NOTICE OF VIOLATION OF THE SAFE DRINKING WATER
AND TOXIC ENFORCEMENT ACT OF 1986
(California Health and Safety Code §25249.5, et seq.)

TO: ANAPLEX CORPORATION

PRIORITY MAIL-
AND FIRST CLASS MAIL TO THE PARTIES LISTED
ON THE ATTACHED DISTRIBUTION LIST TO:

ANAPLEX CORPORATION
Mr. Carmen Campbell, President
15547 Garfield Avenue
Paramount, CA 90723

C/O Agent for Service Mr. Ryan K. Hirota
600 Anton Blvd, 11th Floor
Costa Mesa, CA 92626

Dear Mr. President:

Doris Nichols (the "Noticing Party") serves this Notice of Violation ("Notice") upon ANAPLEX CORPORATION (hereinafter "VIOLATOR") pursuant to and in compliance with California Health and Safety Code ("H&S Code") §25249.7(d).

This Notice satisfies a prerequisite for the Noticing Party to commence an action against the VIOLATORS to enforce the Safe Drinking Water and Toxic Enforcement Act of 1986, Prop 65. The violations addressed by this Notice occur in Los Angeles County and the city of Paramount, California. This Notice is being served upon the VIOLATOR, the California Attorney General, and the District Attorney of Los Angeles County. The above VIOLATOR has a current registration with the California Secretary of State and/or other corporate website that identifies a President. This Notice is being addressed to, and served upon him via the Agent for Service.

The description of the Noticing Party, the alleged VIOLATOR and the alleged Violations addressed by this Notice:

- This Notice is provided by Doris Nichols (hereinafter "Noticing Party"), who is based in Ventura and acting in the public interest pursuant to H&S Code §25249.7(d). She is dedicated to protecting the environment, improving human health and supporting environmentally sound practices.
- The VIOLATOR name is: ANAPLEX CORPORATION
- The first violation addressed by this Notice began on or after Dec. 5, 2009, and has occurred on numerous occasions each and every day since that date and are ongoing and continuing failures to warn in conformity with H&S Code §25249.6, CCR Tit. 27 §2560 I. The air exposures caused by these emissions of specifically hexavalent chromium and chromium compounds, ("Cr VI") are violations of statute and are a 'continuing violation' tolling any statutory protection normally afforded the alleged VIOLATOR.
- There is a second allegation that the VIOLATOR has contaminated sources of drinking water within the state in violation of H&S Code §25249.5 for specifically Cr VI as the VIOLATOR has discharged chemicals into air where they may deposit onto land or into land where the chemical may pass into a source of drinking water.
- The name of each chemical that is listed pursuant to the Safe Drinking Water and Toxic Enforcement Act of 1986 and involved in the violations addressed by this Notice are:
 1. Hexavalent Chromium and its compounds,
- The above Chemical was listed (and have been so listed for more than twelve months) by the Governor of the State of California as being a chemical known to the State of California to cause cancer or reproductive toxicity, or both cancer and reproductive toxicity.
- The route of exposure for the violations addressed by this Notice is inhalation, however there also is a danger of ingestion and dermal exposures. There is also a danger of a dermal and ingestion exposure while rain events wash the VIOLATOR discharged Listed

Chemicals out of the ambient air.

- Further there is a danger of ingestion of the Listed Chemicals as the releases and or discharges are into the air where they may pass into a source of drinking water or the release and or discharge may be to land or into land where it may pass into a source of drinking water. And where said release and or discharge may threaten sources of water such as "groundwater or surface water".
 - The types of exposures alleged herein are environmental and occupational exposures while the VIOLATOR was conducting business in its normal knowing, intentional and supervised fashion. These emissions cause global exposures in the adjacent counties as the heavy metal particulate matter smaller than 1 micron is highly mobile in air dispersion models. The specific concentrations of Cr VI released by the VIOLATOR are further cancer and reproductive burdens on the ambient air and larger air basins adjacent for which the VIOLATOR is also responsible under the theory of "Enterprise Liability".
 - There are numerous diverse geographical areas of the exposures addressed in this Notice. These exposures occur in adjacent homes, via air, surface water, groundwater, soil, on most solid surfaces and in the workplace of the VIOLATOR while also in all counties adjacent to the VIOLATORS Paramount facility. The air basins of Orange, Riverside and San Bernardino County contain actionable levels of Cr VI to such an extent that a Court will have to adjudicate the VIOLATOR proportion contribution and liability at trial.
 - This contamination can be gauged and quantified by a percentage "contribution" to the permanent damage to the environment in each of the counties of California identified above, besides Los Angeles County. Innocent persons have been breathing and will continue to breathe these same Listed Chemicals to their detriment absent environmental warnings, including but not limited to advertisements on television and in the print media, media vehicles such as billboards. These exposures occur principally off the property of the Noticed Company and alleged VIOLATOR.
 - In the course of doing business, the VIOLATOR has and did knowingly expose, and continues to expose, individuals (especially pregnant and post-partum women) to the Listed Chemicals. As a proximate cause of the releases and or discharges alleged above no clear and reasonable warning is or has been provided by the VIOLATOR to individuals or
-

groups in the counties where persons are exposed.

- Further these exposures have gone on from at least Dec. 5, 2015 as to identified herein Listed Chemicals including but not limited to Cr VI which is released during the Paramount Facility normal business operations. The Noticing Party believes that the VIOLATOR, as the original source, will continue to withhold any meaningful information from those persons that required warning, absent this enforcement action. All of the counties identified in this Notice have levels or contributions of air contamination from the same above Cr VI.

OCCUPATIONAL ADVISEMENT

- The release and or discharge by the VIOLATOR constitutes exposures to numerous known carcinogenic chemicals in the environment and the release will cause the subsequent occupational exposures to employees of the Paramount Facility without a clear and reasonable warning as to each chemical released.

"This notice alleges the violation of Proposition 65 with respect to occupational exposures governed by the California State Plan for Occupational Safety and Health. The State Plan incorporates the provisions of Proposition 65, as approved by Federal OSHA on June 6, 1997. The approval also provides that an employer may use the means of compliance in the general hazard communication requirements to comply with Proposition 65. It also requires that supplemental enforcement is subject to the supervision of the California Occupational Safety and Health Administration. Accordingly, any settlement, civil complaint, or substantive court orders in this matter must be submitted to the Attorney General."

ENVIRONMENTAL ADVISEMENT

- The location of these alleged air exposures are varied while occurring within the counties of the state of California as detailed herein. Further the Noticing Party believes and so alleges that most if not all of the jurisdictions so detailed had the VIOLATORS' waste streams in the ambient air and that after that air dispersion fell to the ground that those Cr VI particles would threaten sources of drinking water and cause a subsequent discharge to at least the Los Angeles County aquifer in violation of the H&S Code, sec. 25249.5 and 25249.11.

Please direct any inquiries regarding this Notice or any communication with the responsible party for the Noticing Party:

Note: "APPENDIX A" or "A SUMMARY" of Proposition 65 attaches to the Violator copy of the Notice but IS NOT served upon the Distribution List public agencies.

CERTIFICATE OF MERIT
HEALTH AND SAFETY CODE SECTION 25249.7(d)

NOTICED PARTY: ANAPLEX CORP

I, Kurt S. Bollin, on behalf of the noticing party Doris Nichols hereby declare:

1. This Certificate of Merit accompanies the attached sixty-day notice(s) in which it is alleged that the party identified in the notice have violated California Health and Safety Code section 25249.6 by failing to provide clear and reasonable warnings.

2. I am the Attorney for the noticing party.

3. I have consulted with one or more persons with relevant and appropriate experience or expertise who has reviewed facts, studies, maps, charts, private and public documents, or other data regarding the exposure to the listed chemical(s) that is the subject of this action.

4. Based upon the information obtained through those consultations, and all other information in my possession, I believe there is a reasonable and meritorious case for the private action. I understand that "reasonable and meritorious case for private action" means that the information provides a credible basis that all the elements of the plaintiffs' case can be established and the information did not prove that the alleged violator will be able to establish any of the affirmative defenses set forth in the statute.

5. The copy of this Certificate of Merit served on the Attorney General attaches to it factual information sufficient to establish the basis for this certificate, including the information identified in Health and Safety Code section 24249.7(h)(2), *i.e.*, (1) the identity of the person consulted with and relied on by the certifier, and (2) the facts, studies, or other data reviewed by those persons.

Date: Dec. 5, 2016

/s/ Kurt S. Bollin

Kurt S. Bollin, Esq.
