- ◆ There are numerous sources of the exposures addressed in this Notice. On information and belief, these exposures occur in homes, the workplace and everywhere else in California where these Products are consumed. These exposures occur principally off the respective properties of the Noticed Companies.
- ◆ In the course of doing business, the Companies knowingly and intentionally have exposed, and continue to expose, individuals (especially children and pregnant and post-partum women) to the Listed Chemicals in these Products. No clear and reasonable warning is or has been provided by the Companies to individuals regarding this exposure to the Listed Chemicals in their Products, or regarding the fact that the Listed Chemicals are known to the State of California to be a carcinogen and/or a reproductive toxin.
- ◆ These exposures are ongoing and continuing, with some continuing from 1988. NRDC believes and so alleges that each Company has tolled any applicable statute of limitations by failing at any time in the past to disclose the presence of the Listed Chemicals in their Products to those persons that required a warning when they purchased the Products in the stores where the Companies' Products are sold for consumer use in California. The labels on these Products do not include any warning that would meet the definition set forth at 22 CCR § 12601(b)(1)(A) or comply with 22 CCR § 12601(b)(3) and (b)(4)(B).
- ◆ The chemicals contained in the ingredients of the Products, and subject to the warning requirements of H&S Code §25249.6 and more specifically 22 CCR § 12601(b) *et seq.*, are listed below:
 1. Lead (listed as a reproductive toxin)
 2. Lead and lead compounds (listed as a carcinogen)

NOTICE OF VIOLATION OF THE SAFE DRINKING WATER AND
TOXIC ENFORCEMENT ACT OF 1986

(California Health and Safety Code §25249.5 et seq.)

May 7, 2004

Page 7

- ◆ The aforementioned carcinogen and reproductive toxins are on the Governor's list ("Prop 65 List") as set forth at 22 CCR § 12000. These chemicals are known to the State of California to cause carcinogenic and/or reproductive toxicity harm to humans requiring special warning labels and care in handling and use. The concentrations of these toxins in the Products require a warning of the existence of this chemical danger by the Product's manufacturer, distributor and retailer.
- ◆ The principal route of exposure is through a "consumer products exposure" via dermal contact and/or ingestion. These exposures have gone on since February 27, 1988, and are ongoing and continuing at every place in California that the Products listed in TABLE A are offered for sale and use. All references to "exposure" in this notice shall be understood to be exposures to the Products, including but not limited to the specific Product brands in said TABLE and the ingredients of those Products. The sale of these Products constitutes a transfer of a known reproductive and/or carcinogenic chemical to the purchaser as well as the ultimate consuming individual from the normal use of the Products, causing the exposure to occur without a clear and reasonable warning regarding the Listed Chemicals.
- ◆ The location of these alleged exposures are many and varied, and on information and belief occur within the 58 counties of the state of California, as evidenced by the District Attorneys addressed in the enclosed distribution list. NRDC believes and so alleges that at least one of each Companies' Products were sold within each county by the Companies' wholesale or retail distributor, and that sale caused the utilization of the Products and consumption and subsequent exposure. This purchase and consumption caused exposures in that jurisdiction to the Listed Chemicals in the Products as identified herein, and those exposures by the Companies were allowed to take place without the prerequisite warnings as delineated by the applicable statutes specified in this notice.
