

## ***HOLD"EM***

**In Hold'em each player receives two personal down cards as a starting hand, after which there is a round of betting. Three board cards-referred to as the "flop"-are then turned face up simultaneously, and another round of betting occurs. The next two board cards are turned face up one at a time, with a round of betting after each card. In all fixed limit Hold'em games, the smaller bet is wagered on the first two betting rounds, and the larger bet is wagered on the last two betting rounds.**

**The board cards are community cards; that is, they are shared by all active players in the hand. After the final round of betting, a player may use any five-card combination from among the board cards and personal cards to form a hand. A player may even use all of the board cards and no personal cards. This is called 'playing the board.'**

**Hold'em uses a flat disk called a 'dealer button' to indicate the player who is in the dealer position for that hand (even though a non-playing casino employee actually**

deals the cards). The player with the dealer button is the last to receive cards on the initial deal and has the right of last action after the first betting round. One or more blind bets are used to stimulate action and initiate play. Blinds are posted before the players look at their cards. Blinds are part of a player's bet, unless the structure of a specific game or the situation requires part or all of a particular blind to be 'dead.' Dead chips are not part of a player's bet. The small blind is posted by the player immediately clockwise from the button, and the big blind is posted by the player two positions clockwise from the button. The player to the left of the blinds initiates action on the first betting round. On all subsequent betting rounds, the action begins with the first active player to the left of the button. In non-tournament play, the button rotates one position clockwise after each deal.

### **RULES OF HOLD'EM**

1. In Hold'em, all blinds are 'live' (except for the 'dead collection blind'). If you post a blind, you have the option of raising the pot when it is your turn to act.
2. When there are two blinds in a game with three or more players, the small blind is to the immediate left of the dealer button. In heads-up play, the small blind is on the button.
3. A new player entering a Hold'em game has the following option: You may post or wait.
4. As a player, you cannot be dealt in when you're between the small blind and the button, unless you are buying the button or you must wait until the button passes.
5. If you choose to post the big blind, the blind serves as your opening bet. When it becomes your turn to act, you can either call the action or raise.
6. Players must meet all their blind obligations for every round they play. Players cannot have the button twice; the button always moves forward, and the blinds are adjusted accordingly.
7. If you miss any or all blinds, you can resume play by either posting the total amount of the blinds for that limit game or waiting for the big blind. If you choose to post the total of the blinds, an amount up to the size of the minimum opening bet is live, and the remainder is placed in the pot as 'dead money' when it becomes your turn to act, you may either call the action or raise.
8. Blinds may not be made up between the big blind and the button.
9. When a game starts a player who drew for the button is considered active in the game and is required to make up both blinds if he or she misses a blind.
10. A 'live straddle' may be done only in the position in front of the big blind. This is accomplished by putting in twice the amount of the big blind before you receive your first card. You will be last to act on the first round and you will have the option to raise. You must begin the hand with at least four times the big blind.
11. If the first card off the deck is exposed on the deal, the dealer will place it back into the deck, reshuffle, and re-cut the cards. If any other card is exposed due to dealer error, you may not keep the exposed card. After completing the

deal, the dealer replaces the card with the top card on the deck, and the exposed card is then used for the burn card.

12. If the cards are prematurely flopped before the betting is complete, or if the flop contains too many cards, the board cards are mixed with the remainder of the deck. The burn card remains on the table. After shuffling, the dealer cuts the deck and deals a new flop without burning a card.
13. Should the dealer turn the fourth card on the board before the betting round is complete, the card is taken out of play for that round, and the betting is completed. The dealer then burns and turns what would have been the fifth card in the fourth card's place. After this round of betting, the dealer reshuffles the deck, including the card that was taken out of play, but not including the burn cards or discards. The dealer then cuts the deck and turns the final card without burning a card. If the fifth card is turned up prematurely, the deck is reshuffled and dealt in the same manner.
14. In Hold'em, if the dealer mistakenly deals the first player an extra card (after all players have received their starting hands), the card will be returned to the deck and used for the burn card. If the dealer mistakenly deals more than one extra card, it is a misdeal.
15. You must declare that you are playing the board, and turn your two hole cards face up. Otherwise you relinquish all claims to the pot.

## ***CRAZY PINEAPPLE***

**Crazy Pineapple is basically a Texas Hold'em poker game (see rule for Texas Hold'em) except that three down cards are dealt instead to two. The betting rounds are the same as Hold'em. Just as in Hold'em a player may use any combination of five cards (between the cards in his hand and the five on the board) to determine the best hand. The player may use one card from his hand and four from the board, two cards from his hand and three from the board, two cards from his hand and three from the board or all the board cards and no cards from his hand, termed "playing the board". A player may use a maximum of two cards from his hand (you cannot use all three).**

## ***CRAZY PINEAPPLE HI-LO "8 OR BETTER"***

**In high- low games there is an "8 or better" qualifier. If no player can make a low hand of 8 or better, the high hand wins the entire pot.**

**Players may use one combination of cards to make a high hand and the same or any other combination to make a low hand.**

**ALL OTHER HOLD'EM RULES APPLY**

**OMAHA**

**Omaha is similar to Hold'em, with two exceptions. First, each player is dealt four down-cards instead of two, and second, a player must use precisely two hole cards with any combination of three board cards to make a five-card poker hand. Omaha is also played high-low split (eight or better for low). The betting structure for both forms of Omaha is the same as in Hold'em**

#### **RULES OF OMAHA**

1. You must use two of the four cards in your hand and three cards on the board to make a valid five card hand.
2. All rules of Hold'em apply to Omaha, except the rule on playing the board, which is not possible in Omaha.
3. All rules governing "kill pots" are listed in the section on kill pots. For specific details, see the floor person.

#### ***OMAHA HIGH-LOW SPLIT (8 or better)***

**In Omaha High-low split (8 or better), the best high hand wins half the pot, and the best low hand wins the other half, as long as the low hand consists of five cards of different ranks, with no card being higher than an eight. Straights and flushes do not affect the value of a low hand, and an ace can be used for both high and low.**

#### **RULES OF OMAHA HIGH-LOW SPLIT (8 or better)**

1. All rules of Omaha apply to Omaha high low split 8 or better.
2. A qualifier of eight or better for low is required in all high low split games, unless a specific posting to the contrary is displayed.
3. if there is no low hand, the high hand wins the entire pot, which is referred to as 'scooping the pot'
4. A player may use one combination of cards to make a high hand and the same or any other combination to make a low hand, as long as each hand consists of exactly two hole cards with three board cards.

#### ***SEVEN CARD STUD***

**In seven card stud, each player generally posts an ante before being dealt two cards face down and one card face up, after which the first round of betting takes place. Each player then receives three more up-cards, with a betting round after each card. After the last card is dealt face down, there is a final betting round. The best five card poker hand wins the pot. In all fixed limit stud games, the smaller bet is wagered on the first two betting rounds, and the larger bet is wagered on the betting rounds for the fifth, sixth, and seventh cards.**

## **RULES OF SEVEN CARD STUD**

1. The first round of betting is initiated with a forced bet, which is called the 'bring in' by the player holding the lowest value up-card. A tie is broken by suit, with the lowest suit being forced to bet. On subsequent betting rounds, the high hand on board starts the action. Ties are broken by position, with the player who received cards first acting first. The player with the forced bet has the option of opening for a full bet.
2. Completing an opening forced bet does not count as a raise, but merely as completion of the bet. For example; in \$15-\$30 stud, the low card opens for \$5. If the next player to act brings the bet up to \$15 (completion of the bet), three raises are still allowed.
3. In all fixed-limit stud games, when a pair is showing on fourth street (second up card), any player has the option of betting either the lower or the upper limit. For example; in a \$5-\$10 game, if you have an open pair on fourth street and you are the high hand, you may bet either \$5 or \$10. If you bet \$5 any succeeding player has the option to call \$5, raise \$5 or raise \$10. If a \$10 raise is made, all subsequent raise must be in increments of \$10. If the player who makes the open pair on fourth street checks, all other players still have the same options.
4. **7 Card Stud:** the dealer announces the low card, the high hand, all new pairs, all raise, possible straights and flushes. In limits **below** \$10-\$20 including \$2-\$10 **7 Card Stud High/Low** pairs, possible flushes and straights are not announced.
5. If a dealer accidentally turns up your first or second hole card, your third card will be dealt face down. If both hole cards are dealt up, you have a dead hand and will receive your ante back. If your hand would have contained the low card on board, action will start with the first player to your left. That player may either fold, open for amount of the forced bet, or open for a full bet.
6. If you are not present at the table when it is your turn to act on your hand, you will forfeit your ante and your forced bet, if any, and your hand will be killed in turn.
7. If you fold a hand after making a forced bet, or fold when there is no wager, your seat will continue to receive cards until a bet is made.
8. If you are all in for the ante and you have the lowest up-card, the player to your immediate left must come in for the forced bet, make the maximum bet or fold the hand.
9. If the wrong player is designated as low and that person bets, the action will be corrected to the proper low card, if at all possible. The player with the true low card must then bet, and the player with the improperly designated low card may take back the incorrectly forced wager.
10. If a dealer burns two cards for one round or fails to burn a card, the cards will be corrected, if at all possible, to their proper positions. If an incorrect card is dealt as a final down-card due to a burn error and the card is intermingled with a player's hole cards, or a player looks at the card, that player must accept the card.

11. If a dealer burns and deals one or more cards before a round of betting has been completed, the card(s) must be eliminated from play, along with an additional card for each remaining player still active in the hand. After that round of betting is concluded, the dealer re-burns and play resumes. (The removed cards are held off to the side in the event that the dealer runs out of cards.) If a prematurely dealt card is the final down-card and has been viewed by a player or intermingled with his or her hole cards, that player must keep the card. If there is further betting on Sixth Street, a player who has seven cards may not raise.
12. If there are not enough cards left in the deck for each player:
  - a. The dealer is to deal all the card except the last card.
  - b. The dealer will then scramble the last card and four burn cards, informing the floor person that they are shuffling the burn cards.
  - c. The dealer will cut the deck.
  - d. Then burn a card.
  - e. The dealer will then deliver the remaining down cards, using the last card if necessary.
13. If there are five players remaining with out a card:
  - a. The dealer will not burn so that each player will receive a fresh card if the dealer has determined that using this procedure the players not to have enough cards, the players will get a down card. Instead the dealer is to announce that there are not enough cards to go around and that a community card will be used.
  - b. The dealer will then burn a card and turn a card up in the center of the table. This card plays in everybody's hand. The action begins with the high hand, using all the cards including the community card. If the dealer is uncertain, or a player questions this procedure, a floor person is to be called.
14. If you pick up your up-cards and by doing so cause someone to act behind you-even in a heads up situation-your hand is dead. This does not apply in a check-check situation or a bet and call situation.
15. You must have seven cards to win at the show down.
16. A card dealt off the table must play; it is treated as an exposed card.
17. If the dealer delivers the last card face up to any player, the following rules apply;
18. If there are more than two players, all remaining players receive the last card face down. Prior to action for that round of betting, a player whose last card is exposed has the options of participating in the wagering or declaring all in.
19. If only two players remain and the first player's final card is dealt face up, the second player's final card will also be dealt face up, and the betting proceeds as normal (same as sixth street). In the event that the first player's final card is dealt face down and the opponent's final card is dealt face up, the player with the exposed card has the option of declaring all in. This decision must be made prior to any action on that round.
20. In either of the situations just described, the player who is high on sixth street will initiate the action.

21. If you call a bet even though you are beaten by an opponent's Up-cards, you are not entitled to a refund.

## *RAZZ*

**Razz is seven-card stud player for low. The format of razz is identical to that of seven card stud high, with two exceptions: first player with the highest card (aces are low) on the opening round is required to make the forced bet, and second, player with the lowest hand on the board acts first on all subsequent rounds of betting. The betting structure for razz is the same as in seven stud high, except that an open pair does not affect the betting limit.**

### **RULES OF RAZZ**

1. The lowest hand wins the pot. Aces are low, and straights and flushes have no effect on the value of a low hand. The best possible hand is 5-4-3-2-1, known as a 'wheel' or a 'bicycle'.
2. The player with the highest card starts the action with a forced bet. If the high card is tied, the forced bet is determined by suit from the highest to the lowest; that is spades, hearts, diamonds, and clubs. The player with the low hand on board acts first on each subsequent round. If the low hand is tied, the first player clockwise from the dealer starts the action.
3. Dealers announce all pairs the first time they occur, except pairs of face cards, which are never announced.
4. All seven card stud rules apply in razz, except as otherwise noted.

## *STUD HIGH LOW SPLIT (8 OR BETTER)*

**In seven card stud high low split, the best hand wins half the pot, and the best low hand wins the other half of the pot, as long as the low hand consists of five cards of different ranks, with no card being higher than an 8. Straights and flushes are ignored for low, and an ace can be used for both high and low. The betting structure for stud high low 8 or better is the same as in seven card stud high, except that an open pair does not affect the betting limit.**

### **RULES OF STUD HIGH-LOW SPLIT (8 OR BETTER)**

1. The player with the low card by suit on the opening round is required to make the forced bet, with an ace counting as a high card for this purpose. On subsequent betting rounds, the high hand on board initiates the action. If the high hand is tied, the first player clockwise from the dealer acts first.
2. A qualifier of eight or better for low is required in all high low split games, unless a specific posting to the contrary is displayed.

3. If there is no low hand, the high hand wins the entire pot, which is referred to as 'scooping the pot.'
4. A player may use any combination of five cards to make a high hand and the same or any other combination of five cards to make a low hand.
5. Splitting pots is determined only by the cards and not by agreement among players.
6. When there is an odd chip in the pot, the chip goes to the high hand. If two players tie for both the high and the low, the pot will be split as evenly as possible, with the player holding the highest card by suit receiving the odd chip. When making this determination, all cards are used, not just the five cards that constitute a player's hand.
7. When there is an odd chip in the high portion of the pot and two or more high hands split all or half the pot, the odd chip goes to the player with the high card by suit. When two or more low hands split half the pot, the odd chip goes to the player with the low card by suit.
8. All rules for seven card stud apply to seven card stud high low split, with the exception of an open pair.

## Joker Poker Rules of Play

### Basics and Procedures

1. The object of the game is to make the highest possible 5-card poker hand, including one Joker.
2. Joker Poker is played with specially designed conventional cards. Each card has double value.
  - a. Face Value: The standard deck of 52 cards with conventional value
  - b. Cover Value: A special design of a Joker, used as a wild card to improve each hand by at least one rank.
3. Each player and the bank final hand will be composed of five cards.
4. All action (dealing and paying or collecting of wagers) proceeds clockwise from the position as determined by the dice.
5. Players must post minimum required wager prior to receiving cards. (Minimum and maximum amount of wagers and collections are posted at the table.)
6. Player's cards are dealt sequentially and one card at-a-time, and will receive a total of three down cards.
7. The bank hand will receive two cards face up and one card face down.
8. At this time players act in turn by exercising one of the following options:
  - a. Surrender the hand and forfeiting half of the wager.
  - b. Play with the original wager.
  - c. Doubling-up by putting forward another bet equal to the original wager.
  - d. Triple-up by putting forward two bets equal to the original bet, only if the Bank's two up cards is a pair.
9. The remaining Players and the bank will receive two more face down cards in sequence to complete their hands.
10. At this time, Players designate one card to play as a Joker (wild card) and place it in the Joker box and the remaining four in the Poker box.
11. The House Dealer will turn over one at a time the Banker's three down cards. One card will be designated as Joker and all hands will play in comparison with the Bank's hand.
12. Players will all tie hands (all five cards must play) with the value of three of a kind or better.
13. Banker wins all hands with a value of one pair. (Example: If the Player is holding one pair (including Joker) of Aces and the Banker is holding one pair of Queens (including Joker), the Banker will win the hand.)
14. Player must declare and turn over all Natural Royal Flushes. Natural Royal Flushes will be paid prior to any other wagers. If a Player fails to declare a Natural Royal Flush, then this action will be determined based upon his position that was originally established by the dice.
15. The Bank is only allowed to win or lose the amount of the Bank's original bet.
16. In order for a Player to Bank, the Player must have placed a wager on that position the hand prior to declaring his intent to Bank on that position.

17. Players MAY NOT play more than one position at a time. If a Player desires to play more than one position during the hand, the Dealer will play the hand. The Player has no options (as outlined in #8 above) other than to play his original bet.

### Ranking of Hands

Rank	Hand
1	Natural Royal Flush
2	Five of a Kind
3	Non Natural Royal Flush
4	Straight Flush
5	Four of a Kind
6	Flush
7	Full House
8	Straight
9	Three of a Kind
10	One Pair

### Misdeals

The following circumstances may cause a misdeal:

1. An incorrect number of cards have been dealt to a Player.
2. The Dealer on the initial deal has exposed two or more cards.
3. Cards have been dealt to an empty seat or a Player not entitled to a hand.
4. A player has been dealt out who is entitled to a hand.

In all instances of a misdeal, the Action Button will not be moved.

### Irregularities

1. If the Action Button is discovered to be in the wrong position play will not resume until it is placed in the proper position. If its proper position cannot be determined the dice will be shaken again.
2. The Player must protect his own hand at all times. The Players cards may be protected with the Player's hands, a chip, or other object placed on top of them. If the Player fails to protect his hand, the Player will have no redress if it becomes fouled or the Dealer accidentally kills the hand.
3. If two cards of the same rank and suit appear during a hand, all action is voided and all money is returned to the Players for that round.
4. A card discovered face-up in the deck (boxed card) will be treated as a meaningless scrap of paper. A card being treated as a scrap of paper will be replaced by the next card below it in the deck, except when the next card has already been dealt facedown to another player and has been intermingled with the other cards. In that case, the card that was face-up in the deck will be replaced after all other cards are dealt for that round.
5. Exposed Cards:

- a. If the Dealer accidentally exposes a card while dealing the Players first three cards, that card will be replaced after all other cards are dealt for that round.
  - b. If the Dealer accidentally exposes the Banks down card while dealing the Banks first three cards, that card will be replaced after all other cards are dealt for that round.
  - c. If the Dealer accidentally exposes a card while dealing the Players final two cards, the cards will play.
  - d. If the Dealer accidentally exposes a card while dealing the Banks final two cards, the cards will play.
  - e. If a card is accidentally dealt off table, that card will be considered to be an exposed card.
6. If the Player drops a card on the floor out his hand, it is considered a dead card, thereby causing the Player to have a dead hand.
  7. One or more cards missing from the deck does not invalidate the results of a hand.
  8. Players may not share their hand with another Player. Players violating this rule may have their hand declared as a dead hand and risk losing their wager.

### **ROUND OF PLAY**

1. No-Bust 21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the Dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino Dealer stands opposite of the players, and in the center of the table. The casino Dealer's chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clockwise fashion.
2. The game utilizes a special 52-card deck. The aces are bonus cards with the value of 11 and a half on first two cards and 1 or 11 on three or more cards. The game can be played with a minimum of a one deck, totaling 52 cards and to a maximum of eight decks totaling 416 cards.
3. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed, and collection fee for the Players and Player/Dealer. A maximum of three collection rates are allowed in compliance with the California Penal Code.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place an amount of money (casino chips) in front of their seat in a betting circle and that money will be used to pay the winners and will also set the amount that he/she can collect from the loser. The casino will place a "button" in front of the Player/Dealer, which designates that they are taking the "Player/Dealer" position, and further designate whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his betting circle.
5. Players at a table then place their wagers in designated betting circles. The Players may place a wager at his/her seat along with other unoccupied betting circles. Each Player must pay the posted collection for the wager they placed in any betting circle where they have money or "action".
6. Once the Player/Dealer has posted the amount of money, he/she will wager against the other Players, and once the Players have placed their wagers, the casino dealer will collect all of the fees. This will always be accomplished prior to the start of the game in accordance with the California Penal Code. The casino dealer will take the collection fees and drop them into a locked collection box affixed to the gaming table.
7. After the fees have been collected, the Dealer will deal the cards to the Players and the Player/Dealer. All cards dealt throughout the game are always dealt face up. The casino Dealer is the only person on the table to touch the cards. The Players will signal to the Dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side-to-side manner, indicating they wish to stay with their cards on the table. The casino Dealer deals the first card to the Player seated to the left of the designated Player/Dealer, in a clockwise fashion. Each Player will be dealt one card face up and the Player/Dealer will receive his/her first card also. The Player/Dealer's first card will be placed in front of the casino dealer rather than in front of the Player/Dealer's seat position.
8. The casino Dealer will deal a second face up card to the players, again starting at the Player to the first seated position to the left of the Player/Dealer, in a clockwise fashion. The Player/Dealer will receive a face down card.
9. Players must follow the rules that are listed in the following chart in deciding whether to hit or stand on a particular hand: (please see next page)

10. After all Players have made their best hands by indicating to the casino Dealer that they do not wish to have additional cards dealt to them, the house Dealer will turn over the Player/Dealer hole card. This card will determine where the "action button" will be placed.
11. The Action Button determines where the action starts or who will be first to be paid for their winning hand or lose their wager. The Action Button is placed based on its numerical value and in comparison to the Players seated at the table. (Please see the chart below for an example of how the card's value is used to determine the placement of the Action Button).

12. Once the hand is played to the end, the payout or collection of the wagers will begin at the seat where the action button is placed. Wagers will be paid or collected, clockwise until all bets are settled.
13. In the event that the Player/Dealer does not have enough money on the table to cover all the wagers on the table, there will be no free collection button, refund, or other conciliatory action give to the affected Players by the casino or the Player/Dealer.
14. The Player/Dealer's cards will always be dealt and placed in front of the casino Dealer's tray. The placement of the Player/Dealer's cards is standard in all games and is depicted in the chart below: (please see next page)

15. The casino Dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer does not have an option of hitting a Hard 17 or higher nor staying on a Soft 17 or lower. See the chart below for details:

<b>Rules For Player/Dealer</b>		
Must Stand On	Must Hit On	Have Option On
Hard 17 And Above	Soft 17 Or Less	None

16. Once the Player/Dealer's hand has been made, all winners and losers are determined when their cards' numerical value are compared to the Player/Dealer's. The Player/Dealer is never required to cover all opposing player's wagers. A Player/Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers. If there is not enough money from the Player/Dealer position to cover all winning wagers, there will be no refund, free collection, or other form of rebate given to the affected Players.
17. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the Player/Dealer position is rotated in a clockwise fashion around the table.

**SECTION III – GAME INFORMATION / SPECIFICS**

FOR

**LIGHTNING POKER**

[www.lightningpoker.net](http://www.lightningpoker.net)

**LIGHTNING POKER™ TEXAS HOLD'EM**

**GAME RULES AND STANDARDS OF PLAY**

Lightning Poker™ Texas Hold'em follows traditional Texas Hold'em rules (shown below) except that the game is played electronically through individual player touch screen monitors and with virtual cards and chips. Lightning Poker™ does not allow a player to act until it is his/her turn. In addition to the individual player touch screens, there is a common center screen, which displays the community cards, pot size and other Texas Hold'em information. Lightning Poker™ Texas Hold'em rules are noted below.

**LIGHTNING POKER™ TEXAS HOLD'EM RULES  
(WRITTEN DESCRIPTION ONLY)**

Texas Hold'em is a community card poker game that is played with a standard 52-card deck. The game starts to the left of the dealer button. The blind bet(s) are made from the position(s) left of the dealer button and are forced bets, which must be made before the cards are dealt. Two cards (hole cards) are dealt to each player, one at a time, face down, in rotation. This is followed by the first round of betting. A player may check, bet, call, raise or fold.

Three cards (the flop) are then dealt face up in the middle of the table as community cards (board cards) and the second round of betting occurs. The fourth community card is dealt face up (the turn), followed by the third round of betting. The final community card (the river) is dealt face up and followed by the fourth (final) round of betting.

At the showdown, each player may use any combination of the hole cards and community cards, or may play the board and use no hole cards to make the highest-ranking five-card poker hand. The player with the highest-ranking five-card poker hand wins the pot. In the event of a tie, the pot is split equally.

## LIGHTNING POKER™ TEXAS HOLD'EM RULES (WRITTEN DESCRIPTION WITH VISUALS)

Initially, players receive two down cards as their personal hand (hole cards). This will be followed by a round of betting. Three board cards are turned simultaneously (called the *flop*) and another round of betting occurs. The next two board cards are turned one at a time, with a round of betting after each card. The board cards are community cards, and a player can use any five-card combination from the board and personal cards. A player can even use all of the board cards only or "play the board". A dealer button is used to determine which player is first to receive cards and which player is to act last. Two blinds, right after the button, will be posted each hand.

### ROUND OF BETTING

1. Opening deal – Each player is dealt two cards face down, which are known as *hole cards* or *pocket cards*

2. First round of betting – Starting with the player to the left of the big blind, each player can call the big blind, raise, or fold. The big blind has the option to raise the pot if no one else does.
3. The flop – The dealer (electronic mechanism) burns a card, and then deals three community cards face up. The first three cards are referred to as the *flop*, while all of the community cards are collectively called the *board*.

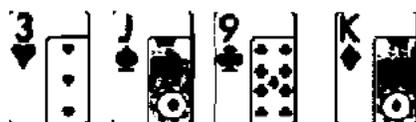

The Flop

4. Second round of betting – Starting with the player to the left of the dealer button, each player can check or bet. Once a bet has been made, each player can raise, call, or fold.
5. The turn – The dealer (electronic mechanism) burns another card, and then adds a fourth card face-up to the community cards. This fourth card is known as the *turn card*, or *Fourth Street*.

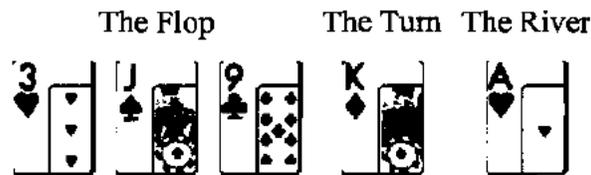

The Flop

The Turn

# ♠ GOLDEN WEST CASINO

6. Third round of betting – It follows the same format as the second round, but the size of the bets have usually doubled in limit games.
7. The river – The dealer burns another card, and then adds a fifth and final card to the community cards. This fifth card is known as the *river card*, or *Fifth Street*.

8. Final round of betting – It follows the same format as the second and third rounds.
9. The showdown – Using the best five-card combination of their hole cards and the community cards, the remaining players show their hands, with the bettor or last raiser showing first. The highest five-card hand wins the pot. (In case of a tie, the pot is evenly split among the winning hands.)

## DECK OF CARDS

A standard 52-card deck is used for this game. It is rendered electronically, rather than a physical deck of cards. A fully certified Random Number Generator (RNG) is used to ensure that all electronically dealt cards are sufficiently randomized.

## DESCRIPTION OF DEALING PROCEDURES

A Lightning Poker game has exactly the same dealing procedures as a non-electronic poker table; it just does everything electronically. Each player is electronically dealt two cards down (hole cards) to their private LCD touch screen. By touching the screen over the cards (touch zone), the player can view their hole cards. A round of betting then happens. Just as in a non-electronic game, the 'deal' is rotated around the table. An electronic 'dealer button' is located in front of a player to denote that the player is the current dealer. Action before the 'Flop' is started by the small and big blinds just like non-electronic play. Player always begins to the left of the current 'dealer' and each player can either 'bet', 'raise' or 'fold'.

If a player wants to 'raise' the bet, they do so through a 'touch' action on their private LCD touch screen. This action will cause virtual chips to be placed in the 'pot'. The subsequent players must either match that raise ('call'), forfeit their hand ('fold') or increase the bet ('raise'), all through 'touch' actions on their private LCD touch screen.

# GOLDEN WEST CASINO

## THE FLOP

Once the initial round of betting has finished, then three cards 'The Flop' are electronically dealt face up onto the 'Community LCD Screen' in the center of the table. These cards represent the first three 'community' cards shared by all players at the table who remain in the hand. At this point, each player has a five (5) card hand composed of their two (2) hole cards and the three (3) community cards. Another round of betting/raising/folding begins via the private LCD touch screens in front of each player.

## THE TURN

After all players have bet on 'The Flop', a 4<sup>th</sup> community card is electronically dealt to the Community LCD Screen in the center of the table. This card is called 'The Turn'. Another round of betting/raising/folding begins via the private LCD touch screens in front of each player.

## THE RIVER

After all players have bet on 'The Turn', a 5<sup>th</sup> and FINAL community card is electronically dealt to the Community LCD Screen in the center of the table. This card is called 'The River'. A final round of betting/raising/folding begins via the private LCD touch screens in front of each player. Once this round is complete, players reveal their two (2) hole cards. The player with the best five card poker hand is deemed the winner of the hand.

## HAND RANKING

The hand rankings to determine the winner are listed below beginning with the best possible hand, a 'Royal Flush':

1. Royal Flush
2. Straight Flush
3. Four of a Kind
4. Full House
5. Flush
6. Straight
7. Three of a Kind
8. Two Pair
9. One Pair
10. High Card

## NUMBER OF PLAYERS IN THE GAME

A Lightning Poker Table can hold a maximum of ten (10) players at one time with a minimum of two (2) players required to begin a game.

# GOLDEN WEST CASINO

## BETTING LIMITS

Golden West Casino plans on offering the same limits of games that are currently offered on its manually dealt games. Depending on players' request, a shift manager and/or a Customer Service Representative will start the requested game by activating the table through a PC or directly at the table.

## BETTING SCHEME

1. Checking, Raising and Folding is permitted in all games.
2. Limit Texas Hold'em caps the bets and allows for three (3) raises per betting round.
3. No Limit Texas Hold'em has no maximum bet and may allow for an unlimited number of raises.
4. In 'heads up play' (two players), there may be an unlimited number of raises. This applies when the action becomes heads up BEFORE the raises have been capped. Once the raising has been capped, it cannot be uncapped on that round of betting.
5. In limit play, an 'All-In Bet' (players bet all her/his remaining money on table) of less than half a bet does not re-open the betting for any player who has already acted and is in the pot for all previous bets. An 'All-In Bet' of half the capped bet or more is treated as a full bet, and other players may fold, call or make a full raise.
6. Any bet must be at least the size of the previous bet or raise in that betting round, unless a player goes 'All-In'.
7. All players must meet the total amount of their blind obligations every round they play. The dealer button always moves forward and the blinds adjust accordingly.

## HOW WINNERS ARE DETERMINED AND PAID

The active player (player who has not folded) with the best five-card poker hand after the fifth community card ('The River') has been dealt and the final round of betting has been completed, or the only active player being left in a hand (all other players have folded their hands) wins the pot.

Payments are transferred automatically to the winning player's account, and the system keeps a running total of all losses or winning for all players. When a player wishes to leave the table and "cash out" his/her winnings or remaining monies, that player touches the "Leave Table/Cash Out" on his/her private LCD Touch Screen. The player then returns to the Lightning Poker Cash Station where he/she created the player account. The player provides card room cashier with the account card and the cashier swipes the player's card to locate the player's cash balance and then pays the player his/her winnings or remaining cash balance.

# GOLDEN WEST CASINO

Lightning Poker utilizes the patented Oneida II account based cash system to handle the entire cash process utilized as part of its product. The Oneida II system is certified and has been utilized in casinos (Turning Stone in Verona, NY) for nearly a decade.

## DESCRIPTION OF ROUND OF PLAY

Once a player registers for a Lightning Poker game and is assigned to a specific Lightning Poker table, the player will swipe his/her account card at his/her private player station. This will activate a 'Pin Pad' screen on each player's private LCD touch screen. Once the player types in her/his private PIN, she/he will be able to play in the next available hand.

When a minimum of two players sit down at a table, the shift manager and/or a Customer Service Representative can begin the game by activating the table directly at the table or from a PC.

1. To begin play, each player is dealt two (2) hole cards to their private LCD touch screen. After viewing their cards, a player can bet, check or fold
2. All players who want to stay in the hand must check or bet as play dictates at that moment.
3. Once the first round of betting is completed, Lightning Poker electronically deals three (3) community cards, known as 'The Flop', on the community LCD center screen. The second round of betting now happens.
4. Once the second round of betting is completed, Lightning Poker electronically deals one (1) more community card, known as 'The Turn', on the community LCD center screen. The third round of betting now happens.
5. Once the third round of betting is completed, Lightning Poker electronically deals one (1) final community card, known as 'The River', on the community LCD center screen. The fourth and final round of betting now happens. Upon completion of the final round of betting, active players now show their hole cards to determine the player with the best five-card poker hand. This player is determined as the winner and the pot is awarded to this player
6. The next hand begins.

## DESCRIPTION OF GAMING TABLE USED FOR THIS GAME

The Lightning Poker table is approximately 86" (length) by 68" (width) by 30" (height). It is octagonal in shape (design patent is filed and attached) and has ten (10) player stations each with a twelve inch private touch screen monitor and card reader in front of them. There is a 45 inch community LCD center screen located in the center of the table.

Any disputes can immediately be resolved. All hands of play are stored on the system servers for an indefinite amount of time.
- The electro-mechanical shuffler has been tested and certified by GLI. The systems servers will be in a secured area within Golden West Casino with very limited access. All information (i.e. hands dealt and the amount of money in play and on an individual's account) will be instantaneously saved so in the case of power or network interruption, there will not be a loss of data. In addition, the servers have tape back ups of all data as well as the data being stored with mirroring software across multiple servers.

- All ties result in a split pot.
- The pot winnings are automatically transferred to the player's table stakes.

**4. Describe a "round of play." Also provide a video of the controlled game being played, if available.**

- A minimum of two and a maximum of ten players can participate in the game.
- The game is played on a poker table modified with individual displays for each player and a 42" flat screen monitor in the center of the table where the action of the table is viewed by players and supervisor(s).

- Players log into their seats using a player card with a magnetic stripe, and an associated Personal Identification Number (PIN) unique to the individual, which will be inserted into card reader at their personal LCD display and will display the amount of funds the player has available to them to bring to the table.
- The electronic cards are shuffled and there is a single deal to all players of high card to determine the dealer button position.
- The electro-mechanical shuffler shuffles the 52 card deck. Once the big and small blinds (the first two seats to the dealers left) are posted, two cards are dealt to each player.
- The player seated to the left of the player posting the big blind must place a check, wager or fold. This follows in a clockwise manner around the table until all players have checked, wagered or folded their hands.
- The table will "burn" the next card, then deal the flop (the first three community cards displayed on the center of the table). The player in the big blind position will check or bet. This process will follow in a clockwise manner around the table until all players have checked, wagered, or folded.
- The table will "burn" the next card, then deal a fourth card to be displayed on the center of the table. The same type of wagering will take place. The same goes for the fifth, or "river" card.
- After all wagers have been made; the winner will be determined and paid. A new electronic 52 card deck will be shuffled and play begins again once the "dealer" button is rotated one spot to the left of the previous spot.
- Any dispute will be settled by a Golden West Casino employee trained in the use of the electronic table and the Directors tablet.

#### 5. DESCRIBE THE TYPE OF GAMING TABLE USED FOR THE GAME.

Based on customer demand and advancement in the industry, Golden West Casino proposes to modify the existing Texas Hold'em and Omaha poker game by using a modified traditional poker table with an Electro-Mechanical Shuffler. The table will be modified by the addition of a LCD screen in front of each player as well as a larger 42" display in the center of the table. No physical cards or chips will be used as in the currently approved game. All cards and chips will be an electronic facsimile or representation.

All rules and standards that apply to the current Texas Hold'em and Omaha poker game will remain the same—including the rotation of the dealer button, placement of wagers, collection of table fees and Jackpot collection, the dealing of cards, wagers, reading of the hands, and the awarding of the pot to the winner.

There is a jackpot element attached to this game which will function in the same manner as that of the current poker jackpot the Division of Gambling Control (Division) has approved. The jackpot collection, administrative fees, payout of winners, and accounting procedures will not change.

Third Party Provider of Proposition Player Services (TPPPPS) as defined in section 19984 of the California Business and Professions Code (the Gambling Control Act) do not participate in this game within their official capacity.

**LIGHTNING POKER™ OMAHA HIGH/LOW Game rules and standards of play**

---

Lightning Poker™ Omaha High/Low follows traditional Omaha High/Low rules (shown below) except that the game is played electronically through individual player touch screen monitors and with virtual cards and chips. Lightning Poker™ does not allow a player to act until it is his/her turn. In addition to the individual player touch screens; there is a common center screen, which displays the community cards, pot size and other Omaha High/Low information. Lightning Poker™ Omaha High/Low rules are noted below.

## A. Omaha High/Low - Game Rules

Each player is dealt four holecards after which there is a round of betting. Three community cards are then displayed simultaneously (called the "flop") and another round of betting ensues. A fourth community card is displayed (called the "turn"), after which there is another round of betting. A fifth and final community card is then displayed called "the river") followed by a final round of betting.

In order to make a hand a player must use two of his/her hole cards combined with three community cards.

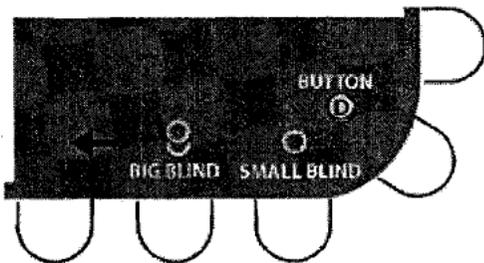

Omaha is often played high-low split, 8-or-better. The player may use any combination of two holecards and three community cards for the high hand and another (or the same) combination of two holecards and three community cards for the low hand. A qualifier of 8-or-better for low applies to all high-low split games. 8-or-better means no card in the low hand can be higher than an eight. Low hands may not contain pairs. Ace plays both high and low. Straights and flushes are not considered when evaluating low hands. If there is no qualifying low hand, then the best high hand wins the whole pot.

### Card Distribution and Betting Procedure

Example: \$2/\$4 Limit Omaha.

At casino Omaha tables, a round plastic marker called the dealer "button" is placed in front of the player who would be dealing if a house dealer were not provided. The button is moved one seat clockwise after each game and the card distribution and betting starts to the left of that position. Blinds are posted and then each player is dealt four cards face down, followed by a round of betting. Then, a total of five community cards are dealt face up in the center of the table in three betting segments (3-1-1). After all the cards are dealt the players make the best hand that they can by combining any two of their four hole cards with any three of the five community cards. Using the illustration above, a player holding a jack and a four would end up with a full house, jacks over fours. If he is also holding a six and an ace, he would have a qualifying low hand of 8,6,5,4,A.

B. The betting procedure is as follows:

- Before each player is dealt four down cards, the player at the immediate left of the button, called the "Small Blind" is forced to bet \$1 (half the minimum bet). Then the player to his left and two seats to the left of the button, called the "Big Blind", is forced to bet \$2. Each player is then dealt a four card hand. Then the player at the left of the big blind is first to act and he must either call the big blind's \$2 bet, raise \$2, or fold his hand. Continuing in turn clockwise, all the players around the table either call, raise or fold. When the betting gets back around to the small blind, he or she can fold and lose only the half minimum bet of \$1 placed earlier, call the amount necessary to get up to the betting level or raise \$2 if there is a raise left. The big blind is then the last to act before any cards are turned up in the middle. The blinds are posted in the first round only
- The dealer turns three cards up in the center of the table. This is the "Flop". The player at the left of the button is first to act. There are no more forced bets and the player's can all check around if they want to. Bets right after the flop are at the \$2 bet level.
- Now comes the "Turn" card with more betting that now goes to the \$4 level.
- Finally the last, or "River" card is turned up. The last \$4 betting round takes place. The players still in the contest reveal their hole cards and the highest hand wins the pot or splits with the lowest qualifying low hand. Of course, the ideal result is to win the high end with no split or have the cards to win both ways.

C. Describe dealing procedures

**"Standard" 52-card deck or other type of card deck.** - A standard 52-card deck is used for this game. It is rendered electronically, rather than a physical deck of cards. A fully certified Random Number Generator (RNG) is used to ensure that all electronically dealt cards are sufficiently randomized.

A Lightning Poker game has exactly the same dealing procedures as a non-electronic poker table; it just does everything electronically. Each player is electronically dealt four cards down (hole cards) to their private LCD touch screen. By touching the screen over the cards (touch zone), the player can view their hole cards. A round of betting then happens. Just as in a non-electronic game, the 'deal' is rotated around the table. An electronic 'dealer button' is located in front of a player to denote that the player is the current dealer. Action before the 'Flop' is started by the small and big blinds just like non-electronic play. Player always begins to the left of the current 'dealer' and each player can either 'bet', 'raise' or 'fold'. If a player wants to 'raise' the bet, they do so through a 'touch' action on their private LCD touch screen. This action will cause virtual chips to be placed in the 'pot'. The subsequent players must either match that raise ('call'), forfeit their hand ('fold') or increase the bet ('raise'), all through 'touch' actions on their private LCD touch screen.

#### ***The Flop***

Once the initial round of betting has finished, then three cards 'The Flop' are electronically dealt face up onto the 'Community LCD Screen' in the center of the table. These cards represent the first three 'community' cards shared by all players at the table who remain in the hand. At this point, each player has a five (5) card hand composed of

their two (2) hole cards and the three (3) community cards. Another round of betting/raising/folding begins via the private LCD touch screens in front of each player.

#### ***The Turn***

After all players have bet on 'The Flop', a 4<sup>th</sup> community card is electronically dealt to the Community LCD Screen in the center of the table. This card is called 'The Turn'.

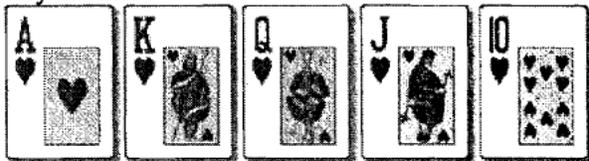

Another round of betting/raising/folding begins via the private LCD touch screens in front of each player.

#### ***The River***

After all players have bet on 'The Turn', a 5<sup>th</sup> and FINAL community card is electronically dealt to the Community LCD Screen in the center of the table. This card is called 'The River'. A final round of betting/raising/folding begins via the private LCD touch screens in front of each player. Once this round is complete, players reveal their two (2) hole cards. The player with the best five card poker hand is deemed the winner of this hand. The hand rankings to determine the winner are listed below

#### D. Number of players in the game.

A Lightning Poker Table can hold a maximum of ten (10) players at one time with a minimum of two (2) players required to begin a game.

#### E. Description of how and when are house fees collected.

Collection or Rake rules will vary from card room to card room, but many follow similar rules where the collection/rake amount changes depending on the amount of players being dealt a hand. The trigger is how many players are dealt a hand. Lightning Poker provides flexibility for each card room to customize their particular rake rules for any limit game.

The card rooms will be able to set the collection/rake rules indicating how much they will charge on a hand and what the maximum collection/rake will be.

Lightning Poker provides each card room the ability to set up their own collection/rake rules.

#### F. Betting limits.

Betting limits vary and are set depending on the type of Omaha game being played. Control of the betting limits will be determined by what game the card room sets up on the table.

The betting limits include:

- 1) **Fixed Limit game** - both the bet and raise amounts for each round are a preset amount. For example, in a \$5/\$10 Fixed game, both the bets and raises for the first two rounds of betting must be \$5, no more, no less. The last 2 rounds have a bet/raise amount of \$10

- 2) **Pot Limit Game** - the maximum bet/raise can't be more than the current pot amount. So, if the pot is \$30, you can't bet more than \$30. One thing to note: If you are raising on a player's bet, your call is already included in the pot. So, for example, let's say the pot is \$100. Player X opens the betting with \$100. Your maximum bet is now \$300 (Pot = Initial \$100 + Player X's \$100 + your \$100)
- 3) **No Limit** - This is a type of game where players are permitted to bet any amount (no limit) up to the amount they have on the table after the Big and Small Blinds are placed. As a note; most card rooms will allow a set maximum amount of money that any individual player can begin with in the game

#### G. How winners determined and paid.

The winner is determined by whichever active player (player has not folded) has the best five-card poker hand after the fifth community card ("The River") has been dealt and the final round of betting has been completed, or by a player being the only active player left in a hand (all other players have folded their hands).

Payments are transferred automatically to the winning player's account, and the system keeps a running total of all losses or winning for all players. When a player wishes to leave the table and 'cash out' their winnings or remaining monies, they touch 'Leave Table/Cash Out' on their private LCD Touch Screen. The player then returns to the Lightning Poker Cash Station where they created their player account. The player provides card room cashier their account card and the cashier swipes their card to locate the player's cash balance and then pays the player their winnings or remaining cash balance.

Lightning Poker utilizes the patented Oneida II account based cash system to handle the entire cash process utilized as part of its product. The Oneida II system is certified and has been utilized in casinos (Turning Stone in Verona, NY and many more) for close to a decade.

#### H. Describe a "round of play."

Once a player registers for a Lightning Poker game and is assigned to a specific Lightning Poker table, the player will swipe their account card at their private player station. This will activate a 'Pin Pad' screen on their private LCD touch screen. Once the player types in her/his private Pin #, she/he will be able to play in the next available hand.

After a set amount of people sit down at a table (set by the card room but no less than two and up to ten players), the card room's poker floor person can begin play by activating the table directly at the table or from a PC.

To begin play, each player is dealt four (4) hole cards to their private LCD touch screen. After viewing their cards, a player can bet, check or fold.

All players who want to stay in the hand must check or bet as play dictates at that moment.

Once the first round of betting is completed, Lightning Poker electronically deals three (3) community cards, known as 'The Flop', on the community LCD center screen. The second round of betting now happens.

Once the second round of betting is completed, Lightning Poker electronically deals one (1) more community card, known as 'The Turn', on the community LCD center screen. The third round of betting now happens.

Once the third round of betting is completed, Lightning Poker electronically deals one (1) final community card, known as 'The River', on the community LCD center screen. The fourth and final round of betting now happens. Upon completion of the final round of betting, active players now show their hole cards to determine the player with the best five-card poker hand. This player is determined as the winner and the pot is awarded to this player.

The next hand now begins.

Screen Shots of Lightning Poker are attached as Exhibit 4.

I. Describe the type of gaming table utilized for this game.

Dealer's chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clock-wise fashion.

2. The game utilizes a 52-card deck with special marked "Natural" aces with wild value. The aces are wild cards with the value of:
  - a. 10 ½ on first two cards with all cards with the value of 10's.
  - b. 1 or 11 with all cards with value of 2-9.
  - c. 1 or 11 with three or more cards.
3. All tables will have signage displaying the name of the game along with the minimum and maximum wager allowed, and collection fees for the Players and Player/Dealer.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer places a wager in front of her betting circle. This wager is used to pay the winners. The casino will place a "button" in front of the Player/Dealer and a designation whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his betting circle.
5. Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each Player must pay the posted collection for their wager(s) in any betting circle where they have money or "action".
6. Prior to the start of play, the casino dealer will take the collection fees.
7. Play commences with the casino Dealer distributing the cards to the Players and the Player/Dealer. All cards are dealt face up. The casino Dealer is the only person on the table to touch the cards. The Players will signal to the Dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino Dealer deals the first card to the Player seated to the left of casino Dealer, in a clock-wise fashion. Each Player will be dealt one card face up. The Player/Dealer's first card will be placed in front of the casino dealer.
8. The casino Dealer will deal a second face up card to the players, again starting at the Player to the first seated position to the left of the casino Dealer, in a clock-wise fashion. The Player/Dealer will receive a face down card in front of the casino Dealer.
9. Players must follow the below listed chart in deciding whether to hit or stand on a particular hand:

12. The Player/Dealer's cards will always be dealt and placed in front of the casino Dealer's tray.
13. The casino Dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer must follow the following hit rules:

<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>

15. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the Player/Dealer position is rotated in a clock-wise fashion around the table.
16. The next round of play begins once the casino Dealer collects all cards from the table and places them in the discard tray. Player/dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player/dealer wager. The house never participates as a player/dealer. The house never takes a percentage of wagers placed in the game. There is no maximum on the player/dealer's wager.

Wagers shall be settled in the following order from seat to seat: all Player line wagers, all Banker line wagers, all Tie wagers, all Panda 8 wagers, and then all Dragon 7. ## Dealing Procedures and Round of Play

At the start of a game a player is offered the player-dealer position. Once accomplished, the house dealer shall wait for each player to make their wager in accordance with the table limits.

Each player has the following options when placing their wager(s):

- The player line which pays 1 to 1;
- The banker line which pays 1 to 1;
- The Tie Bet, which pays 8 to 1;
- If a player placed a wager on either the player line or the banker line, that player may place a wager on the Dragon 7 Bonus Bet, which pays 40 to 1.
- If a player placed a wager on either the player line or the banker line, that player may place a wager on the Panda 8, which pays 25 to 1.

Once all wagers are placed, the house dealer deals one card to the right and one card to the left, one by one in rotation, until each hand has a total of two cards each. All cards are dealt face-up. The hand to the left of the house dealer is a community hand that belongs to those that placed a bet on the banker line. The hand to the right of the house dealer is a community hand that belongs to those that placed a bet on the player line. The player's hand is resolved first and then the banker's hand is resolved. The hand that is closest to nine wins. After the house dealer delivers the first two cards to both the Player line and Banker line, the following Baccarat rules are followed.

- The player's hand must stand when the hand is valued at 6 through 9, and must hit when the hand is valued at 5 or less.
- If the player's hand stands, then the dealer hand hits on a total of 5 or less.
- If the player's hand hits for a complete hand then the banker's hand hits using the following rules:
  - If the banker's hand total is 3, then the banker's hand is dealt a third card unless the third card dealt to the player's hand was an 8.
  - If the banker's hand total is 4, then the banker's hand is dealt a third card unless the third card dealt to the player's hand was a 0, 1, 8, or 9.
  - If the banker's hand total is 5, then the banker's hand is dealt a third card if the third card dealt to the player's hand was 4, 5, 6, or 7.
  - If the banker's hand total is 6, then the banker's hand is dealt a third card if the third card dealt to the player's hand was a 6 or 7.

The following chart shows when the banker hits (H) or stands (S) according to the rules above:

Banker's Score	Player's Third Card									
	0	1	2	3	4	5	6	7	8	9
7	S	S	S	S	S	S	S	S	S	S
6	S	S	S	S	S	S	H	H	S	S
5	S	S	S	S	H	H	H	H	S	S
4	S	S	H	H	H	H	H	H	S	S
3	H	H	H	H	H	H	H	H	S	H

1	H	H	H	H	H	H	H	H	H	H
0	H	H	H	H	H	H	H	H	H	H

The house dealer must use the "house way" when a player requests the house dealer to play an additional wager. House way hands shall be set as follows: player hand hits on five or below and stands on six or more

- All winning Tie Bet wagers shall be paid 8 to 1.
- Wagers are collected or paid, to the extent that the player-dealer's wager covers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the players.

- See the collection rate schedule for restrictions on the amount that may be wagered on the Dragon 7 Bonus Bet and any collection fees that may be taken.
- If the banker hand has a point value of seven using three cards and the player's hand has a value of six or less, regardless of the number of cards, the Dragon 7 Bonus Bet wins. The Dragon 7 Bonus Bet shall lose on all other outcomes.
- All winning Dragon 7 Bonus Bet wagers shall be paid 40 to 1.
- The player-dealer shall pay all winning Dragon 7 Bonus Bet wagers and shall collect all losing Dragon 7 Bonus Bet wagers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the players.

## OBJECT OF THE GAME

The object of 21<sup>st</sup> Century Blackjack Switch is for the players and the player-dealer to add the numerical value of their cards and obtain the best possible hand of 21 ½, referred to as a “Natural.” A natural beats all other hands.

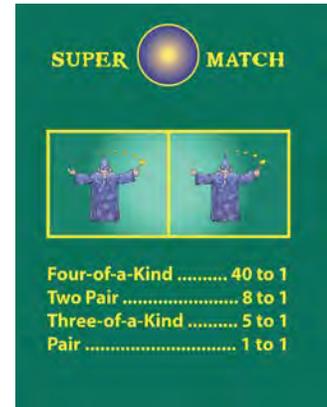

## HOW TO PLAY

Each player plays two (2) hands and places a wager in both betting spots. Players have the chance of keeping the hands that have been dealt or switching their second cards around.

For example, if a player is dealt a king on the first card and 5 on the second card (with the value of 15) for one hand and 6 on the first card and ace on the second card (with the value of 7 or 17) for the second hand, the player can request to switch the A & 5. The player will end up with K & A on one hand and 6 & 5 on the other hand.

## TYPE OF TABLE

The game shall be played on a standard blackjack table having six places on one side for the players and the player-dealer, and a place for the house dealer on the opposite side. Each 21<sup>st</sup> Century Blackjack Switch table shall have a drop box attached to it. The cloth covering a 21<sup>st</sup> Century Blackjack Switch table (the layout) shall have wagering areas for six players. The wagering areas shall be designated as shown in the picture to the right. The game wager for each of the two player’s hands will be placed on the wizards and the Super Match wager will be placed on the circles with a crown inside. Backline betting is not permitted.

## VALUE OF CARDS

A plural standard deck of cards (52 cards) with no Joker is used in the play of the game. However, all four (4) of the Ace cards shall be removed from the deck and shall be replaced with four (4) specially marked Aces with the word “Bonus” on them. The game can be played with a minimum of six (6) and a maximum of eight (8) decks.

- Any two card hand, before a switch, consisting of a specially marked “Bonus” ace with any 10 or face card is a “Natural” and beats all other hands. **A switched “Natural” is considered a 21 ½ not a “Natural.”**
- A “Bonus” Ace has the following values :
  - 11 ½ on the first two cards when the other card has a value of 10.
  - 1 or 11 when combined with cards valued at 2 - 9.
  - 1 or 11 with three or more cards.
- Two aces have a value of 2 or 12.
- All cards from 2-10 have their face value.
- Picture or face cards have a value of 10.

## RANKING CHART

Card	Value
“Bonus” Ace	a) 11 ½ when paired with another card with the value of 10. b) 1 or 11 with all cards with value of 2-9. c) 1 or 11 with three or more cards.
Ten, Jack, Queen, King	10
Two - Nine	Hold their face value.

## ROUND OF PLAY

1. 21<sup>st</sup> Century Blackjack Switch is played on a raised gaming table. The table seats six players who face the house dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The house dealer stands opposite of the players, and in the center of the table. The house dealer's chip tray is set in front of him/her. The play starts from the left of the house dealer and proceeds in a clock-wise fashion.
2. All tables will have signage displaying the name of the game along with the minimum and maximum wagers allowed, and collection fees for the players and the player-dealer.
3. A standard round of play begins when a player-dealer is designated. The player-dealer places a wager in front of her betting circle. This wager is used to pay the winners. The casino will place a "button" in front of the player-dealer and designating whether it is the first or second turn for the player-dealer in the banking position. The player-dealer will place the collection fee in front of his/her betting circle.
4. Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each player must pay the posted collection for their wager(s) in accordance with the collection rate schedules.
5. Collection fees will be taken in accordance with the collection rate schedule.
6. Play commences with the house dealer distributing the cards to the players and the player-dealer. All cards are dealt face up, with the exception of the player-dealer's second card, which will be dealt face down and will remain face down until all players have acted on their hands. The house dealer is the only person on the table to touch the cards.
7. The house dealer deals the first card to the player seated to the left of house dealer and continues in a clockwise fashion around the table. Each player will be dealt one card, face up, to each of their hands for a total of two cards. After each player has received their cards, the player-dealer receives one card face up. The player-dealer's card will be placed in front of the house dealer face up.
8. The house dealer will deal a second card, face up, to each of the players' two hands, again starting with the player to the first seated position to the left of the house dealer, in a clockwise fashion. After all players have received their cards, face up, the player-dealer will receive their second card, which will be placed in front of the house dealer face-down.
9. When each player has two hands and the player-dealer has two starting cards, the Super Match wager will be settled beginning with the player to the right of the house dealer and continuing in a counter-clockwise manner until all Super Match wagers have been acted upon or the player-dealer's funds are exhausted.
10. The player-dealer's hand shall be checked for a "Natural" when the player-dealer's face-up card is a "Bonus" Ace card. If the player-dealer is dealt a "Bonus" Ace face-up, players will be asked if they would like to place an "Insurance" wager. Players may either decline this or place an "Insurance" wager by betting an amount equal to half of their game wager. After each player has been given the opportunity to place an "Insurance" wager, the house dealer will check the player-dealer's face-down card. If the player-dealer has a "Natural," players shall not be given the opportunity to draw additional cards and the hands shall be compared immediately.

## 21<sup>st</sup> Century Blackjack Switch

11. If the player-dealer does not have a “Natural,” each player is given an opportunity, starting with the player seated to the left of the player-dealer and continuing clockwise around the table, to switch the second card of each hand (See Procedure for Switching the Cards). After the player has made their decision on whether or not to switch their second card, the player then has the opportunity to “Hit” and be dealt additional cards to make the best possible hand for each of their two hands. The players will signal to the house dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The player may also decide to “double-down,” “split,” or “stand.” Each player shall be required to hit or stand according to the chart below:

<b>Rules For Player</b>		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Soft & Hard 21 “Naturals”	11 Or Less	12 - 20

A Hard hand is achieved when a hand contains a combination of three or more cards totaling 21. In the event that the hand includes an Ace, the Ace is only able to be counted as 1, not 11.

A Soft hand is achieved when a hand contains a combination of two or more cards totaling 21 with an Ace counted as 1 or 11.

12. After all players have made their best hands by indicating to the house dealer that they do not wish to have additional cards dealt to them, the house dealer will turn over the player-dealer’s hole (second) card.
13. The player-dealer’s cards will always be dealt and placed in front of the house dealer’s tray.
14. The house dealer continues to draw cards for the player-dealer, if necessary until a Hard 17 or higher number is reached. The player-dealer must follow the following hit rules:

<b>Rules For Player-dealer</b>		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Hard 17 And Above	Soft 17 Or Less	None

A Hard hand is achieved when a hand contains a combination of two or more cards totaling 17. In the event that the hand includes an Ace, the Ace is only able to be counted as 1, not 11.

A Soft hand is achieved when a hand contains a combination of two or more cards totaling 17 with an Ace counted as 1 or 11.

15. Once the player-dealer’s hand has been made, all winners and losers are determined by comparing the numerical value of the player’s hands with the player-dealer’s hand. The Player-dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers.
16. Beginning with the player to the right of the house dealer, the settling of the wagers will be done in a counter-clockwise manner until all wagers have been acted upon or the player-dealer’s funds are exhausted. Furthermore, wagers will be settled in the following order: All Super Match wagers (see number 8 above), then all game wagers on the table.

## 21<sup>st</sup> Century Blackjack Switch

17. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the player-dealer position is offered in a clock-wise fashion around the table.
18. The next round of play begins once the house dealer collects all cards from the table and places them in the discard tray.
19. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house shall not participate as the player-dealer. The house shall not take a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
20. The player-dealer position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

**Standards of play:**

Ultimate Texas Hold'em features head-to-head play against the player-dealer and an optional bonus bet.

The player-dealer position will be selected as in other games approved by the Bureau of Gambling Control; and the player-dealer will only "bank" the hand (including bonus bets) for two consecutive times before it is rotated in a clockwise fashion around the gaming table.

Players and the player-dealer each receive two cards. They combine them with five community cards to make their best five-card hand.

Ultimate Texas Hold'em lets players bet aggressively. The earlier they bet, the more they can risk and win. If players bet pre-flop, they may risk 3x or 4x their ante. If they bet on the flop, they may bet 2x their ante. If they wait until the river, when all community cards are out, they may only bet 1x their ante.

This game also features an optional bet, the Trips bonus. Players win the Trips bonus if their final five-card hand is three of a kind or higher. Odds will be printed on layout.

  - c. 5 community cards in the center of the table.
4. The automatic shuffler shall deal cards as follows:

  - c. 5 community cards in the center of the table.
5. After the cards have been dealt and delivered to each player and the player-dealer, the house dealer shall unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards.

#### **Round of Play**

1. After the dealing procedures above have been completed, each player shall examine his or her cards and decide whether to check (do nothing) or to make a play wager three or four times the value of their ante wager. Once players bet, they cannot bet again and they cannot change their bet.
2. When players have made their player wagers (if any), the house dealer shall proceed to turn over the first three community cards.
3. Players who have not already made a play wager may decide to either check again or to make a play wager two times the value of their ante wager.
4. The house dealer shall proceed to turn over the remaining two community cards (the turn and the river).
5. When all five community cards are revealed, players who have not yet made a play wager can either fold or make a play wager equal to the value of their ante wager.
6. A player who decides to fold shall place his/her cards face down on the table. The house dealer shall then, in relation to each player who has folded:
  - a. Collect the ante wager, blind wager, any trips bonus wager (if the hand is not a 3 of a Kind or better) on behalf of the player-dealer, and the player's cards;

8. When handling the cards, players shall at all times ensure that the cards remain on or above the area of the table. The cards must not be removed from the table.

**When the player-dealer does not qualify:**

9. Where the player-dealer's hand is not 1 pair or higher, the player-dealer does not qualify. Starting with the player on the player-dealer's left, the house dealer shall:
  - a. Expose each player's cards, signal a push for the ante and return the ante wager to each player that did not fold;
  - b. Resolve the play, blind, and trips bonus bets normally (see below "When player-dealer qualifies"); and
  - c. Collect, count and place the player's cards in the discard holder.

NOTE: Ultimate Texas Hold'em handles qualifying differently than other games. When the dealer does not qualify, it is not an automatic win for the player.

**When the player-dealer qualifies:**

10. If the player-dealer's hand has a poker value of a pair or higher, the house dealer reconciles the hands of those players who remain in the game. Starting with the player to the left of the player-dealer and moving clockwise around the table, the house dealer will:
  - a. Bring the player's cards into the "work area" between the player-dealer's hand and the trips bonus wager area and reveal the player's cards;
  - b. Determine the player's best 5-card poker hand utilizing any of the 7 cards available (player's 2 hole cards and 5 community cards);
  - c. Compare the player's hand with that of the player-dealer; and
  - d. Announce the value of the player's hand and whether it wins or loses.
11. A player's hand shall:
  - a. Win if it has a higher poker value than that of the player-dealer's hand;

- b. Lose if it has a lower poker value than that of the player-dealer's hand;
  - c. Constitute a push if it has a poker value equal to that of the player-dealer's hand.
  - d. If a player wins with less than a straight, the blind bet pushes.
12. If a player's hand loses, the house dealer shall:
- a. Collect on behalf of the player-dealer, in order, the play, ante and blind wagers;
  - b. Determine whether the trips bonus wager qualifies and pay accordingly on behalf of the player-dealer; and
  - c. Collect, count and place the player's cards in the discard holder.
13. If a player's hand wins, the house dealer shall on behalf of the player-dealer:
- a. Pay the ante wager and play wager on the hand;
  - b. Pay the blind wager if the hand is a straight or better;
  - c. Pay any trips bonus wager if the hand is a 3 of a kind or better; and
  - d. Collect, count and place the payer's cards in the discard holder.
14. If a player's hand constitutes a push, the house dealer shall:
- a. Pay any trips bonus wager if the hand is a 3 of a kind or better;
  - b. Collect, count and place the player's cards in the discard holder.
15. Winning ante wagers and play wagers shall be paid 1 to 1.
16. Winning blind wager and trips bonus wagers shall be paid in accordance with the approved pay table for the cardroom.
17. Where a player has made a trips bonus wager at the beginning of the round and has received a 3 of a Kind or higher, the house dealer shall leave the particular cards face up on the table and those cards shall not be collected or discarded until the payout on the hand has been made.
18. If the player receives a 3 of a Kind or higher, the trips bonus payouts are made regardless of whether the hand wins, loses, or pushes.

NOTE: If the player has a 3 of a Kind or better, the trips bet always wins – even if the player folds.

19. The player-dealer is never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house never participates as the player-dealer. The house never takes a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
20. The player-dealer position rotates in a systematic and continuous way among the seated players, and no one player may serve as the player-dealer for more than two consecutive hands. The player-dealer button rotates clockwise around the table.

**Trips Bonus**

1. This is an optional wager for Ultimate Texas Hold'em.
2. Backline betting is permitted.
3. This bet will be paid according to the payable if it is a qualifying hand of three of a kind or better. If the hand does not qualify with a three of a kind or better, according to the payable, the wager shall lose and be collected. This bet cannot push. This bet wins or loses regardless of whether the player hand wins, loses, or ties.
4. If a player placed a Trips Bonus bet and folds their hand, they are still eligible if the community cards contains three of a kind or better. If there is a three of a kind or better on the board, the Trips Bonus bet wins, otherwise, that wager is collected as well with the ante and blind bet.
5. To participate in the Trips Bonus, players must make bets on the Ante, Blind. Players place their Trips Bonus wagers in the marked circle.
6. If the player's hand qualifies for payouts, the player-dealer pays him according to the posted payable. If the player's hand does not qualify, the player-dealer takes his wager and moves on to the next player.
7. If the player receives a 3 of a Kind or higher, the trips bonus payouts are made regardless of whether the hand wins, loses, or pushes.

**Description of Table Used and Total Number of Seated Positions**

The game shall be played on a standard poker table which shall accommodate up to ten seated positions for patrons. Within each betting area for each seated position, there shall be a single betting space specifically designated for players to place a wager. Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by the table limits. Back-line betting is not permitted.

**Action and Distribution of Cards**

The game also utilizes a flat disk called a "dealer button" to visually designate which player is in the dealer position (in theory) for that hand. The dealer button rotates clockwise after each hand. The dealer button is the last to receive cards on the initial deal, but does not determine where action begins. The player with the highest card clockwise of the dealer button will make a mandatory opening bet (the bring in). When two cards of equal value are present, the first player to receive their card will open the betting. (when the joker is dealt face up on the initial round it will be considered an Ace for the purpose of determining the bring in) The opening better has the option of opening at either the lower or upper limit in limit games, or opening for at least the minimum in no-limit games.

**Dealing Procedures and Round of Play**

When first opening a game, all players are dealt one card. The player with the highest ranked card, by suit, shall receive the dealer button. Once the dealer button has been established, the cards are collected and each player shall be required to place an "ante." Antes are used to initiate action and are posted before players receive any cards. All antes shall be placed in the center of the table, which is known as "the pot." Once the antes have been posted, the card room dealer shall deal one card face up to each player, starting with the player to the left of the dealer button and continuing clockwise around the table until all players have one face up card. The card room dealer shall then deal one face down to each player, starting with the player to the left of the "dealer button" and continuing clockwise around the table until all players have a total of two cards; one face up and one face down. Once the initial two cards have been distributed to each player, the first round of betting will occur. The player that that has been dealt the highest face up card, clockwise of the dealer button, according to card rank and suit,

shall be required to place a bet equal to the amount of the lower table limit, referred to as the "bring in." Players are then given the following options, starting with the player to the left of the player that placed the bring in, and then continuing clockwise around the table:

- Call the bring in by placing a wager equal to the bring in;
- Raise the pot by placing a wager equal to the bring in as well as an amount equal to the lower table limit. In no-limit games the amount of the raise must be equal to or larger than the amount of the bring in and may be up to the entire amount of chips that player has on the table. If a player raises the pot, all other players shall be required to call the raise, re-raise the pot by an amount equal to the lower table limit, or fold their hand. In no limit games the player must re-raise the pot for amount equal to or greater than the amount of the previous raise. There is a maximum of three raises per round of betting, unless there are only two active players, in which case there is no limit to the number of raises. In no limit games there is no limit to the number of raises, regardless of the number of players remaining in the pot. When a raise or re-raise occurs, checking is not permitted;
- Fold their hand, which shall be collected by the card room dealer;

After all players have acted in turn and either called all bets or folded their hand, the card room dealer shall move all player bets into the pot. Players are now given the opportunity to expose their down card. If a player chooses to expose their down card, the next card will be dealt face down. If they do not choose to expose their down card, the next card will be dealt face up. The card room dealer shall then take the top card of the deck and place it in the discard pile without exposing it. The card room dealer shall then deal one card face up or face down, depending on the player's decision to expose their already dealt face down card, to each player, starting with the player to the left of the "dealer button" and continuing clockwise around the table until all players have a total of three cards; two face up cards and one face down card. The face up cards are not community cards and are only available to the player whose hand they belong. Once each player has been dealt their third card, the second round of betting will occur. All active players, which are players that called all wagers and did not fold their hand, shall be given the following options, starting with the player that has the highest ranked face up card(s):

Players are now given the opportunity to expose their down card. If a player chooses to expose their down card, the next card will be dealt face down. If they do not choose to expose their down card, the next card will be dealt face up. The card room dealer shall then take the top card of the deck and place it in the discard pile without exposing it. The card room dealer shall then deal one card face up or face down,

Players are now given the opportunity to expose their down card. If a player chooses to expose their down card, the next card will be dealt face down. If they do not choose to expose their down card, the next card will be dealt face up. The card room dealer shall then take the top card of the deck and place it in the discard pile without exposing it. The card room dealer shall then deal one card face up or face down, depending on the player's decision to expose their already dealt face down card, to each player, starting with the player to the left of the "dealer button" and continuing clockwise around the table until all players have a total of five cards; four face up cards and one face down card. The face up cards are not community cards and are only available to the player whose hand they belong. # Pure Spanish 21.5™

Masque Publishing, Inc.

U.S. Patent 5,615,888, 5,806,846

**OBJECT OF THE GAME**

The object of Pure Spanish 21.5 is for the players and the player-dealer to add the numerical value of their cards and:

- Achieve the best possible point total of 21.5 by getting a King, Queen, or Jack Bonus Card and an ace on the initial two cards dealt (Example King Bonus Card below). This hand is called a Pure Spanish 21.5 Blackjack and pays 6 to 5.

- Get as close to 21.5 as possible, without going over.
- Draw additional cards if needed.

**VALUE OF THE CARDS**

The game uses a 48-card deck with aces through nines (the standard spades, hearts, clubs and diamonds) and 12 cards specially marked with the word "Bonus" (four of each "king", "queen", and "jack" cards). All 10's shall be removed from each deck. The game shall be played with a minimum of four decks (totaling 192 cards) to a maximum of eight decks (totaling 384 cards).

- A King, Queen, or Jack Bonus card and an ace, on the initial deal, is the best possible hand. It is known as a "Pure Spanish 21.5" and pays 6 to 5.
- A King, Queen, or Jack Bonus card dealt with any other card is worth 10 and is added to the other card(s) point total.
- An ace has a value of either 1 or 11.
- All cards from 2-9 have their face value.
- King, Queen, or Jack Bonus cards have a value of 10 unless dealt with an Ace on the initial deal, and then they have a value of 10.5.

**ROUND OF PLAY**

1. Pure Spanish 21.5 is played on a raised gaming table. The table seats up to eight players who face the house dealer in a 180-degree seating arrangement. The tables are the standard blackjack tables commonly used in the casino industry. The house dealer stands opposite the players, and in the center of the table. The house dealer's chip tray is set in front of the dealer.
2. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed. The collection fee for the players and player-dealer shall also be displayed. A maximum of five collection rates is allowed in compliance with the California Penal Code.

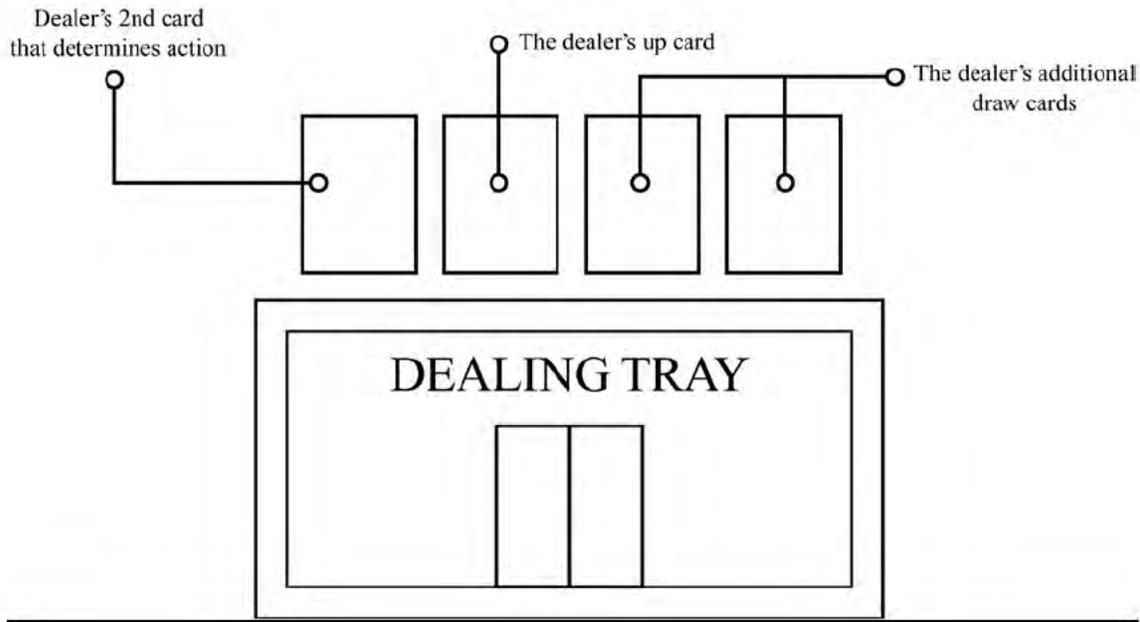

3. A standard round of play begins when a player-dealer is designated. The player-dealer will place a wager in a betting circle in front of their seat. That wager will be used to pay the winners and will set the amount that he/she can collect for the losers. The casino will place a button in front of the player-dealer, which designates that they are taking the "bank" position and further designates whether it is the first or second turn for the player-dealer in the banking position. The player-dealer will place the appropriate collection fee in front of his/her betting circle.
4. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the appropriate collection fee based on the posted schedule for the cardroom. Prior to the start of play the house dealer will take collection fees and drop them into a locked collection box affixed to the gaming table.
5. After the fees have been collected, the house dealer will deal the cards to the players and the player-dealer. All cards dealt throughout the game are face up, with the exception of the player-dealer's second card, which will remain face-down until all players have acted on their hands. The house dealer is the only person on the table allowed to touch the cards. The players will signal the dealer with hand gestures that indicate whether they wish to hit or stand. The hand signals will be consistent with the industry standard signals of a sweeping motion towards a player's body, indicating a hit, or a side to side hand motion, indicating the desire to stand. The house dealer deals the first card to the player seated to the left of the player-dealer, and continues in a clock-wise manner. Each player will be dealt one card face up with the player-dealer receiving the last card. The player-dealer's cards will be placed in front of the house dealer.
6. The house dealer will deal a second card to the players in the same order noted above and the last card will go to the player-dealer and will be dealt face down. The players are given an opportunity, starting with the player seated to the left of the player-dealer, to be dealt additional cards to make the best possible hand.
7. Players must follow the below listed **Chart 1A** in deciding whether to hit or stand on a particular hand.
8. After all players have acted on their hands and indicated to the house dealer that they do not want or cannot receive additional cards, the player-dealer's down card will be turned up. This down card will determine where the "action button" is placed.
9. The game utilizes an action button to determine which player receives first action on their wager. The player-dealer's second card, which is dealt face-down, determines the position of the action button. The player-dealer position is not counted when determining where the action button shall be placed. The other seats, in clockwise rotation, starting with the player to the left of the house dealer and continuing left to right, respectively represent the numbers of the player-dealer's face down card. When determining where the action button will be placed, cards will hold the following values: Ace is one, 2 through 9 have their face value, jack is eleven, queen is twelve, and king is thirteen.
10. The player-dealer's hand will then be completed according to the rules listed on **Chart 1B**. Once the player-dealer's hand is completed, the payoff and/or collection of wagers will begin in the seat designated by the action button and continue in a clockwise manner until all wagers have been acted on.
11. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house shall not participate as the player-dealer. The house shall not take a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
12. The player-dealer's cards will always be dealt and placed in front of the house dealer's tray. The placement of the player-dealer's cards is standard in all games and is depicted below. See **Diagram #1**

13. The next round of play begins when the house dealer collects all the cards from the table and places them in the discard tray. The player-dealer position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

### GAME RULES

1. A Pure Spanish 21.5 Blackjack (an ace and a King, Queen, or Jack Bonus card) is the best possible hand. If the player and the player-dealer's hand are both Pure Spanish 21.5 Blackjack the player wins.
2. If the player-dealer does not have a Pure Spanish 21.5 Blackjack, the players will be given the option to draw to improve their hands, in accordance with Chart 1A above. The player-dealer's face-down card will be checked by the house dealer, for a Pure Spanish 21.5 Blackjack, when the player-dealer's face-up card is an ace or King, Queen, or Jack Bonus Card. This will happen prior to any additional cards being given to players. If the player-dealer has Pure Spanish 21.5 Blackjack, no additional action will take place and all players' hands that do not have a Pure Spanish 21.5 Blackjack will lose.
3. After all players have been given a chance to act on their hands, the player-dealer's hand will be completed in accordance with Chart 1B.
4. If a player's total is less than a Pure Spanish 21.5 Blackjack and the player-dealer's total is more than a Pure Spanish 21.5 Blackjack, the player wins the hand.
5. If a player's total is more than a Pure Spanish 21.5 Blackjack and the player-dealer's total is less than a Pure Spanish 21.5 Blackjack, the player loses the hand.
6. If a player and the player-dealer have the same total and it is less than a Pure Spanish 21.5 Blackjack, the hand is a push or tie. No action is taken on the wager.
7. If a player's total and the player-dealer's total are less than a Pure Spanish 21.5 Blackjack, the hand closest to a Pure Spanish 21.5 Blackjack will win.

11. Backline betting is permitted on all wagers.
12. Third Party Providers of Proposition Player Services, as defined in Section 19984 of the California Business and Professions Code, are permitted to play.

### DOUBLE-DOWN, RESCUE, DOUBLE-DOUBLE DOWN, SPLIT, AND SURRENDER

1. Players can double-down on the first two cards dealt to them. The player must place a second wager which may be equal to or less than the player's original wager. The player will only receive one additional card, regardless of the total.

2. After doubling, if a player is dissatisfied with his/her non-busted hand, he/she may "rescue" (take back) the last doubled portion of the bet and forfeit the remainder of the wager. Their play for the hand will then cease.
3. If the player-dealer hits on a soft 17, the casino may allow an option known as "double-double down." If the casino allows the double-double down option, once a player elects to double and receives a double card, the player then has the option to double-double down (double his total wager again), rescue the last doubled portion of the bet, or stand. A player may double the total wager up to three times, once via double down and twice via double-double down, creating a maximum wager up to 8 times the original wager. After doubling a third time and receiving a double card, a player only has the option to stand or rescue. When a player "rescue" (take back) the last doubled portion of the bet and forfeit the remainder of the wager. Their play for the hand will then cease.
- a. Important: The "double-double down" option is not available to the player when the player-dealer stands on all totals of 17. Doubling for less is only allowed if the double-double down option is not allowed. In other words, when the double-double down option is allowed there is no doubling for less.
4. Players can split any pair or two cards of the equal value, including aces and Bonus cards. The player must place a second wager equal to the original wager. The player may draw as many cards as desired per split card. There is no splitting for less.
5. A maximum of three splits is allowed per hand, giving a player up to 4 hands. Doubling-down is permitted after splitting.
6. Players can surrender after the first two cards are dealt to them. If they choose to surrender, half of their wager will be forfeited. The player must indicate their desire to surrender before the player-dealer's down card is exposed. Their play for the hand will then cease.
7. Late surrender option:
  - a. Players will have to option to surrender after the dealer has checked for Pure Spanish 21.5 Blackjack. If the player-dealer has Pure Spanish 21.5 Blackjack, the hand is over there will be no draw; the player will not have the option to surrender.
  - b. If the player-dealer does not have Pure Spanish 21.5 Blackjack the player will have the option on their original first two cards dealt to them to surrender, whereas half of their wager will be forfeited. The player must indicate their desire to surrender before the player-dealer's down card is exposed. Their play for the hand will then cease.
8. The casino will take no extra collection fee on double downs or splits from the player or player-dealer.
9. All payoffs are to the extent that the player-dealer's money covers the action on the table. A player-dealer cannot win or lose more than the entire amount of money placed on the table before the start of the hand.

### **Match the Dealer Up Card Bonus Bet**

1. In addition to the regular base game wager, casinos may offer a Match the Dealer Up-Card bonus wager
2. A Match the Dealer Up Card bonus wager is a wager that one or both of a player's original two cards of the hand will exactly match the dealer's up-card in rank.
3. In order to play the Match the Dealer Up Card bonus wager, the player must make a regular base game wager.

There are two payoff amounts for each respective wager, a suited rank match and an unsuited rank match. All payoffs are shown in the below Match the Dealer Card bonus bet pay tables.

The Total Table Action does not include any additional wagers placed by players after cards are dealt. There will also be a collection fee taken from each player and backline bettor for each betting circle they place a game wager on. The collection will be collected from the player-dealer and dropped by the house dealer after each player has placed their wagers, but prior to cards being dealt or any round of play being conducted.

- California games utilize a player-dealer position. The position will be offered systematically and continuously in a clockwise manner around the table after every two hands.
- All controlled game wagers, including bonus bets, are collected or paid, to the extent that the player-dealer's wager covers.
- Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the respective players.
- The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.
- Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed above, will be used at a gaming table at any one time.
- Collection rates and fees will be determined prior to the start of play of any hand or round. Rates will not be calculated as a fraction or percentage of wagers made or winnings earned.
- Flat fees on wagers may be assessed at different collection rates; however, no more than five collection rates may be established per table.

### **Description of Table Used and Total Number of Seated Positions**

Face Up Pai Gow Poker is played on a standard Pai Gow Poker table, which seats a maximum of six players and a player-dealer, for a total of seven seated positions. Within each betting area for each seated player, there shall be three separate betting areas representing each players' base game wager, Fortune Bonus Bet, and Ace-High Bonus Bet. Each betting space at the table has a fixed amount for wagering limits defining the minimum and maximum amounts that may be wagered. Players must bet at least the table minimum.

### **Dealing Procedures and Round of Play**

All wagers in Face Up Pai Gow Poker will be made by placing casino chips on the appropriate betting areas of the table layout keeping in mind the tables minimum and maximum wagering limits.

1. At the start of a game a player is offered the player-dealer position. Once the player-dealer position is accepted, the house dealer shall wait for each player to make their wager in accordance with the table limits.
  - a. Each player then has the following option(s) when placing their wager(s):
    - i. The base game which pays 1 to 1;
      1. If the player-dealer's hand is a seven-card ace-high hand all wagers will push.
    - ii. The Fortune Bonus Bet which pays according to the payable, as shown below;
      1. If a player wagers at least \$5 on the Fortune Bonus Bet, the player qualifies for the Envy Bonus and the house dealer must place an "envy" button next to the player's Fortune Bonus Bet wager.
    - iii. The Ace-High Bonus Bet which pays according to the payable as shown below.
2. Third-Party Providers of Proposition Player Services (TPPPS), as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
3. Backline betting is only permitted on base game wagers.
4. Once all wagers have been placed, the cards will be shuffled and dealt to players in the following way.
  - a. If the cards are hand shuffled then the house dealer will shuffle, offer the player-dealer the cut, and complete the deal of seven piles of seven cards face-down in front of them. When dealing the seven piles of seven cards, the house dealer shall deal one card at a time in front of the house dealer position until there are seven cards, starting from left to right. Once there are seven cards laid out, the house dealer shall deal each pile another card, from right to left, giving each pile a total of two cards. This process of dealing cards left to right, then right to left, shall be completed until each pile has seven cards. The remaining four cards shall be placed in the discard pile.

## Face Up Pai Gow Poker

- i. The player-dealer then selects one of the seven piles.
    - ii. The action button, which determines the first player to receive first action from the player-dealer, is placed on the selected pile and will be the first hand distributed once the placement of the action button has been determined.
    - iii. To determine who receives the action button, the house dealer will use a dice cup. The player-dealer shakes a dice cup, which contains three dice, and the numerical total of the three dice determines the position of the action button. When using the dice cup method, the player-dealer's position is always one, eight, and fifteen. Other seats in clockwise rotation, respectively represent the other numbers. If the random number or total dice value is one, eight, or fifteen, the player-dealer shall receive the first set of cards and the player to the left of the player-dealer shall receive the "Action" button.
    - iv. Once the first position is determined, the house dealer then distributes the seven piles of cards, starting with the action button and continuing clockwise.
    - v. The player-dealer receives their cards in turn according to the action.
    - vi. All seven piles of cards will be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed. The house dealer will then spread the remaining cards to verify there are four cards remaining and place them in the discard pile.
  - b. If a machine shuffler is used, the house dealer will use the shuffle machine to randomly intermix and deliver seven cards to each seat.
    - i. The action button, which determines the first player to receive first action from the player-dealer, is placed on the selected seat and will be the first hand distributed once the placement of the action button has been determined.
    - ii. The machine shuffler comes equipped with a random number generator, which will be used to determine which seat will receive the "Action" button. Once the machine has provided a number, between 1 and 7, the house dealer will place the "Action" button in the appropriate seat. The player-dealer's position is always one, other seats in clockwise rotation, respectively represent the other numbers. If the random number or total dice value is one the player-dealer shall receive the first set of cards and the player to the left of the player-dealer shall receive the "Action" button.
    - iii. Once action is determined, the house dealer will deliver the first seven cards to the action seat and continue clockwise around the table.
    - iv. Each seven-card hand will be distributed by the shuffle machine and placed on the table by the house dealer, one at a time, from the house dealer's left to right, until all seven hands are dealt.
    - v. All seven piles of cards will be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed. The house dealer will then spread the remaining cards to verify there are four cards remaining and place them in the discard pile.
5. The player-dealer's hand will then be exposed and set, according to the house way chart below, before the players set their hands.
  - a. If the player-dealer has a seven-card ace-high hand, all player's wagers shall automatically push.
    - i. If the player-dealer's hand does not contain a seven-card ace-high hand, each player shall then set their hand.
6. Once the player-dealer's hand is set, each player sets their hands by arranging the seven cards into a two-card hand in front, and a five-card hand in back.
  - a. The five-card hand must rank higher than the two-card hand, according to the hand rankings, as shown above.

## Face Up Pai Gow Poker

- b. The player has the option to ask the house dealer to set their hand according to the House Way chart below.
- c. Players do not have to set their hand the “House Way”, they are free to set the hand in any fashion they choose as long as it is not a foul hand. If a player arranges the two-card hand so it out-ranks the five-card hand, this will be considered a foul and the player will automatically lose their wager.
7. Once the player's hands are set, each player's hand is exposed, in turn, and compared to the player-dealer's hands to determine the winners, losers, or push hands.
8. Each player's five-card hand will be compared to the player-dealer's five-card hand, and each player's two-card hand will be compared to the player-dealer's two-card hand, in turn.
9. Wagers will be settled in a clockwise manner around the table, starting with the player with the Action button.
10. All wagers will be settled from seat to seat in the following order: base game wager, Fortune Bonus Bet, Envy Bonus, and finally the Ace-High Bonus Bet.
  - a. Backline bettors will be paid immediately after the seated player they are behind and before the next seated player.
11. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the respective players.
12. The cards are collected, shuffled, and a new round begins.

### How Winners are Determined and Paid

Once the hands have been completed, according to the guidelines above, the player's wagers are settled. Wagers will be settled in a clockwise manner around the table, starting with the player with the Action Button. All wagers will be settled from seat to seat in the following order: base game wager, Fortune Bonus Bet, Envy Bonus, and finally the Ace-High Bonus Bet. Backline bettors will be paid immediately after the seated player they are behind and before the next seated player. The following shall apply when determining whether the player wins, loses, or pushes:

1. The base game wager wins if the two-card hand and the five-card hand, held by the player, ranks higher than the player-dealer's two-card hand and five-card hand.
2. The base game wager loses if the two-card hand and the five-card hand held by the player, ranks lower than the player-dealer's two-card hand and five-card hand.
3. The base game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
  - a. The base game wager also "pushes" if the ranking of the player-dealer's shown hand is a seven-card ace-high hand. Neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
4. If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
5. The Fortune Bonus Bet wins if a player, who placed a Fortune Bonus Bet, obtains an eligible hand listed in the payable below.
6. The Envy Bonus wins if a player places a \$5 Fortune Bonus Bet and a player at the table (other than themselves and the player-dealer) obtains an eligible hand according to the payable below.
7. The Ace-High Bonus Bet wins if a player, who placed an Ace-High Bonus Bet, and/or the player-dealer obtain an eligible hand according to the payable below.
8. The player-dealer will pay all winning wagers and collect all losing wagers.

### Collection Procedures

- California games utilize a player-dealer position. The position will be offered systematically and continuously in a clockwise manner around the table after every two hands.
- All controlled game wagers, including bonus bets, are collected or paid, to the extent that the player-dealer's wager covers.
- Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the respective players.
- The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.
- Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed above, will be used at a gaming table at any one time.
- Collection rates and fees will be determined prior to the start of play of any hand or round. Rates will not be calculated as a fraction or percentage of wagers made or winnings earned.
- Flat fees on wagers may be assessed at different collection rates; however, no more than five collection rates may be established per table.
- Golden West Casino will provide ample notice to patrons regarding the collection rates and fees, as well as the procedure for collecting them.
- Collection fees will be conspicuously posted on or within view of every gaming table.

- The players of the poker games, as shown above, play against each other for the pot of money on the table. The games do not utilize a player-dealer position, they are Poker games.
- The collection fees shall be pre-determined and conspicuously posted on each table prior to any cards being dealt or a round of play commencing.
- Collection rates and fees shall be determined prior to the start of play of any hand or round.
- Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed above, shall be used at a table at any one time.
- Rates may not be calculated as a fraction or percentage of wagers made or winnings earned.
- Flat fees on wagers may be assessed at different collection rates; however, no more than five collection rates may be established per table limit.
