Notice of Data Breach

Dear <<MemberFirstName>> <<MemberLastName>>,

Chaney Electronics, Inc., d/b/a The Electronic Goldmine ("Chaney") has become aware of a data security issue involving the presence of malware on the servers of one of its third-party vendors, Freestyle Solutions, Inc. ("Freestyle"). Freestyle provides the shopping cart and payment processing functionality for various companies' e-commerce sites, including Chaney's site. Freestyle has confirmed that the malware was removed and additional steps were taken to block the unauthorized activity.

We are reaching out as our customers are a top priority, and we take the protection of your information very seriously.

Below is additional information about what happened, what Freestyle did in response, and what steps you can take to further protect your information.

What Happened?

On August 26, 2022, Freestyle informed Chaney that the payment card information of individuals who used a card on Chaney's website between September 18, 2020 and February 3, 2022 may have been acquired by an unauthorized party. Freestyle has further advised Chaney that, in early February 2022, Freestyle was notified by another customer that malware had been identified on a server hosting that customer's website. Freestyle quickly commenced an investigation and identified and removed malware found on servers that hosted certain customers' e-commerce sites, including Chaney's site, www.goldmine-elec-products.com.

Freestyle retained data security experts to conduct a thorough investigation of the incident's nature and scope and assist in Freestyle's containment and remediation efforts.

This notification has not been delayed as a result of a law enforcement investigation.

What Information Was Involved?

The malware was designed to capture information entered into the checkout page, including first and last name, payment card number, expiration date, security code, billing address, gift certificate number (if applicable), and transaction details (such as product type, price and quantity).

What We Are Doing.

As indicated above, after becoming aware of the issue, Freestyle took immediate steps to identify and remove the malware and block further unauthorized activity. Freestyle promptly launched an extensive

investigation with the assistance of data security experts to determine the timeframes of exposure for each of Freestyle's affected customers and to identify impacted cardholders. Freestyle also notified federal law enforcement authorities and has been coordinating with the payment card companies in an effort to protect affected cardholders.
