

The Attorney General of California has prepared the following title and summary of the chief purpose and points of the proposed measure:

REQUIRES EARTH SUSTAINABILITY EDUCATION IN PUBLIC SCHOOLS.

INITIATIVE STATUTE. Requires all K-12 public schools, including charter schools, to provide students with thirty hours of education, training, and hands-on learning relating to sustainability or care of the Earth, every two years. Summary of estimate by Legislative Analyst and Director of Finance of fiscal impact on state and local governments: **Costs likely not exceeding the low tens of millions of dollars during initial implementation, then declining over time, for public schools to purchase materials and make adjustment to their science lessons. The costs would vary based on the degree to which schools already cover environmental sustainability topics and provide hands-on learning activities.** (25-0001.)
