

April 13, 2009

**60-DAY NOTICE OF VIOLATION IN COMPLIANCE WITH CALIFORNIA HEALTH  
& SAFETY CODE §25249.7(d)**

**TO: DISTRIBUTION LIST ATTACHED**

**FROM: MICHAEL HALL**

This Notice is sent pursuant to Cal. Health & Safety Code § 25249.6 ("Proposition 65").

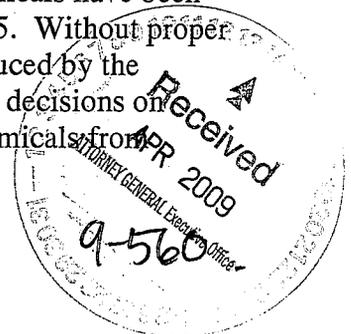

**I. INTRODUCTION**

My name is Michael Hall. I am a citizen of the State of California acting in the interest of the general public I seek to promote awareness of exposures to toxic chemicals in products sold in California and, if possible, to improve human health by reducing hazardous substances contained in such items. This Notice is provided to the parties listed above pursuant to Proposition 65. As noted above, notice is being provided to the violators on the newly supplemented Exhibit A (the "Violators"). The violations covered by this Notice consist of the product exposure, routes of exposures, and types of harm potentially resulting from exposure to the following toxic chemicals ("listed chemicals"):

Product Exposure: See Section VI. Exhibit A  
Listed Chemicals: Lead and Lead Compounds  
Routes of Exposure: Dermal and Ingestion  
Types of Harm: Birth Defects and Other Reproductive Harm and Cancer

**II. NATURE OF ALLEGED VIOLATION (PRODUCT EXPOSURE)**

The specific type or types of products (hereafter the "products") that are causing consumer and occupational exposures in violation of Proposition 65 (and that are covered by this Notice) are listed on Exhibit A in section V below. The Violators' sales of these musical guitar strings products have been occurring from at least from January 1, 2005 to the present. As a result of the sales of these guitar strings products, exposures to the listed chemicals have been occurring without clear and reasonable warnings as required by Proposition 65. Without proper warnings regarding the toxic effects of exposures to the listed chemicals produced by the products, California citizens lack the information necessary to make informed decisions on whether and how to eliminate (or reduce) the risk of exposure to the toxic chemicals from reasonably foreseeable use of the products.

**A. Consumer Product Exposure**

California consumers and musicians, through the act of buying, acquiring or utilizing the products, are exposed to the listed chemicals- by way of example but not limitation, their intended use as musical guitar strings. Simply stated, the installation musical guitar strings into guitars and playing of guitars will cause consumers and musicians to be exposed to lead and lead compounds through dermal routes of exposure. In addition, through the routine touching of the parts or portions of the products containing readily available surface amounts of lead and then touching the face and/or mouth (hand to mouth transfer), the listed chemicals can be ingested (i.e. when installing guitar strings and/or when playing or tuning guitars with a pick, the pick is almost always placed in the player's mouth as adjustments to the guitar strings are made... among many other examples idiosyncratic to guitar playing). People likely to be exposed include both children and adults.

**B. Occupational Product Exposure**

Similarly, men and women in California use the products as a part of their jobs and are, therefore, subject to occupational exposures to the listed chemicals. Employees are exposed at the California business locations of the apparent manufacturer, distributor and retailer (and their agents, assigns and divisions) as well as all other California locations where the products, or the component parts thereof that include the listed chemicals, are by way of example but not limitation, manufactured, used, packed, unpacked, labeled, arranged, installed, operated, cleaned, stocked, stored, repaired or otherwise handled. These tasks cause employee exposure through the routine touching of the parts or portions of the products containing readily available surface amounts of the listed chemicals. Additionally, through the routine touching of the parts or portions of the products containing readily available surface amounts of lead and then touching the face and/or mouth (hand to mouth transfer) the listed chemicals can be ingested (i.e. when installing guitar strings and/or when playing or tuning guitars with a pick, the pick is almost always placed in the player's mouth as adjustments to the guitar strings are made... among many other examples idiosyncratic to guitar playing)

These products are also used by sole proprietors and other persons in settings not covered by the OSH Act, i.e. independent and professional musicians. This notice alleges the violation of Proposition 65 with respect to occupational exposure governed by the California State Plan for Occupational Safety and Health. The State Plan incorporates the provisions of Proposition 65, as approved by Federal OSHA on June 6, 1997. This approval specifically placed certain conditions with regard to occupational exposures on Proposition 65, including that it *does* not apply to the conduct of manufacturers occurring outside the State of California. The approval also provides that an employer may use the means of compliance in the general hazard communication requirement to comply with Proposition 65. It also requires that supplemental enforcement is subject to the supervision of the California Occupational Safety and Health Administration. Accordingly, any settlement, civil complaint, or substantive court orders in this matter must be submitted to the Attorney General.

My research and investigation indicates the products listed in Exhibit A, and other products yet to be identified, are currently in violation of Proposition 65. I reserve the right to supplement this Notice of Violation with other alleged violators as my research and investigation continue.

#### **IV. CONTACT INFORMATION**

Please direct all questions concerning this notice to my counsel at the following address:

JL Sean Slattery  
John H. Donboli  
Del Mar Law Group, LLP  
2002 Jimmy Durante Blvd., Suite 100  
Del Mar, CA 92014  
Telephone: (858) 793.6244  
Facsimile: (858) 793.6005

#### **V. PROPOSITION 65 INFORMATION**

For general information concerning the provisions of Proposition 65, please feel free to contact the Office of Environmental Health Hazard Assessments ("OEHHA") Proposition 65 Implementation Office at (916) 445-6900. For the Violators' reference, I have attached a copy of "Proposition 65: A Summary" which has been prepared by OEHHA.

The specifically identified example of the type of products subject to this Notice are for the recipients benefit to assist in its investigation of, among other things, the magnitude of potential exposure to the listed chemicals from other items within the product category listed in Exhibit A. It is important to note that this example is not meant to be an exhaustive or comprehensive identification of each specific offending product of the type listed under Products

in Exhibit A. Further, it is this citizen's position that the alleged violator is obligated to continue to conduct a good faith investigation into other specific products within the type or category described above that may have been manufactured, distributed, sold, stored (or otherwise within the notice recipient's control) during the relevant period so as to ensure that the requisite toxic warnings are provided to California citizens prior to purchase.

April 13, 2009

**CERTIFICATE OF MERIT**  
Health and Safety Code Section 25249.7(d)

I, JL Sean Slattery, hereby declare:

1. This Certificate of Merit accompanies the attached sixty day notice in which it is alleged the parties identified in the notice have violated Health and Safety Code section 25249.6 by failing to provide clear and reasonable warning.

2. I am the attorney for the noticing party.

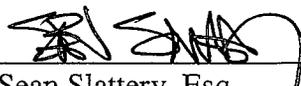

3. I have consulted with one or more persons with relevant and appropriate experience or expertise who has reviewed facts, studies, or other data regarding the alleged exposure to the listed chemicals that are the subject of this action.

4. Based on the information obtained through those consultants and on all other information, in my opinion, there is a reasonable and meritorious case for the private action. I understand that "reasonable and meritorious case for the private action" means that the information provides a credible basis that all elements of the plaintiffs' case can be established and the information did not prove that the alleged violator will be able to establish any of the affirmative defenses set forth in the statute.

5. The copy of this Certificate of Merit served on the Attorney General attaches to it factual information sufficient to establish the basis for this certificate, including information identified in Health and Safety Code §25249.7(h)(2) (i.e., (1) the identity of the persons consulted with and relied on by the certifier and (2) the facts, studies or other data reviewed by those persons.)

## APPENDIX A

### OFFICE OF ENVIRONMENTAL HEALTH HAZARD ASSESSMENT CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

#### THE SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT OF 1986 (PROPOSITION 65): A SUMMARY

The following summary has been prepared by the Office of Environmental Health Hazard Assessment, the lead agency for the implementation of the Safe Drinking Water and Toxic Enforcement Act of 1986 (commonly known as "Proposition 65"). A copy of this summary must be included as an attachment to any notice of violation served upon an alleged violator of the Act. The summary provides basic information about the provisions of the law, and is intended to serve only as a convenient source of general information. It is not intended to provide authoritative guidance on the meaning or application of the law. The reader is directed to the statute and its implementing regulations (see citations below) for further information.

Proposition 65 appears in California law as Health and Safety Code Sections 25249.5 through 25249.13. Regulations that provide more specific guidance on compliance, and that specify procedures to be followed by the State in carrying out certain aspects of the law, are found in Title 22 of the California Code of Regulations, Sections 25000 through 27001.

#### *WHAT DOES PROPOSITION 65 REQUIRE?*

***The "Governor's List."*** Proposition 65 requires the Governor to publish a list of chemicals that are known to the State of California to cause cancer, or birth defects or other reproductive harm. This list must be updated at least once a year. Over 735 chemical listings have been included as of November 16, 2001. Only those chemicals that are on the list are regulated under this law. Businesses that produce, use, release or otherwise engage in activities involving those chemicals must comply with the following:

***Clear and reasonable warnings.*** A business is required to warn a person before "knowingly and intentionally" exposing that person to a listed chemical. The warning given must be "clear and reasonable." This means that the warning must: (1) clearly make known that the chemical involved is known to cause cancer, or birth defects or other reproductive harm; and (2) be given in such a way that it will effectively reach the person before he or she is exposed. Exposures are exempt from the warning requirement if they occur less than twelve months after the date of listing of the chemical.

***Prohibition from discharges into drinking water.*** A business must not knowingly discharge or release a listed chemical into water or onto land where it passes or probably will pass into a source of drinking water. Discharges are exempt from this requirement if they occur less than twenty months after the date of listing of the chemical.

#### *DOES PROPOSITION 65 PROVIDE ANY EXEMPTIONS?*

Yes. The law exempts:

***Governmental agencies and public water utilities.*** All agencies of the federal, State or local government, as well as entities operating public water systems, are exempt.

***Businesses with nine or fewer employees.*** Neither the warning requirement nor the discharge prohibition applies to a business that employs a total of nine or fewer employees.

***Exposures that pose no significant risk of cancer.*** For chemicals that are listed as known to the State to cause cancer (“carcinogens”), a warning is not required if the business can demonstrate that the exposure occurs at a level that poses “no significant risk.” This means that the exposure is calculated to result in not more than one excess case of cancer in 100,000 individuals exposed over a 70-year lifetime. The Proposition 65 regulations identify specific “no significant risk” levels for more than 250 listed carcinogens.

***Exposures that will produce no observable reproductive effect at 1,000 times the level in question.*** For chemicals known to the State to cause birth defects or other reproductive harm (“reproductive toxicants”), a warning is not required if the business can demonstrate that the exposure will produce no observable effect, even at 1,000 times the level in question. In other words, the level of exposure must be below the “no observable effect level (NOEL),” divided by a 1,000-fold safety or uncertainty factor. The “no observable effect level” is the highest dose level which has not been associated with an observable adverse reproductive or developmental effect.

***Discharges that do not result in a “significant amount” of the listed chemical entering into any source of drinking water.*** The prohibition from discharges into drinking water does not apply if the discharger is able to demonstrate that a “significant amount” of the listed chemical has not, does not, or will not enter any drinking water source, and that the discharge complies with all other applicable laws, regulations, permits, requirements, or orders. A “significant amount” means any detectable amount, except an amount that would meet the “no significant risk” or “no observable effect” test if an individual were exposed to such an amount in drinking water.

#### *HOW IS PROPOSITION 65 ENFORCED?*

Enforcement is carried out through civil lawsuits. These lawsuits may be brought by the Attorney General, any district attorney, or certain city attorneys (those in cities with a

population exceeding 750,000). Lawsuits may also be brought by private parties acting in the public interest, but only after providing notice of the alleged violation to the Attorney General, the appropriate district attorney and city attorney, and the business accused of the violation. The notice must provide adequate information to allow the recipient to assess the nature of the alleged violation. A notice must comply with the information and procedural requirements specified in regulations (Title 27, California Code of Regulations, Section 25903). A private party may not pursue an enforcement action directly under Proposition 65 if one of the governmental officials noted above initiates an action within sixty days of the notice.

A business found to be in violation of Proposition 65 is subject to civil penalties of up to \$2,500 per day for each violation. In addition, the business may be ordered by a court of law to stop committing the violation.

*FOR FURTHER INFORMATION...*

Contact the Office of Environmental Health Hazard Assessment's Proposition 65 Implementation Office at (916) 445-6900.

## PROOF OF SERVICE

I, the undersigned, declare under penalty of perjury:

I am a citizen of the United States, over the age of 18 years, and not a party to the within action; my business address is 2002 Jimmy Durante Blvd., Ste. 100, Del Mar, CA 92014.

On April 13, 2009, I served the following document:

- **60-DAY NOTICE OF VIOLATION SENT IN COMPLIANCE WITH HEALTH & SAFETY CODE §25249.7(d);**
- **PROPOSITION 65: A SUMMARY;**
- **CERTIFICATE OF MERIT; AND**
- **CERTIFICATE OF MERIT ATTACHMENTS (SERVED ONLY ON THE ATTORNEY GENERAL)**

served on the Violators listed below via U.S. mail by placing a true and correct copy in each sealed envelope, addressed to each Violator and depositing such envelope in a with the United States Postal Service this same day in the ordinary course of business pursuant to Code of Civil Procedure §1013a.:
