18 Defendants.

CASE No.: **24CV062366**

**COMPLAINT FOR CIVIL PENALTIES  
AND INJUNCTIVE RELIEF**

Health & Safety Code §25249.5, *et seq.*

19  
20  
21 **INTRODUCTION**

22 1. This Complaint is brought by plaintiff Keep America Safe and Beautiful (“Plaintiff”)  
23 in the public interest of the People of the State of California to enforce their right to be informed of  
24 the presence of chemicals listed by the State of California, pursuant to the Safe Drinking Water and  
25 Toxic Enforcement Act of 1986, codified at Health and Safety Code section 25249.6 *et seq.*  
26 (“Proposition 65”), including di(2-ethylhexyl) phthalate (DEHP).

27 2. Plaintiff seeks to remedy Defendants’ failure to warn citizens of the State of  
28

1 California, in violation of Proposition 65, about the presence of DEHP (“Listed Chemical”) in the  
2 Defendant FORTUNE VALVE USA, INC.’s (“Defendant”) Ball Valve 3/4in Brass offered for sale  
3 throughout the State of California (“Products”).

4 3. Defendant’s Products contain the Listed Chemical and consumers of Products in the  
5 State of California are exposed to the Listed Chemical through dermal exposure and ingestion of the  
6 Products.

7 4. Defendants know and intend that their Products expose consumers in the State of  
8 California to the Listed Chemical.

9 5. Attached hereto and incorporated by reference are copies of a letter (“60-Day  
10 Notices”), dated June 15, 2023, which Plaintiff sent to Defendant, to J. Racenstein Company, LLC,  
11 and to California’s Attorney General. Identical letters were sent to the requisite public enforcement  
12 agencies and to all Defendants. Attached to the 60-Day Notices were Certificates of Merit attesting  
13 to the reasonable and meritorious basis for this action, Certificates of Service attesting to service of  
14 the letters on each entity described above, and a description of Proposition 65 prepared by the  
15 California Office of Environmental Health Hazard Assessment. Furthermore, factual information  
16 sufficient to establish the basis of the Certificates of Merit was enclosed with the 60-Day Notices  
17 sent to California’s Attorney General.

18 6. After receiving the claims asserted in the 60-Day Notice, the public enforcement  
19 agencies identified in Paragraph 5 have failed to commence and diligently prosecute a cause of action  
20 against Defendants under Proposition 65.

21 **PARTIES**

22 7. Plaintiff is a non-profit corporation organized under California law dedicated to  
23 protecting the public from environmental health hazards and toxic exposures. Plaintiff is based in  
24 Westminster, California with a mailing address in Orange County, California and does business  
25 throughout the entire state of California. Plaintiff is a person within the meaning of Health and Safety  
26 Code section 25249.11 and brings this enforcement action in the public interest pursuant to Health  
27 and Safety Code section 25249.7(d). Health and Safety Code section 25249.7 (d) specifies that  
28

1 actions to enforce Proposition 65 may be brought by a person in the public interest, provided certain  
2 notice requirements and no other public prosecutor is diligently prosecuting an action for the same  
3 violation(s).

4 8. The Defendant is a “Person” in the course of doing business within the meaning of  
5 H&S Code §25249.11(a) – “Person” means an individual, trust, firm, joint stock company,  
6 corporation, company partnership, limited liability company, and association.

7 9. The Defendant is a Texas Corporation that manufactures, distributes, and/or offers for  
8 sale in the State of California and the County of Alameda, Products that contain the Listed Chemical.

9 10. DOES 1 through 10, which manufacture, distribute, and/or offer for sale in the State  
10 of California Products that contain the Listed Chemical, are each person in the course of doing  
11 business within the meaning of Health and Safety Code section 25249.11. At this time, the true  
12 names and capacities of DOES 1 through 10, inclusive, are unknown to Plaintiff, who, therefore, sues  
13 said defendants by their fictitious names pursuant to Code of Civil Procedure section 474. Plaintiff  
14 is informed and believes, and on that basis alleges, that each of the fictitiously named defendants is  
15 responsible for the acts and occurrences alleged herein. When ascertained, their true names and  
16 capacities shall be reflected in an amended complaint.

17 **JURISDICTION AND VENUE**

18 11. This Court has jurisdiction over this action pursuant to California Constitution Article  
19 VI, Section 10, which grants the Superior Court “original jurisdiction in all causes except those given  
20 by statute to other trial courts.” The statute under which this action is brought does not specify any  
21 other court with jurisdiction.

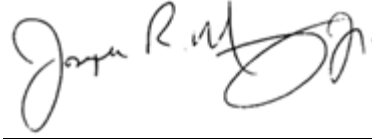

22 12. This Court has jurisdiction over Defendants based on Plaintiff’s information and good  
23 faith belief that each Defendant is a person, firm, corporation, or association that is a citizen of the  
24 State of California, has sufficient minimum contacts in the State of California, and/or otherwise  
25 purposefully avails itself of the California market. Defendants’ purposeful availment renders the  
26 exercise of personal jurisdiction by the Court consistent with traditional notions of fair play and  
27 substantial justice.

### NOTICE OF VIOLATION OF CALIFORNIA HEALTH & SAFETY CODE SECTION 25249.5 *ET SEQ.* (PROPOSITION 65)

Dear Alleged Violators and the Appropriate Public Enforcement Agencies:

I represent Keep America Safe and Beautiful, Inc. (“KASB”), 14891 Booney St, Westminster, CA 92683; Tel. (714) 277-7269. KASB’s Executive Officer is My Nguyen. KASB is a California non-profit corporation dedicated to, among other causes, helping safeguard the public from health hazards by bringing about a reduction in the use and misuse of hazardous and toxic chemicals, facilitating a safe environment for consumers and employees, and encouraging corporate responsibility.

KASB has identified violations of California’s Safe Drinking Water and Toxic Enforcement Act of 1986 (“Proposition 65”), which is codified at California Health & Safety Code §25249.5 et seq., with respect to the products identified below. These violations have occurred and continue to occur because the alleged Violators identified below failed to provide required clear and reasonable warnings with these products. This letter serves as a notice of these violations to the alleged Violators and the appropriate public enforcement agencies. Pursuant to Health and Safety Code Section 25249.7(d), KASB intends to pursue a private enforcement action in the public interest 60 days after effective service of this notice unless the public enforcement agencies have commenced and are diligently prosecuting an action to rectify these violations.

**General Information about Proposition 65.** A copy of a summary of Proposition 65, prepared by the Office of Environmental Health Hazard Assessment, is enclosed with this letter served to the alleged Violators identified below.

**Alleged Violators.** The names of the person/company covered by this notice that violated Proposition 65 (hereinafter the “Violators”) are:

1. Fortune Valve USA, Inc.
2. J. Racenstein Company, LLC

**Consumer Products and Listed Chemical.** The products that are the subject of this notice and the chemical in those products identified as exceeding allowable levels are:

**Ball Valve 3/4in Brass, UPC#669893916289**

On January 1, 1988, the State of California listed Di(2-ethylhexyl) Phthalate (DEHP) to cause cancer, and, on October 24, 2003, the State of California officially listed Di(2-ethylhexyl) Phthalate (DEHP) as a chemical known to cause developmental toxicity, and male and female reproductive toxicity.

It should be noted that KASB may continue to investigate other products that may reveal further violations and result in subsequent notices of violations.

**Route of Exposure.** The consumer exposures that are the subject of this notice result from the recommended use of these products. Consequently, the route of exposure to this chemical has been and continues to be through skin absorption and direct and indirect oral exposure from typical hand-to-mouth activity.

**Approximate Time Period of Violations.** Ongoing violations have occurred every day since at least **November 3, 2022**, as well as every day since the products were introduced into the California marketplace and will continue every day until clear and reasonable warnings are provided to product purchasers and users or until this known toxic chemical is either removed from or reduced to allowable levels in the products. Proposition 65 requires that a clear and reasonable warning be provided prior to exposure to the identified chemical. The method of warning should be a warning that appears on the product label. The Violators violated Proposition 65 because they failed to provide persons ingesting these products with appropriate warnings that they are being exposed to this chemical.

Consistent with the public interest goals of Proposition 65 and a desire to have these ongoing violations of California law quickly rectified, KASB is interested in seeking a constructive resolution of this matter that includes an enforceable written agreement by the Violators to: (1) reformulate the identified products so as to eliminate further exposures to the identified chemical, or provide appropriate warnings on the labels of these products; (2) pay an appropriate civil penalty; and (3) provide clear and reasonable warnings compliant with Proposition 65 to all persons located in California who purchased the above products in the last three years. Such a resolution will prevent further unwarned consumer exposures to the identified chemical, as well as an expensive and time-consuming litigation.

### **CERTIFICATE OF MERIT**

**Re: Keep America Safe and Beautiful, Inc.'s Notice of Proposition 65 Violations by Fortune Valve USA, Inc., and J. Racenstein Company, LLC**

I, Joseph R. Manning, Jr., declare:

1. This Certificate of Merit accompanies the attached 60-day notice in which it is alleged that the parties identified in the notice violated California Health & Safety Code Section 25249.6 by failing to provide clear and reasonable warnings.
2. I am an attorney for the noticing party.
3. I have consulted with one or more persons with relevant and appropriate experience or expertise who have reviewed facts, studies, or other data regarding the exposure to the listed chemical that is the subject of the notice.
4. Based on the information obtained through those consultations, and on other information in my possession, I believe there is a reasonable and meritorious case for the private action. I understand that "reasonable and meritorious case for the private action" means that the information provides a credible basis that all elements of the plaintiff's case can be established, and that the information did not prove that the alleged Violators will be able to establish any of the affirmative defenses set forth in the statute.
5. Along with the copy of this Certificate of Merit served on the Attorney General is attached additional factual information sufficient to establish the basis for this certificate, including the information identified in California Health & Safety Code §25249.7(h)(2), i.e., (1) the identity of the persons consulted with and relied on by the certifier, and (2) the facts, studies, or other data reviewed by those persons.

## APPENDIX A

### OFFICE OF ENVIRONMENTAL HEALTH HAZARD ASSESSMENT CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

#### THE SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT OF 1986 (PROPOSITION 65): A SUMMARY

The following summary has been prepared by the California Office of Environmental Health Hazard Assessment (OEHHA), the lead agency for the implementation of the Safe Drinking Water and Toxic Enforcement Act of 1986 (commonly known as "Proposition 65"). A copy of this summary must be included as an attachment to any notice of violation served upon an alleged violator of the Act. The summary provides basic information about the provisions of the law, and is intended to serve only as a convenient source of general information. It is not intended to provide authoritative guidance on the meaning or application of the law. The reader is directed to the statute and OEHHA implementing regulations (see citations below) for further information.

FOR INFORMATION CONCERNING THE BASIS FOR THE ALLEGATIONS IN THE NOTICE RELATED TO YOUR BUSINESS, CONTACT THE PERSON IDENTIFIED ON THE NOTICE.

The text of Proposition 65 (Health and Safety Code Sections 25249.5 through 25249.13) is available online at: <http://oehha.ca.gov/prop65/law/P65law72003.html>. Regulations that provide more specific guidance on compliance, and that specify procedures to be followed by the State in carrying out certain aspects of the law, are found in Title 27 of the California Code of Regulations, sections 25102 through 27001.<sup>1</sup> These implementing regulations are available online at: <http://oehha.ca.gov/prop65/law/P65Regs.html>.

#### *WHAT DOES PROPOSITION 65 REQUIRE?*

**The "Proposition 65 List."** Under Proposition 65, the lead agency (OEHHA) publishes a list of chemicals that are known to the State of California to cause cancer and/or reproductive toxicity. Chemicals are placed on the Proposition 65 list if they are known to cause cancer and/or birth defects or other reproductive harm, such as damage to

---

<sup>1</sup> All further regulatory references are to sections of Title 27 of the California Code of Regulations unless otherwise indicated. The statute, regulations and relevant case law are available on the OEHHA website at: <http://www.oehha.ca.gov/prop65/law/index.html>.

female or male reproductive systems or to the developing fetus. This list must be updated at least once a year. The current Proposition 65 list of chemicals is available on the OEHHA website at: [http://www.oehha.ca.gov/prop65/prop65\\_list/Newlist.html](http://www.oehha.ca.gov/prop65/prop65_list/Newlist.html).

Only those chemicals that are on the list are regulated under Proposition 65. Businesses that produce, use, release or otherwise engage in activities involving listed chemicals must comply with the following:

***Clear and reasonable warnings.*** A business is required to warn a person before “knowingly and intentionally” exposing that person to a listed chemical unless an exemption applies. The warning given must be “clear and reasonable.” This means that the warning must: (1) clearly make known that the chemical involved is known to cause cancer, or birth defects or other reproductive harm; and (2) be given in such a way that it will effectively reach the person before he or she is exposed to that chemical. Some exposures are exempt from the warning requirement under certain circumstances discussed below.

***Prohibition from discharges into drinking water.*** A business must not knowingly discharge or release a listed chemical into water or onto land where it passes or probably will pass into a source of drinking water. Some discharges are exempt from this requirement under certain circumstances discussed below.

#### *DOES PROPOSITION 65 PROVIDE ANY EXEMPTIONS?*

Yes. You should consult the current version of the statute and regulations (<http://www.oehha.ca.gov/prop65/law/index.html>) to determine all applicable exemptions, the most common of which are the following:

***Grace Period.*** Proposition 65 warning requirements do not apply until 12 months after the chemical has been listed. The Proposition 65 discharge prohibition does not apply to a discharge or release of a chemical that takes place less than 20 months after the listing of the chemical.

***Governmental agencies and public water utilities.*** All agencies of the federal, state or local government, as well as entities operating public water systems, are exempt.

***Businesses with nine or fewer employees.*** Neither the warning requirement nor the discharge prohibition applies to a business that employs a total of nine or fewer employees. This includes all employees, not just those present in California.

**Exposures that pose no significant risk of cancer.** For chemicals that are listed under Proposition 65 as known to the State to cause cancer, a warning is not required if the business causing the exposure can demonstrate that the exposure occurs at a level that poses “no significant risk.” This means that the exposure is calculated to result in not more than one excess case of cancer in 100,000 individuals exposed over a 70-year lifetime. The Proposition 65 regulations identify specific “No Significant Risk Levels” (NSRLs) for many listed carcinogens. Exposures below these levels are exempt from the warning requirement. See OEHHA's website at: <http://www.oehha.ca.gov/prop65/getNSRLs.html> for a list of NSRLs, and Section 25701 *et seq.* of the regulations for information concerning how these levels are calculated.

**Exposures that will produce no observable reproductive effect at 1,000 times the level in question.** For chemicals known to the State to cause reproductive toxicity, a warning is not required if the business causing the exposure can demonstrate that the exposure will produce no observable effect, even at 1,000 times the level in question. In other words, the level of exposure must be below the “no observable effect level” divided by 1,000. This number is known as the Maximum Allowable Dose Level (MADL). See OEHHA's website at: <http://www.oehha.ca.gov/prop65/getNSRLs.html> for a list of MADLs, and Section 25801 *et seq.* of the regulations for information concerning how these levels are calculated.

**Exposures to Naturally Occurring Chemicals in Food.** Certain exposures to chemicals that naturally occur in foods (i.e., that do not result from any known human activity, including activity by someone other than the person causing the exposure) are exempt from the warning requirements of the law. If the chemical is a contaminant<sup>2</sup> it must be reduced to the lowest level feasible. Regulations explaining this exemption can be found in Section 25501.

**Discharges that do not result in a “significant amount” of the listed chemical entering any source of drinking water.** The prohibition from discharges into drinking water does not apply if the discharger is able to demonstrate that a “significant amount” of the listed chemical has not, does not, or will not pass into or probably pass into a source of drinking water, and that the discharge complies with all other applicable laws, regulations, permits, requirements, or orders. A “significant amount” means any detectable amount, except an amount that would meet the “no significant risk” level for chemicals that cause cancer or that is 1,000 times below the “no observable effect” level for chemicals that cause reproductive toxicity, if an individual were exposed to that amount in drinking water.

---

<sup>2</sup> See Section 25501(a)(4).

## *HOW IS PROPOSITION 65 ENFORCED?*

Enforcement is carried out through civil lawsuits. These lawsuits may be brought by the Attorney General, any district attorney, or certain city attorneys. Lawsuits may also be brought by private parties acting in the public interest, but only after providing notice of the alleged violation to the Attorney General, the appropriate district attorney and city attorney, and the business accused of the violation. The notice must provide adequate information to allow the recipient to assess the nature of the alleged violation. The notice must comply with the information and procedural requirements specified in Section 25903 of Title 27 and sections 3100-3103 of Title 11. A private party may not pursue an independent enforcement action under Proposition 65 if one of the governmental officials noted above initiates an enforcement action within sixty days of the notice.

A business found to be in violation of Proposition 65 is subject to civil penalties of up to \$2,500 per day for each violation. In addition, the business may be ordered by a court to stop committing the violation.

A private party may not file an enforcement action based on certain exposures if the alleged violator meets specific conditions. For the following types of exposures, the Act provides an opportunity for the business to correct the alleged violation:

- An exposure to alcoholic beverages that are consumed on the alleged violator's premises to the extent onsite consumption is permitted by law;
- An exposure to a Proposition 65 listed chemical in a food or beverage prepared and sold on the alleged violator's premises that is primarily intended for immediate consumption on- or off-premises. This only applies if the chemical was not intentionally added to the food, and was formed by cooking or similar preparation of food or beverage components necessary to render the food or beverage palatable or to avoid microbiological contamination;
- An exposure to environmental tobacco smoke caused by entry of persons (other than employees) on premises owned or operated by the alleged violator where smoking is permitted at any location on the premises;
- An exposure to listed chemicals in engine exhaust, to the extent the exposure occurs inside a facility owned or operated by the alleged violator and primarily intended for parking non-commercial vehicles.

If a private party alleges that a violation occurred based on one of the exposures described above, the private party must first provide the alleged violator a notice of special compliance procedure and proof of compliance form.

A copy of the notice of special compliance procedure and proof of compliance form is included in Appendix B and can be downloaded from OEHHA's website at:  
<http://oehha.ca.gov/prop65/law/p65law72003.html>.

## APPENDIX A

### OFFICE OF ENVIRONMENTAL HEALTH HAZARD ASSESSMENT CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

#### THE SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT OF 1986 (PROPOSITION 65): A SUMMARY

The following summary has been prepared by the California Office of Environmental Health Hazard Assessment (OEHHA), the lead agency for the implementation of the Safe Drinking Water and Toxic Enforcement Act of 1986 (commonly known as "Proposition 65"). A copy of this summary must be included as an attachment to any notice of violation served upon an alleged violator of the Act. The summary provides basic information about the provisions of the law, and is intended to serve only as a convenient source of general information. It is not intended to provide authoritative guidance on the meaning or application of the law. The reader is directed to the statute and OEHHA implementing regulations (see citations below) for further information.

FOR INFORMATION CONCERNING THE BASIS FOR THE ALLEGATIONS IN THE NOTICE RELATED TO YOUR BUSINESS, CONTACT THE PERSON IDENTIFIED ON THE NOTICE.

The text of Proposition 65 (Health and Safety Code Sections 25249.5 through 25249.13) is available online at: <http://oehha.ca.gov/prop65/law/P65law72003.html>. Regulations that provide more specific guidance on compliance, and that specify procedures to be followed by the State in carrying out certain aspects of the law, are found in Title 27 of the California Code of Regulations, sections 25102 through 27001.<sup>1</sup> These implementing regulations are available online at: <http://oehha.ca.gov/prop65/law/P65Regs.html>.

#### *WHAT DOES PROPOSITION 65 REQUIRE?*

***The "Proposition 65 List."*** Under Proposition 65, the lead agency (OEHHA) publishes a list of chemicals that are known to the State of California to cause cancer and/or reproductive toxicity. Chemicals are placed on the Proposition 65 list if they are known to cause cancer and/or birth defects or other reproductive harm, such as damage to

---

<sup>1</sup> All further regulatory references are to sections of Title 27 of the California Code of Regulations unless otherwise indicated. The statute, regulations and relevant case law are available on the OEHHA website at: <http://www.oehha.ca.gov/prop65/law/index.html>.

female or male reproductive systems or to the developing fetus. This list must be updated at least once a year. The current Proposition 65 list of chemicals is available on the OEHHA website at: [http://www.oehha.ca.gov/prop65/prop65\\_list/Newlist.html](http://www.oehha.ca.gov/prop65/prop65_list/Newlist.html).

Only those chemicals that are on the list are regulated under Proposition 65. Businesses that produce, use, release or otherwise engage in activities involving listed chemicals must comply with the following:

***Clear and reasonable warnings.*** A business is required to warn a person before “knowingly and intentionally” exposing that person to a listed chemical unless an exemption applies. The warning given must be “clear and reasonable.” This means that the warning must: (1) clearly make known that the chemical involved is known to cause cancer, or birth defects or other reproductive harm; and (2) be given in such a way that it will effectively reach the person before he or she is exposed to that chemical. Some exposures are exempt from the warning requirement under certain circumstances discussed below.

***Prohibition from discharges into drinking water.*** A business must not knowingly discharge or release a listed chemical into water or onto land where it passes or probably will pass into a source of drinking water. Some discharges are exempt from this requirement under certain circumstances discussed below.

#### *DOES PROPOSITION 65 PROVIDE ANY EXEMPTIONS?*

Yes. You should consult the current version of the statute and regulations (<http://www.oehha.ca.gov/prop65/law/index.html>) to determine all applicable exemptions, the most common of which are the following:

***Grace Period.*** Proposition 65 warning requirements do not apply until 12 months after the chemical has been listed. The Proposition 65 discharge prohibition does not apply to a discharge or release of a chemical that takes place less than 20 months after the listing of the chemical.

***Governmental agencies and public water utilities.*** All agencies of the federal, state or local government, as well as entities operating public water systems, are exempt.

***Businesses with nine or fewer employees.*** Neither the warning requirement nor the discharge prohibition applies to a business that employs a total of nine or fewer employees. This includes all employees, not just those present in California.

**Exposures that pose no significant risk of cancer.** For chemicals that are listed under Proposition 65 as known to the State to cause cancer, a warning is not required if the business causing the exposure can demonstrate that the exposure occurs at a level that poses “no significant risk.” This means that the exposure is calculated to result in not more than one excess case of cancer in 100,000 individuals exposed over a 70-year lifetime. The Proposition 65 regulations identify specific “No Significant Risk Levels” (NSRLs) for many listed carcinogens. Exposures below these levels are exempt from the warning requirement. See OEHHA's website at: <http://www.oehha.ca.gov/prop65/getNSRLs.html> for a list of NSRLs, and Section 25701 *et seq.* of the regulations for information concerning how these levels are calculated.

**Exposures that will produce no observable reproductive effect at 1,000 times the level in question.** For chemicals known to the State to cause reproductive toxicity, a warning is not required if the business causing the exposure can demonstrate that the exposure will produce no observable effect, even at 1,000 times the level in question. In other words, the level of exposure must be below the “no observable effect level” divided by 1,000. This number is known as the Maximum Allowable Dose Level (MADL). See OEHHA's website at: <http://www.oehha.ca.gov/prop65/getNSRLs.html> for a list of MADLs, and Section 25801 *et seq.* of the regulations for information concerning how these levels are calculated.

**Exposures to Naturally Occurring Chemicals in Food.** Certain exposures to chemicals that naturally occur in foods (i.e., that do not result from any known human activity, including activity by someone other than the person causing the exposure) are exempt from the warning requirements of the law. If the chemical is a contaminant<sup>2</sup> it must be reduced to the lowest level feasible. Regulations explaining this exemption can be found in Section 25501.

**Discharges that do not result in a “significant amount” of the listed chemical entering any source of drinking water.** The prohibition from discharges into drinking water does not apply if the discharger is able to demonstrate that a “significant amount” of the listed chemical has not, does not, or will not pass into or probably pass into a source of drinking water, and that the discharge complies with all other applicable laws, regulations, permits, requirements, or orders. A “significant amount” means any detectable amount, except an amount that would meet the “no significant risk” level for chemicals that cause cancer or that is 1,000 times below the “no observable effect” level for chemicals that cause reproductive toxicity, if an individual were exposed to that amount in drinking water.

---

<sup>2</sup> See Section 25501(a)(4).

## *HOW IS PROPOSITION 65 ENFORCED?*

Enforcement is carried out through civil lawsuits. These lawsuits may be brought by the Attorney General, any district attorney, or certain city attorneys. Lawsuits may also be brought by private parties acting in the public interest, but only after providing notice of the alleged violation to the Attorney General, the appropriate district attorney and city attorney, and the business accused of the violation. The notice must provide adequate information to allow the recipient to assess the nature of the alleged violation. The notice must comply with the information and procedural requirements specified in Section 25903 of Title 27 and sections 3100-3103 of Title 11. A private party may not pursue an independent enforcement action under Proposition 65 if one of the governmental officials noted above initiates an enforcement action within sixty days of the notice.

A business found to be in violation of Proposition 65 is subject to civil penalties of up to \$2,500 per day for each violation. In addition, the business may be ordered by a court to stop committing the violation.

A private party may not file an enforcement action based on certain exposures if the alleged violator meets specific conditions. For the following types of exposures, the Act provides an opportunity for the business to correct the alleged violation:

- An exposure to alcoholic beverages that are consumed on the alleged violator's premises to the extent onsite consumption is permitted by law;
- An exposure to a Proposition 65 listed chemical in a food or beverage prepared and sold on the alleged violator's premises that is primarily intended for immediate consumption on- or off-premises. This only applies if the chemical was not intentionally added to the food, and was formed by cooking or similar preparation of food or beverage components necessary to render the food or beverage palatable or to avoid microbiological contamination;
- An exposure to environmental tobacco smoke caused by entry of persons (other than employees) on premises owned or operated by the alleged violator where smoking is permitted at any location on the premises;
- An exposure to listed chemicals in engine exhaust, to the extent the exposure occurs inside a facility owned or operated by the alleged violator and primarily intended for parking non-commercial vehicles.

If a private party alleges that a violation occurred based on one of the exposures described above, the private party must first provide the alleged violator a notice of special compliance procedure and proof of compliance form.

A copy of the notice of special compliance procedure and proof of compliance form is included in Appendix B and can be downloaded from OEHHA's website at:  
<http://oehha.ca.gov/prop65/law/p65law72003.html>.
