PROPOSITION 65 ENFORCEMENT REPORTING  
ATTENTION: PROP 65 COORDINATOR  
1515 CLAY STREET, SUITE 2000  
P.O. BOX 70550  
OAKLAND CA 94612-0550

Greetings:

This office and the Mateel Environmental Justice Foundation ("Mateel") give you notice that the private businesses on the attached service list have been, are, will be and threaten to be in violation of Cal. Health & Safety Code § 25249.6. Both this office and Mateel are private enforcers of Proposition 65, both may be contacted at the below listed address and telephone number, and I am a responsible individual at both Mateel and this office. The above referenced violations occur when California residents come into contact with tools that are made from brass or that have components made of brass, such as centerpunches, planes, squares and cold chisels, air conditioning recharge kits that utilize brass components and brass gauges and hose fittings (collectively "brass fittings, tools and accessories") that the listed businesses market. A list of specific examples of the specific types of products at issue is attached. Though a specific model or UPC number may be given as an example, this notice pertains to all similar types of brass fittings, tools & accessories). Though a specific model or UPC number may be given as an example, this notice pertains to all similar types of brass fittings, tools and accessories. The brass fittings, tools and accessories that people handle are made from leaded brass, which contain lead and lead compounds ("lead"), which are chemicals known to cause cancer, birth defects and other reproductive harm. California residents are exposed to lead when they handle these fittings, tools and accessories. Lead is transferred from the brass fittings, tools and accessories to peoples' hands and to other parts of their skin. This lead is then absorbed through the skin, taken into cuts and abrasions, absorbed through mucous membranes, and transferred from the skin to the mouth via oral contact either directly with the lead-contaminated skin, and when lead is transferred from contaminated skin to cigarettes and food and the contaminated cigarettes and food are smoked and/or eaten. These lead exposures thus occur via the dermal absorption, subcutaneous, mucous membrane, ingestion and inhalation routes. The listed businesses did not and do not provide people with clear and reasonable warnings before they expose them to lead. These violations have occurred every day since at least February 15, 2009, and will continue every day until the lead is removed from the brass fittings, tools and accessories, or until clear and reasonable warnings are given. These violations are alleged for occupational and consumer product exposures. We do not, however, allege occupational exposure violations as to any brass fittings, tools and accessories made outside of California, except as to workplaces the listed businesses themselves maintain in California. This notice does not allege any environmental exposure violations.

Cordially,

William Verick

This notice alleges the violation of Proposition 65 with respect to occupational exposures governed by the California State Plan for Occupational Safety and Health. The State Plan incorporates the provisions of Proposition 65, as approved by Federal OSHA on June 6, 1997. This approval specifically placed certain conditions on Proposition 65, including that it does not apply to the conduct of manufacturers occurring outside the State of California. The approval also provides that an employer may use the means of compliances in the general hazard communication requirements to comply with Proposition 65. It also requires that supplemental enforcement is subject to the supervision of the California Occupational Safety and Health Administration. Accordingly, any settlement, civil complaint, or substantive court orders in this matter must be submitted to the Attorney General.
