Notice of Data Breach

Dear Sample A Sample:

Dynavax Technologies Corporation (“Dynavax”) take the privacy and security of personal information very seriously. Regrettably, we are writing to inform you that we recently identified and addressed a security incident that may have involved some of your information. This notice explains the incident, outlines the measures we have taken in response, and steps you can take.

What Happened?

Our ongoing investigation into a phishing email incident recently determined that an unauthorized individual gained access to a Dynavax employee’s email account for a brief period of time on February 28, 2020. Upon identifying the incident, we immediately secured the account and a leading computer forensic firm was engaged to assist with our investigation. A review of available data shows no further unauthorized access to the account occurred. While we have identified employee information in the email account, our investigation has not shown that the unauthorized person stole or misused or attempted to misuse any personal information from the account.

What Information Was Involved?

Out of an abundance of caution, we manually reviewed the emails and attachments contained in the employee’s email account to identify personal information that may have been accessible to the unauthorized person. As a result of that review, we identified emails and/or attachments that may have included your Extra 1.

What We Are Doing.

Again, there is no evidence that any of your information was actually viewed by the unauthorized person, or that it has been misused. However, we wanted to notify you of this incident and assure you we take this very seriously. In addition to changing the credentials for the account, we have taken steps to further increase security and protect our systems.
