1 **1. INTRODUCTION**

2 **1.1 Parties**

3 This Consent Judgment is entered into by and between Environmental Health Advocates, Inc.,  
4 (“EHA” or “Plaintiff”) and Defendants Almar Sales Co., Inc.; Bellapierre Cosmetics, Inc.; Beauty 21  
5 Cosmetics, Inc.; Beauty Treats International Co., Inc.; The Boots Company PLC; Kimchi\_Chic  
6 Beauty, LLC; JW Beauty LLC; Laura Lee Los Angeles LLC; Michael Giordano International Inc.;  
7 Pearl World Inc.; Revolution Beauty, Inc.; and Walgreen Co. (“Settling Defendants”) with EHA and  
8 Settling Defendants each individually referred to as a “Party” and collectively referred to as the  
9 “Parties.”

10 **1.2 Plaintiff**

11 EHA is a corporation organized in the state of California, acting in the interest of the general  
12 public. It seeks to promote awareness of exposures to toxic chemicals and to improve human health  
13 by reducing or eliminating hazardous substances contained in consumer products.

14 **1.3 Defendant**

15 Each Settling Defendant employs ten or more individuals and for purposes of this Consent  
16 Judgment only, is a “person in the course of doing business” for purposes of the Safe Drinking Water  
17 and Toxic Enforcement Act of 1986, Health and Safety Code section 25249.6 et seq. (“Proposition  
18 65”).

19 **1.4 General Allegations**

20 EHA alleges that Settling Defendants manufacture, import, sell, and distribute for sale  
21 powdered facial cosmetics that expose individuals to airborne, unbound, respirable size particles of  
22 Titanium Dioxide (TiO<sub>2</sub>). EHA further alleges that Settling Defendants do so without providing a  
23 sufficient health hazard warning as required by Proposition 65 and related Regulations. Settling  
24 Defendants deny these allegations and assert that their products are safe and in compliance with all  
25 applicable laws, rules and regulations.

1           **1.5**       Notice of Violation

2           Commencing on the dates below, EHA served Settling Defendants, the California Attorney  
3 General, and all other required public enforcement agencies with a 60-Day Notice of Violation of  
4 Proposition 65 (“Notices”). The Notices alleged that Settling Defendants had violated Proposition 65  
5 by failing to sufficiently warn consumers in California of the health hazards associated with  
6 exposures to TiO2 contained in powdered facial cosmetics.

7

No.	SETTLING DEFENDANT	DATE OF INITIAL SERVED 60-DAY NOTICE OF VIOLATION
1.	Almar Sales Co., Inc,	August 12, 2022
2.	Bellapierre Cosmetics, Inc.	August 2, 2022
3.	Beauty 21 Cosmetics, Inc.	June 2, 2022
4.	Beauty Treats International Co., Inc.	August 10, 2022
5.	The Boots Company PLC	May 11, 2022
6.	Kimchi_Chic Beauty, LLC	September 7, 2022
7.	JW Beauty LLC	September 20, 2022
8.	Laura Lee Los Angeles, LLC	August 10, 2022
9.	Michael Giordano International Inc.	May 11, 2022
10.	Pearl World Inc.	December 21, 2021; February 10, 2022 (amended NOV)
11.	Revolution Beauty, Inc.	February 23, 2022; April 20, 2022 (amended NOV)
12.	Walgreen Co	May 11, 2022

25

26           No public enforcer has commenced or is otherwise prosecuting an action to enforce the  
27 violations alleged in the Notices.

1           **1.6**           Complaints and Coordinated Proceedings.

2           Commencing on the dates below, EHA filed complaints against each Settling Defendant for  
3 the alleged violations of Proposition 65 that are the subject of the Notices (“Complaints”).

22           **1.7**           No Admission

23           Settling Defendants deny the material factual and legal allegations of the Notices and  
24 Complaints and maintain that all the products they have manufactured, imported, sold, and/or  
25 distributed for sale in California, including Covered Products, have been, and are, in compliance with  
26 all applicable laws, rules and regulations. Nothing in this Consent Judgment shall be construed as an  
27 admission of any fact, finding, conclusion of law, issue of law, or violation of law, nor shall  
28

1 compliance with this Consent Judgment be construed as an admission of any fact, finding, conclusion  
2 of law, issue of law, or violation of law. This Section shall not, however, diminish or otherwise affect  
3 a Settling Defendant’s obligations, responsibilities, and duties under this Consent Judgment.

4 **1.8 Jurisdiction**

5 For purposes of this Consent Judgment and the Complaint only, the Parties stipulate that this  
6 Court has jurisdiction over Settling Defendants as to the allegations in the Complaints, that venue is  
7 proper in the County of Alameda, and that the Court has jurisdiction to enter and enforce the  
8 provisions of this Consent Judgment pursuant to Proposition 65 and Code of Civil Procedure section  
9 664.6.

10 **2. Definitions**

11 **2.1** “Binding Agents” means ingredients that are Alcohols, Ethers, Esters, Fatty Acids,  
12 Fats and Oils, Gums, Hydrocarbons, Polyols, Siloxanes and Silanes, and Soaps, as categorized by  
13 chemical classes in the International Cosmetic Ingredient Dictionary and Handbook, either as set  
14 forth in Exhibit A or as those classes may subsequently change.

15 **2.2** “Covered Products” mean powder cosmetics that are pressed, baked, or otherwise  
16 compressed that contain TiO<sub>2</sub>.

17 **2.3** “Effective Date” means the date on which this Consent Judgment is approved and  
18 entered as a judgment of the Court, as discussed in Section 5.

19 **2.4** “Compliance Date” means the date one year after the Effective Date.

20 **2.5** “Listed TiO<sub>2</sub>” means airborne, unbound TiO<sub>2</sub> particles of respirable size

21 **2.6** “Reformulated Products” means Covered Products that contain at least 10 percent  
22 Binding Agents by mass.

23 **3. Background.**

24 **3.1** TiO<sub>2</sub> is a mineral used as an ingredient in cosmetic and personal care products,  
25 including color cosmetics (such as eye shadow, blush, foundation, setting powder, pressed powder,  
26 loose powder, bronzer, and other makeup products). It is opaque (non-transparent), and its color is  
27  
28

1 consistently bright white, allowing it to be mixed with other pigments to create a varied palette of  
2 consistent shades.

3 **3.2** On September 2, 2011, the State of California identified Listed TiO<sub>2</sub> as a chemical  
4 known to the State to cause cancer. Accordingly, Proposition 65 warnings were required to be  
5 provided for exposures to Listed TiO<sub>2</sub> that exceed the “no significant risk level” occurring after  
6 September 2, 2012.

7 **3.3** Plaintiff contends that the application of facial powdered cosmetics exposes  
8 individuals to Listed TiO<sub>2</sub> when unbound particles of respirable size become airborne and inhaled, at  
9 levels above the “no significant risk level.” Settling Defendants contend that the TiO<sub>2</sub> in powdered  
10 facial cosmetics is not unbound, and that airborne, unbound TiO<sub>2</sub> particles of respirable size are  
11 either not detectable under normal conditions of use or are at levels that are below the “no significant  
12 risk level” for Listed TiO<sub>2</sub>.

13 **3.4** The presence of Binding Agents can reduce the amount of unbound, respirable-sized  
14 particles of TiO<sub>2</sub> that can become airborne. The Parties agree that increasing the amount of Binding  
15 Agents to 10 percent or more of the formulation of pressed powder facial cosmetics will substantially  
16 reduce, if not completely eliminate potential exposure to Listed TiO<sub>2</sub>. By signing this Consent  
17 Judgment, each Settling Defendant confirms it will need to reformulate or discontinue at least one  
18 Covered Product to meet the reformulation standard set forth herein.

19 **4. INJUNCTIVE RELIEF**

20 **4.1** Settling Defendants shall provide a Proposition 65 warning for Covered Products they  
21 manufacture, distribute, or sell for sale in California after the Compliance Date that are not  
22 Reformulated Products.

23 **4.2** A warning provided pursuant to Section 4.1 shall include one of the following warning  
24 statements.

25 **Option 1:**

26  **WARNING:** This product can expose you to chemicals including  
27 Titanium Dioxide (unbound, airborne particles of respirable size), which  
28 is known to the State of California to cause cancer. For more  
information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

1 A Settling Defendant may identify additional listed chemicals and provide a warning for exposures to  
2 reproductive toxins as part of the warning statement.

3 **Option 2:**

4  **WARNING:** Cancer– [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

5 **4.3** The warning statement shall be prominently displayed on the Covered Products, on the  
6 packing of the Covered Products, or on a placard, shelf tag, or sign provided that the statement is  
7 displayed with such conspicuousness, as compared with other words, statements, or designs as to  
8 render it likely to be read and understood by an ordinary individual prior to sale. If the Option 2  
9 warning statement is displayed on the Covered Product’s packaging, it must be in a type size no  
10 smaller than the largest type size used for other consumer information on the product. In no case shall  
11 an Option 2 warning statement displayed on the Covered Products’ packaging appear in a type size  
12 smaller than 6-point type.

13 **4.4** Settling Defendants shall provide the warning statement or a clearly marked hyperlink  
14 using the word “WARNING” on the product display page, or by otherwise prominently displaying  
15 the warning to the purchaser prior to completing the purchase. Settling Defendants shall provide the  
16 warning statement to any customers whom it knows or has reason to believe may be selling Covered  
17 Products online to customers in California, pursuant to 27 Cal. Code Regs. § 25600.2(b).

18 **4.5** Where a sign or label used to provide a warning includes consumer information about  
19 a Covered Product in a language other than English, the warning must also be provided in that  
20 language in addition to English.

21 **4.6** Sell-Through Period

22 Notwithstanding anything else in this Consent Judgment, Covered Products that are  
23 manufactured or imported by a Settling Defendant on or before the Compliance Date shall be subject  
24 to the release of liability pursuant to this Consent Judgment, without regard to when such Covered  
25 Products were, or are in the future, distributed or sold to customers.

1 **5. MONETARY SETTLEMENT TERMS**

2 **5.1 Settlement Amount**

3 Within 10 business days after the Effective Date and receipt of Forms W-9 for all payees,  
4 whichever is later, each Settling Defendant shall pay the total sum set forth on **Exhibit B** for that  
5 Settling Defendant as a settlement payment as further set forth in this Section.

6 **5.2 Allocation of Payments.**

7 The total settlement amount shall be paid in the amounts specified for each Settling Defendant  
8 on **Exhibit B** and delivered as set forth below. The funds paid by Settling Defendants shall be  
9 allocated as set forth below between the following categories and made payable as follows:

10 **(a) Civil Penalty**

11 Each Settling Defendant shall pay the civil penalty amount set forth in **Exhibit B** for that  
12 Settling Defendant as a civil penalty pursuant to Health & Safety Code §25249.7(b). The civil  
13 penalty payment shall be allocated according to Health and Safety Code section 25249.12(c)(1) and  
14 (d), with seventy-five percent (75%) of the penalty paid to the California Office of Environmental  
15 Health Hazard Assessment (“OEHHA”), and the remaining twenty-five percent (25%) of the penalty  
16 paid to EHA individually. All payments owed to EHA shall be delivered to the following address:

17 Isaac Fayman  
18 Environmental Health Advocates  
19 225 Broadway, Suite 2100  
San Diego, CA 92101

20 All payments owed to OEHHA (EIN: 68-0284486) shall be delivered directly to OEHHA  
21 (Memo Line "Prop 65 Penalties") at the following addresses:

22 For United States Postal Service Delivery:

23 Mike Gyurics  
24 Fiscal Operations Branch Chief  
25 Office of Environmental Health Hazard Assessment  
26 P.O. Box 4010  
27 Sacramento, CA 95812-4010  
28

For Federal Express 2-Day Delivery:

1  
2 Mike Gyurics  
3 Fiscal Operations Branch Chief  
4 Office of Environmental Health Hazard Assessment  
5 1001 I Street  
6 Sacramento, CA 95814

7 Each Settling Defendant agrees to provide EHA's counsel with a copy of the check payable to  
8 OEHHA, simultaneous with its penalty payment to EHA.

9 Plaintiff and its counsel will provide completed IRS 1099, W-9, or other tax forms as  
10 required. Relevant information is set out below:

- 11 • "Environmental Health Advocates, Inc." (EIN: 84-2322975) at the address provided above.
- 12 • "Office of Environmental Health Hazard Assessment" 1001 I Street, Sacramento, CA 95814.

### 13 5.3 Attorney's Fees and Costs

14 Each Settling Defendant shall pay the amount set forth in **Exhibit B** for that Settling  
15 Defendant attributable to attorneys' fees and costs shall be paid to EHA's counsel, as a  
16 reimbursement for attorneys' fees and costs incurred by it in this action, including but not limited to  
17 investigating potential violations, bringing this matter to Settling Defendant's attention, as well as  
18 litigating and negotiating a settlement in the public interest.

19 A Settling Defendant shall provide its payment for attorneys' fees and costs to EHA's counsel  
20 by physical check or by electronic means, including wire transfers, at the Settling Defendant's  
21 discretion, payable to Entorno Law, LLP. The address for this entity is:

22 Noam Glick  
23 Entorno Law, LLP  
24 225 Broadway, Suite 1900  
25 San Diego, CA 92101

## 26 6. CLAIMS COVERED AND RELEASE

27 6.1 The Parties enter into this Consent Judgment as a full and final settlement of all claims  
28 arising under Proposition 65 relating to alleged exposure to Listed TiO<sub>2</sub> from powdered facial  
cosmetics containing TiO<sub>2</sub> ("Released Products"), and as to all claims pursuant Health and Safety  
Code section 25249.7(d) that were raised or could have been raised in the Notices or Complaints,  
arising from the failure to warn under Proposition 65 regarding the presence of Listed TiO<sub>2</sub> in such  
Released Products.

1           **6.2**           EHA’s Public Release of Proposition 65 Claims

2           Plaintiff, acting on its own behalf and in the public interest, releases each Settling Defendant  
3 and its parents, subsidiaries, affiliated entities under common ownership or control, its directors,  
4 officers, principals, agents, employees, attorneys, insurers, accountants, predecessors, successors, and  
5 assigns (“Defendant Entities”), licensors, brand owners, and/or IP owners of Covered Products, and  
6 each entity to whom such Settling Defendant directly or indirectly distributes, ships, or sells the  
7 Covered Products, including but not limited to downstream distributors, wholesalers, customers,  
8 retailers and marketplaces, franchisees, franchisors, cooperative members, suppliers, licensees, and  
9 licensors, and all of the foregoing entities’ owners, directors, officers, agents, principals, employees,  
10 attorneys, insurers, accountants, representatives, predecessors, successors, and assigns (collectively  
11 referred to as the “Releasees”) from all claims for violations of Proposition 65 up through the  
12 Compliance Date based on exposure to TiO<sub>2</sub> from Covered Products as set forth in the Notices.  
13 Compliance with the terms of this Consent Judgment constitutes compliance with Proposition 65  
14 with respect to exposures to TiO<sub>2</sub> from Covered Products as set forth in the Notices. This Consent  
15 Judgment is a full, final, and binding resolution of all claims under Proposition 65 that were or could  
16 have been asserted against Settling Defendants and/or Releasees for failure to comply with  
17 Proposition 65 for alleged exposure to TiO<sub>2</sub> from Covered Products. This release does not extend to  
18 any third-party retailers selling the product on a website who, after receiving warning information  
19 from a Settling Defendant as set forth above in section 4.2, do not include such a warning.

20           **6.3**           EHA’s Individual Release of Claims

21           EHA, in its individual capacity, also provides a release to Settling Defendants and Releasees,  
22 which shall be a full and final accord and satisfaction of, as well as a bar to, all actions, causes of  
23 action, obligations, costs, expenses, attorneys’ fees, damages, losses, claims, liabilities, and demands  
24 of every nature, character, and kind, whether known or unknown, suspected or unsuspected, arising  
25 out of alleged or actual exposures to Listed TiO<sub>2</sub> in Released Products manufactured, imported, sold,  
26 or distributed by the Settling Defendant before the Compliance Date.  
27  
28

1           **6.4**       Settling Defendants’ Release of EHA

2           Each Settling Defendant on its own behalf, and on behalf of Releasees as well as its past and  
3 current agents, representatives, attorneys, successors, and assignees, hereby waives any and all claims  
4 against EHA and its attorneys and other representatives, for any and all actions taken or statements  
5 made by EHA and its attorneys and other representatives, whether in the course of investigating  
6 claims, otherwise seeking to enforce Proposition 65 against them, in this matter or with respect to the  
7 Covered Products.

8           **6.5**       No Other Known Claims or Violations

9           EHA and EHA’s counsel affirm that they are not presently aware of any actual or alleged  
10 violations of Proposition 65 by Settling Defendants or for which Settling Defendants bear legal  
11 responsibility other than those that are fully resolved by this Consent Judgment.

12       **7.       COURT APPROVAL**

13           This Consent Judgment is not effective until it is approved by the Court and shall be null and  
14 void if it is not approved by the Court within one year after it has been fully executed by the Parties,  
15 or by such additional time as the Parties may agree to in writing.

16       **8.       GOVERNING LAW**

17           The terms of this Consent Judgment shall be governed by the laws of the state of California as  
18 applied within the state of California. In the event that Proposition 65 is repealed, or is otherwise  
19 rendered inapplicable as to TIO2 in the Covered Products for reasons, including but not limited to  
20 changes in the law, then a Settling Defendant may provide written notice to EHA of any asserted  
21 change, and may file a motion to amend this Consent Judgment accordingly, with statutory notice  
22 provided to EHA and the opportunity to oppose the motion to amend.

23       **9.       ENFORCEMENT**

24           **9.1**       Either Party may by motion or application for an order to show cause before this  
25 Court seek to enforce the terms of this Consent Judgment. Prior to filing any such motion or  
26 application, a Party seeking to enforce shall provide the allegedly violating Party with a written  
27 notice setting forth the detailed factual and legal basis for the alleged violation along with any  
28 evidentiary support for the alleged violation (“Notice of Violation”). The Parties shall then meet and

1 confer during the thirty (30) day period following the date the Notice of Violation was sent in an  
2 effort to try to reach agreement on an appropriate cure, penalty or related attorneys' fees related to the  
3 alleged violation. After such thirty (30) day period, the Party seeking to enforce may, by motion, or  
4 order to show cause before the Superior Court of Alameda, seek to enforce the terms and conditions  
5 contained in this Consent Judgment.

6 **9.2** If Plaintiff serves a Notice of Violation against a Settling Defendant that alleges a  
7 violation of the injunctive requirements set forth in Section 4, it shall identify the Covered Product,  
8 along with the evidentiary support for the Notice of Violation.

9 **9.3** A Settling Defendant shall serve its response to a Notice of Violation within 30  
10 days of receipt of the Notice, unless extended by agreement. The response may include any  
11 documentation responsive to the claims in the Notice of Violation.

12 **9.4** If the Settling Defendant's response demonstrates that: (a) the Covered Product  
13 was manufactured, distributed, or sold by the Settling Defendant before the Compliance Date; (b) the  
14 Covered Product's formulation qualifies as a Reformulated Product; or (c) the Settling Defendant  
15 complied with the warning requirements of Section 4, Plaintiff shall take no further action.

16 **9.5** If the Settling Defendant elects not to contest a Notice of Violation, it shall do the  
17 following:

18 **(a)** withdraw the Covered Product from sale in California and direct customers to  
19 withdraw the Covered Product from sale in California; or

20 **(b)** provide a clear and reasonable warning pursuant to Section 4 for Covered  
21 Products sold by the Settling Defendant in California and instruct any customers it knows or has  
22 reason to believe are selling the Covered Products in California to provide such warning.

23 **9.6** In any action to enforce the terms of this Consent Judgment, the prevailing party  
24 shall be entitled to its reasonable attorneys' fees and costs.

25 *[Rest of page intentionally left blank.]*  
26  
27  
28

1 **10. NOTICE**

2 **10.1** Unless otherwise specified herein, all correspondence and notice required by this  
3 Consent Judgment shall be in writing and sent by: (i) personal delivery; (ii) first-class, registered, or  
4 certified mail, return receipt requested; or (iii) a recognized overnight courier; and (iv) with a copy by  
5 email.

6 **10.2** Any notice to plaintiff shall be sent to

7 Noam Glick  
8 Entorno Law, LLP  
9 225 Broadway, Suite 2100  
10 San Diego, CA 92101  
11 noam@entornolaw.com

12 **10.3** Any notice to a Settling Defendant shall be sent by U.S. Mail, overnight delivery,  
13 and/or email to the address(es) listed on **Exhibit B** for such Settled Defendant.

14 **10.4** Any Party may, from time to time, specify in writing to the other, a change of  
15 address to which notices and other communications shall be sent.

16 **11. COUNTERPARTS; DIGITAL SIGNATURES**

17 This Consent Judgment may be executed in counterparts and by facsimile signature, each of  
18 which shall be deemed an original, and all of which, when taken together, shall constitute one and the  
19 same document.

20 **12. POST EXECUTION ACTIVITIES**

21 EHA agrees to comply with the reporting form requirements referenced in Health and Safety  
22 Code section 25249.7(f). The Parties further acknowledge that, pursuant to Health and Safety Code  
23 section 25249.7(f), a noticed motion is required to obtain judicial approval of the settlement, which  
24 motion EHA shall draft and file. Settling Defendants shall support the entry of this agreement as  
25 judgment, and to obtain judicial approval of their settlement in a timely manner.  
26  
27  
28

1 **13. MODIFICATION**

2 **13.1** This Consent Judgment may be modified by: (i) a written agreement of the Parties  
3 and entry of a modified consent judgment thereon by the Court; or (ii) a successful motion or  
4 application of any Party, and the entry of a modified consent judgment thereon by the Court.

5 **13.2** In the event the California Office of Health Hazard Assessment adopts a regulation  
6 or safe use determination, or issues an interpretive guideline that exempts Covered Products from  
7 meeting the requirements of Proposition 65; or if Proposition 65 cases are permanently enjoined by a  
8 court of competent jurisdiction; or if Proposition 65 is determined to be preempted by federal law or a  
9 violation of First Amendment rights with respect to TIO<sub>2</sub> in Covered Products or cosmetic products  
10 substantially similar to Covered Products, then an affected Settling Defendant may file a motion to be  
11 relieved of its obligation to comply with Section 2 herein, with statutory notice provided to EHA and  
12 the opportunity to oppose the motion to amend.

13 **13.3 Most Favored Nations Provision.** If, after the Effective Date, a court enters  
14 judgment in a Proposition 65 enforcement action brought by Plaintiff over exposure to Listed TiO<sub>2</sub> in  
15 substantially comparable Covered Products that imposes different injunctive relief than in this  
16 Consent Judgment, this Consent Judgment shall be modified at the request of one or more Settling  
17 Defendants to conform with the injunctive relief provided in such later judgment upon submission of  
18 an amended Consent Judgment for Court approval by such Settling Defendant(s). Prior to submitting  
19 an amended Consent Judgment to the Court, the Settling Defendant(s) shall meet and confer with  
20 Plaintiff's counsel on the language of the proposed amended Consent Judgment, and in the event of a  
21 dispute over the applicability of the later judgment to the Covered Products (i.e., whether the affected  
22 Covered Products and those subject to the later judgment are substantially comparable), Plaintiff shall  
23 have statutory notice and the opportunity to oppose the motion to amend the Consent Judgment.

24 **13.4 Termination of Injunctive Relief.**

25 **(a)** If, after the Effective Date, a court enters judgment in a Proposition 65  
26 enforcement action brought by Plaintiff over exposure to Listed TiO<sub>2</sub> that denies a request for  
27 injunctive relief on the grounds that (a) Plaintiff has not shown an exposure to Listed TiO<sub>2</sub> from  
28 powdered facial cosmetics, or (b) the defendant has demonstrated that any exposure to Listed TiO<sub>2</sub>

1 from powdered facial cosmetics is exempt from the Proposition 65 warning requirement under Health  
2 & Safety Code § 25249.10(c), a Settling Defendant may file a motion to terminate the injunctive  
3 relief in Section 4 of this Consent Judgment as to that Settling Defendant. Plaintiff shall have  
4 statutory notice and the opportunity to oppose any such motion to terminate the Settling Defendant's  
5 injunctive relief obligations.

6 (b) Commencing on the fifth anniversary of the Effective Date, a Settling  
7 Defendant may terminate the injunctive relief in Section 4 of this Consent Judgment as to that  
8 Settling Defendant by filing a notice of voluntary termination and serving the notice on Plaintiff and  
9 the Attorney General. In the event the Settling Defendant elects to do so, it shall lose the *res judicata*  
10 protections of this Consent Judgment as to potential future claims by Plaintiff or any other  
11 Proposition 65 enforcer.

12 **13.5 Notice; Meet and Confer.** Any Party seeking to modify this Consent Judgment or  
13 terminate it pursuant to Section 13.4(a) shall attempt in good faith to meet and confer with all  
14 affected Parties prior to filing a motion to modify the Consent Judgment.

15 **14. AUTHORIZATION**

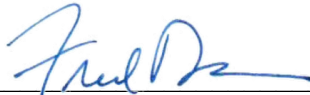

16 The undersigned are authorized to execute this Consent Judgment and acknowledge that they  
17 have read, understand, and agree to all of the terms and conditions contained herein.

18 **15. ENTIRE AGREEMENT**

19 This Consent Judgment contains the sole and entire agreement and understanding of the  
20 Parties with respect to the entire subject matter herein, and any and all prior discussions, negotiations,  
21 commitments, and understandings related hereto. No representations, oral or otherwise, express or  
22 implied, other than those contained herein have been made by any Party. No other agreements, oral or  
23 otherwise, unless specifically referred to herein, shall be deemed to exist or to bind any Party.

# EXHIBIT A

## Exhibit A

### Alcohols

Alcohols are organic compounds in which a hydroxyl group (-OH) is attached to a saturated carbon atom. Alcohols have the general formula ROH, where R may be aliphatic or alicyclic and may include aromatic rings. Alcohols are further classified as primary, secondary or tertiary, according to the position of the hydroxyl group on the aliphatic carbon chain. If the hydroxyl group is attached directly to an aromatic ring, the compound is classified as a Phenol.

Alcohols may also be classified by the number of hydroxyl groups present in the molecule; for example, a compound with two hydroxyl groups is called a diol, and one with three hydroxyl groups is called a triol. Strictly speaking, glycols are alcohols in which hydroxyl groups are found on adjacent carbon atoms. In common usage some dihydroxy compounds not conforming to this definition are identified as glycols, e.g., diethylene glycol and hexylene glycol.

Alcohols are widely used in cosmetics. The low molecular weight alcohols, e.g., isopropyl, butyl, and especially ethyl alcohol, are employed as solvents as well as for their astringent action in aftershaves, colognes, mouthwashes, and similar products. For cosmetic applications of other types of alcohols, see: Alkanolamides, Alkanolamines, Fatty Alcohols, Polyols, Phenols, and Sterols.

#### Esters

This grouping includes only esters not otherwise classified as alkoxyated carboxylic acids, glyceryl esters, isethionates, lanolin derivatives, phosphorus compounds, sulfosuccinates or sulfuric acid esters. Chemically, esters are the covalent compounds formed between acids and Alcohols. Esters can be formed from almost all acids (inorganic and carboxylic) and any alcohol. Thus, the number of naturally occurring and synthetically prepared esters used in cosmetics is very large. In order to subdivide the list of esters, most have been assigned to other chemical classes on the basis of some additional chemical features: Alkoxyated Fatty Acids, Alkyl Ether Sulfates, Alkyl Sulfates, Fats and Oils, Glyceryl Esters, Phosphorus Compounds, Isethionates, Sorbitan Derivatives, Sulfosuccinates, Sulfuric Acid Derivatives, and Waxes.

Esters belonging to this specific class are derived from carboxylic acids and have the structure RCO-OR' where RCO- represents the carboxylic acid radical and where -OR' is the alcohol residue. Included are low and medium molecular weight compounds, e.g., Butyl Acetate or Isopropyl Myristate; some polymers, e.g., Polyvinyl Acetate. They are subject to hydrolysis into alcohols and acids at extreme pHs and at elevated temperatures.

Esters in this group find diverse uses in cosmetics as emollients and conditioners (Isopropyl Myristate), as solvents (Ethyl Acetate), as fragrance components (Methyl Salicylate), and as preservatives (Propylparaben).

INCI Name:

1,2,4-Benzenetriacetate  
1,2-Hexanediyl Dicaprate  
1,4-Butanediol Bisdecanoate  
1,4-Butanediol Dimethacrylate  
1,4-Cyclohexanediol Bis-Ethylhexanoate  
10-Hydroxydecanoic Acid  
16-Alpha Ethyl Estradiolcarboxylate  
2-Caproyl Caproyl Methyl Alaninate  
2-Capryloyl Capryloyl Dimethyl Aspartate  
2-Capryloyl Capryloyl Methyl Alaninate  
2-Cyclohexylethyl Acetate  
2-Hydroxyethyl Acrylate  
2-Hydroxypropyl Acrylate  
2-Oleamido-1,3,4-Octadecatriyl Prolinate  
2-t-Butylcyclohexyl Acetate  
3-(Acryloyloxy)-2-Hydroxypropyl Methacrylate  
3,3,5-Trimethylcyclohexyl Succinate Dimethylamide  
3-Hydroxybutyrate/4-Hydroxybutyrate Copolymer  
4-Hydroxybutyl Acrylate  
6-Methyl Coumarin  
7-Dehydrocholesteryl Palmitate  
Acacia Seyal Gum Octenylsuccinate  
Acefylline Methylsilanol Mannuronate  
Acetaminosalol  
Acetoacetoxyethoxy Methacrylate  
Acetoxy Phenylcoumarin  
Acetyl Arctigenin  
Acetyl Beta-Boswellic Acid  
Acetyl Dipeptide-1 Cetyl Ester  
Acetyl Ethylhexyl Polyhydroxystearate  
Acetyl Isooctyl Polyricinoleate  
Acetyl Methyl Hydroxyprolinatyl Glycyrrhetinate  
Acetyl Methyl Oleanolate  
Acetyl Tributyl Citrate  
Acetyl Triethyl Citrate  
Acetyl Triethylhexyl Citrate  
Acetyl Trihexyl Citrate  
Acetylated Cetyl Hydroxyprolinate  
Acetylated Glycol Stearate  
Acetylated Hydrogenated Castor Oil  
Acetylated Hydrogenated Vegetable Glyceride  
Acetylated Sucrose Distearate  
Acetylmethionyl Methylsilanol Elastinate  
Acetylphytosphingosine  
Acetylsalicylic Acid

Acrylamidomethyl Cellulose Acetate Butyrate

Xylityl Caprylate  
Xylityl Cocoate  
Xylityl Sesquicaprylate  
Xylityl Undecylenate

## Ethers

Ethers are the organic compounds possessing a C-O-C system of bonds. If this C-O-C system is part of a ring, the corresponding compound is classified with the Heterocyclics, e.g., Tocopherol. Sorbitan Derivatives are also heterocyclic ethers. Most ethers used in cosmetics are prepared synthetically. Alkoxyated derivatives are ethers, but are herein classed as Alkoxyated Alcohols, Alkoxyated Amides, Alkoxyated Amines, Alkoxyated Carboxylic Acids, and Polymeric Ethers. The esterified polyglyceryl ethers resulting from the dehydration of glycerin are included in the group of Glyceryl Esters.

Ethers are primarily used as solvents or as fragrance or flavor components and in specialty cosmetic applications.

### INCI Name:

1-(3,4-Dimethoxyphenyl)-4,4-Dimethyl-1,3-Pentanedione  
1,2-Bis-(2-Aminoethoxy)ethane  
1,3-Bis-(2,4-Diaminophenoxy)propane  
1,3-Epoxy-4-Vinylcyclohexane  
2,4-Diaminophenoxyethanol Sulfate  
2-Ethylhexylal  
2-Methylundecenol Phenethyl Ether  
2-O-Ethyl Ascorbic Acid  
2-t-Butylcyclohexyloxybutanol  
3-(2,4,6-Trimethoxybenzylidene)-indolin-2-one  
3,4-Methylenedioxybenzyl Methylsulfone  
3-Butylglyceryl Ascorbate  
3-Ethylhexylglyceryl Ascorbate  
3-Glyceryl Ascorbate  
3-Lauryl/Tridecylglyceryl Ascorbate  
3-Laurylglyceryl Ascorbate  
3-Methoxybutanol  
3-O-Cetyl Ascorbic Acid  
3-O-Ethyl Ascorbic Acid  
4-Ethoxybenzaldehyde  
4-Hydroxy-2-Methoxybenzaldehyde  
4-Nitroguaiacol  
5-Bromo-5-Nitro-1,3-Dioxane  
5-Hydroxyvanillin  
7-Ethylbicyclooxazolidine  
Acetamidoethoxyethanol  
Acetamidophenyl Methoxypropionic Acid

Acetoxytetramethylbutylphenyl Tetramethylbutylbenzofuranone  
Acetyl Arctigenin  
Acetyl Benzoyloxy Prasterone  
Acetyl Oligopeptide-129 Amidopropoxy PEG-2 Propylamine  
Acetyl Zingerone  
Acetyl Zingerone Methyl Ether  
Acetylbenzofuran  
Adapalene  
Alpha-Viniferin  
Ambroxide  
Aminoethoxymethyl Pyrrolopyrimidone  
Aminopropyl Triethoxysilane  
Anethole  
Angoroside C  
Anisaldehyde  
Anise Alcohol  
Apocynin  
Arachidyl Glucoside  
Arctigenin  
Arctiin  
Ascorbyl Methoxycinnamate  
Ascorbyl Tocopheryl Acetate  
Batyl Alcohol  
Batyl Isostearate  
Batyl Stearate  
Benzoin Ethyl Ether  
Benzyl 3-Glyceryl Ascorbate  
Benzyl Dimethylamino Morpholinophenyl Butanone  
Benzyl Glycol  
Benzyl Tetrahydropyran  
Benzylhemiformal  
Benzylidene Dimethoxydimethylindanone  
Betulinic PEG-44 Amide Methyl Ether  
Betulinyl Methoxy PEG-22 Carboxylate  
Bis-(Butyl Dimethicone) PEG-3 Polyglyceryl-3 Ether  
Bis-(Decyltetradeceth-150) Hexanedicarbamate  
Bis-(Ditrimethylolpropane Triacrylate) Hexanedicarbamate  
Bis(ethoxysalicylidene)ethylenediamine Manganese Acetate  
Bis-(Maleimidoethoxy) Ethane  
Bis-(Maleimidoethylglycolmethyl) Bicyclopentane  
Bis-(Polyglyceryl-3 Oxyphenylpropyl) Dimethicone  
Bis-Ethoxydiglycol Cyclohexane 1,4-Dicarboxylate  
Bis-Ethylhexyl Hydroxydimethoxy Benzylmalonate  
Bis-Ferulamidobutane  
Bis-Glyceryl Ascorbate  
Bis-HEA Isopropylidenediphenyl Bisoxhydroxypropyl Ether/IPDI Copolymer

Bis-Methoxyethoxy Methane  
Bis-Methoxyphenyl Heptanedione  
Bisphenol A Bis-(2-Hydroxypropyl) Ether  
Bis-Stearoxydimethylsilane  
Buteth-2 Acetate  
Butoxydiglycol  
Butoxyethanol  
Butoxyethyl Acetate  
Butoxyethyl Nicotinate  
Butoxyethyl Stearate  
Butoxyhydroxypropyl Cetyl Hydroxyethylcellulose  
Butyl 2-Glyceryl Ascorbate  
Butyl 3-Glyceryl Ascorbate  
Butyl Glucoside  
Butyl Methoxydibenzoylmethane  
Butyl PG-Acetal Levulinate  
Butylglucoside Caprate  
Butylglycerin  
C10-16 Alkyl Glucoside  
C12-13 Alkyl Glyceryl Hydrolyzed Hyaluronate  
C12-14 Hydroxyalkyl Hydroxydimerdilinoleyl Ether  
C12-14 Hydroxyalkyl Maltitol Ether  
C12-18 Alkyl Glucoside  
C12-20 Alkyl Glucoside  
C16-18 Hydroxyalkyl Hydroxydimerdilinoleyl Ether  
C20-22 Alkyl Glucoside  
C8-12 Alkyl Glucosides/Xylosides  
C9-11 Alkyl Glucoside  
Caffeoyl Methoxytryptamine  
Caffeoyl Glucoside  
Capryl/Lauryl Wheat Bran/Straw Glycosides  
Capryloyl/Capryloyl Leucine Isosorbide Esters  
Caprylyl 2-Glyceryl Ascorbate  
Caprylyl 3-Glyceryl Ascorbate  
Caprylyl Glucoside  
Caprylyl Glyceryl Ether  
Caprylyl/Capryl Glucoside  
Caprylyl/Capryl Glucosides/Xylosides  
Caprylyl/Capryl Wheat Bran/Straw Glycosides  
Caprylyl/Capryl Xylosides  
Caprylyloxyphenylamino Dimethyltetrahydro Benzothiazine Carboxylic Acid  
Capsaicin  
Capsaicinyl Glucosides  
Carboxymethyl Caprooyl Chitosan  
Carboxymethyl Chitin  
Carboxymethyl Chitosan

Carboxymethyl Chitosan Myristamide  
Carboxymethyl Chitosan Succinamide  
Carboxymethyl Dextran  
Carboxymethyl Levan  
Cetearyl Glucoside  
Cetearyl Polypropanediol-8  
Cetearyl Wheat Bran Glycosides  
Cetearyl Wheat Straw Glycosides  
Cetyl 2-Glyceryl Ascorbate  
Cetyl 3-Glyceryl Ascorbate  
Cetyl Dimethylbutyl Ether  
Cetyl Glyceryl Ether  
Cetyl Glyceryl Ether/Glycerin Copolymer  
Cetyloxypropyl Glyceryl Methoxypropyl Myristamide  
Cetyl-PG Hydroxyethyl Decanamide  
Cetyl-PG Hydroxyethyl Palmitamide  
Chimyl Alcohol  
Chimyl Isostearate  
Chimyl Stearate  
Chlorphenesin  
Cholesteryl Glucoside  
Cineole  
Cinnamido Benzylpiperidiny Ethoxypropylbenzamide  
Cinnamidoethyl Dimethoxybenzene  
Cinoxate  
Citronellyl Glucoside  
Cocamidopropyl Lauryl Ether  
Coceth-4 Glucoside  
Cordycepin  
Corn Starch Modified  
Coumaramido Ferulamidobutane  
Coumaroyl Methoxytryptamine  
Curcumin  
Cyathusal A  
Cyathusal B  
Cyathusal C  
Cyclobutyl Xylol Methylpiperiziny Methoxyphenylamino Dihydropyrimidopyrimidinone  
Cyclohexylglycerin  
Dalosirvat  
Daphnetin  
DEA-Methoxycinnamate  
Decursin  
Decursinol  
Decursinol Pyridinylvinyl Carbamate  
Decyl Glucoside  
Deltamethrin

Demethoxycurcumin  
Deoxycytidine  
Deoxyguanosine  
Diacetyl Boldine  
Diallylammonium Diglycol Diacetate  
Diallyloxyneohexyl Zirconium Tridecanoate  
Dibenzylidene Sorbitol  
Dibutoxymethane  
Dicaprylyl Ether  
Dicetyl Dipeptide-9  
Dicetyl Ether  
Dichlorophenyl Imidazoldioxolan  
Didecyl Ether  
Dieckol  
Diethoxydiglycol  
Diethoxynonadiene  
Diethyl Ascorbic Acid  
Diethylene Glycol  
Diethylhexyl Syringylidenemalonate  
Diglycerin  
Diglycol Ethylhexyl Ether  
Dihexyloxy Cyclohexane  
Dihydroquercetin Dithiolanepentyl Ether  
Dihydroxy Methylchromonyl Palmitate  
Dihydroxybenzyl Adamantanyldimethoxybenzamide  
Dihydroxybenzyl Butyrolactone  
Diisononyl Ether  
Dilauroyl 3-Glyceryl Ascorbate  
Dilauryl Ether  
Dimethoxy Di-p-Cresol  
Dimethoxybenzamido Phenylhydroxylacetamide  
Dimethoxybenzyl Alcohol  
Dimethoxydiglycol  
Dimethoxyphenethyl Resorcinol  
Dimethoxyphenyl Phenylloxoethyl Ethylcarbonate  
Dimethoxytolyl Propylresorcinol  
Dimethyl Ether  
Dimethyl Hexahydronaphthyl Dihydroxymethyl Acetal  
Dimethyl Isosorbide  
Dimethylaminopropylamino Hypocrellin B  
Dimethylcyclohexylethoxy Isobutylpropanoate  
Dimethylmethoxy Chromanol  
Dimethylmethoxy Chromanyl Palmitate  
Dimethylol Glycol  
Dimyristoyl Glyceryl Ascorbate  
Dimyristyl Ether

Dioleoyl Phosphate  
Dioleoyl Tocopheryl Methylsilanol  
Diosmetin  
Diosmine  
Dioxanedimethanol  
Dioxolane  
Dipentyloxy Cyclohexane  
Diphenhydramine HCl  
Diphenyl Ether  
Diphenyl Naphthopyran  
Dipropylene Glycol  
Dipropylene Glycol Diacrylate  
Dipropylene Glycol Dimethyl Ether  
Diretinyl Ether  
Disodium Cetyl Phenyl Ether Disulfonate  
Disodium Decyl Phenyl Ether Disulfonate  
Disodium Lauryl Phenyl Ether Disulfonate  
Disodium Ubiquinone  
Distarch Glyceryl Ether  
Distearoyl Glyceryl Ascorbate  
Distearyl Ether  
Docosyloxymethoxybenzyl Azafullerenedione  
Eckol  
Epichlorohydrin  
Epigallocatechin Gallatyl Glucoside  
Ethoxydiglycol  
Ethoxydiglycol Acetate  
Ethoxydiglycol Acrylate  
Ethoxydiglycol Behenate  
Ethoxydiglycol Isostearate  
Ethoxydiglycol Oleate  
Ethoxyethanol  
Ethoxyethanol Acetate  
Ethoxyethyl Cyanoacrylate  
Ethoxyheptyl Bicyclooctanone  
Ethoxypropyl Quinazolidinedione  
Ethyl Ether  
Ethyl Glucoside  
Ethyl Glycerin Acetal Levulinate  
Ethyl Methoxycinnamate  
Ethyl Methylphenylglycidate  
Ethyl Perfluorobutyl Ether  
Ethyl Perfluoroisobutyl Ether  
Ethyl PG-Acetal Levulinate  
Ethyl Phenethyl Acetal  
Ethyl Salicylate Hexyl Ether

Ethylal  
Ethylbisiminomethylguaiacol Manganese Chloride  
Ethylcellulose  
Ethylhexyl Ferulate  
Ethylhexyl Methoxycrylene  
Ethylhexyl Methoxydibenzoylmethane

### Fatty Acids

Fatty Acids are the Carboxylic Acids obtained by hydrolysis of animal or vegetable Fats and Oils. Carboxylic acids having alkyl chains shorter than about seven carbon atoms are not commonly considered fatty acids. Natural fatty acids may be saturated or unsaturated and generally contain an even number of carbon atoms. Fatty Acids have the general structure R-COOH. A few chemically synthesized substances (which are rarely found in nature) are included in the listing of fatty acids in light of their usage in cosmetics.

Fatty acids may be saturated or unsaturated. Palmitic Acid is a typical saturated fatty acid; Oleic Acid is a monounsaturated acid, i.e., contains one cis-double bond. The double bonds in naturally available fatty acids are almost always cis and are not conjugated. Docosahexaenoic acid is a polyunsaturated C22 fatty acid containing six double bonds. Fatty acids derived from natural triglycerides, e.g., Corn Acid, are blends of saturated and unsaturated fatty acids.

Fatty acids are a common source of raw materials for the synthesis of cosmetic ingredients. They are used in cosmetics in the form of their salts, i.e., as Soaps, which are frequently formed in situ from the acid and a suitable alkali. These salts are emulsifiers and suspending agents and possess foaming characteristics which are desirable in shaving preparations and can be used in skin and

hair cleaning products. Free fatty acids are used to produce superfatted soaps and as opacifiers and thickening agents.

INCI Name:

10-Hydroxystearic Acid

Arachidic Acid

Arachidonic Acid

Babassu Acid

Beeswax Acid

Behenic Acid

C10-40 Hydroxyalkyl Acid

C10-40 Isoalkyl Acid

C32-36 Isoalkyl Acid

Capric Acid

Caproic Acid

Caprylic Acid

Carpotroche Brasiliensis Seed Acid

Coconut Acid

Corn Acid

Cottonseed Acid

Erucic Acid

Gamma-Linolenic Acid

Gamma-Linolenic/Linoleic Acid

Hippophae Rhamnoides Acid

Hydrogenated Coconut Acid

Hydrogenated Menhaden Acid

Hydrogenated Palm Acid

Hydrogenated Tallow Acid

Hydroxystearic Acid

Isobeheinic Acid

Isomerized Linoleic Acid

Isomerized Safflower Acid

Isostearic Acid

Lauric Acid

Linoleic Acid

Linolenic Acid

Linseed Acid

#### Fats and Oils

Fats and Oils, as a group, are the glyceryl esters of Fatty Acids (triglycerides) normally found in animal and plant tissues, including those which have been hydrogenated to reduce or eliminate unsaturation. Also included are synthetically-prepared esters of glycerin and fatty acids. They possess the structure:

in which -COR, -COR', -COR'' may be the same or different fatty acid radicals.

Naturally occurring fats and oils in this group are Esters and can be hydrolyzed to yield glycerin and mixtures of fatty acids. These fatty acids may serve as raw materials for a variety of other chemicals useful in cosmetics. Alternately, isolated and purified fatty acids can be esterified with glycerin to yield mono-, di-, and triglycerides. The last are relatively pure fats which differ only slightly from the fats and oils found in nature.

Fats and Oils are used directly in cosmetics as emollient vehicles and lubricants. Volatile oils obtained by the distillation of plant material are classified as Essential Oils.

INCI Name:

Abies Alba Seed Oil  
Acacia Victoriae Seed Oil  
Acanthosicyos Horridus Seed Oil  
Acetic/Linoleic/Palmitic Triglyceride  
Acetylated Castor Oil  
Acetylated Hydrogenated Castor Oil  
Achras Sapota Seed Oil  
Acrocomia Aculeata Kernel Oil  
Acrocomia Aculeata Seed Butter  
Actinidia Chinensis (Kiwi) Seed Oil  
Adansonia Digitata Oil  
Adansonia Digitata Seed Oil  
Adeps Bovis  
Adeps Suillus  
Akebia Quinata Seed Oil  
Aleurites Moluccanus Bakoly Seed Oil  
Aleurites Moluccanus Seed Oil  
Allanblackia Parviflora Seed Butter  
Allanblackia Stuhlmannii Seed Butter  
Alligator Oil

### Gums, Hydrophilic Colloids and Derivatives (Including salts)

The materials in this group are generally plant-derived materials which belong to the chemical class of Carbohydrates. Although chemically diverse, the unique ability of gums to swell in the presence of water and to increase the viscosity of aqueous preparations accounts for this special class. The viscosity developed by hydrophilic colloids depends on their molecular weight and the presence of various cations which may neutralize some acid functions of these carbohydrate molecules or cause some cross linking.

In cosmetics, gums and the like are used to impart viscosity to all types of products. They act as suspending or gelling agents and emulsion stabilizers. Some of these gums have unique textural qualities which make them useful in water-based lubricants.

## Hydrocarbons

Hydrocarbons are the group of compounds containing only carbon and hydrogen. Hydrocarbons are generally derived from petrochemicals, but some of them are found in the plant and animal kingdom (e.g., Azulene or Squalene). Their structures can vary widely, and include aliphatic, alicyclic, and aromatic compounds. This category also includes some materials of complex composition which can be a source of a variety of hydrocarbons.

As a rule these compounds are chemically inert. Typical are petrolatum, paraffin, and mineral oil, all of which are widely used as emollients and vehicles in cosmetics because of their nonvolatility and unctuous character. Lower molecular weight volatile hydrocarbons are used as solvents (e.g., Mineral Spirits). The hydrocarbons which are normally gases at room temperature (e.g., Butane or Propane) are used as aerosol propellants. Finally, it should be noted that many Synthetic Polymers are hydrocarbons (e.g., Polyethylene).

### INCI Name:

### Polyols

Polyols are compounds which contain three or more hydroxyl groups per molecule. The most important members of this class are Glycerin and Sorbitol, which are used as humectants in skin preparations and oral care products, and as cosolvents in these and other cosmetic products.

#### INCI Name:

1,2,6-Hexanetriol

#### Siloxanes and Silanes

Siloxanes, or more precisely, organo-substituted polysiloxanes, are linear or cyclic polymers of monomeric silicon/oxygen monomers. The polymeric backbone is made up of alternating silicon and oxygen atoms. The silicon atoms may carry a wide variety of substituents which can be the same or different. The chemically least reactive substituents are the methyl or phenyl groups:

Functional end-blocking groups may carry nitrogen or hydroxyl moieties, as in the case of dimethiconol.

Silanes are non-polymeric organo-substituted silicon compounds.

Linear siloxanes are used as opacifiers and lubricants in all types of cosmetic products. The cyclic siloxanes (up to about 7 silicon atoms per ring) are volatile and find use in dry application antiperspirants. Functionally substituted silicones are employed for specific applications in skin and hair care products; the dimethicone copolyols are useful nonionic surfactants.

#### INCI Name:

## Soaps

Soaps are the salts of water-insoluble Fatty Acids with various bases. Soaps were the first surface-active agents prepared by man.

Soaps are subdivided into water-soluble and water-insoluble types. The former are the salts of fatty acids with ammonia, low molecular weight Amines, especially Alkanolamines, and alkali metals, especially sodium and potassium. Water-insoluble fatty acid salts result from reaction with metallic cations, such as zinc and aluminum, alkaline earths such as calcium and magnesium, and long-chain fatty amines.

The water-soluble salts of fatty acids, derived from alkaline hydrolysis (saponification) of plant or animal Fats and Oils, are used widely as skin cleansers (in bar form and the like) and in laundry and other cleaning applications. In cosmetics, such soaps are used as emulsifiers, in shaving products, and occasionally in shampoos. These soaps are also commonly used for gelling hydro-alcoholic sticks, such as deodorants. As a rule, water-soluble soaps in cosmetics are formed in situ by reaction of the fatty acid(s) with the desired alkali. Some soap bars are still produced by the classic kettle soap process via alkaline saponification of fats and oils.

The water-insoluble soaps are used as binders and fillers in loose and compressed powders, as hydrophobic solids in skin applications and as lubricants in pharmaceutical tablet manufacture. Metallic soaps are commonly used as emulsion stabilizers in w/o emulsions, and occasionally employed in drugs and cosmetics to thicken or gel hydrocarbons.

## INCI Name:

Aluminum Behenate  
Aluminum Caprylate  
Aluminum Dilinoleate  
Aluminum Dimyristate  
Aluminum Distearate  
Aluminum Isostearate  
Aluminum Isostearates/Laurates/Palmitates  
Aluminum Isostearates/Laurates/Stearates  
Aluminum Isostearates/Myristates  
Aluminum Isostearates/Palmitates  
Aluminum Isostearates/Stearates  
Aluminum Lanolate  
Aluminum Myristate  
Aluminum Myristates/Palmitates  
Aluminum Stearate
