- Player's time is tracked by having a casino representative either scan or manually enter the card information into the compute device.
- The casino representative will also input the player's average wager and time played into the computer device.
- A printable record of the amount of time a player has accumulated during the promotional period shall be available at any time it is requested by the player.
- If the Player's Card Computer System should stop working during the promotion, information will be manually tracked and entered in the computer system once it starts working.

How Points are Earned Based on Time Played

Points shall be earned based on the amount of time played. Each player that plays at a predetermined and posted table and has their player's card scanned by a casino representative will earn points based on time played, which can be redeemed for prizes during or at the end of a predetermined and posted promotional period. The range of points per hour played will range from 1 to 200,000. During predetermined and posted times, bonus rates may be offered by the Casino (for example, double points may offered during off-peak hours).

Example: A player signs up for the Customer Incentive Program at the cashier and receives a player's card. The player presents the card to a casino representative at the gaming table. The casino representative enters the player into the tracking software and will input the type of game and average wager per hand in 15 minute increments. At the end of the gaming session, the player will be logged out by the casino representative. The tracking software tabulates the amount of points the player earned based on time played and adds it to the player's account. The player may check their point balance and redeem points with a casino representative at any time during the promotion.

How Player Rewards Points are Redeemed

Players may redeem their points for prizes at any time during the promotion or at the end of the promotional period. All prizes shall have a predetermined and designated value. Points shall be earned by the amount of time played during the promotional period. After a player has accumulated a predetermined and specific amount of points, a player may redeem the accrued points for a predetermined and designated prize. When predetermined and posted, points may also be redeemed for money in these cases 1 point will be worth \$0.01 to \$100.

- After a player has been awarded a prize, they may also be eligible for multiple and subsequent prize(s) until the end of the promotion.
- Players may redeem their points for multiple prizes so long as the total amount of points required for all prizes is within the player's point balance.
- Once points are redeemed by the player, they are deducted from their point balance.
- Points are non-transferable and may only be redeemed by the player that earned them.
- Points may be redeemed at any point during or at the end of the posted promotional period. Points that are not redeemed at the end of the promotional period will expire within 30 days.
- All reward points are subject to review and verification. The Casino reserves the right to adjust balances or void points due to any error or fraud.
- A player may check their point balance with a casino representative at any time during the promotion.

Object and Summary

The Poker Pyramid Promotion is a house funded promotion that awards players, who are participating in an eligible controlled game, and who achieve a qualifying hand, a predetermined and posted prize from the pyramid. A Poker Pyramid board is used to track eligible prizes and eligible qualifying hands. The board consists of two parts: the qualifying hands, which make up the base, and the prizes, which make up the pyramid (see below for an example of a pyramid). There are a total of 36 qualifying hands and a total of 36 prizes.

Poker Pyramid Promotion Procedures:

- The Casino will advertise the eligible game(s) and promotional period for the Poker Pyramid Promotion.
- The Casino will post the Poker Pyramid board prominently near the eligible gaming tables.
 - If more than one game is eligible, the casino will post a Poker Pyramid board for each eligible game.
 - Each eligible game will be independent of any other eligible games.
 - All tables participating in the same eligible game will share the corresponding Poker Pyramid board.

Poker Pyramid Promotion

- Staff and surveillance cameras will monitor and maintain the Poker Pyramid board's accuracy, thus ensuring patrons and employees do not tamper with the Poker Pyramid board.
- Players will participate in the eligible game(s) as a seated player.
 - Backline bettors cannot participate in this promotion.
- If the player achieves an eligible qualifying hand, listed in the base of the Poker Pyramid, a casino representative will confirm the hand.
- Once the hand has been confirmed the player will immediately receive the corresponding prize.
 - Prizes are not determined by the qualifying hand, but rather by the order in which a qualifying hand has been achieved.
- The casino representative will then remove the qualifying hand from the Poker Pyramid board and that qualifying hand will no longer be eligible to receive a prize.
 - The hand will remain ineligible to receive a prize for the remainder of the promotional period.
- The casino representative will also remove the corresponding prize and that prize will no longer be eligible to be won.
 - The prize will be ineligible to be won for the remainder of the promotional period.
- Prizes are awarded in sequence from left to right, one row at a time until the row is empty.
 - An entire row of prizes must be completed before the next row of prizes will be offered.
- After the removal of a prize, the next prize in sequence will be awarded to the next qualifying hand achieved.
 - No specific sequence is required to make the qualifying hands.
- This will continue until there is one prize left (the top of the pyramid) and, therefore, one qualifying hand left on the pyramid base.
