORIs. So, entries could be made from Santa Monica. So, somebody from L.A. could go to Santa Monica, do this over the phone, or they could ask if San Mateo would have their people take care of it.

Mr. Park: So that's a beautiful idea and I will
definitely investigate that. Out of curiosity, though,
about mnemonics -- sometimes they expire. Is that true?

Mr. Mason: That is true. The mnemonics will expire if they're unused for 90 days or is it six months? I'm drawing a blank on it.

Mr. Blair: Should be nine months.

Mr. Mason: Nine. I'm sorry. Nine months, yes, if they're unused. And that can be fixed very simply by sending out an admin message. Any activity --

Mr. Park: True.

2.3

Mr. Mason: -- incoming or outcoming will fix that.

But yes. After nine months they will drop out of the system. There is a list available on CLEW if you think you might have some. This often happens with backup computers that are kept in a case somewhere --

Mr. Park: Yeah.

Mr. Mason: -- and don't come out, then you pull
them out and they don't work because your mnemonics have
expired. And we cannot reuse mnemonics.

Mr. Park: Right.

Mr. Mason: So, we will have to reassign new mnemonics. And as with a lot of the other stuff that we're speaking of that involves the table, worst case scenario would be 13 days. If you hit right after we did a table, then we could get your mnemonic in, but it could take up to 13 days to get it.

Mr. Park: Understood. Can I take a little bit from Chief White? You know, our role in this committee is to make recommendations. Is there an opportunity that a recommendation could be taken back to your technical staff? Perhaps we can identify disaster recovery

mnemonics that are only used in this fashion so that my agency, working in conjunction with a neighboring agency, has that mnemonic in place, identified as "disaster mnemonic," and perhaps it would never expire. Could we consider that as a technical option? It would be a little difficult with transition and retirements and various other folks to remember we've got to drive over to that other agency and do a quick little test so that we keep the mnemonic alive. If we can pre-identify disaster recovery mnemonics that never expire, then at least we know that when the disaster happens, they would be available, and we'd be good to go based on the plans that we would have in place. I submit that for consideration.

2.3

Mr. Mason: Sure, sure. I will -- I will talk to
Chris and bring that back to our technical team.

Mr. Park: That would be amazing. Thank you for these options. This is great.

Mr. Mason: You are very welcome. Any other
questions?

Chief White: I just wanted to thank DOJ for putting this together. I think sometimes with this committee, it's the same stuff over and over. This is really good information. And having worked with an agency recently that was dealing with a cyberattack, I think sometimes we forget about all the capabilities you guys do have to

help keep things going. So, we'll have to figure out a way to get this information out to the agencies, at least to spark that conversation. And I think the message I would add to that is call DOJ early because you have incredible resources that can help maintain continuity, and I like two of the options in here. Some of them are rather manual, but it gets the job done. So, thank you for putting it together and keeping it so succinct.

2.3

Mr. Mason: You're very welcome. If I would make one suggestion: LEAWeb is a wonderful resource and that can be set up in advance. And if you have a couple of employees, get them LEAWeb passwords and then that will provide at least one option for you if you have a situation where your connection still works, but your programs are having a problem. It's a simple thing.

Mnemonics for LEAWeb are assigned to people, whereas with everything else it's assigned to a specific device. So, you can set up a couple of people, get them mnemonics, get them passwords, and we table them for you. You even have the option of sending that person to another agency where they can access LEAWeb there using their login and password. So, I really can't stress enough that I would set something like that up if I were in your positions.

Chief White: Thank you.

Chief O'Keefe: Yeah. Thank you, Chief White, for

that because that's what I was going to talk about, the cyberattacks. And not naming the agency but very, very timely. So, thank you very much for that. Any further comments or questions from the committee?

2.3

2.5

Mr. Park: I just might make one other suggestion.

Perhaps, Chief Gilliard, there could be an opportunity

for a bulletin that would go out to the ACCs kind of

adding this presentation to their catalogue of

information. I think it would be very helpful for all of

our agencies to receive this level of detail. Thank you.

Chief Gilliard: I agree. I'll take it back to the team. Thank you.

Chief O'Keefe: And maybe this is something that could be a presentation for Cal chiefs and state sheriffs at their meetings. So, thank you. Any further comments, questions? Thank you very much for your --

Mr. Mason: Thank you so much for your time.

Chief O'Keefe: -- for your presentation. Any member of the public that would like to speak or comment on the issue? Seeing and hearing none, thank you. Okay.

Let's go to item eight, CLETS Legislative Update.

John Ponce will give us a legislative report. John.

Mr. Ponce: Hi. Good afternoon, committee members.

My name is John Ponce. I'm the legislative manager for
the California Justice Information Services Division. And

thank you again for the opportunity to provide you with updates regarding pending legislation. I do have two that I would like to provide updates for.

1

2

3

5

6

7

10

11

12

13

14

15

16

17

18

19

20

21

22

2.3

24

25

One is Assembly Bill 2352 by Assembly Member Irwin. This is a bill on mental health and psychiatric advance directives. AB 2352 would specify the requirements for the formation of a written or digital psychiatric advance directive and how these directives may be used in numerous health care and legal settings. A psychiatric advance directive is a legally binding document that the individual completes and shares regarding their desire for treatment, medication, and other individuals to contact when the individual is experiencing a mental health crisis. (Inaudible) engage with the author's office and her sponsor regarding technical assistance on how this bill would allow psychiatric advance directives to be available to any state or local law enforcement agency through the California Law Enforcement Telecommunications System. The goal of this possible bill amendment is to give first responders, such as law enforcement agencies, additional information to assist them in de-escalating a situation, avoiding a dangerous outcome, or directing an individual to treatment. Currently, the bill is in the Assembly of Appropriations Committee. It is in suspense file, and the proposed

amendment is not yet in print. It's not yet in the bill.

2.3

2.5

The second bill that I am presenting is AB 2917 by Assembly Member Zbur. It is a bill on firearms restraining orders. Existing law requires the Department of Justice to maintain state summary criminal history information and to furnish this information to specified entities, including city attorneys pursuing gang injunctions or drug abatement actions. AB 2917 would require the Department of Justice to also furnish state summary criminal history information to city attorneys and county counsels pursuing gun violence restraining orders.

While not specified in the bill, prosecuting city attorneys or city prosecutors may be able to get this information in CLETS if they qualify for CLETS access. And they may qualify for CLETS access only if they prosecute misdemeanors. So, the bill may potentially increase the number of entities seeking access to CLETS. There are a handful of city attorney offices that currently have access due to prosecuting misdemeanors. Alternatively, if they don't access CLETS, if they need a certified record, they would instead request it from the records custodian in CJIS. While there may be a potential increase in requests for CLETS access, the intent behind AB 2917 is to make clear that city attorneys can have

access to criminal history information when filing gun violence restraining order petitions on behalf on law enforcement agencies, and we expect them to receive the information from the law enforcement agencies, not from our office or via CLETS access request.

And those are all my updates, and $I^{\prime}m$ open to any questions.

Chief O'Keefe: Does the committee have any questions or comments? Seeing and hearing none, is there any public comment? Seeing and hearing none, thank you very much for your report.

Mr. Ponce: Okay. Thank you.

2.3

Chief O'Keefe: Okay. We'll move on to item number nine, new service applications. Chris, please present the application, the new CLETS service.

Mr. Blair: Thank you. So, the City of Lancaster
Police Department, located in Los Angeles County, has
submitted an application for new CLETS service. They are
a Class 1 law enforcement agency. The statute of
entitlement that they fall under is the California Penal
Code 830.1. The City of Lancaster Police Department's
primary function is to preserve the peace and security of
the city. The police department shall enforce all laws of
the United States, state of California, and all
ordinances of the city. They are P.O.S.T. certified. They

have peace officer powers. They currently have one sworn personnel with seven hires pending. They connect through a local area network, wide area network. They have a CAD system, wireless server, and they will be connecting through the county Message Switching Computer to CLETS. They also have Wi-Fi and cellular within their network and a VPN for remote communications. They have six fixed terminals planned and nine mobile terminals planned. They do meet the CLETS firewall policy. They are seeking inquiry, entry, and update access. And some additional comments, this agency qualifies for CLETS service and has been assigned an ORI by the FBI. However, the application is still under DOJ review to ensure that their connectivity meets all security requirements. DOJ recommends approval for the City of Lancaster Police Department.

Chief O'Keefe: Thank you, Chris. Approval for this agency requires a vote. Is there any discussion from the members surrounding this agency? Seeing and hearing none, before we take the motion, is there any public comment?

Not seeing any public comment. Chris, please initiate a roll call vote for the application.

Mr. Blair: Chief White?

Chief White: Approve.

Chief O'Keefe: Approve.

Mr. Blair: Chief Gilliard?

Chief Gilliard: Approve.

Mr. Blair: Chief Michel?

Chief Michel: Approve.

Mr. Blair: Committee Member Park?

Mr. Park: Approve.

Mr. Blair: Thank you.

Chief O'Keefe: Okay. Moving on to item number ten, upgrade applications approved by DOJ. For CLETS upgrade applications approved by DOJ, there were a total of 17 approved since last meeting. These are presented as information only and do not require a vote by the committee. Instead of reading the list of applications, I will ask the members and the public to refer to the agenda where they are listed. I'll just give you a few moments to take a look at it.

Okay. Do the members have any questions or comments?

None. Is there any member of the public that would like to comment on this? Okay. Seeing none, next on the agenda is our closed session. Before we go, Chris, please

present the information about the closed session.

1

22

2.3

24

25

Mr. Blair: Pursuant to Government Code section 11126, subsection C18, a closed session is being conducted in order to review detailed client reports regarding specific matters that pose a threat or potential threat of criminal activity against CLETS and/or CLETS data transmitted between the DOJ and specific client law enforcement agencies.

Chief O'Keefe: Thank you. Before we proceed to closed session, is there any public comment regarding this item? Okay. Now a closed session.

Mr. Blair: Do we need to make a vote to go into
session?

Chief O'Keefe: Oh. I'm sorry. We will take a vote to go. Chris, please take the vote.

Mr. Blair: Chief White?

Chief White: Approve.

Mr. Blair: Chief Bonini?

Chief Bonini: Approve.

Mr. Blair: Chief Hillman?

Chief Hillman: Approve.

Mr. Blair: Chief O'Keefe?

Chief O'Keefe: Approve.

Mr. Blair: Chief Gilliard?

Chief Gilliard: Approve.

Mr. Blair: Chief Michel?

2.3

Chief Michel: Approve.

Mr. Blair: Committee Member Park?

Mr. Park: Approve.

Mr. Blair: Thank you.

Chief O'Keefe: Okay. We'll now go into closed session.

(Off the Record)

Chief O'Keefe: Please present the information from the closed session.

Mr. Blair: The closed session was held pursuant to Government Code 11126, subsection C18. The committee received a status report regarding specific matters that pose a threat or potential threat of criminal activity against CLETS and/or CLETS data transmitted between the DOJ and specific client law enforcement agencies where the disclosure of these considerations could compromise the security of CLETS or the transmitted CLETS data.

The committee evaluated the status of compliance efforts and directed dates by which items need to be resolved.

Chief O'Keefe: Is there any public comment on this item? Seeing and hearing none, next on the agenda is members' reports. For members' reports, each of the members, please provide a report for your agency or

association which you are representing on the committee.

And I'm just going to start with Mr. Park, and we'll just work our way down.

Mr. Park: Thank you very much on behalf of the League of California Cities, or Cal Cities. Again, I want to extend a thanks to staff for the report on disaster recovery and other technology options available to us. I'd also like to extend a thank you to Kirk Beardwood, to Executive Secretary Blair, and Richele Coy for a presentation that they coordinated for Alameda County agencies presenting LEAWeb. It was very helpful for our law enforcement agencies to understand that that technology is available and the state's presentation kind of gives us the pipelines or the pathways to get there. So, staff and Chief, thank you for your support on that effort.

I also want to highlight and appreciate the work that Mark St. Pierre, Jessica Beshara, and Jessica Velasquez continue to do on the master federal code table effort. This year new laws that were passed by the legislature and signed by the governor were made available to local law enforcement agencies for download, I think by January 3rd, if not sooner. And that's amazing for our data systems to have that new information available and tabled for the (inaudible) reporting and

various other requirements that we must comply with. So, thank you to DOJ staff for that continued effort.

We will have our next state-wide master federal code update call this Friday, May 17th at 1:00 p.m. If folks are interested, we'll get you dialed in. Thank you very much.

Chief O'Keefe: Chief Michel, would you like to --

Chief Michel: I have nothing to report.

Chief O'Keefe: Okay.

Chief Michel: Thank you.

Chief O'Keefe: Chief Gilliard?

Chief Gilliard: No updates.

Chief O'Keefe: Go down. Chief?

Chief Hillman: No updates from the California

Police Chiefs Association, other than there will be a

training symposium next week in Palm Springs.

17 | Chief Bonini: I have nothing to report.

Chief O'Keefe: Chief White?

Chief White: Nothing to report.

Chief O'Keefe: Don O'Keefe here, again, from Cal
OES. I want to thank staff for everything they've done to
put this meeting together. I want to thank the
presenters. Of course, Cal OES, it's emergency
(inaudible). If it's not a fire, it's a flood or civil
unrest and a lot of things that you see going on in the

news around the nation, and also in California. So, we've been extremely busy with that. That's all I have.

And agenda item 13: CAC Discussion/Open Form/Public Comment. For this item on the agenda, I would like first to open it up to the committee to request any items members would like to recommend for future CAC meetings. Although any CAC member may identify a topic of interest, CAC may not substantially discuss or take action on any matter raised during the meeting that is not included on this agenda, except to decide to place the matter on the agenda for a future meeting.

Now I'd like to open to public comment on any item that is not agendized for this meeting. Okay.

Mr. Park: Committee Member Park.

Chief O'Keefe: I'm sorry. I forgot to put it out to the committee members.

Mr. Park: There you go.

2.3

2.5

Chief O'Keefe: I'm sorry. Go ahead.

Mr. Park: During the Executive Secretary's Report, there was a mention that the CLEW environment is for law enforcement only. I guess for clarification, is there any member of this CLETS Advisory Committee, the CAC, that is not law enforcement that would not have access to that CLEW environment?

Mr. Blair: No.

Mr. Park: So, we had presentations today from some excellent experts in your staff who pointed us to CLEW to understand where these resources are available. I'd like to resubmit my request that CLEW -- an understanding of what CLEW contains and how it operates to support our efforts could be available to us and our constituents. I just want to resubmit that if possible. Thank you.

Chief O'Keefe: Any other members?

Chief White: Yes, Chair.

2.3

2.5

Chief O'Keefe: Yes, Chief White.

Chief White: Just in transparency, I wanted to put on the record that I did reach out to DOJ regarding discussions of access to the ALPR hotlist. I think that that's a critical item that we maintain access to while obviously balancing security. So, I appreciate the staff looking into that further and look forward to discussing it in the future, it being resolved offline or if it needs to come back to the committee. Thank you.

Chief O'Keefe: Any other comments by the committee members? Okay. I'd like to open up to public comment.

Anything that's not agendized for this meeting? Okay.

Don't see any.

The next item will be the next CAC meeting, and we'll adjourn after this. The next meeting will be scheduled for around September or October 2024. Staff are

currently looking for a date when we will have a quorum.

I would like to adjourn the meeting and thank you all for coming.

Mr. Park: Mr. Chair, if I may?

Chief O'Keefe: Yes, you may.

Mr. Park: Thank you to staff for making the date adjustments that we discussed at our last advisory meeting about moving them a little bit further away from holiday periods. Today was phenomenal for me, and I anticipate our next meeting will also be. And that looks like a better window. So, staff, thank you for working with us on that.

Chief O'Keefe: Thank you, Mr. Park. With that, we'll adjourn the meeting.
