Dealing Procedures and Round of Play

1. The game shall utilize a flat white disk with the words “dealer button” on it to visually designate which player is in the dealer position (in theory) for that hand.
 - a. The dealer button shall rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play except for the first round, where the “big blind” shall have the right of last action.
2. The game also utilizes two separate disks, one with the words “small blind” and the other with the words “big blind” on them, to visually designate which player is in the “small blind” position and which player is in the “big blind” position.
 - a. The small blind and the big blind are used to initiate action and are positioned immediately to the left of the dealer button and posted before the house dealer deals cards.
 - b. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - c. The small blind and big blind buttons shall rotate from player to player around the table clockwise after each round of play.
3. When first opening a game, all players shall be dealt one card face-up, starting with the player to the immediate left of the house dealer and continuing clockwise around the table.
 - a. The player with the highest ranked card with traditional suit rankings (spades, hearts, diamonds and clubs) will receive the flat white disk with the words dealer button.
4. Additionally, the player to the immediate left of the player that received the small blind button shall receive the big blind button and shall be required to place the big blind.
 - a. Both blinds are pre-determined and mandatory for the players with the small blind and big blind buttons, and are used to initiate action.
 - b. Both blind wagers shall be placed in the designated wagering area, referred to as “the pot.”
5. Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard poker table which shall accommodate up to ten seated positions for patrons. Each seated position at the table shall have the same minimum and maximum wagering limits during each round of play, as specified by the table limits.

Dealing Procedures and Round of Play

1. The game shall utilize a flat white disk with the words "dealer button" on it to visually designate which player is in the dealer position (in theory) for that hand.
 - a. The dealer button shall rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play except for the first round, where the "big blind" shall have the right of last action.
2. The game also utilizes two separate disks, one with the words "small blind" and the other with the words "big blind" on them, to visually designate which player is in the "small blind" position and which player is in the "big blind" position.
 - a. The small blind and the big blind are used to initiate action and are positioned immediately to the left of the dealer button and posted before the house dealer deals cards.
 - b. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - c. The small blind and big blind buttons shall rotate from player to player around the table clockwise after each round of play.
3. When first opening a game, all players shall be dealt one card face-up, starting with the player to the immediate left of the house dealer and continuing clockwise around the table.
 - a. The player with the highest ranked card with traditional suit rankings (spades, hearts, diamonds, and clubs) shall receive the flat white disk with the words "dealer".
4. Cards will be collected and shuffled.
5. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button shall receive the small blind button and shall be required to place the small blind. Additionally, the player to the immediate left of the player who received the small blind button shall receive the big blind button and shall be required to place the big blind.
 - a. Both blinds are predetermined and mandatory for the players with the small blind and big blind buttons, and are used to initiate action.
 - b. Both blind wagers shall be placed in the designated wagering area, referred to as "the pot."
6. Once the blinds have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the player to the left of the dealer button, the player that received the small blind button, and continuing clockwise around the table until all players have two cards face-down.
 - a. These initial two cards are referred to as hole cards.

Texas Hold'em

7. Once each player has received their two hole cards, the first round of wagering will occur. Players are given the following options, starting with the player to the left of the player that received the big blind button and continuing clockwise around the table:
 - a. Place a wager that is equal to the amount of the big blind or "call" a wager, meaning to match the amount wagered by another player; or
 - b. Place their two hole cards face-down into the center of the table, referred to as a "fold." The hand shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play; or
 - c. Place a wager equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a "raise"; or
 - d. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering, unless there are only two players participating during a round of wagering, in which case there is no limit to the number of raises; or
 - e. The player in the big blind position may "check", meaning they do not wish to place an additional wager, or they may also raise, by placing an additional wager.
8. After all players have acted in turn and either called all wagers, raised or folded their hand, the house dealer shall move all player wagers into the pot.
9. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as the "burn card."
10. The house dealer shall then take the next three cards from the top of the deck and place them face-up on the table simultaneously.
 - a. This is referred to as "the flop."
 - b. These are community cards and are shared by all players.
11. Once the first three community cards have been placed face-up on the table, the second round of wagering will occur.
12. All active players that called all wagers and did not fold their hand, shall be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Do not make a wager, referred to as a "check", with the option to call or raise a wager by another player; or

 - d. Fold their hand according to the rules and guidelines used in the previous round of play; or

15. The house dealer shall then take one card from the top of the deck and place it face-up on the table so that there are now a total of four community cards face-up on the table.
 - a. This is referred to as "the turn" card.
 - b. This card shall also become a community card and is shared by all players.
16. Once the fourth community card has been placed face-up on the table, the third round of wagering will occur.
17. All active players shall be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or

How Winners are Determined and Paid

Players may use any combination of the two hole cards initially dealt to them at the beginning of the game and the five community cards turned over throughout the course of the game, or they may use the five community cards and no hole cards to make the highest ranking five-card poker hand. The following shall apply for determining which player wins the pot:

- The pot shall be awarded to the player with the highest ranking five-card poker hand, according to the hand and card rankings shown above. All other players shall lose.
- In the event that more than one player has the highest ranked hand, the pot shall be split equally among all players with the winning hand.
- In the instance that there are an odd number of chips, the odd chips shall be awarded to the player closest to the left of the dealer button.
