Re: Asphalt Hot Mix CAS # 8052424

**NOTICE OF ENVIRONMENTAL VIOLATIONS (PROPOSITION 65)**

Dear Sir or Madam:

**NOTICE IS HEREBY GIVEN** that we, the Noticing Party/Complainant, **Environmental World Watch** (hereinafter "EWW"), believe that the Noticed Party and **Alleged Violator: A** delineated in Exhibit "A" attached hereto (Hereinafter "**Alleged Violator**") is in violation of the Safe Drinking Water and Toxic Enforcement Act of 1986 (hereinafter "The Act"); and more specifically Health and Safety Code § 25249.5 et seq. (hereinafter "H&S") and Business and Professions Code § 17200, et seq. (Unfair Competition Law). The Alleged Violator, we believe, is also in violation of the requirements to warn as expressed at 22 C.C.R. 12601(c) and (d). It is our further belief that absent an action by any governmental agency as defined at H&S Code § 25249.7(c), that EWW may proceed in a court of competent jurisdiction with an action on behalf of the People of the State of California to remedy all the violations delineated herein. EWW further asserts the authority to proceed on behalf all exposed persons and children in the state of California, which have been exposed to chemicals known to the state to cause cancer or other reproductive toxicity by the Alleged Violator during the normal course of business. This notice does not apply to any company listed herein that did not have 10 employees during the last 4 years. If you have previously received this notice, please consider this a superceding amendment thereto.

**I. BACKGROUND AND ALLEGATIONS**

EWW possess the Alleged Violator advertisements or name and address listing in the trade publication "Blue Books" under paving contractors or paving companies and supplies. Further EWW has in it's possession other evidence from the EPA's testing in July of 1998 which reveals the true hazardous ingredients of Asphalt and more specifically Asphalt Hot Mix used in paving operations which unequivocally demonstrate that the Alleged Violator has in the past, and is currently, exposing employees in its normal course of business and others in the environment to carcinogens and reproductive toxins listed under the Act at title 22 CCR 12000 more specifically from Jan. 1998 until Jan 2002 as EWW believes and so alleges that Alleged Violator has failed to supply the required warnings before exposing people. Further, we believe and allege that Alleged Violator has emitted Extremely Hazardous Waste as defined at CCR Title 22 Section 66261.110 in violation of H&S

TO THE PARTIES ON THE  
ATTACHED DISTRIBUTION LIST  
Re: Asphalt Hot Mix CAS # 8052424  
February 8, 2002  
Page 2

Code § 25155. This same activity, releasing listed carcinogens and reproductive/developmental toxicants, without warning individuals in advance, we believe, is also a public Nuisance in violation of H&S code 41700.

The listed carcinogens and reproductive toxins subject to the warning requirements of H&S Code § 25249.6 and more specifically 22 C.C.R. 12601(c) and (d) are delineated hereinafter:

- |                                |                                |
|--------------------------------|--------------------------------|
| 1. Benzo[a]anthracene          | 15. Acetaldehyde               |
| 2. Chrysene                    | 16. Beryllium                  |
| 3. Nickel and Nickel Compounds | 17. Mercury                    |
| 4. Carbon Disulfide            | 18. Arsenic                    |
| 5. Methylene Chloride          | 19. Cadmium                    |
| 6. Benzene                     | 20. Methylene Chloride         |
| 7. Toluene                     | 21. Chromium VI                |
| 8. Lead                        | 22. Tetrachloroethylene (Perc) |
| 9. Cobalt                      | 23. Trichloroethylene (TCE)    |
| 10. Benzo[b]fluoranthene       | 24. Formaldehyde               |
| 11. Benzo[k]fluoranthene       | 25. 5-Methylchrysene           |
| 12. Benzo[a]pyrene             |                                |
| 13. Dibenzo[a,h]anthracene     |                                |
| 14. Indeno[1,2,3-cd]pyrene     |                                |

The source of the exposures to the chemicals above is hot mix Asphalt that is used by the Alleged Violator during paving operations and other construction activities, including but not specifically limited to dewatering, pipelines, berms, impervious barriers, gutters and dams.

The aforementioned carcinogens, reproductive/developmental toxins are on the Governor's list (Prop 65 List) as expressed at Title 22 C.C.R. 12000. These chemicals are known to the State of California to cause cancer and reproductive harm to humans requiring special warning and care in handling and use.

This notice alleges environmental exposures in violation of the warning requirements of the Act as defined at Title 22 CCR 12601 (d). These exposures without a clear and reasonable warning occur principally off the property owned by the Alleged Violator at jobsites that employee workers in the performance of the construction activities as outlined above. These environmental exposures to the listed chemicals herein occur to those persons in the adjacent community to those jobsites and include but are not specifically limited to passerby's, motorists, delivery people, children, pregnant women and inspectors/engineers not in the direct employ of the Alleged Violator. Any other person in the normal course of their daily activities inside residences or business that brought them within one city block of that jobsite could also be exposed. Breathing the ambient air in the described area adjacent to the hot mix Asphalt use would cause an exposure to the esophagus, throat, and lungs.

TO THE PARTIES ON THE  
ATTACHED DISTRIBUTION LIST  
Re: Asphalt Hot Mix CAS # 8052424  
February 8, 2002  
Page 3

This notice further alleges a violation of the warning requirements of the Act under occupational exposures as defined at Title 22 CCR 12601 (c). These types of exposures are overseen by the Cal OSH state plan and the state plan incorporated the provisions of the Act, as approved by the federal OSHA adoption in June 1997. These occupational exposures are to three categories of workers; laborers, operators and teamsters performing such duties as raking Asphalt, rolling Asphalt, placing Asphalt by machine and by hand, and delivering Asphalt in trucks. Other incidental employees exposed during the operations include but are not specifically limited to Foreman, secretaries, draftsmen, grade checkers, truck counters, water truck operators, and flagmen.

The Alleged Violators jobsites during the time frame of these exposures are many and varied while occurring within the 37 counties of the state of California as evidenced by the District Attorneys address's in the enclosed distribution list. EWW believes and so alleges that at least one of the jurisdictions identified had permanent work performed within that county by the Alleged Violator and that work caused the utilization of hot mix Asphalt. Further that usage caused exposures in that jurisdiction to the constituents of Asphalt as identified herein, and those exposures by the Alleged Violator were allowed to take place without the prerequisite warnings as delineated by the applicable statutes specified in this notice.

There is a further danger of exposure to employees of other subcontractors present during construction activities within the onsite confines and encompass the same category of workers delineated above. There is also danger to all the other trades as workers from numerous diverse specialty areas of construction could be onsite and subsequently be similarly exposed.

The route of exposure for both occupational and environmental to the above listed chemicals is through inhalation. There is a dermal exposure danger as workers hands come in contact with hot mix Asphalt through raking and aligning before compaction through the rolling process. There is a further dermal danger around the eyes as workers remove their gloves and inadvertently touch their faces.

EWW believes and further alleges that the Alleged Violator never provided a "clear and reasonable" or "conspicuous" warnings as required by law from Jan 1998 to Jan 2002 to those identified employees and others equally set forth in the environment while utilizing hot mix Asphalt at the places and locations so delineated herein.

Page 4

Proposition 65 was passed in 1986 and some of the chemicals addressed in this Notice were added to the Prop. 65 list on July 1, 1987 and were subject to the warning requirements 12 months after their listing. Other chemicals set forth in this notice were added to the list at later dates and were subject to the warning requirements 12 months after their listing. Benzene, Lead and Carbon Disulfide, as reproductive toxicants, required special concerns and warnings for any potential exposure to pregnant women.

A copy of "The Safe drinking Water and Toxic Enforcement Act", "A summary" is enclosed as furtherance of the requirements of the statute.

## APPENDIX A

### OFFICE OF ENVIRONMENTAL HEALTH HAZARD ASSESSMENT CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY THE SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT OF 1986 (PROPOSITION 65): A SUMMARY

The following summary has been prepared by the Office of Environmental Health Hazard Assessment, the lead agency for the implementation of the Safe Drinking Water and Toxic Enforcement Act of 1986 (commonly known as "Proposition 65"). A copy of this summary must be included as an attachment to any notice of violation served upon an alleged violator of the Act. The summary provides basic information about the provisions of the law, and is intended to serve only as a convenient source of general information. It is not intended to provide authoritative guidance on the meaning or application of the law. The reader is directed to the statute and its implementing regulations (see citations below) for further information.

Proposition 65 appears in California law as Health and Safety Code Sections 25249.5 through 25249.13. Regulations that provide more specific guidance on compliance, and that specify procedures to be followed by the State in carrying out certain aspects of the law, are found in Title 22 of the California Code of Regulations, Sections 12000 through 14000.

#### *WHAT DOES PROPOSITION 65 REQUIRE?*

***The "Governor's List."*** Proposition 65 requires the Governor to publish a list of chemicals that are known to the State of California to cause cancer, or birth defects or other reproductive harm. This list must be updated at least once a year. Over 550 chemicals have been listed as of May 1, 1996. Only those chemicals that are on the list are regulated under this law. Businesses that produce, use, release or otherwise engage in activities involving those chemicals must comply with the following:

***Clear and reasonable warnings.*** A business is required to warn a person before "knowingly and intentionally" exposing that person to a listed chemical. The warning given must be "clear and reasonable." This means that the warning must: (1) clearly make known that the chemical involved is known to cause cancer, or birth defects or other reproductive harm; and (2) be given in such a way that it will effectively reach the person before he or she is exposed. Exposures are exempt from the warning requirement if they occur less than twelve months after the date of listing of the chemical.

**Prohibition from discharges into drinking water.** A business must not knowingly discharge or release a listed chemical into water or onto land where it passes or probably will pass into a source of drinking water. Discharges are exempt from this requirement if they occur less than twenty months after the date of listing of the chemical.

**DOES PROPOSITION 65 PROVIDE ANY EXEMPTIONS?**

Yes. The law exempts:

**Governmental agencies and public water utilities.** All agencies of the federal, State or local government, as well as entities operating public water systems, are exempt.

**Businesses with nine or fewer employees.** Neither the warning requirement nor the discharge prohibition applies to a business that employs a total of nine or fewer employees.

**Exposures that pose no significant risk of cancer.** For chemicals that are listed as known to the State to cause cancer ("carcinogens"), a warning is not required if the business can demonstrate that the exposure occurs at a level that poses "no significant risk." This means that the exposure is calculated to result in not more than one excess case of cancer in 100,000 individuals exposed over a 70-year lifetime. The Proposition 65 regulations identify specific "no significant risk" levels for more than 250 listed carcinogens.

**Exposures that will produce no observable reproductive effect at 1,000 times the level in question.** For chemicals known to the State to cause birth defects or other reproductive harm ("reproductive toxicants"), a warning is not required if the business can demonstrate that the exposure will produce no observable effect, even at 1,000 times the level in question. In other words, the level of exposure must be below the "no observable effect level (NOEL)," divided by a 1,000-fold safety or uncertainty factor. The "no observable effect level" is the highest dose level which has not been associated with an observable adverse reproductive or developmental effect.

**Discharges that do not result in a "significant amount" of the listed chemical entering into any source of drinking water.** The prohibition from discharges into drinking water does not apply if the discharger is able to demonstrate that a "significant amount" of the listed chemical has not, does not, or will not enter any drinking water source, and that the

discharge complies with all other applicable laws, regulations, permits, requirements, or orders. A "significant amount" means any detectable amount, except an amount that would meet the "no significant risk" or "no observable effect" test if an individual were exposed to such an amount in drinking water.

#### *HOW IS PROPOSITION 65 ENFORCED?*

Enforcement is carried out through civil lawsuits. These lawsuits may be brought by the Attorney General, any district attorney, or certain city attorneys (those in cities with a population exceeding 750,000). Lawsuits may also be brought by private parties acting in the public interest, but only after providing notice of the alleged violation to the Attorney General, the appropriate district attorney and city attorney, and the business accused of the violation. The notice must provide adequate information to allow the recipient to assess the nature of the alleged violation. A notice must comply with the information and procedural requirements specified in regulations (Title 22, California Code of Regulations, Section 12903). A private party may not pursue an enforcement action directly under Proposition 65 if one of the governmental officials noted above initiates an action within sixty days of the notice.

A business found to be in violation of Proposition 65 is subject to civil penalties of up to \$2,500 per day for each violation. In addition, the business may be ordered by a court of law to stop committing the violation.

#### **For Further Information**
